TYPE 62 A unique half-size micro-miniature relay having these eleven specific advantages: (1) diagonally mounted coil allows larger coil for greater sensitivity; (2) uniquely designed armature assures maximum sensitivity and magnetic uniformity; (3) massive pole pieces provide higher heat dissipation; (4) contacts of gold-plated silver magnetic nickel for high temperature stability and low level performance; (5) single coil design provides greater reliability; (6) single stamping forms integral return spring and back stop. Fewer parts, greater dependability; (7) Welded, spade-type coil terminations; (8) greater rigidity thru unitized, welded construction; (9) designed for optimum magnetic characteristics; (10) balanced armature provides higher resistance to vibration and shock; (11) sensitivity level below 200 milliwatts.

Dimensions: H. 0.400"; L. 0.390"; W. 0.800".

Type	Res.	Contacts	Volt.	Style	Net
62-01-G	700	DPDT	26.5	Solder Header with 2 Mounting Brackets	14.25
62-07-G	700	DPDT	26.5	Plug In—Plain Can	14.25

TYPE 64 The Type 64 embodies engineering advances truly unique among today's four-pole, double throw relays—twice the versatility of conventional 2PDT's, half the size of conventional 4PDT's, with no sacrifice in performance. Designed specifically to meet aero-space needs, the Type 64 features all-welded construction and "Thermo-Dri" nitrogen backfilling to assure contamination-free operation. Symmetrical circuitry simplifies wiring. Available in various coil resistances and all popular header styles. Meets MIL-R-5757/12A.

Type	Res.	Contacts	Voltage	Style	Net
64-01-H	500	4PDT	26.5	Solder Header with Mounting Brackets	24.50
64-07-H	500	4PDT	26.5	Plug In—Plain Can	24.50

SENSITIVE MICRO-MINIATURE TYPES

TYPE 80 A 40 milliwatt micro-miniature relay using latest manufacturing techniques, including back-filling with "Thermo-Dri" nitrogen and precise adjustments to obtain an operate time of less than 10 milliseconds. This unit meets all requirements of military specifications, MIL-R-5757/13A. Vibration, 20 G's through 2000 CPS. Shock, 65 G's for 11 milliseconds. Operating temperature range, -65 C to +125 C.

Type	Res. (Ohms)	Contact Rating (Amps)	Voltage	Style	Net
80-01-S	5000	3	26.5	Solder Header with Mounting Brackets	13.00
80-07-S	5000	3	26.5	Plug In—Plain Can	13.00

CIRCUIT DESIGNERS' BREADBOARD The latest advance in circuit breadboard design... the ideal electronic workbench for schools and industry. Circuit diagrams may be drawn on schematic transfer board and viewed from above thru transparent work surface. 14K gold plated spring connectors assure perfect electrical contacts, instantly and without solder. Features: sturdy aluminum frame on rubber cushions; binding posts, 100 spring connectors included; solid 1/4" Plexiglas circuit panel; built-in ground rail for alligator clips; partitioned drawer for tools and parts; slide-out schematic board doubles as cover; includes Ohms Law, color code, symbol charts. Size, 14" by 17". Weight, 4 1/2 pounds. Net, \$34.95

BS SERIES Long coil telephone type. Suited for computer and automatic test equipment applications requiring large numbers of poles. Tinned, pierced solder type terminals for rear panel wiring. Mounting: Two No. 8-32 NC 2B tapped holes on $\frac{1}{16}$ " centers. Contact arms: Bifurcated with $\frac{1}{16}$ " dia. twin palladium contacts. Weight: Approximately 9 ozs.

BS DUST COVER Two sizes of sheet metal enclosures. Small size for BS relays up to 6 Form C (6PDT, BS23), measures: H: $2\frac{1}{16}$ ", W: $1\frac{1}{4}$ ", L: $3\frac{7}{16}$ " exclusive $\frac{5}{16}$ " knob; weight: 6.5 ozs. Medium size for up to 10 Form C, measures: H: $2\frac{1}{2}$ ", other dimensions same as small size; weight: 7 ozs.

35D188, Small size NET \$1.80
35D189, Medium size NET \$1.80

LS SERIES Short springs and light weight armature provide fast action without sacrificing reliability and long life. Stainless steel hinge bearing designed to give 100 million operations. Tinned, pierced solder type terminals. Mounting: Two No. 6-32 tapped holes on $\frac{1}{16}$ " centers. Bifurcated contact arms with $\frac{1}{16}$ " dia. twin palladium contacts. Weight: Approximately $\frac{1}{2}$ ozs.

MB SERIES Miniature DC contactor. Designed for very high current applications. Extra rugged construction insures long life. Handles 150 ampere surges for 0.3 sec. Contact arms: Stationary, heavy brass, $\frac{1}{4}$ " dia. silver contacts pierced solder terminals. Movable, $\frac{1}{2}$ " x $\frac{3}{16}$ " silver bar contact. Mounting: Four No. 3-48 tapped holes on $\frac{3}{16}$ " x $\frac{3}{16}$ " centers. Weight: 2 ozs.

POTTER & BRUMFIELD
PRINCETON, INDIANA

DIVISION

AMERICAN MACHINE & FOUNDRY COMPANY

Potter & Brumfield Relays

MC SERIES Built with ceramic contact spaces for RF switching to minimize losses at high frequencies. Intercontact capacitance 1.5 mmfd. max. Tinned, pierced solder type terminals. Mounting: Four No. 3-48 tapped holes on $\frac{3}{8}$ " x $\frac{3}{8}$ " centers. Contacts: $\frac{3}{32}$ " dia. palladium. Weight: 2 ozs.

MF SERIES Unusually low coil temperature rise is an inherent feature of this efficient AC miniature telephone type relay. The rise does not exceed 20°C for a 4 Form C relay with continuous operation at 115V AC 50/60 cycles @ 25°C. The MF is economical since even a large number in an enclosed chassis require no costly cooling, and less costly circuit components, such as transformers, can normally be used. Sensitivity: 2.3VA (4 Form C). Two mountings: Two 6-32 tapped holes on $\frac{3}{8}$ " centers; four 4-40 tapped holes on $\frac{3}{8}$ " x $\frac{3}{8}$ " centers. Weight: 3 ozs. maximum.

MG SERIES Sub-miniature telephone type relay for aircraft, computer and other applications requiring good shock and vibration characteristics. Furnished open, sealed or in nylon dust cover. Mounting: Open model has four No. 3-48 tapped holes on $\frac{3}{8}$ " x $\frac{3}{8}$ " centers. Sealed model has three No. 4-40 threaded studs on $1\frac{1}{8}$ " x $\frac{3}{8}$ " centers. Dust cover model has plug-in header that fits Amphenol receptacle No. 57-20140 or similar. Contacts: $\frac{3}{32}$ " dia. silver. Weight: Open 1.2 ozs.; Dust cover 2.0 ozs.; Sealed 2.75 ozs.

MH SERIES MINIATURE TYPE

Ideal for miniature program applications where space and weight are factors. Mounting: Open model, MH11L, one No. 6-32 threaded stud $1\frac{1}{8}$ " long plus locating boss. All other open models have four No. 3-48 holes on $\frac{3}{8}$ " x $\frac{3}{8}$ " centers. Sealed models, M enclosures, three 6-32 NC 2 threaded studs on $1\frac{1}{8}$ " x $\frac{3}{8}$ " centers. D enclosures, three 6-32 threaded studs on $1\frac{1}{8}$ " x $\frac{3}{8}$ " centers. All sealed models have hook end solder terminals. All models have $\frac{3}{8}$ " dia. gold-flashed silver contacts. Weight: Open models 2 1/2 oz. max. Sealed models 5 ozs. max.

ML SERIES A small telephone type relay having excellent sensitivity with outstanding switching capabilities. Ideal for transistorized computer networks, telephone systems and battery powered communications equipment. Single contact arms have $\frac{1}{8}$ " dia. gold-flashed silver contacts rated at 3 amps for 100,000 operations. Pierced solder terminals. Mounting: Four 3-48 holes on $\frac{3}{8}$ " centers. Weight: 2.5 ozs.

Potter & Brumfield Relays

PLATE CIRCUIT and SENSITIVE RELAYS

KCP SERIES Low cost plate circuit relay enclosed in clear cellulose acetate cover. Sensitivity 125 mw single pole; 250 mw double pole; 375 mw three pole. Mounting: Standard octal plug-in type. Eight pin for KCP5 and KCP11. Eleven pin for KCP14. Contacts: $\frac{1}{8}$ " dia. gold-flashed silver. Weight: Approximately 3 ozs. Use KCP-KRP hold down spring when vibration, inverted or horizontal mounting are factors (see page 10).

LB SERIES Designed for top performance, long life at an unusually low cost. Each coil is wound with a given coil resistance and factory adjusted to operate on minimum current requirements. Mounting: Two $\frac{3}{16}$ " dia. holes on $2\frac{1}{2}$ " centers. Contacts: $\frac{1}{8}$ " dia. silver. Weight: Approximately 2 ozs.

LM SERIES (See KL for similar voltage actuated relays.) Sensitivity 100 milliwatts for single pole and 200 milliwatts for double pole. Medium cost, high quality relay with $\frac{1}{16}$ " dia. silver contacts. Pull-in adjustable by tail spring adjusting screw. Mounting: Two No. 6-32 tapped holes on $1\frac{1}{4}$ " centers. Weight: Approximately 5 ozs. DC Coils only.

PW SERIES (In both voltage and current actuated models.) Sensitivity 40 mw for current actuated models. 180 mw for voltage actuated models. Precision, light weight, hermetically sealed relay for aircraft and missile applications. Will withstand 10G vibration to 500 cps. Mounting: Standard 7-pin miniature tube base. Weight: Approx. 1 oz.

RS SERIES (In both voltage and current actuated models.) 60 mw. sensitivity. Low-cost, small, light weight, sensitive relay for radio-sonde, light dimmer and model applications. Mounting: Two No. 4-40 tapped holes on diagonal $\frac{3}{8}$ " x $\frac{1}{2}$ " centers. Contacts: Bar palladium. Weight: $1\frac{1}{2}$ ozs.

SM SERIES (In both voltage and current actuated models.) Sensitivity 75 mw for current actuated models. Medium cost, light weight, dust covered (right) or hermetically sealed (left) relay for light contact loads found in computers, model airplanes and similar applications. Extremely long mechanical life because of reed armature. Mounting: Sealed, standard 7-pin miniature tube socket; dust cover, two $\frac{3}{16}$ " dia. holes on $1\frac{1}{2}$ " centers. Contacts: Stationary silver; movable rhodium. Weight: 1 oz. max.

SS SERIES Ultra sensitive precision relay. 10 mw sensitivity. Dual series-connected coils with balanced armature on needle-point bearings for all low energy circuits such as instruments and bridge balancing. May also be used as a differential relay by connecting the two coils in separate circuits. Mounting: Two No. 6-32 tapped holes on $\frac{3}{16}$ " centers. Contacts: $\frac{1}{8}$ " dia. silver. Weight: Approx. $3\frac{1}{2}$ ozs.

Potter & Brumfield Relays

AB SERIES For appliance and general purpose applications where rugged construction, long life and quiet operation are required. All equipped with terminals to fit snap-on connectors and may also be applied to printed circuits using dip soldering. Snap-on screw adaptors packed with each relay. All AC models carry U/L and CSA* labels. Mounting: Two No. 8-32 tapped holes, on 1 1/4" centers. Weight: Approx. 5 ozs. Silver contacts.

ABC SERIES Medium duty power relay with dust cover. For small motors, industrial control and similar applications. All equipped with terminals to fit snap-on connectors and may also be applied to printed circuits using dip soldering. Snap-on screw adaptors packed with each relay. All AC models carry U/L and CSA* labels. Mounting: One No. 8-32 threaded stud 3/8" long and locating tab on 3/16" centers. Contacts: 1/4" dia. silver. Weight: Approx. 7 ozs.

GF SERIES Medium duty power relay for industrial control applications. Long contact arms have 1/4" dia. silver contacts rated at 10 amps at 115V AC or 28V DC resistive. Contacts have excellent wipe or self-cleaning action. Tinned, pierced solder terminals. Mounting: 8-32 tapped cover with locating boss. Weight: 4.75 ozs. (See GA series for similar voltage actuated relays.)

MR SERIES A medium duty power relay that can handle small motors, transmitters, and general purpose applications. Mounting: Two 5/32" dia. holes on 2 1/4" centers for MR3 and 11, 2 1/4" centers for MR2, 5 and 14. Contacts: 1/2" dia. silver. Weight: 4 ozs.

MS/MR Metal dust cover similar to PM/PR shown below. 3 3/8" x 2 3/8" x 2 1/4". Weight: 7.5 ozs.
35D130 fits MS/MR NET \$1.90

PM SERIES A compact heavy duty 4PDT power relay for polyphase and heavy duty switching applications. Screw terminals. Has 1/4" silver-cadmium-oxide contacts rated at 25 amps at 115V, 25 amps at 230V, 50/60 cycle resistive AC, 1 HP per movable arm at 120V, or 240V. AC single phase, U/L and CSA* listed, except 440V. Mounts by one front key-hole and two rear channel slots for 8-32 screws on 2" x 2 1/2" triangular centers. Weight: 14 ozs.

9PM1 Adapter plates for mounting PM on PR mounting holes. Box of 10 Net \$1.50
For metal enclosure see below.

PR SERIES Heavy duty relay for industrial control applications requiring long life and fast action. Heavy duty screw type terminals. All AC and DC models except PR11A15 carry U/L labels. Only AC models except PR11A15 carry CSA* labels also. Mounting: Two 5/16" dia. holes on 1 7/8" centers. Weight: 11 ozs. max. Contacts: 5/16" dia. silver. Enclosure: See "PR" cover. The PR11A15 relay is equipped with 3/16" dia. silver SPDT auxiliary contacts rated at 5 amps.

PM and PR DUST COVERS These dust covers have a sheet metal base with knockouts for 1/2" dia. conduit and an aluminum cover fitted with two screws. Finished in gray baked enamel. Mounting: Three No. 10 holes on 1 1/8" x 4 1/8" centers. Approx. weight: 1 lb.

35D227 Metal cover for PM only NET \$3.00
35D013 Metal cover for PR only NET \$3.00

See ordering information on page 8.

SOLID STATE

TIME DELAY RELAYS

Excellent operational characteristics mark this economical P&B series of reliable solid state time delay relays. Includes models for AC or DC operation. All relays provide a time delay on operate either with knob adjustment for the entire time range, or as a fixed value timer optionally adjustable by an external resistor. Available with an internal DPDT relay or as a separate timing unit for use with P&B relays listed under "Notes."

CD TIME DELAY RELAYS

are distinguished by

- Accurate Time Delay Values
- Excellent Repeatability
- Fast Reset Time
- Wide Time Delay Range

SPECIFICATIONS:

Timing Accuracy: $\pm 10\%$

Repeatability: $\pm 2\%$

Fast Reset Time: 60 milliseconds

Ambient Operating Temperature: -40°C to $+55^{\circ}\text{C}$

Duty: Continuous

Enclosures: Rugged plastic

NOTES

1. Has internal relay with DPDT contacts rated at 10 amperes, 115V AC.
2. Use with Potter & Brumfield relay KRP11AG—115V AC or KRP14AG—115V AC (see page 10). One set of normally open contacts on KRP relay must be connected to the time delay unit.
3. Use with Potter & Brumfield KRP5DG—24V DC, KRP11DG—24V DC or KRP14DG—24V DC relay (see page 10).
4. Use with Potter & Brumfield KHP17D11—24V DC relay (see page 9).
5. As supplied, this unit has a fixed time delay of 180 seconds. Connect external $\frac{1}{2}$ watt resistor between terminals 9 and 12 to reduce time delay period. The following are approximate values of required resistors:

CHOOSE FROM THESE TYPES

Knob-adjustable with self-contained DPDT relay:

CDB-38-70003 CDD-38-30003

CDB-38-70005 CDD-38-30005

$1\frac{3}{4}'' \times 2\frac{3}{4}'' \times 3\frac{3}{4}''$ high. Weight: 7 ozs.

Knob-adjustable use with external relay:

CDB-21-70003 CDD-21-30003

CDB-21-70001 CDD-21-30001

$1\frac{3}{4}''$ sq. $\times 2\frac{3}{4}''$ high. Weight: $3\frac{1}{2}$ ozs.

Adjustable to provide fixed time delay by external resistor (not furnished); use with external relay.

CDH-31-30005

$3\frac{3}{4}'' \times 1\frac{3}{4}'' \times 1\frac{3}{4}''$. Weight: $1\frac{1}{2}$ ozs.

Mercury-Wetted Contact Relays

AVAILABLE IN THESE SERIES:

JML-SENSITIVE, FORM C
NON-BRIDGINGsingle-side-stable
bi-stable
chopper**JMP**-POLARIZED FORM D
BRIDGINGsingle-side-stable
bi-stable
chopper**JM**-BRIDGING FORM D

1 CAPSULE	SPDT	single coil dual coil
2 CAPSULES	DPDT	single coil
3 CAPSULES	3PDT	single coil
4 CAPSULES	4PDT	single coil

Rare long life, high speed, and unvarying dependability—all are the result of the basic component of these relays: a hermetically sealed glass capsule. It contains the contact arrangement and a small reservoir of mercury sealed under a high pressure hydrogen atmosphere. A film of mercury is renewed for every operation—that's why you can think in terms of billions of operations without contact bounce, pits or welds.

TWO TYPES OF CAPSULES

The capsule used in JML relays has a SPDT, break-before-make (Form C), non-bridging contact arrangement. Each capsule used in JMP, and JM1 to JM4 relays has a SPDT, make-before-break, (form D), bridging contact arrangement. Both JML and JMP series achieve a high rate of sensitivity by factory-adjusted magnet biasing.

Single-Side-Stable: The relay will release (open its normally open contacts) when the coil current is reduced to less than must release value.

Bi-Stable: The armature remains in the last operated position until opposite polarity is applied.

Chopper: Approximately equal dwell exists on the normally open and closed contacts when the coil is driven by 60 cps sine waves.

QUALITY SPECIFICATIONS

CONTACT RATINGS:

JML: 500V max., and 2 amps max., 100 VA max.*

JMP and JM1 to JM4: 500V max., and 5 amps max., 250 VA max.*

*With contact protection unless low level current is applied. Details of simple circuit consisting of resistor and capacitor in series are packed with each relay.

SENSITIVITY:

Minimum sensitivities are

JML: 27.3 ampere turns

JMP: 70 ampere turns

JM1: 190 ampere turns

JM2 and 3: 250 ampere turns

JM4: 260 ampere turns

TIMING:

JML: 200 operations per sec.

JMP and JM1: 100 operations per sec.

JM2, 3 and 4: 60 operations per sec.

SHOCK RESISTANCE:

All series: 30G for 11 milliseconds, non-operating. Vibrations up to 10G, 10-500 cps.

TEMPERATURES:

All series: -39°C (mercury freezes), 107°C internal (potting compound softens).

TERMINATIONS:

All series: Octal style plugs, except figures 23, 32, and 42 (Hook Solder), figure 41 (14-pin miniature plug).

ENCLOSURES:

Five steel case sizes, one each for JML, JMP, JM1, JM2 and JM3, and JM4. Required mounting position: Vertical.

* See Fig. 23, 32, 42 (Hook Solder), Fig. 41 (14-Pin miniature plug).

*Octal style plugs, except Fig. 23, 32, 42 (Hook Solder), Fig. 41 (14-Pin miniature plug).

Potter & Brumfield High Performance Relays

FC SERIES Conventional micro-miniature relay lies flat on printed circuit board. Withstands 100g shock, 400g linear acceleration, 30g vibration to 2000 cps. Ambient temperature range: -65° to +125°C. Hermetically sealed. Bifurcated contacts. Plugs in on .2" grid. Meets applicable sect. MIL-R-5757D, and MSFC-SPEC-339. Weight: .75 ozs.

FL SERIES Dual-coil latching relay has same specs as above, except operates by pulsing each coil alternately (observing coil polarity); or connecting the coils in series from a reversing (polarized) source. Remains latched without coil power.

SC SERIES Micro-miniature permanent magnet relay for low power, high shock/vibration applications. 100g shock, 30g vibration to 2000cps with no contact openings. Ambient temperature range: -65°C. to +125°C. Features single coil action and conforms to standard micro-miniature coil operation except polarized connections because of magnetic circuit. Positive terminal marked with red dot. Mounting: SC11D*, SCG11D -DA, -DB, DC and DD correspond to similarly designed SL mountings. Weight: 3/4 oz.

*Cinch No. 54A20730 and Arnel No. HRK-1, 8-pin receptacles available from distributors for plug-in applications.

SL SERIES Dual coil micro-miniature magnetic latching relay with same shock/vibration, resistance and ambient temperature range as SC. Coils may be connected in series for polar operation. Mounting: SL11D* for plug-in applications. -DA has shoulder flanges with two .104" x .136" holes on a 1.062" center; -DB has a welded bracket with four .125" dia. holes on 1.062" x .281" centers; -DC has two No. 4-40 NC 2A threaded studs on .488" x .220" diagonal centers; -DD has plain case with hook end solder terminals. SCG-SLG11D have plug-in terminals on .2" grid.

*Viking No. P/N VB10/3DV 1 10-pin receptacles available from distributors for plug-in applications.

TL SERIES High performance 4PDT micro-miniature magnetic latching relay for severe environments. Encapsulated and hermetically sealed coils within hermetically sealed relay case can't contaminate contacts by out-gassing. Strong permanent magnetic forces keep contacts locked in desired position when relay is de-energized. Approx. 0.5ms transfer time. Temperature range: -65°C to 125°C. Meets or exceeds applicable sections MIL-R-5757D and MSFC-SPEC-339. Weight: Approx. 1 1/4 ozs. Mountings: D = plain case, plug-in header, DA = shoulder bracket .300" from base, hook-end solder. DB = flat plate, .593" wide x 1.60" long, 4-.125" dia. holes on .281" x 1.30" centers, hook-end solder.

ORDERING INSTRUCTIONS — File-O-Matic Sec. 23

All relay contacts are rated at 115 volt-60 cycle, non inductive load. When ordering specify relay type and coil voltage or resistance.

Example: PR5AY, 115 Volts AC, 60 cycles or LB5, 2500 ohms resistance.

To operate 110V DC relays on 220V DC use a 5 watt wire-wound

resistor of a value approximately the relay coil resistance in series with the relay coil.

CONTACT LEGEND: S-Single; D-Double; P-Pole; T-Throw; N-Normally; O-Open; C-Closed; B-Break; M-Make.

Prices and Specifications subject to change without notice. For latest prices refer to United Pricing Service.

POTTER & BRUMFIELD

Specialists in RELAYS for a third of a century

Three modern plants in the United States are devoted solely to engineering and producing electro-magnetic relays. Manufacturing methods, processes and equipment are constantly re-evaluated and kept current with every technical advance. Augmenting P&B's own facilities are the vast research and financial resources of our parent organization, American Machine & Foundry Company.

GENERAL PURPOSE RELAYS Potter & Brumfield Relays

GA SERIES Low cost, all purpose, multiple contact, voltage switching relay. Used for many industrial control applications. Tinned, pierced solder type terminals. Contacts: $\frac{1}{16}$ " dia. silver, designed for maximum self-cleaning action. Mounting: No. 8-32 tapped core with locating boss. Weight: $\frac{3}{4}$ ozs.

See GF series for similar relays having 10 amp ratings.

SPECIFY COIL VOLTAGE OR RESISTANCE WHEN ORDERING

GP SERIES Separate AC and DC coils to match with 2PDT or 4PDT switches. AC coils (GPA) available in 6, 12, 24, 115 and 230 volts. DC coils (GPD) available in 6, 12, 24 and 110 volts; current coils: 2,500, 5,000 and 10,000 ohms. Contacts: $\frac{1}{16}$ " dia. silver.

GP11 Switch Assembly DPDT 5 amps \$1.70
GP17 Switch Assembly 4PDT 5 amps 2.95

GP-100 A complete kit of GP Series coils and switches consisting of the following: AC coils: Two 6 V., two 12 V., four 24 V., six 115 V., two 230 V. DC coils: Two 6 V., two 12 V., two 24 V., four 110 V. Also two 2,500 and four 10,000 ohm coils; eighteen DPDT switch assemblies. Fourteen 4PDT switch assemblies. The complete kit is ideal for experimenters, school and industrial laboratories.

NET \$133.65

KA and KAP SERIES Small, low cost, highly efficient general purpose relays for handling light power loads such as small motors, solenoids and other relays, and general automation work. All KA models carry U/L labels. Only AC models are CSA* listed. KAP relays with "Y" suffix bear CSA* seal and have U/L component listing. Mechanical life expectancy: 10 million operations. Duty: continuous. Contacts: Movable, $\frac{3}{16}$ " dia. gold-flashed silver; stationary, $\frac{1}{16}$ " dia. wide silver overlay.

The KA is the open version of this series. Mounting: One No. 6-32 threaded stud and locating tab on $\frac{1}{16}$ " centers. Weight: 2 ozs. The KAP is the enclosed model and is protected by a clear, high impact plastic dust cover. Terminals: 8 or 11-pin pack. Weight: 3 ozs.

"C" suffix indicates silver-cadmium-oxide contacts on movables rated 10 amps.

KHP and KHS SERIES Small, rugged, 4PDT, available for AC or DC operation. KHP has Nylon dust cover; KHS is hermetically sealed in metal enclosure. These relays are designed to meet the exacting requirements of data processing, computer and process control applications. Contacts are $\frac{3}{16}$ " gold-flashed silver and are rated 3 amps @ 30V DC or 115V AC resistive for 100,000 operations. "12" suffix indicates silver-cadmium-oxide contacts. Mounting: Solder terminals with a 3-48 stud $\frac{3}{16}$ " long. Adaptable to sockets (below) with printed circuit or solder lug terminals. Weights without sockets: KHP $1\frac{1}{2}$ ozs.; KHS $1\frac{1}{2}$ ozs.

KHP hold down spring (similar to KCP-KRP, page 10)
9KH3 50 per box, weight 3 ozs. Net \$5.00

9KH1 Solder terminal sockets and retainers, Single \$0.60 Box of 10 Net \$6.00
9KH2 Printed circuit terminal sockets, Single \$0.60 Box of 10 Net \$6.00
Weight per box: 4 ozs.

Potter & Brumfield Relays

KL SERIES

Multiple contact relay. Varied contact combinations and high dielectric phenolic insulation affords extreme versatility and utility. Widely used in such applications as industrial controls, elevator controls, communications equipment and electronic measuring devices. Mounting: All models—Two No. 6-32 tapped holes on 1 1/4" centers. Contacts: 1/8" dia. gold-flashed silver. Weight: 5 ozs.

KRP SERIES

Versatile, multi-contact arrangement. Enclosed in a clear cellulose acetate dust cover. Standard 8-pin octal-type plug for KRP5 and KRP11, 11-pin for KRP14. Weight: Approx. 3 ozs. Contacts: 5 amp, 3/16" dia. gold-flashed silver. 10 amp 3/16" dia. silver cadmium-oxide. See KCP-KRP hold down spring for special mounting applications. See KRP indicator lamp relay for current monitoring applications.

KRP-N INDICATOR

LAMP RELAY A general purpose relay incorporating a lamp to indicate current or voltage availability in power circuit. Contacts: 3/16" dia. silver cadmium-oxide. Enclosure: Clear cellulose acetate dust cover. Mounting: Standard octal plug. Weight: Approx. 3 ozs. See KCP-KRP Hold Down Spring for special mountings.

"P"—CASE A clear cellulose acetate case for mounting rectifiers, capacitors, resistors or a combination of these. Available with octal-type plug with 8 or 11-pins. Comes complete with four screws. Weight: .5 ozs. each. See KCP-KRP Hold Down Spring for special mounting applications.

35D070 Case (8-pin plug) NET \$5.55
35D072 Case (11-pin plug) NET \$7.70

KCP-KRP HOLD DOWN SPRING

Designed to insure secure mounting of relay in any position. Fits all KCP or KRP plug-in relays. Durable stainless steel spring can be moved aside for relay removal or installation. Mounting: Two 5/16" dia. holes on 1 1/2" centers; will accommodate machine screws or rivets. Available in quantities of 50 per box. Weight: 3 ozs. per box.

9-KR-15 NET \$5.00

AP SERIES RATCHET, IMPULSE

A reliable compact unit for applications requiring on-off or reversing action on alternate operations. Positive ratchet operation at all speeds on impulses as short as 60 ms. Intermitent operation only. Mounting: Three 5/16" dia. holes on 3/4" x 7/8" triangular centers. Contacts: 3/16" dia. silver. Weight: 7 ozs.

BU BUZZER

AC operated coil with a spring steel armature which buzzes when coil is energized. Used extensively in test equipment, laboratories and a host of other applications where a small light weight, dependable buzzer is required. Weight: 1% ozs. Mounting: No. 6-32 tapped core.

Potter & Brumfield Relays

SPECIAL PURPOSE RELAYS

GM SERIES Unusually versatile switching makes this impulse/sequencing relay especially suitable for single coil latching. The 2 Form C contact arrangement is switched alternately by cam action during drop-out of the armature. It can also be furnished with additional 2 Form C auxiliary contacts (designated by "L"). AC version operates on a 50% coil duty cycle (5 Min. max.). Mounting: 8-32 tapped core with locating boss. Weights: With aux. contacts 4 1/4 ozs. Without aux. contacts 4 ozs.

KB SERIES LATCHING RELAY

Both release and trip coils must be for the same voltage. One coil operates relay to set latch and other coil releases it. Ideal for memory work and overload applications. Operates on momentary impulse to either coil. Mounting: Two 5/16" dia. holes on 1 3/4" centers. Weight: 6 ozs. Contacts: 1/8" dia. silver rated 5 amps; "G" suffix indicates silver cadmium-oxide contacts on movables rated 10 amps. AC relays with 5 amp. contacts carry U/L and CSA* labels.

KM SERIES Subminiature relay for applications requiring unusually small relays with up to 3-poles. 5/16" dia. silver contacts. Withstands 30g mechanical shock and .06" excursion 10 to 55 cps mechanical vibration. Used extensively in small business machines, alarm systems, automatic toys and communications systems. Mounting: One 2-56 tapped core and locating half-punch. Solder terminals. Weight: .58 ozs.

PC SERIES Single coil impulse latching relay for on-off and current reversal switching on alternate pulses. Operates on 30 millisecond pulses to the coil. Mounting: Two 5/16" dia. holes on 2 1/4" centers. Weight: 5 ozs. Contacts: 1/8" dia. gold-flashed silver cadmium-oxide.

KT SERIES ANTENNA SWITCHING RELAY Glass base insulation for minimum RF loss to switch 300 ohm line. Mounting: One No. 6-32 threaded stud. Contacts: 1/8" dia. gold-flashed silver. Weight: 1 1/2" ozs.

MS SERIES MOTOR STARTING RELAYS

For starting capacitor start, induction-run motors. Operates on back EMF of start winding. Armature gap can be altered to change pull-in. Meets all U/L spacing requirements. Mounting: Two 5/16" dia. holes on 1 1/2" centers. Contacts: 3/4 HP, 5/16" dia. fine silver. 3 HP, 5/8" dia. silver cadmium. Weight: 5 ozs. max. MS/MR Metal dust cover similar to PM/PR shown on page 4. 3 3/8" x 2 3/8" x 2 1/2". Weight: 7.5 ozs. 3SD130 fits MS/MR NET \$1.90

SA SERIES STEPPING SWITCH A twelve position stepping relay with printed circuit strips to switch currents up to 250 milliamperes. Armature-driven pawl operates a ratchet wheel to drive the movable contact in steps of 30 degrees over 12 positions. Used widely for audio-level switching in TV remote control units, scoreboards and process controls. Mounting: Two 6-32 holes on 1 1/4" centers. Weight: 4 ozs.

- Bounce-free

NEW! SMALL POLARIZED RELAYS

For Bi-Stable or Center-Stable Operation

Small size, ultra-sensitivity and high speed switching together with efficient, bounce-free contact action characterize P&B MDP polarized relays. Their operation depends on both the magnitude and direction of the coil current. Two types of contact arrangements provide the following action when the coils are de-energized: *Bi-stable* — armature remains in its last energized position; *Center-stable* — armature remains in center-off position with contacts open. Silver contacts. Temperatures: -60°C to $+85^{\circ}\text{C}$. Measuring only $1\frac{1}{16}$ " sq. by $1\frac{1}{16}$ " high (seated), MDP relays are equipped with a plastic dust cover and 8 or 12-pin plugs. Weight: $4\frac{1}{4}$ ozs.

Types MDP-900-1 and MDP-930-1 (with extra long life contacts) will directly replace Western Electric Type 255 relays. $2\frac{11}{16}$ " square x $3\frac{3}{4}$ " overall height. Weight: 10 ozs.

37B536 Hold-down Bracket to adapt MDP relays to Barber-Colman socket. Box of 10 Net \$2.50

FACILITIES

ENGINEERING CAPABILITIES

P&B's large staff of specialists concentrate exclusively on the design engineering aspects of electro-mechanical relays. During nearly a third of a century, they have created many original and basic designs which have earned wide acceptance throughout the world. Our engineering capabilities are wholly devoted to a continual search for new designs and the improvement of existing relays. Chances are, our engineers can help you solve your relay problems and perhaps suggest cost-saving hook-up and mounting methods compatible with modern production techniques.

PRODUCTION FACILITIES

Manufacturing facilities include three factories in the United States and one in Canada. More than 150,000 square feet of space is devoted exclusively to the production of high quality relays for commercial and military needs. Shop staffs apply their skills equally well in large production runs or in turning out limited quantities of custom-designed relays.

TESTING AND QUALITY CONTROL

A completely equipped Test Department is maintained for prototype as well as specific, customer-required testing. Our scope of testing capabilities includes vibration, acceleration, shock, humidity, atmospheric pressure, life-under-load, reliability, contact resistance and others. Certification of test results will be supplied upon request. A complete Standards Room is maintained to keep all test equipment in meticulous calibration. More than 100 employees comprise our Quality Control group. Government inspection is under the cognizance of the United States Navy.

DIVISION OF AM & F

Potter & Brumfield Division of American Machine & Foundry Company, with headquarters at Princeton, Indiana, enjoys the distinction of being an important segment of a large, strong, widely-diversified, and financially responsible company which serves all America at work, at play, and in Defense.

A. C. GENERAL REPLACEMENT RELAYS

The design flexibility of this relay permits many combinations of pole counts (N.O., N.C. & D.T.); number of poles (1 to 6); contact ratings (1/2, 3/4 & 15 amperes); coil and contact termination (solder, quick-connect and lead wire) and front or rear mounting.

Relays listed offer wide latitude of circuit application combining power and control circuit ratings. In addition, the relays listed serve as a replacement for over 400 RBM custom designed relays for high volume industrial applications. (Consult your RBM distributor for replacement recommendations).

15 AMPERE CONTACT CONVERSION NORMALLY OPEN TO NORMALLY CLOSED

All 15 ampere contact assemblies on RBM standard type C contactors are normally open. To convert to normally closed—

1. Remove movable contact assembly and lock washer by backing off terminal nut "A".
2. Loosen screws "B" and remove stationary contact assemblies.
3. Invert movable contact assembly, and replace on contactor with flat "I" spring resting on contact block. Contacts facing out.
4. Remove screws "B" from, and reinsert into opposite end of, stationary contact assembly. Re-install stationary contact assemblies; holding contacts in alignment with movable contacts while tightening screws.

This heavy gauge enclosure has tapped holes (with identification template) to permit mounting of all power relays and contactors listed below.

ENCLOSURE WILL ACCOMMODATE FOLLOWING TYPES—129, 75, 80, 85, S30, S40, C15, C30 & C50R.

*Magnet coils designed for continuous duty. Do not operate at rate higher than indicated under Mechanical Life.

*Based on steady state test under laboratory environmental conditions. Consult factory if application involves unusual load, speed of operation, off-on ratio, environmental or operating conditions. Electric life substantially greater when operated below rated load.

†Load tests—making inrush ratings (0.4 to 0.5 P.F.)—breaking 125% continuous rating (0.65 to 0.8 P.F.).

RELAYS

SENSITIVE RELAY — CMD SERIES

In this series there are eleven types in three classifications.

No.	Coil	List Price
CMD-5D	600Ω	\$4.95
CMD-5D	2400Ω	4.95
CMD-5D	9600Ω	5.20
CMD-11D	450Ω	6.10
CMD-11D	1890Ω	6.10
CMD-11D	7300Ω	6.10
CMD-5A	540Ω	5.00
CMD-5A	234Ω	4.75
CMD-5A	1000Ω	4.75
CMD-5A	3850Ω	4.75
CMD-5A	6900Ω	5.30

1. D.C. Relays with one form C contact Type CMD 5D—base wiring; Pull-in sensitivity 40 mw; Coil Rating 60 mw; Coil Windings—600 ohm, 2400 ohm, 9600 ohm

2. D.C. Relays with two form C contacts Type CMD 11D—base wiring; Pull-in sensitivity 80 mw; Coil Rating 80 mw; Coil Windings—450 ohm, 1890 ohm, 7300 ohm

3. A.C. Relays with one form C contact Type CMD 5A—base wiring; Pull-in sensitivity 80 MVA; Coil Rating 120 MVA; Coil Windings—540 ohm, 234 ohm, 1000 ohm, 3850 ohm and 6900 ohm

Contact ratings are 2 amps at 115 VAC.
Contact points are gold-flashed silver.

CAD SERIES

Contacts	10 Amp. Rating		
	SPDT	DPDT	3PDT
Relay Type	CAD5A10	CAD11A10	CAD14A10
6 volts a.c.	\$4.95	\$5.55	\$6.75
12 volts a.c.			
24 volts a.c.			
115 volts a.c.	\$5.50	\$5.95	\$7.15
230 volts a.c.			
Relay Type	CAD5D10	CAD11D10	CAD14D10
6 volts d.c.	\$4.95	\$5.55	\$6.75
12 volts d.c.			
24 volts d.c.			
110 volts d.c.	\$5.50	\$5.95	\$7.15

Same basic design as CA series; however, with clear plastic dust cover and octal-type plug-in base. Case is secured firmly to base by 4 "upset" plastic studs. Contact carrier plate is self-centering. Contact carrier is made of "KERIPOLE," a polyester material with glass fibre filling.

CSD SERIES

A plate circuit relay, similar to the CAD Type; however with increased sensitivity (125 MW per movable arm).

Contacts	2 Amp. Rating		
	SPDT	DPDT	3PDT
Relay Type	CSD5	CSD11	CSD14
2500 ohms	\$5.20	\$5.60	\$6.80
5000 ohms	\$5.30	\$5.70	\$6.90
10,000 ohms	\$5.70	\$6.10	\$7.30

ROTARY STEPPING SWITCH TYPE RT

The SCHRACK Rotary Stepping Switch is a combination of three reliable components:

1. Standard Relay with 1 Form C heavy-duty contact.
2. Ratchet driven Rotary Switch consisting of four banks of twelve or ten points each with sliding bifurcated wipers.
3. Ratchet driven Stepping Relay with two cams which actuate one Form C contact each.

GENERAL CONSTRUCTION The Schrack Rotary Stepping Switches have a highly efficient magnetic circuit and a driving mechanism designed for maximum operating safety. All components are mounted on a rigid die-cast light metal frame, and contacts permanently molded in a sturdy melamine plastic.

ROTARY SWITCH terminals are arranged in a circular pattern with four groups of twelve points each. An alternate version with 4 x 10 points is available for applications requiring decimal counting. Each group occupies a quadrant of the circle and contains a common bus which is connected to the twelve or ten insulated points in sequence by means of a sliding wiper as the switch is operated.

The sliding contacts are four bifurcated spring phosphor bronze wipers. The wiper contact assemblies are insulated electrically from each other and the wipers are of the non-bridging type.

CONTACT RATING The contacts of the rotary switch bank are capable of carrying .5 amps on a steady state basis and of interrupting .1 amps at 110 volts DC with a resistive load or .2 amps at 115 volts AC.

TYPE RT 304—4 x 12 Contact Points

TYPE RT 404—4 x 10 Contact Points

Voltage	Driving Coil	Code No.	Price
12 Volts d.c.	17 ohms	RT 304-012	\$19.00
24 Volts d.c.	57 ohms	RT 304-024	\$19.00
48 Volts d.c.	280 ohms	RT 304-048	\$19.00
110 Volts d.c.	1290 ohms	RT 304-110	\$19.00

Same specifications and prices apply to Type RT 404.

RELAYS

TYPE CBT LATCHING RELAY

SPECIFICATIONS

A dual coil mechanical latching relay. Each relay operates on a momentary impulse on either coil and is held in the set position until released by an impulse on the other coil. Both coils must be for the same voltage and are continuously rated.

Contact rating: 10 amps. (Based on 600 operations per hour at 115 volts AC 60 cy. resistive load).

May be operated continuously at 1000 cycles per hour.

The CBT relays have a transparent dust cover and a sturdy base plate of insulating material. Screw-type terminals are provided for all contact and coil connections.

110 volts d.c.	\$3.15	\$3.60	\$4.25

A robust and dependable open-type relay, with pierced solder lug terminals. Contact rating: 5 amps or 10 amps; according to contact material. Standard coils available: 6, 12, 24, 115, 230 volts a.c.; 6, 12, 24, 110 volts d.c.

Standard versions include 1, 2, or 3 Form C contacts. Optional: solder lugs for printed circuit boards or taper tabs for AMP-Connectors. All relays are available with AMP contacts.

MINIATURE RELAY TYPE RK

A small and reliable, fast-acting open-type relay for a wide field of applications, including telephone equipment. May be fitted with a maximum of 18 contact springs (6 Form C or any other combination not exceeding 6 movable arms). A.C. and D.C. coils are available, using approximately 400 mW (500 mVA) per movable arm.

CONTACT RATING

Fine Silver Contacts are rated at 2 amp. max. or 115 volts max. A.C. Special contacts (Palladium, gold/nickel etc.) are available on request. Standard fine silver contacts are gold flashed to prevent corrosion. Twin contacts also available on request. Contact pressure (standard figures) approx. 15-18 grams.

COIL DATA FOR SOME TYPICAL RELAYS

RESISTORS

±1% PRECISION ®CARBOFILM AND ®CARBOMOLD RESISTORS
CARBOFILM PRECISION RESISTORS

Precision deposited carbon resistors designed for circuits calling for the accuracy and stability of wire-wound resistors with the marked economy of carbon resistors. The exclusive Aeroglaze conformal coating offers mechanical protection superior to any other coating eliminating the need for special tubes, sleeves and jackets. Aeroglaze coating will meet all moisture requirements of MIL-R-10509B. Carbofilm resistors offer outstanding stability, low voltage coefficient, low capacitance and inductance in high frequency applications.

CARBOFILM CHARACTERISTICS

TESTING: All Tests conducted in accordance with MIL-R-10509B requirements.

TEMPERATURE COEFFICIENT: Approximately 200 ppm per degree C in the lower resistance ranges and not exceeding 500 ppm per degree C in the highest values specified by MIL-R-10509B.

MOISTURE RESISTANCE: Will meet or surpass the requirements of MIL-R-10509B.

LOAD LIFE: When tested for more than 1,000 hours at full load operation in 40°C ambient temperature, maximum changes are less than 1% with an average change of less than 0.5%.

TEMPERATURE CYCLING: After 5 complete temperature cycles there is an average change of 0.21% with a maximum change of less than 0.5%.

SHORT TIME OVERLOAD: When subjected to 2.5 times the rated working voltage, but not exceeding 2 times the maximum rated voltage for 5 seconds, changes are less than 0.25% with an average change of 0.13%.

LOW TEMPERATURE OPERATION: Maximum changes are less than 1%.

ACCURACY: Guaranteed tolerance of plus/minus 1% at 25°C. (77°F.)

AGING: Due to manufacturing process and control, changes attributed to aging are negligible. The average change in resistance for self-aging is approximately 0.2% per year.

VOLTAGE COEFFICIENT: Does not exceed .002% per volt.

A superior molded carbon-deposited resistor manufactured under the most exacting quality control standards and specifications assuring excellent performance under the most adverse operating conditions. Resistors are encapsulated in a strong reinforced moisture and heat resistant plastic for added stability, precision and reliability. Rated for full load operation at 70°C and linearly derated to zero load at 150°C. Will meet or exceed insulation resistance requirements of MIL-R-10509D.

CARBOMOLD CHARACTERISTICS

TESTING: All tests conducted in accordance with MIL-R-10509C requirements.

TEMPERATURE COEFFICIENT: Extends from approximately 200 ppm per degree C in the lower resistance ranges to and not exceeding 500 ppm per degree C at the highest values specified by MIL-R-10509D.

MOISTURE RESISTANCE: Will meet or surpass the requirements of MIL-R-10509D.

LOAD LIFE: When tested for more than 1000 hours at full load operation in 70°C ambient temperature, maximum changes less than 1% with an average change of less than 0.5%.

TEMPERATURE CYCLING: After 5 complete temperature cycles there is an average change of 0.21% with a maximum change of less than 0.5%.

SHORT TIME OVERLOAD: When subjected to 2.5 times the rated working voltage, but not exceeding 2 times the maximum rated voltage for 5 seconds, changes are less than 0.25% with an average change of 0.13%.

LOW TEMPERATURE OPERATION: Maximum changes are less than 1%.

ACCURACY: Guaranteed tolerance of plus/minus 1% at 25°C.

AGING: Average change in resistance for self-aging, approximately 0.2% in a year.

VOLTAGE COEFFICIENT: Does not exceed .002% per volt.

**Prices listed are for MIL-BELL values only. For commercial standard values listed in catalog IDC 563 add 10% to the above prices in the appropriate columns. For prices on any values other than MIL-BELL or catalog commercial standard values contact your authorized Aerovox Industrial Distributor.

ACKAGING:
Commercial Stock Values—Small quantities packaged individually in sealed plastic tubes. Also available in larger quantities, protected by paper sleeves and packed in bulk.

Mil Bell Stock Values—Small quantities packaged individually in sealed plastic tubes. Also available in larger quantities packed in bulk.

*Request OEM Price in quantities of 25-49, 50-99, 100-249, 250-499 and 500-999

TRIMMERS, POTENTIOMETERS, DIALS AND MOTORS

MICROPOT® TRIMMING POTENTIOMETERS

Borg produces 10 complete series of Micropot trimmers—from subminiature square trimmers to standard sizes. Borg trimmers are offered in general purpose, humidity-proof, high temperature, or humidity-and-high-temperature models, in a wide choice of resistance ranges and end terminals. Borg trimmers have a 40-turn adjustment screw for an extremely fine degree of selectivity. Wire-wound resistance elements are up to 50% longer than competitive types.

MICROPOT® CARBON TRIMMERS

Borg's Micropot carbon trimmers provide infinite resolution with a wide range of resistance values.

MICROPOT® PRECISION POTENTIOMETERS

Borg offers a complete line of Micropot potentiometers for precision application—military and commercial—ranging from ½-inch to 3-inches. They are available in single-turn or multi-turn models with high resolution and a wide range of resistance values.

MICRODIAL® CONCENTRIC DIALS

Engineers consider the Borg Microdial line the most comprehensive in the industry. Concentric scale Microdials are available in three basic series. Each features epicyclic gearing to eliminate ambiguity, and large numerals for high readability. Each dial is available with or without brake. Most Microdial models are offered in a choice of color combinations for coding.

MICRODIAL® DIGITAL DIALS

Borg's digital Microdial line includes three, four, or five digit models. The 1300 Series has optional 10, 100, or 1000 turns. The 10-turn 1330 Microdial has internal illumination, convex lens, and is available with or without brake. Borg dials offer 1000:1 indexing accuracy, and are virtually free from accidental setting changes.

SUB-FRACTIONAL MOTORS

Borg's line of sub-fractional h.p. motors includes synchronous, induction, or low inertia types, in two or four pole models. Borg motors speed/torque ratios meet the most exacting requirements of instruments, controls, and related products.

BOURNS TRIMPOT[®] POTENTIOMETERS

THE INDUSTRY'S LARGEST SELECTION OF ADJUSTMENT POTENTIOMETERS

33 Standard Models / 4 Terminal Types / 3 Mounting Styles

Military ■ Industrial ■ Commercial ■ Wirewound ■ RESISTON[®] Carbon

Rectangular ■ Square ■ Precision Rotary ■ Humidity-Proof ■ High-Temperature ■ Special-Purpose

Only Bourns TRIMPOT Potentiometers Give You All Of These Outstanding Features

SPRING—Carriage spring provides positive no-slip performance during rotation plus a reliable idling feature at mechanical limits of travel.

LEADSCREW—Stainless steel lead screw is corrosion-resistant.

O-RING—Silicone rubber O-ring seals potentiometer against humidity, withstands high temperature.

SHAFT HEAD—Stainless steel with machined slot for screw-driver adjustment. Meets military salt spray requirements.

WIPER—Gold-plated wiper carriage and precious-metal wiper for low noise. Carriage and wiper are welded together.

SOLDER TERMINALS—Tinned terminals are compact, yet large enough for easy soldering. Teflon-insulated leads and printed circuit pins are also available.

SILVERWELD[®] TERMINATION—This exclusive Bourns feature is unequalled in ruggedness. There is a metal-to-metal bond from the terminal to the resistance wire.

PICK-OFF—Precious-metal, positive-contact pick-off assures wiper continuity.

ELEMENT—Special ceramic element card for maximum reliability is precision wound with low-temperature-coefficient resistance wire.

SHAFT RETAINER—Shaft is locked in place for top performance under extreme shock, vibration and acceleration.

SHAFT INSULATOR—High-dielectric-strength, ceramic insulator isolates shaft head from internal circuits.

This cutaway of Model 224 shows the typical high quality to be found in all Bourns TRIMPOT potentiometers, although some features may vary from model to model.

Key to terminal types:

- ① Insulated stranded leads.
- ② Solder lugs (includes panel mounting bushing on Models 3367's, 3368's, 3300 & 3301's only).
- ③ Printed circuit pins.
- ④ Unsoldered wires (edge mounting 3250, 3251, 3280 & 3281).

⑤ Enclosed local distributors quote factory prices through 500 pieces. Contact factory for price in higher quantities.

⑥ The following resistances are standard if they fall within the limits listed: 10 ohm—10, 20, 50, 100, 200, 500, 1K, 2K, 5K, 10K, 25K, 50K, 100K, 150K, 200K, 250K, 300K, 350K, 400K, 450K, 500K, 550K, 600K, 650K, 700K, 750K, 800K, 850K, 900K, 950K, 1 Meg. Other resistances available on special order.

⑦ 0 to 0.5 ohms, whichever is greater.

⑧ 0 to 1.0 ohms, whichever is greater.

⑨ Closer tolerances available on request, except commercial models.

⑩ All models are sealed against sand and dust.

⑪ Humidity-proof version available on special order. Contact factory for part number, price and delivery.

Precision Film Resistors, Composition Resistors, Potentiometers, Spark Suppressors and Switches

CONTINENTAL
WIRT

There's long life and superior performance behind every C-W component — meeting highest quality and reliability standards at a moderate cost.

Molded Deposited Carbon Precision Film Resistors

C-W molded carbon film resistors are designed and manufactured to meet or exceed performance requirements of MIL-R-10509E. Available: $\frac{1}{8}$ W. thru 1 W.; 10 ohms thru 50 megohms. Request Bulletin 2023.

Carbolite Resistors

Insulated fixed composition resistors for replacement and service applications, $\frac{1}{4}$ thru 2 watts. Available as Type "M" packaged in bulk. Also, Type "MR" consisting of five Type "M" resistors of one resistance value and tolerance mounted on one 3x5 index card, ten cards per package. File drawers and storage cabinets for Type "MR" resistors available. Request Bulletin 2047.

Coated Deposited Carbon Precision Film Resistors

C-W coated deposited carbon film resistors — while being designed and manufactured to meet or exceed characteristic "X" requirements of MIL-R-10509, are more modestly priced than molded resistors. Available: $\frac{1}{8}$ W. thru 2 W.; 10 ohms thru 100 megohms. Request Bulletin 2045.

Wire-Wound Controls

Available from $\frac{3}{4}$ " O.D., 2 watt trimmer control thru 5 watt phenolic housed controls. Available with conventional single or dual element for "L" pad and similar applications. Shafts, bushings, mounting hardware and other features available to meet your specific requirements. Request Bulletins 2009 and 2055.

Nobelay and Nobelette Metal Film Precision Resistors

For applications where fine precision and good stability must be complemented with low extremes in resistance range, or, low noise characteristics, at a moderate cost. Metallic resistance element deposited on low loss ceramic core, is protected by rugged vitreous enamel coating. Available: $\frac{1}{2}$ W. thru 5 W.; less than 1 ohm thru 15 megohms. Request Bulletin 302.

Automotive and Oil Burner Spark Suppressors

For suppression of radio and television noise interference due to ignition spark discharge at plugs and high tension distributor; and due to ignition discharge action of oil burner igniting coil. Complete line of resistive type suppressors. Request Bulletin 125.

Slide Switches

Full line of slide switches in current ratings from .5 amp thru 10.0 amps; one pole thru 4 poles; 2 position thru 4 position; detent action or spring return. Also midjet "swidget" where space is limited. Request Bulletins 2039 and 2054 for full technical details.

Your C-W distributor can supply prices, and bulletins mentioned above — also details on the convenient RESIST-O-FILE stocking plan for composition resistors.

WIRT

CONTINENTAL-WIRT ELECTRONICS CORP.
Philadelphia, Pa. 19144

Prize Crop of Precision Potentiometers

With smaller housings, higher resistances, better linearity, finer resolution, and higher operating temperatures than any other line.

Now you can obtain a 25 to 40% increase in total resistance together with standard linearity as low as 0.2% and resolution as fine as 0.01% — in a potentiometer that's shorter than any competitive unit. Our 10-turn Model 3500, for example, is just 1" long, a full 1/2" shorter than units available elsewhere. The secret: new design techniques including a thin-wall molded plastic case and reduced helix pitch that let us put a 20%-longer resistance element in a shorter package.

The new case also improves heat dissipation, thus increasing power-handling ability and raising the maximum operating temperature 20°C above most poten-

tiometers available elsewhere. Sealed against humidity, these units exceed steady-state requirements, and most can even be specified to meet MIL-STD-202B, Method 106 (cycling humidity). Reliability is further enhanced by the virtually indestructible Bourns Silverweld® termination.

Units are individually inspected and subjected to the stringent double-check of the Bourns Reliability Assurance Program. Prices are competitive and delivery is immediate. Write today for complete technical data.

Don't MIL-SPECulate — SPECify Bourns!

Exclusive Silverweld® termination — an indestructible fused bond between terminal and resistance wire — eliminates chief cause of precision potentiometer failure.

Double slip-ring contact provides wider contact area and a double safety margin for vibration and shock.

Molded, high-temperature plastic housing enables standard model to meet steady state humidity spec. of MIL-STD-202B, Method 103.

20%-longer resistance element provides better resolution, cooler operating temperature, and higher total resistance.

This cutaway of Model 3500 shows the typical high-quality construction to be found in all Bourns precision potentiometers, although some features may vary from model to model.

NOBPOT® POTENTIOMETERS

Model 3600

Precision potentiometer, clock readout dial and knob in a single, compact package. Mounts in front of panel. See specs above.

Model 3640

KNOBPOT Sr. Potentiometer—similar to Model 3600, but more accurate and slightly larger. See specs above.

KNOBPOT POTENTIOMETER ACCESSORIES

COLOR PLASTIC SNAP RINGS available in red, yellow, blue, green and white per MIL-STD-595.

STANDARD MIL-SPEC 1" DIA. SLIP-OVER KNOBS of plastic, available in MIL-SPEC red, yellow, blue, green, black, gray. Available for Model 3600 only.

STAINLESS STEEL SKIRTS (for use without brake) to add high-polish glamour.

STAINLESS STEEL LOCKING BRAKE with plastic handles for Model 3600 snaps easily into place between potentiometer and panel. All-plastic friction brake easily slips over Model 3640.

STAINLESS-STEEL, PANEL-RECESSED MOUNTING BRACKET permits recession of dial for special panel requirements.

TURNS-COUNTING DIALS

Easy-to-read vernier dials requiring only 1" of panel space are available for all Bourns precision potentiometers (except KNOBPOT units, which incorporate their own readout). Easily mounted—no extra panel holes needed; can be set to less than .1% of total travel. Locking device (optional) positively prevents shift in setting. Anodized finish, black or clear.

NEW 10-TURN H-351 SERIES TURNS-COUNTING DIAL measures only 1/2" dia. by 3/8" long, fits 1/8" or 3/16" diameter shafts. Features unique clock-face readout for higher readability; has continuous, full-gear engagement. Extremely simple to install. Available with or without slip-over lock.

Controls, Attenuators

Model H

HOT-MOLDED CARBON POTENTIOMETERS
Offer greatly increased high voltage stability due to wide clearance between bushing and collector track. Free from contamination of dirt due to elevated resistance track. Exceptionally long noise-free operation.

MODEL L2 (2-WATT) HOT MOLDED POTENTIOMETERS
Centralab RV4 Style Hot Molded Composition Potentiometers are manufactured to meet the requirements of MIL-R-94B. These "HOT MOLDED" Potentiometers offer greatly increased high voltage stability due to wide clearance between bushing and collector track; greater freedom from contamination from dirt due to elevated resistance track and exceptionally long noise-free operation. Completely enclosed construction permits encapsulation or potting without affecting operation. **CERTIFIED TEST DATA AND LOT IDENTIFICATION AVAILABLE UPON REQUEST.**

MODEL—HMP, HMS, HML (RV4 STYLE)
Molded composition resistance element; Rated 2.25 watts @ 70°C, 500 volts. Tolerance $\pm 10\%$ (except *) which are $\pm 20\%$ $\frac{1}{2}$ W diameter, $\frac{1}{4}$ W deep; mechanical rotation 312-2.3°.

HML SERIES
Shaft $\frac{1}{4}$ " diameter, full round, stainless steel, screwdriver slot for locking bushing, $\frac{3}{4}$ " long from mtg. surface. Bushing $\frac{3}{4}$ "-32 NEF-2A thd., nickel plated brass $\frac{3}{4}$ " long locking type. Shipping wt. 4 oz. Linear taper on all units.

1/10 WATT CONTROLS

Designed for transistorized hearing aids, miniature radios and similar applications. Model B16 Miniature; Can be reduced to $\frac{1}{4}$ " dia. by removing knob, with knob is $\frac{3}{4}$ ". Plain type is slotted mounted, using 2-72NF-2thd. x $1\frac{1}{4}$ " studs on 427" centers. Switch type is bracket mounted. Model SM Subminiature; Measures $\frac{1}{2}$ " with knob, reduced to .502" without knob. Mount is standard .60NF-2A thd. x $1\frac{1}{4}$ " long brass studs on .285" centers. Switch type only. Tolerance: $\pm 20\%$ except Types B16-124, B16-127, B16-128, B16-224, and B16-228, $\pm 30\%$.

L-PAD, T-PAD, AND STEREO ATTENUATORS

Constant Impedance L-pads and bridged T-pads provide optimum sound reproduction quality without altering frequency response. Rated 20 watts, audio: 5 watts DC and sine-wave. Breakdown, 500 volts AC rms to ground. Anti-backlash design with force-fit shaft interlock to control relative motion between control springs of front and rear units; assures smooth operation in either direction without deterioration. Full round brass shaft, $\frac{1}{2}$ " dia. x $1\frac{1}{2}$ " long, mounting surface, bushing $\frac{1}{2}$ " lg. x $\frac{3}{4}$ "-32 thread with nut and lockwasher, can be added up to 1" adding AK-31 or AK-37 adapter bushing. Size: $1\frac{1}{2}$ " dia. x $1\frac{1}{2}$ " behind panel. Plate with AK-36 brushed gold-anodized dial plate and KC-10 black pointer knob with screw.

L-PAD ATTENUATORS

Cross audio level of speakers in PA, intercom and hi-fi sound systems. Shipping Weight, 5 oz.

MODEL 7 MINIATURE LINEAR MOTION VARIABLE RESISTOR

Unique design of contact arm, wiper carriage and constant torque adjustment screw result in electrically stable, smooth, noise-free unit. Capable of operating under the most severe commercial or military requirements. Assembled under a microscope. Custom adjusted to guarantee no contact bounce when subjected to vibration test of 20-2000 cps at 100 for 10 minutes in each of three planes. Constant quality vigilance from raw stock to final testing guarantees reliability under adverse environments. Reliability in excess of the highest current military specifications, MIL-STD-202 and MIL-R-94B. Used since 1956 for airborne guidance and other military applications. Now available for a wide range of commercial uses.

PHYSICAL DIMENSIONS

GENERAL FEATURES

Insulation Resistance: 5000 meg. min. at 500 v. DC at 25° C. and less than 50% RH. Dielectric Strength: 1000 v. rms at sea level at 3 1/4" dia. 350 v. rms at 50,000 p.f. for 1 minute. Stray Strength: 15 in.-oz. Temperature Cycling: No discontinuity or permanent resistance change of more than 5%, -55° C. to 85° C. Method 102, Condition A. No. of Turns: 25; screw adjustment. Volume: 1 cu. in. component density. Weight: 16 oz. average, including three 12" leads.

FASTATCH® II PLAIN TYPE CONTROLS

Complete exact replacement control coverage for dual concentric single or tandem twins. Snap together assembly, with snap in, permanent locking shafts. Controls are carbon, $\frac{1}{2}$ watt, $\frac{1}{4}$ dia. Rear control $\frac{1}{4}$ dia. deep, bushing $\frac{1}{4}$ dia. $\frac{1}{4}$ x $\frac{1}{4}$ slot. Supplied with mtg. nut and universal terminals replacing printed circuit, wire-wrap and hole type terminals. Shafts and switches not included. Anti-backlash construction on duals and twins. CRL Fastatch® II Dual Controls—Front or rear unit plain, Net Each 90c

Number preceding dash (-) indicates taper. Number after dash (-) indicates number of ohms in resistance.

FIELD-ASSEMBLED CONTROLS

SERIES DA

A complete line of field-assembled dual controls (operating on a single-shaft) for all those audio requirements — Hi-Fi, Stereo, sound systems, and all others requiring a practical, profitable means of making up the exact combinations required. Offers a wide choice of panel and rear units, plus ON/OFF switches and a virtually unlimited variety of shaft configurations. Use the Series DA to meet customer requirements.

UNI-TITE

The advanced concept in dual concentric universal control replacement. Fast! Simple! Sure! The first and only unit ever offered that provides completely trouble-free assembly. Just 50 panel units, 49 rear units, 5 switches and an assortment of shafts enables you to make up any combination to replace over 2000 TV dual concentric controls.

Uni-Tite controls are supplementary to the RTV controls, providing every replacement unit you'll ever need — the most complete line in the industry.

CODE DESIGNATIONS

EXAMPLE: $\frac{P}{\text{Panel Unit}} - \frac{500}{\text{Ohms}} - \frac{S}{\text{Taper}}$

EXAMPLE: $\frac{F}{\text{Flat}} - \frac{P}{\text{Panel}} - \frac{1}{\text{Inches}} - \frac{13}{\text{Sixteenths}} = \text{Flatted Panel Shaft } 1\frac{13}{16}'' \text{ long from mounting surface of control.}$

CLAROSTAT

RESISTORS • CONTROLS
RESISTANCE DEVICES

SERIES 54-48JA**3" Dia. Vari/Phase Single Turn Potentiometer**

Permits external phasing of electrical rotation to mechanical rotation. Ultra precise unit for professional use. Exclusive Claro-stat design eliminates bulky, hard-to-adjust clamping rings. Anodized aluminum housings for minimum weight. Widely used in aircraft instrumentation.

Stock Values	Resolution 100/Total Turns
250,000	.003%
100,000	.031%
50,000	.040%
10,000	.061%
1,000	.083%

CLARODIALS**Ten-Turn Concentric Scale Dials**

Calibrated dials designed for multi-turn potentiometers up to 10 turns or other rotary devices. CLARODIALS require only one inch of panel space. The knob attaches directly to the shaft, and the body of the dial is mounted rigidly to the panel. As a result, accurate readings with a ratio 1000:1 for ten turns are provided with zero backlash and no reading error. CLARODIALS are made of anodized aluminum for years of attractive use. Mounting requirements are $\frac{1}{4}$ " shaft and $\frac{3}{8}$ "-32 NEF-2A bushing. Adapters for $\frac{1}{8}$ " dia. shafts are available.

Cat. No.	Description
411	Commercial 10 turn, black anodize $\frac{1}{4}$ " shaft, no lock
412	Commercial 10 turn, black anodize $\frac{1}{4}$ " shaft, with lock
461	Commercial 10 turn, clear anodize $\frac{1}{4}$ " shaft, no lock
462	Commercial 10 turn, clear anodize $\frac{1}{4}$ " shaft, with lock

SERIES SC42-970 SINE-COSINE**Single-Turn Potentiometer**

Used in radar, computer and servomechanisms, or any application requiring two output voltages accurately proportioned to the sine and cosine rotation angle. Due to functional use, units are designed and built for exceptionally long rotational life.

SPECIFICATIONS

FUNCTION: Sine-Cosine.

TOTAL RESISTANCE: $16,000 \Omega \pm 10\%$.

POWER RATING: 2.46 watts @ 40°C.

(198 volts R.M.S.)

ROTATION: (Eff., Elec., Mech) 360° (Cont.)

MAXIMUM SPEED

RECOMMENDED: 30 RPM (20 gm. contact pressure)

EXPECTED LIFE: 500,000 Cycles.

RESOLUTION: 0.14% maximum of peak to peak voltage.

CONFORMITY: Standard, $\pm 1\%$ peak to peak voltage.(Available, $\pm \frac{1}{2}\%$ peak to peak voltage.

Not stocked — must be ordered special price and information on request.)

SHAFT TORQUE: 1 oz. in.

WEIGHT: 6 oz.

SERIES 62JA**Commercial Multi-Turn Potentiometer**

A 10-turn potentiometer offering electrical operating characteristics comparable to units costing far more. Designed specifically for the industrial instrumentation market, the Series 62JA has the inherent advantages of far greater resolution in trimming, better instrument control and settings for all types of electronic equipment. Brief specifications include: $\frac{7}{8}$ " diameter, $1\frac{1}{2}$ " deep behind panel, bushing and shaft or split-locking bushing with screwdriver slot, 2 watts @ 25°C, derated to zero @ 85°C, 1000 to 100K ohms standard — others available, absolute linearity of $\pm 0.25\%$ standard, closer on order.

SERIES 57M & 57EJ**1/2" Single Turn Potentiometers**

High performance potentiometer packaged in a 1/2" diameter housing. Quality construction throughout. Available in two models; Series 57M rated at 1.5 watts at 40°C and Series 57EJ rated at 2 watts at 70°C. The high-temperature Series 57EJ features glass-sealed terminals. Both units are corrosion resistant.

SERIES 42-900**High Versatility
Single-Turn Potentiometer**

Used and approved by the millions in all types of applications ranging from ultra-critical military systems to ultra-dependable hard-working industrial equipment. Extra tap affords greater electrical versatility. Shaft extension through rear of unit permits addition of switching or other functions actuated by single shaft.

Stock Values	***Terminal Linearity	Resolution 100/Total Turns	Temp. Coefficient of Wire
100,000	±0.25%	.053%	±.00002 Ω/Ω/°C
50,000	±0.25%	.056%	±.00002 Ω/Ω/°C

50	±1.0%	.35%	.00017 Ω/Ω/°C

***Absolute Linearity: The maximum deviation of the actual output characteristic from a straight reference line extending between zero and the total applied voltage over the theoretical effective rotation.

MINIATURIZED POTENTIOMETERS

Consistent with miniaturization in Military and Commercial equipment, such as; Guided Missiles, Aircraft Electronics, Mobile Radio and Radar, Computers, Range Finders, Pocket Radios and Hearing Aids; Clarostat offers miniaturized composition element Series 48M and wire-wound

Series 49M Potentiometers, and a Rotary Selector Switch designated as Series BHM to meet the switching requirements of the above mentioned and other applications.

**SERIES 48M — 0.2 WATT
COMPOSITION ELEMENT**

Available in single or dual, standard or shaft locking bushing. Standard bushing potentiometers have 1/4" x 32 NEF-2A x 1/4" long bushing and 1/8" dia. x 1/2" long shaft beyond bushing.

Shaft locking bushing potentiometers have 1/4" x 32 NEF-2A x 3/8" long bushing and 1/8" dia. x 1/4" long screwdriver slotted shaft.

All potentiometers furnished with mounting nut 1/8" thick x 3/4" across flats, and one internal tooth lockwasher. Potentiometers with split locking bushings furnished with jam nut also.

Insulation: Breakdown test between terminals and ground for 1 minute 1000v.a.c.; 350v.a.c. @ 3.4" Hg.

Resistance Range (Ohms): Linear 200 to 5 Meg.
Tapered 1500 to 2.5 Meg.

Resistance Tolerance: Linear ±10%,
Above 100,000 ohms ±20%.
Tapered ±20% all values.

Tapers: Linear
Left hand — 10% resistance at 50% rotation. "Z"

Mechanical and Electrical Rotation: 300° ±3°

Effective Rotation: 300° ±3°

Torque (oz.-in.): 0.5 to 6

Dual Construction: Available

**SERIES 49M — 1.5 WATT
WIRE-WOUND**

Available in single or dual, standard or shaft locking bushing. Standard bushing potentiometers have 1/4" x 32 NEF-2A x 1/4" long bushing and 1/8" dia. x 1/2" long shaft beyond bushing.

Shaft locking bushing potentiometers have 1/4" x 32 NEF-2A x 3/8" long bushing and 1/8" dia. x 1/4" long screwdriver slotted shaft. All potentiometers furnished with mounting nut 1/8" thick x 3/4" across flats, and one internal tooth lockwasher. Potentiometers with shaft locking bushings furnished with jam nut also.

Fabricated in accordance with MIL-R-19

Insulation: Breakdown test between terminals and ground for 1 minute. 1000v.a.c.; 500v.a.c. @ 3.4" Hg.

Resistance Range (Ohms): Linear 1 to 20,000

Resistance Tolerance: Linear ±5%
Tapered Linear only

Mechanical and Electrical Rotation: 300° ±3°

Effective Rotation: 300° ±3°

Torque (oz.-in.): 0.3 to 6

Dual Construction: Available

"FIXTOHM"™

PRECISION RESISTORS

± 1% TOLERANCE

SERIES CVF
MIL Style RN20X
1/2 WATT

50 ohms to 2 megohms.

Values other than military decade values on page at right add 10% to List Price.
*Values outside the above range price and delivery information on request.

SERIES CVC
MIL Style RN25X
1 WATT

100 ohms to 4.99 megohms.

Values other than military decade values on page at right add 10% to List Price.
*Values outside the above range price and delivery information on request.

SERIES CVD
MIL Style RN30X
2 WATT

200 ohms to 10 megohms.

Values other than military decade values on page at right add 10% to List Price.
*Values outside the above range price and delivery information on request.

SERIES CML
MIL Style RN60B
1/8 WATT
(MOLDED BODY)

50 ohms to 5 megohms.

Values other than military decade values on page at right add 10% to List Price.
*Values outside the above range price and delivery information on request.

SERIES CMH
MIL Style RN65B
1/4 WATT
(MOLDED BODY)

50 ohms to 5 megohms.

Values other than military decade values on page at right add 10% to List Price.
*Values outside the above range price and delivery information on request.

SERIES CMF
MIL Style RN70B
1/2 WATT
(MOLDED BODY)

50 ohms to 2.2 megohms.

Values other than military decade values on page at right add 10% to List Price.
*Values outside the above range price and delivery information on request.

SERIES CMD
MIL Style RN80B
2 WATT
(MOLDED BODY)

200 ohms to 10 megohms.

Values other than military decade values on page at right add 10% to List Price.
*Values outside the above range price and delivery information on request.

Resistance tolerances available from 1/2 to 10%.

Hermetically sealed resistors available on special order.

Also available—Series CEL 1/8 watt and Series CEH 1/4 watt.

Prices and information on request.

RESISTANCE DEVICES

SERIES 53—2 WATT

MOLDED COMPOSITION ELEMENT POTENTIOMETERS

SERIES 53C1

SERIES 53C2

SERIES 53C3

A 2-watt molded composition element potentiometer totally enclosed and sealed against moisture and other environmental conditions. Meets the need for a high quality resistance device incorporating high-stability under extreme climatic and operational conditions. For use in critical applications, such as, test equipment, military requirements, computers, servo systems and industrial metering devices.

$1\frac{1}{16}$ " diameter and $\frac{1}{16}$ " deep, wiper assembly of one piece construction; carbon to carbon contact insures exceptionally low noise level; brass nickel plated, gold plated terminals. Electrical tolerances are plus/minus 10% for all values up to 1 meg, 1 meg, and above plus/minus 20%.

Fabricated in accordance with MIL-R-94 Style RV4.

Items not listed are special, prices and information supplied upon request.

The C1 designation indicates a $1\frac{1}{16}$ " round shaft beyond bushing; $\frac{3}{8}$ " long bushing with $\frac{3}{8}$ -32-NEF-2 thread. The C2 designation is a $\frac{1}{8}$ " screwdriver slotted shaft with a $\frac{1}{8}$ " split locking bushing. The C3 designation is a $\frac{1}{8}$ " round shaft FMS, $\frac{3}{8}$ " long bushing with $\frac{3}{8}$ -32-NEF-2 thread.

RESISTANCE DEVICES

"GREENOHM V"™ VITREOUS-ENAMEL RESISTORS

Based on years of research and engineering development, these vitreous-enamel wire-wound power resistors offer superlative performance and life as proved by countless tests. "Greenohm V" resistors provide all the outstanding quality which made Clarostat "Greenohm" cement-coated units famous, plus a glass-smooth vitreous-enamel coating in a handsome bluish-green for maximum eye appeal. Made to MIL-R-26C specifications.

- Fixed and adjustable
- 5-watt to 200 watt sizes
- $\pm 5\%$ tolerance, 50 ohms and over. $\pm 10\%$ tolerance, 49.9 ohms and under. $\pm 10\%$ for adjustable.

"GREENOHM V"™ FIXED RESISTORS (VITREOUS ENAMEL)

RESISTANCE DEVICES

AXIAL LEAD VITREOUS RESISTORS

Available in three sizes 3, 5 and 10 watts, Series VC3D, VC5E and VC10F. Axial lead resistors are particularly adapted to printed circuit, terminal board, and point-to-point wiring applications. These resistors save considerable space because of the elimination of mounting brackets and terminal lugs. Standard resistance tolerance is $\pm 5\%$ for 1 ohm and higher and tolerance below 1 ohm is $\pm 10\%$. Attractively packaged in a newly designed carton particularly adapted to this new axial lead resistor, beautifully finished with Clarostat's new vitreous shade of teal green.

POWER RESISTOR DECADE BOX

The Resistance Decade Box, Model 240-C for bench use—Model 250 for rack mounting, provides any resistance from 1 to 999,999 ohms for working circuits at the flip of a switch. Six front-panel dials enable selection in 1 ohm increments, the total value being read directly from the dial. Each decade has a power rating of 225 watts maximum, 1,000 VDC or 660 VAC maximum.

Resistance changing switches are of the type that prevent a resistance breakdown between steps, thus protecting delicate meters and measuring instruments in the circuit. Knobs indicate the resistance

value being used at a glance.

Clarostat GREENOHM Power Resistors are used throughout. These components are wire-wound power resistors on ceramic tubes and coated with an exclusive Clarostat Inorganic cold-setting cement, providing the most rugged, long-lasting, trouble-free power resistor available. The resistors are mounted in rigid metal supports.

Overall length: 240C: 13" long x 8 1/2" deep x 5 1/2" high, weight 1 1/2 lbs. 250: 19" long x 13 1/2" deep x 7" high (fits in standard 19" relay rack), weight 1 1/2 lbs.

SUGGESTED USES: Resistance determination, Load Resistance, Meter Multiplier, Calibrating Meters, Providing any desired ohmage as a universal power resistor.

Decade No.	1	2	3	4	5	6
Max. Current Rating (amps)	5	1.5	.5	.15	0.5	.005
Resistance Tolerance	5%	2%	2%	2%	2%	2%

NET PRICE: Model 240C \$110.00, Model 250 \$150.00

SERIES U39

UNIVERSAL "HUMDINGER" CONTROL 2W. WIRE WOUND

Series U39 is a shaftless potentiometer with the contact arm grounded to the housing. The design of terminals and mounting tabs, meets the following requirements: Above chassis mounting, as a potentiometer or rheostat; printed circuit mounting, as a potentiometer or rheostat. The terminal layout meets the popular industry standards. A fiber adapter plate is furnished with each control. Series U39 is ideally suited for radio and television requirements, as well as many industrial applications. Resistance tolerance $\pm 20\%$. Linear only.

COMPOSITION-ELEMENT CONTROLS

Graph Explanation:
Taper S—Straight or uniform resistance change with rotation.
Taper T—Right-hand 50% resistance at 50% of C.W. rotation.
Taper U—Left-hand 1% resistance at 33% of C.W. rotation.
Taper V—Right-hand 20% resistance at 50% of C.W. rotation.
Taper W—Left-hand 20% resistance at 50% of C.W. rotation.
Taper Z—Left-hand (Log. audio) 10% resistance at 50% of C.W. rotation.
Taper Y—Left-hand 5% resistance at 50% of C.W. rotation.

SERIES "A47" 1/2-WATT CONTROLS

Composition-element controls in the popular $1\frac{1}{16}$ " dia. size. Series "A47" controls are field-assembled with the selected "Pick-A-Shaft" and "Ad-A-Switch"*. These controls are also available with factory-assembled shafts at no extra charge, by omitting prefix "A" from catalog number and designating the type shaft desired when ordering. Example: 47-100K-S with FKS-1/4 shaft.

RESISTANCE DEVICES

WIRE-WOUND CONTROLS

These are "Pick-A-Shaft" controls which take any one of 12 shafts listed on page R-24 including High Voltage Coupler and insulated shaft. Your choice of any one of the 12 shafts listed (this does not include insulated shaft) with each control. Tolerances of these controls are in accordance with EIA standards. Overall resistance

tolerance of plus/minus 10% for all values. All controls are linear. Available with factory-assembled shafts at no extra charge, by omitting the prefix "A" from the catalog number and designating the type of shaft desired when ordering. Example: 43-500 with FKS-¼ shaft, or 43S-10K with FS-3 shaft and SPST switch.

SERIES BHM ROTARY SWITCHES

Series BHM switches are rated at 50 ma. at 300 V. a.c. or d.c., and 500 ma. at 30 V. a.c. or d.c. All moving parts and contact mechanism are totally enclosed, and the switch assembly is sealed for protection from dust and atmospheric conditions. They are particularly adapted to portable radios, receivers and transmitters, X-ray and medical instruments, calculating machines and computers.

Current: 50 Millamps. at 300 volts a.c. or d.c.
Rating: 500 Millamps. at 30 volts a.c. or d.c.
Protection: All moving parts and contact mechanisms are totally enclosed and switch is sealed, which protects it from dust and atmospheric conditions.

Shaft: ¼" diameter round 1" beyond bushing.
Finish: Nickel Plating.
Bushing: ¾" x 32 NEF-2 Thread. ¾" Long.
Torque: 30 to 50 oz. in.

SHAFTS FOR "PICK-A-SHAFT"™ CONTROLS

For use with all Clarostat "Pick-A-Shaft"™ controls, either carbon or wire-wound. Your choice of shaft furnish with each control.

- (1) SS-3/4" length—(Male) to take female fitting
- (2) RS-2 — Round shaft, 2" long.
- (3) RS-3/16 — Round shaft 3/16" dia., 3" long.
- (4) KSS-3 — Knurled, split shaft, 3" long.
- (5) RS-5 — Round shaft, 5" long.
- (6) FS-5 — Flatted, 5" long.
- (7) KSS-5 — Knurled, split shaft, 5" long.
- (8) FS-3 — Flatted shaft, 3" long.
- (9) RS-3 — Round shaft, 3" long.
- (10) DRS-1/2 — Double flatted Philco Type, 1/2" long.
- (11) FKS-1/4 — Fine knurled slotted shaft, 1/4" long.
- (12) KFS-3 — Knurled flatted shaft, 3" long.
- (13) FKS-1/2 — Fine knurled slotted shaft, 1/2" long.

Net Price, Each Shaft \$0.33

SERIES "SWE" SWITCHES FOR "AD-A-SWITCH"™ CONTROLS

For use with "A47" and "A47F" controls. Underwriters' Laboratories Inc. approved.

Cat. No.	Wiring	Net Price
SWE-12	S.P.S.T. — Single Pole Single Throw, 5A-125V. A.C.	\$0.45
SWE-13	S.P.S.T. — Single Pole Single Throw, 15A-10V. D.C.	.66
SWE-20	D.P.S.T. — Double Pole Single Throw, 3A-125V. A.C.	.51
SWE-21	Mod. D.P.S.T. — one pole on, one off or with Jumper S.P.D.T., 3A-125V. A.C.-D.C.	.51
SWE-23	D.P.S.T., 15A-10V. D.C.	.66
(Mod. DPST has one pole "on", one pole "off" or with Jumper it is SPDT.)		

Standard Packing: 10 per Carton.

POWER RHEOSTATS

Clarostat Power Rheostats maintain their full power rating at settings as low as one-third rotation without excessive temperature rise. Standard overall resistance tolerance plus/minus 10%. Closer tolerances are available upon special order.

AN Types (aircraft type) are basically the same units mechanically and electrically except that they are encased in a metal housing (versus ceramic). Terminals are screw type lugs to prevent corrosion. Approved under MIL-R-6749.

Units mount through a single hole, a locking pin is provided for rear panel mounting.

SOUND-SYSTEM CONTROLS

For proper control of volume and tone alike, Clarostat offers a choice of several controls, such as L- and T-pads, output attenuators, and individual-speaker volume controls as used for drive-in theatre installations.

These are not ordinary radio controls but rather sound-system controls designed and built for critical requirements.

CONSTANT-IMPEDANCE CONTROLS

Self-compensating volume controls known as L-pads and T-pads for use in sound systems. Rated at 2½ watts DC, but will handle up to 10 watts audio. Continuous range from 0.5 to 30 decibels attenuation in 90% rotation. Last 10% affords infinite attenuation. With Clarostat constant-impedance L-pads and T-pads the input and output impedances of associated circuits can be kept within the limits of a constant required value. Knob and dial plate furnished with each control.

U. S. Pat. 2,434,248

Standard Packing: Individual Carton.

CONSTANT IMPEDANCE OUTPUT ATTENUATORS

Series "CIB" rated at 10 watts, but will handle up to 30 watts in audio circuit. Linear attenuation provided in 8 decibel steps up to 24db, then 30db followed by infinity. Equipped with dial plate and bar knob. One-hole mounting, ¾" bushing diameter, 1" shaft. This control has been developed to meet the need for a constant-impedance attenuator capable of handling considerable power without measurable insertion loss. Recommended as an output level control for power amplifiers, or as an input attenuator for individual or for a group of speakers in a public address system.

SPECIAL DRIVE-IN THEATRE L-PAD

To meet the needs of theater sound systems, more especially those of drive-in theaters, a special 8 ohm L-Pad is now available, containing two separate windings of 5 ohms and 40 ohms. Also 50 ohm linear rheostat and 35 ohm tapered rheostat, as listed. Units have ¾" 32 bushing ¾" long, and 1¼" round shaft.

Cat. No. CM8727-1 8 ohm L-Pad
Net Price \$1.80

SPACE-SAVER CONSTANT-IMPEDANCE ATTENUATORS

Characterized by reduced depth and diameter, these attenuators are ideal for use in remote control of speakers since they are small enough to be installed in standard electrical boxes in the home, office, stockroom, etc.

These controls are rated 2 watts D.C., but will handle up to 4 watts of audio, depending upon the type signal being handled. (As the frequency becomes constant, wattage reduces to 2 watts or the same as the D.C. rating).

- Attenuation range of 0 to 30 db over 90% of rotation, 60 db in remaining 10% of rotation. Attenuation will increase approximately linearly to 30 db with counter-clockwise rotation.

- Insertion loss less than 0.5 db.
- Input impedance within plus/minus 20%.

- The CIT43 and CIBT43 (Bridged T Pad) have constant input and output impedances, while the CIL43 has constant impedance in the input only.

- Shafts and bushings are insulated from the circuit elements.

- Pads have ¾-32 x ¾" long bushing.

- ¼" dia. round shafts 1½" long beyond bushing.

- All pads supplied with bar knob and dial plates, as shown above.

- Dia. 1¼". Depth of body from mounting surface: CIL43—1¼"; CIT43—1¼"; CIBT43—1½".

RESISTANCE DEVICES

"GREENOHM"® WIRE-WOUND RESISTORS

FIXED TYPES Wire-wound resistors for most rugged applications. Will withstand tremendous overloads and temperature changes without altering resistance values or appearance. Wire windings on high grade ceramic tubing and coated with special inorganic cement. In accordance with EIA standards, overall tolerances are $\pm 5\%$ for resistors of 50 ohms and higher. For resistors of 49.9 ohms and lower, overall tolerances are $\pm 10\%$.

ADJUSTABLE TYPES Same electrically and mechanically as Fixed types, but incorporating sliding band or bands for tapping any desired resistance values. Slider band tightened by means of screw. In accordance with EIA standards, overall tolerances are $\pm 10\%$.

CORNING GLASS TIN OXIDE FILM RESISTORS

Fuse a tin oxide coating into the pure surface of freshly drawn glass, cut a helix in the coating, attach leads and you have a simple, rugged, exceptionally reliable CORNING® resistor. Physically, the perfect matching of the thermal expansions of resistive film and substrate eliminates stressing of the film during sudden overloads and thermal shocking. Continuous process and quality monitoring combine with these high quality inorganic materials to produce resistors with low TC guarantees

from $\pm 0.010\%$ to $\pm 0.050\%$ depending on type. Noise levels are typically less than 0.1 $\mu\text{V/V}$. High frequency characteristics assure non-inductive performance above 280 ohms.

Corning manufactures precision, general purpose and power resistors meet your circuit function, environment and duty cycle requirements. Their performance and economic advantages will add value to your equipment.

*Standard resistance values are obtained from the decade table by multiplying by multiples of 10. As an example, 1.33 can represent 13.3 ohms, 133 ohms, 1.33k, 13.3k, 133k, 1.33 megohm

*Values not listed are considered non-standard. $\pm 42\%$ only.

See our complete line of fixed glass capacitors in Section 1500. For more technical data or for fast delivery on top-reliability CORNING resistors, call your CORNING distributor, or contact us directly.

INCORPORATED • CHICAGO, ILLINOIS

ALS

FLEXIBLES

ALS

LECTROHM, while manufacturing the standard vitreous line, is also producing whole new groups of types, each designed to solve a special problem. Miniaturization and printed circuit restrictions in space and tolerances no longer are complicated by conventional power resistor standards. New coating materials and winding methods developed by LECTROHM permit an infinite variety of configurations yet retain the rating and life characteristics expected of the finest grade vitreous coated types. LECTROHM engineers will fit the resistor size and type to your design.

LECTROHM

INCORPORATED • CHICAGO, ILLINOIS

VITREOUS ENAMELED RESISTORS

FIXED AND ADJUSTABLE WIRE-WOUND TYPES

Years ahead in manufacturing techniques, LECTROHM Resistors offer absolutely top quality at consistently lower prices. New winding methods and improved enameling processes are the result of continuing research.

Your wire-wound resistor requirements, whether in small or large quantities, are given immediate attention. Large factory stocks of standard types are maintained for your convenience. Special types to fit particular applications are provided quickly and at low cost.

Adjustable Wire-Wound Types

HARDWICK, STOCK BLUE RIBBON RESISTORS

HINDLE

Wirewound Flat Core for Individual and Stack Mounting

■ Standard tolerance is $\pm 5\%$. Closer tolerance available on order.

■ In resistors with values below 10 ohms a special through-bracket construction may be used for greater mechanical strength.

■ When stack mounted these resistors should be derated.

HARDWICK-HINDLE PRODUCTS

HUNTINGTON, INDIANA

MEMCOR/COMPONENTS DIVISION

MODEL ENGINEERING and MANUFACTURING CORP.

MEMCOR®

HARDWICK, HINDLE

STOCK TAB TYPE FIXED RESISTORS

Sizes: 5 Watts to 200 Watts. 1 Ohm to 100,000 Ohms

■ Features of this widely-used type of resistor, built "better than need be" by Hardwick, Hindle, are welded tabs (lugs) solidly anchored to withstand vibration and hot tin-dipped for easy soldering; shock-absorbing mounting brackets; multi-layer vitreous enamel coating which locks the uniformly-wound resistance wire in position and also locks out moisture; high-temperature stability and compatible coefficient of expansion which prevents crazing and cracking.

■ Standard tolerance is $\pm 5\%$. Closer tolerance on special orders.

10 WATT

Gray Line

STOCK AXIAL LEAD RESISTORS

Gray Vitreous Enameled Fixed Type

These lightweight resistors are designed for mounting by their leads. Special care is taken to provide every element required for making stable trouble-free connections.

■ Stock tolerance is $\pm 5\%$. Closer tolerance is available at additional cost.

"Gray Line" resistors are especially useful in laboratories for experimental work, circuit design, etc.

The wattage rating given here (and the tolerance of $\pm 10\%$) is for the entire resistor, without adjustable band. Never exceed the maximum current rating through any portion of the resistor.

TO ORDER

Stock items: Specify stock number, type, ohms, word adjustable and quantity.

Mounting Brackets: Specify bracket catalog number separately, if required. Furnished on request only.

STANDARD PACKAGING: Ten watt size packed 10 units per box. Larger sizes packed one unit per box.

INSULATED CARBON COMPOSITION & WIREWOUND RESISTORS

INTERNATIONAL RESISTANCE COMPANY

FIXED COMPOSITION RESISTORS. IRC's unique design of $\frac{1}{2}$ - and 1-watt resistors mean better performance and reliability. 50% more molding around the resistance element assures greater moisture protection. The working element is a layer of carbon thermally bonded to an inert glass filament for better resistance and temperature characteristics. Ribbed shoulder leads are deeply imbedded in the molding to prevent twist pull-out and act as heat sinks to conduct heat away for cooler operation and longer field life.

VERSATILE WIREWOUND RESISTORS. Type BWH is a new molded wirewound resistor that can be used as a direct replacement for composition resistors at about half the price. In one size (RC32) it covers 3 different wattage requirements and provides substantial cost savings over 1 watt 2 watt fixed composition units, and space saving over 2 watt RC42 units. The BWH has the stability, reliability and long life of a wirewound unit. It meets all the performance requirements of MIL-R-11.

RESISTOR KITS & ASSORTMENTS

INTERNATIONAL RESISTANCE COMPANY

HANDY-PAKS. The neatest, most compact resistor package available, and it's exclusive from IRC. Slimline plastic sleeve keeps leads straight and in place.

- Easier to identify—Type, resistance value and power rating on every Handy-Pak. Resistor color code is easily seen through the plastic.
- Handier to use—Opens at either end. Simply slide package out of plastic sleeve . . . withdraw the required number of resistors and slide the package into the sleeve.
- Quicker to find—Handy-Paks can be indexed by power rating and resistance. Resistors are always visible for inventory.

3 TYPES AVAILABLE . . . ½ watt contains 6 GBT½ carbon composition resistors; 1 watt package contains 4 GBT1 resistors and the 2 watt Handy-Pak contains 3 SR2 resistors.

RESIST-O-PANEL. Unique swing panel attaches to wall; measures only 7" x 12¼". All-metal construction with slots to hold Handy-Paks. Supplied with 10 Handy-Paks of most popular values, and slots on back for 10 additional. Included **FREE** with either of two popular assortments.

ASSORTMENT #64

60 GBT½ ½-watt resistors
(10% tolerance)
6 each of 10 values

ASSORTMENT #68

40 GBT1 1-watt resistors
(10% tolerance)
4 each of 10 values

ASSORTMENT #80

30 SR2 2-watt resistors (10% tolerance), 3 each of 10 values

RESIST-O-PEDIA. Attractive, hardback binder with 3-ring "tab" inserts to hold Handy-Paks. Saves searching . . . speeds servicing. Resistors always visible. Resist-O-Pedia **FREE** with any of 2 assortments.

ASSORTMENT #44

462 GBT½ ½-watt resistors
(10% tolerance)
6 each of the 77 10% values
from 10 ohms to 22 megohms

ASSORTMENT #48

308 GBT1 1-watt resistors
(10% tolerance)
4 each of the 77 10% values
from 10 ohms to 22 megohms

RESIST-O-CADDY. Ideal for in-home servicing. Plastic pouch folds to 6¾" x 3⅞" x 1½" . . . fits easily in tube caddy or tool chest. Individual pockets keep Handy-Paks secure and orderly.

Accurate inventory is always visible. Resist-O-Caddy **FREE** with either of these two popular assortments:

ASSORTMENT #41

120 GBT½ ½-watt resistors
(10% tolerance)
6 each of 20 values

RESIST-O-CABINET. A practical way to give any shop a professional appearance. Sturdy metal Resist-O-Cabinets are FREE with any of our balanced assortments. Designed for stacking, and for tidy stocks of small parts. Resist-O-Cabinets have four non-spill drawers and 28 compartments. Overall size is $5\frac{3}{8}" \times 5\frac{15}{16}" \times 10\frac{7}{8}"$. Blue and silver finishes.

POWER RESISTORS

INTERNATIONAL RESISTANCE COMPANY

RESISTEG COATED POWER RESISTORS need no derating. They operate at full rated power even at high resistance values. Other features include heat resistant terminals for easy soldering, ceramic cores that withstand shock and are impervious to moisture, heavy windings that handle overloads without burnout, and standard size spring loaded push-in brackets for easy mounting.

ED TYPES

1A—5-8 watts. Resisteg coating. Core size: 1" long by $\frac{1}{16}$ " dia. Terminals: 13A. Tolerance: $\pm 5\%$. Mounting hardware included: none. Standard package: 5.

POWER RESISTORS

INTERNATIONAL RESISTANCE COMPANY

PW5 AND PW10 AXIAL LEAD POWER WIREWOUND RESISTORS.

For 5 and 10 watt application, these popular resistors are compact to save space and feature superior solderability. Sealed in a ceramic case. Standard tolerance is 10%.

PW5 available from 1 to 6,000 ohms. PW10 available from 1 to 25K ohms. See stock list.

POPULAR ASSORTMENT #20A PW10 resistors is available for handy bench stock. On plastic covered card with hole for hanging.

STANDARD STOCK VALUES (PW10)

MULTI-RANGE POWER RESISTORS. Up to 47 values from a single resistor. 5 multi-range resistors give complete 10 watt coverage . . . 200 values from $\frac{1}{2}$ to 50,000 ohms. No delays for a particular value, and you don't tie up inventory with odd values. Ideal for in-home servicing and weekend shop work.

Four-wire wound elements are sealed in a steatite housing. It's simple to solder a basic interconnection for the required value, and cut off unused terminals. Connection diagrams included.

5 TYPES COVER 200 VALUES

TYPE MR1. 0.5 through 15 ohms. 1, 2, 4, 8 ohm elements. 10 watts. 47 values.

TYPE MR2. 5 through 150 ohms. 10, 20, 40, 80 ohm elements. 10 watts. 47 values.

TYPE MR3. 50 through 1,500 ohms. 100, 200, 400, 800 ohm elements. 10 watts. 47 values.

TYPE MR4. 500 through 15K ohms. 1K, 2K, 4K, 8K ohm elements. 10 watts. 47 values.

TYPE MR5. 3K through 50K ohms. 10K, 10K, 15K, 15K ohm elements. 10 watts. 12 values.

MULTI-RANGE KIT #55. Complete 10 watt power resistor coverage that fits in the palm of your hand. Rigid clear plastic case holds 5 Handy-Paks, 2 of each type MR resistor. With these 10 versatile resistors you have finger-tip coverage of 200 values from $\frac{1}{2}$ to 50,000 ohms. Fits easily in tool case or tube caddy.

PRECISION RESISTORS

INTERNATIONAL RESISTANCE COMPANY

DEPOSITED CARBON PRECISIONS are available in $\frac{1}{2}$, 1 and 2 watt sizes. The wide range of values, 1% tolerance, economy, low voltage coefficient, excellent frequency characteristics, predictable temperature, high voltage rating, low noise level, and small size make IRC deposited carbon resistors ideal for application in advanced electronic equipment and critical TV circuits.

MOLDED DEPOSITED CARBON RESISTORS are designed for high reliability, stable performance, low voltage coefficient, low capacitive and inductive impedance in high frequency applications. In miniature $\frac{1}{8}$, $\frac{1}{4}$, and $\frac{1}{2}$ watt sizes, plus 1 and 2 watt types.

Standard tolerance is 1%. (2% tolerance on high range units.) The housing gives complete protection, and offers better heat dissipating qualities. This results in improved load life and maximum moisture protection.

STANDARD STOCK VALUES—TYPES DCC, DCF, DCH and MDC

One decade of stock values is as follows:

Ohms	Ohms	Ohms	Ohms	Ohms	Ohms	Ohms	Ohms	Ohms	Ohms	Ohms	Ohms

Special Resistance Tolerances

Standard tolerances $\pm 1\%$. Other tolerances, subject to minimum values shown on specification charts, are available on special order for all WWJ types, as follows:

0.5% 0.25% 0.2% 0.1% 0.05%

TYPE Q & TYPE 4W CONCENTRIKITS

INTERNATIONAL RESISTANCE COMPANY

IRC offers the broadest replacement coverage in the industry with its Type Q, $\frac{1}{2}$ watt carbon controls and Type 4W, 4 watt wirewound controls in CONCENTRIKIT form. With the CONCENTRIKIT replacement system, an extremely broad range of electrical and mechanical variations are available as factory assembled controls or as selected control parts for easy field assembly.

Available in CONCENTRIKIT are many types of single controls, ganged multi-section controls, concentric dual controls with combinations of carbon and wirewound sections, and specially matched controls for stereo.

Some of the mechanical variations possible include bushing mountings, tab mountings, printed circuit mountings and printed circuit terminals. A wide choice of shafts, rotary and axially-operated power switches and special tone switches can be selected from CONCENTRIKIT for almost any application.

For more data, write for Catalog S649.

DEALER STOCKS

No. 90. A comprehensive basic selection of CONCENTRIKIT parts provides broad replacement coverage of radio, TV, auto and hi-fi controls. Features the outstanding versatility of the industry's most proven and most widely used replacement system. Includes handsome metal cabinet with 12 "see thru" plastic drawers.

No. 92. A greatly expanded selection of CONCENTRIKIT parts. Covers in depth controls for ADMIRAL-DUMONT-EMERSON-GE-MAGNAVOX-MOTOROLA-MUNTZ-PHILCO-RCA-SILVERTONE-SYLVANIA-TRUETONE-WESTINGHOUSE-ZENITH and 170 other manufacturers. Stock is housed in handsome 12 drawer metal cabinet with "see thru" plastic drawers.

No. 91 CONVERSION STOCK. Conversion Stock No. 91 supplies you with all the items necessary to convert Dealer Stock No. 90 to the broader coverage of Dealer Stock No. 92.

For more information on the above items, write for Catalog S658.

SNAPTROL

INTERNATIONAL RESISTANCE COMPANY

IRC's SNAPTRON replacement system provides great versatility, easy assembly and snap together convenience. With fewer basic components, SNAPTRON gives you broader replacement coverage than any other section-type exact duplicate control system on the market today.

Without cutting or modifications, factory assembled sections quickly and easily snap together to make ganged multiple section and concentric dual controls. A broad variety of carbon and wirewound front and rear sections are available, as well as matched front and rear sections for stereo.

Both universal and exact duplicate shafts snap into the control sections. Rotary and axially-operated power switches snap-on single or concentric controls. Mounting configurations include bushings, tab mountings and printed circuit brackets. Printed circuit terminals are supplied on all carbon sections for universal use.

Carbon sections are rated at $\frac{1}{2}$ watt. Wirewound sections are rated at 5 watts (linear tapers).

For more data, write for Catalog S605.

DEALER STOCKS

No. 87. Features a broad selection of components of IRC's new SNAPTRON replacement system—the fast, snap-together method of replacing controls. Includes many outstanding features unique to the system. Housed in handsome metal cabinet with 12 "see thru" plastic drawers.

No. 89. Includes an expanded selection of SNAPTRON components. Covers greatest variety of control mounting and proven switch types. Broad replacement coverage of ADMIRAL-DUMONT-EMERSON-GE-MAGNAVOX-MOTOROLA-MUNTZ-PHILCO-RCA-SILVERTONE-SYLVANIA-TRUETONE-WESTINGHOUSE-ZENITH—and 170 other manufacturers. Housed in handsome metal cabinet with 12 "see thru" plastic drawers.

No. 88 CONVERSION STOCK. Conversion Stock No. 88 supplies you with all the items necessary to convert Dealer Stock No. 87 to the broader coverage of Dealer Stock No. 89.

For more information on above items, write for Catalog S657.

INDUSTRIAL CONTROLS

INTERNATIONAL RESISTANCE COMPANY

TYPES PQ, RQ, RQL and M. High quality $\frac{1}{2}$ watt controls. Resistance tolerance is $\pm 10\%$.

Type PQ has full round $\frac{1}{4}$ " shaft, 3" FMS. In 33 stock values.

Type RQ has $\frac{1}{4}$ " screw-driver slotted shaft, $\frac{1}{2}$ " FMS. Supplied in 33 values.

Type RQL has $\frac{1}{4}$ " screw-driver slotted shaft and lock type bushing. $\frac{1}{2}$ " FMS. 26 stock values.

Type M Multi-section is a rear section which can be added to PQ, RQ or RQL for dual, triple or quadruple controls. Supplied in 25 stock values.

For more data, write for Catalog S649.

TYPES WP, WPRL and WM. Husky 4 watt controls with heavily tinned terminals for easy soldering. $\pm 10\%$ resistance tolerance.

Type WP has $\frac{1}{4}$ " full round shaft, 3" FMS. Available in 36 stock values.

Type WPRL has $\frac{1}{4}$ " screw-driver slotted shaft and lock type bushing. $\frac{1}{2}$ " FMS. In 36 values.

Type WM Multi-section is a rear section which mates to WP and WPRL for dual, triple or quadruple controls. Supplied in a wide assortment of values.

For more data, write for Catalog S649.

SERIES 45. $\frac{1}{2}$ watt controls with resistance tolerance of $\pm 20\%$. Available as snap-together sections, shafts and power switches to provide up to 12,631,500 different controls for virtually every application. Twenty shaft styles cover the majority of commercial and industrial needs.

For more data, write for Catalog S605.

ENGINEERING LAB STOCKS. Series 45, $\frac{1}{2}$ watt controls to meet more than 12 million requirements. Two IRC engineering lab stocks include snap-together sections, control shafts, switches and dust covers. Ideal for building breadboards and prototypes. Grey metal cabinets stack or hang. Clear plastic drawers are labeled and separated for easy inventory and stock control.

SPECIAL CONTROLS

INTERNATIONAL RESISTANCE COMPANY

AUTO RADIO CONTROLS for 265 different makes and models. IRC's line of exact duplicate controls includes 127 individual types for every popular auto radio. Faster servicing results from these top-quality controls because of IRC's strict adherence to manufacturer's specifications. For more data, write for Catalog S525.

BUZZ AND BIAS CONTROLS for hum balance, centering, holding, locking and other TV uses. These miniature controls are available in two types, both designed for screw-driver adjustment. Type 110 in 17 values from 1.5 to 3,000 ohms. Type 112 supplied in 23 values from 50 to 10,000 ohms. For more data, write for Catalog S655.

TV HEIGHT CONTROLS for reliable operation in TV and other B + applications such as AGC, noise gate, focus, fringe lock and sync. 1 watt rating. $1\frac{5}{16}$ " diameter. Nylon slotted and knurled shaft can easily be modified. Tab mount design with rear adjustment. In six values from 2.0 megohms to 7.5 megohms. $\pm 30\%$ tolerance. Type HLC. For more data, write for Catalog S655.

TV ATTENUATORS for on-the-spot adjustment of signal input to TV set. In most cases it corrects or reduces adjacent channel interference, background picture on weaker stations, poor definition, picture and sound breakover. Type QJ-3 is widely used in service work to duplicate fringe area signals when near strong local station.

LOUDNESS CONTROLS that are continuously compensated to boost lows and highs as volume is decreased. Maintains depth and brilliance even at whisper level. The LC-2 can easily be wired into most audio circuits. Uses types 76-1, 76-2 or 76-4 switches.

L AND T PAD CONTROLS with constant impedance for use in sound systems and for speaker controls. Both types handle up to 15 watts of audio power (5 watts DC). L pad provides constant input impedance. Constant input/output impedances provided by the T pad. Knob and dial plate included. L and T pads available in 4, 8, 15, and 500 ohms. For more data, write for Catalog S656.

DUAL DIODES & FUSE RESISTORS

INTERNATIONAL RESISTANCE COMPANY

DUAL DIODES. Universal selenium dual diodes for horizontal phase detectors and remote control in TV receivers. Also used in radio control devices for model planes, and other circuits. Available in four basic types.

TYPE D7 SPECIAL MOTOROLA SIX CELL DIODE

For Motorola Part No. 48C65831A02

FUSE RESISTORS. This special resistor functions as a resistor under normal conditions, and as a fuse under overload conditions. It is used extensively as a surge-limiting resistor in voltage doubler circuits of TV receivers. Installation of an IRC Type FR fuse resistor in a TV set will prevent overloading of more valuable components and possible fire due to a short circuit. The compact, modern design of IRC fuse resistor measures only $1\frac{5}{64}'' \times \frac{1}{32}'' \times \frac{3}{8}''$. This unit is completely insulated in a rectangular ceramic case, and equipped with plug-in terminals. FR5.0—5 ohms, FR5.6—5.6 ohms, FR7.5—7.5 ohms.

MILITARY CONTROLS, 3-WATT INDUSTRIAL CONTROLS, ROTARY SELECTOR SWITCHES

INTERNATIONAL RESISTANCE COMPANY

MILITARY VARIABLE RESISTORS

WIREWOUND VARIABLE RESISTORS MEET MIL-R-19A

RA20 (Type 252) 2 watt wire wound in 15 resistance values. 2 shaft styles, plain and locking bushings.

RA30 (Type 25) 4 watt wire wound in 15 resistance values. 2 shaft styles, plain and locking bushings.

COMPOSITION VARIABLE RESISTORS MEET MIL-R-94B

RV2 (Type 90) 1 watt composition resistors in 14 resistance values. 2 shaft styles, plain and locking bushings.

RV4 (Type 96) 2 watt composition resistors in 16 resistance values. 2 shaft styles, plain and locking bushings.

RV5 (Type 65) 1/2 watt miniature composition resistors in 13 resistance values. 2 shaft styles, plain and locking bushings.

RV6 (Type 300) 1/2 watt miniature composition resistors in 14 resistance values. 2 shaft styles, plain and locking bushings.

For stock values, write for Catalog S004.

3-WATT INDUSTRIAL CONTROLS. Types 321S and 321LT. Completely enclosed construction features: a carbon-ceramic element, excellent heat sink, long life and low noise characteristics and a large safety factor. Available from 250 ohms through 2.5 megohms. For more data, write for Catalog S631.

ROTARY SELECTOR SWITCHES with unique one-piece molded wafer for high reliability and constant uniformity that eliminates drift.

- Compact 1 1/16" size design allows more circuitry per unit of depth behind panel and closer stacking.
- Superior insulation of molded glass alkyd material.
- 1000% more silver than used by most commercial switches.
- Molded stator will not break or crush during ordinary handling, or if dropped.

Available as assembled switches or as wafers and shaft-detent assemblies. For more data, write for Catalog S607.

FOUR-WATT WIRE-WOUND POTENTIOMETERS, RHEOSTATS

Used on bias control and voltage dividers; also for replacement of positioning, hold, focus and other controls of TV sets. Rugged. Rheostats feature "off" position (no connection) type of construction. Insulated contact arm. Pots have three, rheostats have two terminals. Total rotation 295° $\pm$ 5%. No. 4 linear taper. Voltage breakdown 1000 v. DC. One control (with hex nut) to carton.

SEVEN-WATT WIRE-WOUND POTENTIOMETERS

Suitable for precision instruments such as resistance bridges and where a control of medium currents or voltages is required. Supplied with grounded contact arm. 307° total rotation; 295° effective electrical rotation. Will dissipate 7 watts. Provided with short shaft, milled screw-driver slot for easy adjustment. Will take standard knobs. Hex nut furnished. No. 4 taper.

MALLORY POWER RHEOSTATS

Mallory power rheostats (Type K) utilize vitreous enamel construction for maximum environmental protection. All current-carrying parts are electrically insulated by dimensionally stable ceramic. Type K rheostats have been tested to 5,000 volts, without breakdown between electrical and mechanical components. U/L voltage ratings are as follows: 25K, 50K, 75K, 100K and 150K—300 volts; 225K, 300K and 500K—600 volts.

The contact mechanism features the patented spring-hinge arm. This spring loaded assembly ensures constant and correct pressure on the rheostat windings. An added advantage is that the high-purity graphite block may be removed easily for cleaning, or, if necessary, for replacement.

Type K rheostats are furnished in a standard linear taper and with all mounting hardware, dial plate and knob. Special two- and three-section tapers are available on special order. All values shown are for continuous operation in free air.

MALLORY RESISTORS

TYPE HJ (FIXED) AND AV (ADJUSTABLE)

Vitreous enamel-coated, wire-wound resistors. Furnished with complete hardware except HHJ, 1HJ and 2HJ which have wire leads.

To Order: Use type number followed by resistance value (i.e., HHJ4000).

Tolerance: $\pm 5\%$ except (*), $\pm 10\%$.

FIXED VITREOUS TYPES 5-WATT TYPE HHJ

OHMITE

resistors • rheostats • tap switches • relays
variable transformers • tantalum capacitors
semiconductor diodes • r. f. chokes

VITREOUS ENAMELED RHEOSTATS

Twelve sizes in wirewound, vitreous enameled rheostats are stocked by Ohmite distributors all over the country and at the Ohmite factory. This selection, the most extensive available to industry, covers ratings that meet the major portion of design, production and emergency needs. Ratings of $7\frac{1}{2}$, $12\frac{1}{2}$, 25, 50, 75, 100, 150, 225, 300, 500, 750 and 1000 watts are standard.

FEATURES OF CONSTRUCTION: Ohmite rheostats are designed to produce permanently smooth, close control. The construction is all ceramic and metal; there is nothing to smoke, char, shrink, or shift. All models have insulated shafts with provision to keep the rheostat from turning on the panel. The resistance wire is wound over a solid ceramic core. Each turn is a separate resistance step and is locked against shifting by vitreous enamel. The core and base are also bonded by vitreous enamel. The pivoted universal-action-mounted contact brush is of copper-graphite or silver-graphite on the heavier current rheostats. It rides upon a large flat surface and assures perfect contact without wear on the wire. Pressure at the contact and at the center lead are independent. Ohmite Rheostat Models H, J, G, K, L, P, and N, all marked Series A, are listed under the Underwriters' Laboratories Reexamination Service.

RATING: The current carrying capacities shown in the tables are for use in *free air*; when units are enclosed, these currents should be reduced possibly as much as 30% to 50%, depending upon the degree of ventilation. The rated current will cause the rheostat to dissipate its rated wattage when the full resistance is in the circuit.

MODEL "C" — MINIATURE RHEOSTAT

In this era of miniaturization and transistorization, the Model C enlarges the horizons of designers by providing greater design flexibility. In addition to its small size, its versatile solder terminals will also plug into common transistor sockets or circuit boards. It is stocked with both standard and locking type bushings.

Actual Size

MODEL "C" — $7\frac{1}{2}$ WATT*

Standard & Locking Bushings

Diameter .515" max. — Depth behind panel $\frac{1}{8}$ " — Shaft $\frac{1}{8}$ " diameter, slotted for both types; Std. shaft accommodates knob — Rotation 300° — Mounting for panels up to $\frac{1}{4}$ " by means of $\frac{3}{16}$ "-32 bushing and hex nut — Non-turn lug requires $\frac{1}{8}$ " hole $\frac{1}{4}$ " below center of shaft — No. 5151 knob recommended — Solder terminals will fit EIA type TS-E3R100 transistor socket — Wt. 0.27 oz.

variable transformers • tantalum capacitors
semiconductor diodes • r.f. chokes

RHEOSTAT TANDEM COUPLING KITS

Inexpensive kits assemble standard Ohmite Model G, H, J, K, L or E (miniature) rheostats. Each kit consists of a steel "U" frame, a coupling with set screw, mica washer, Allen wrench and assembly instructions. Rheostat shafts are joined by the coupling which is fastened to the shaft of the rear unit. Projections on the coupling fit a recess in the rear hub of the front unit. Stock No. 6533 kit, mounts Model G, K or L units but accommodates Models H or J in the rear position. Stock No. 6532 unit mounts Models H or J but accommodates Models G, K or L in the rear position. Stock No. 6591 kit assembles only Model E (miniature) rheostats.

5152A	Like 5104 but shorter pointer	3 1/4"	1/4"	1.60

*Requires pin and tapped hole in shaft.

MOLDED COMPOSITION POTENTIOMETERS, 1/2 and 2 WATTS

Used in commercial and military electronic applications where high quality and dependable performance are important. Type AB, 1 1/2" dia., is rated 2 watts at 70°C ambient and is available with 7/8" slotted shaft (CMU), 2" unslotted shaft (CU, CA, CB, CCU dual unit) and locking type slotted shaft (CLU). Type AS, a miniature unit 1/2" dia. rated 1/2 watt,

is available with locking type shaft (Style AS) or 7/8" slotted shaft for knob control (Style ASM).

Because of their molded composition elements, these units outlast and outperform film type units. Noise level is exceedingly low. Single control Type AB units extend 3/8" behind panel; dual con-

trol 1 1/2" Type AS miniature unit extends 1 1/8" behind panel. An SPST switch for single Type AB units is available. Units are dust and splash proof, fungus and corrosion resistant and meet the latest requirements of MIL-R-94. Styles CMU, CLU, Styles AS and ASM conform respectively to MIL-R-94 Styles RV4N, RV4L, RV6L, and RV6N.

STOCK "POTS" — MIL Units are Stamped with MIL and Commercial Designations

These all-welded construction resistors have welded high-strength alloy terminals. For perfect electrical connection, the resistance wire is welded to the terminal. Units are wire-wound on ceramic cores and protected by Ohmite Vitreous Enamel. Furnished with mounting brackets and on DIVIDOHM with one adjustable lug.

75 WATT SIZE — Dividohm

Core: $6'' \times \frac{1}{8}''$ — Mounting Centers $6\frac{1}{2}''$

High quality, small size, wire-wound resistors ideal for voltage dropping, bias units, bleeders, etc. They're extra-sturdy, all-ceramic, vitreous enameled. These all-welded construction units have welded high-strength alloy terminals. For perfect electrical connection, the resistance wire is welded to the terminal. They give time-proved protection against shock, vibration, heat and humidity. Their long record of continuous trouble-free service—their wide use in all climates of the world—prove their complete reliability and economy. All units can be conveniently mounted by means of their 1½" tinny wire leads. Standard resistance tolerance is ±5%.

OHMITE Series 99 Resistors

SERIES 99 MOLDED VITREOUS AXIAL LEAD RESISTORS

All welded resistors with 1000 v. AC insulation. They meet general requirements of specification MIL-R-26C for RW69, RW68, RW69, RW68, RW69 and RW69. Chip and break resistant, uniformly molded white vitreous enamel protects against moisture, salt spray and immersion. Vitreified markings resist high temperatures, solvents and abrasion. Can be mounted on component clips. Tolerance: ± 5% standard. Size: 1.5-watt, 0.422" lg. x 0.125" dia.; 2-watt, 0.375" lg. x 0.188" dia.; 3-watt, 0.547" lg. x 0.203" dia.; 5-watt, 0.938" lg. x 0.203" dia.; 11-watt, 1.781" lg. x 0.312" dia. Tinned leads 1½" lg., #20 AWG except 1-watt, #24 AWG.

resistors • rheostats • tap switches • relays
variable transformers • tantalum capacitors
semiconductor diodes • r.f. chokes

These precision power resistors are furnished from stock in power ratings of 3, 5 and 10 watts depending upon resistance. Single layer wound on ceramic core, Type 884 units feature a pressure-molded jacket of tough, resilient, silicone-ceramic material. Negligible inductance at audio frequencies. Temperature coefficient of resistance is $\pm 20 \text{ppm}/^\circ\text{C}$. Values shown are selected from MIL Standard MS90169, MIL-R-10509 and Bell Tel. Labs.

Resistance values marked * are derated in wattage because of maximum voltage gradient considerations. Even with these voltage limitations, however, the watt ratings are still adequate for most precision applications. However, where wattage requirements dictate, the same value shown in a derated area for either the 3 or 5 watt sizes can be supplied in the next higher wattage as the case may be.

LITTLE DEVIL® RESISTOR ASSORTMENTS FOR SERVICE USE

Serviceman's assortments of 150 Ohmite "Little Devil," 1/4-watt or 1/2-watt, or 125, 1-watt or 2-watt insulated composition resistors, in the 40 values (10 ohms to 10 megohms) most frequently used by servicemen. CAB-4 has 37 resistance values. The assortment is offered at the price of the resistors alone—the cabinet is furnished without extra cost! Cabinet is only 9" long, 4 3/4" high, and 5 1/4" deep.

Assortment SERVICE ±10% tolerance (40 resistance values)

Assortment	Stock No.	Quantity of Resistors	Wattages	Net Price
CAB-4	150	150	1/4 watt	\$19.50
CAB-10	150	150	1/2 watt	18.50
CAB-2	125	125	1 watt	22.50
CAB-3	125	125	2 watt	30.00

OHMITE R.F. PLATE CHOKES

This series of seven Ohmite single layer wound solenoid radio frequency plate chokes covers the entire frequency range of 3 to 520 megacycles. The four highest frequency chokes are wound on low power factor plastic cores while

the other three units are wound on steatite tubes. The single layer winding is designed to avoid adverse harmonic effects within the recommended operating range and also prevents breakdown from high r.f. potentials.

Stock Number	Operating Range Megacycles	Micro-henries	Core Dimensions	Net Each 1-9
Z-7	3 to 20 Mc.	84.0	6" x 3/4"	\$1.37
Z-14	7 to 35 Mc.	44.0	2" x 1/2"	.68
Z-28	20 to 60 Mc.	21.0	1 1/2" x 3/4"	.57
Z-50	35 to 110 Mc.	7.0	3/4" x 3/4"	.46
Z-144	80 to 200 Mc.	1.8	3/4" x 3/4"	.43
Z-235	160 to 350 Mc.	0.84	3/4" x 3/4"	.43
Z-460	320 to 520 Mc.	0.20	1/2" x 3/4"	.43

Non-magnetic Brackets Furnished with Z-7, The Z-14 and Z-28 are rated at 600 ma. All others 1000 ma.

NEW OHM'S LAW CALCULATOR

Redesigned! This new, improved version of the famous Ohmite Ohm's Law Calculator — popular the world over with servicemen, engineers and students — now has scales for solving parallel resistance problems, AND a standard slide rule. More useful than ever! With one setting of the scale the calculator gives the answer to any Ohm's Law problem—reading directly in ohms, volts, amperes, and watts. Three of the new scales on the back provide a quick, one-setting means of solving parallel resistance problems. The slide rule scales will multiply, divide, find squares, and square roots.

Ohm's Law Calculator (Cardboard) Net Price \$0.25
Ohm's Law Calculator (Plastic) Net Price 1.50

LITTLE DEVIL COLOR CODER

Here is a handy little device that makes it easy to determine the resistance and tolerance

values of EIA color coded composition resistors. Just turn the color wheels until the color corresponds to the color band on the resistor and read the resistance value directly in ohms in the windows.

Tape

Now Includes MIL-R-11 Types

Ohmite's famous molded composition resistors, in the 1/4, 1/2, 1 and 2-watt sizes, conform respectively to Styles RC07, RC20, RC32 and RC42 of MIL-R-11E and meet all the requirements of this military specification.

Little Devils have molded insulation except for the 1/10 watt size which is coated with insulating material. Features: Great stability, low noise level, low voltage coefficient, high insulation breakdown voltage and rapid heat dissipation. They may be used at full rated wattage at 70°C (158°F) ambient temperature.

Available from stock in the standard EIA resistance values in the tolerances and resistance ranges shown in the price table below. Ratings for maximum continuous RMS voltage drop are high: 150 volts for 1/10 watt units, 250 volts for 1/4 watt, 350 volts for 1/2 watt, 500 volts for 1 watt and 750 volts for 2 watt units.

STANDARD EIA VALUES

Figures in large, bold type are ±10% EIA values. All values listed are ±5% values. Price table lists the various "Little Devil" sizes and indicates the tolerances and resistance ranges in which they are supplied.

*Minimum resistance under MIL-R-11E is 2.7 ohms.

Leads 1 1/2" long.

MILWAUKEE "Fire-tested" RESISTORS

TUBULAR—Round Wire: Vitreous Enamel—Fixed and Adjustable—5 thru 1500 Watts. Taps and non-inductive winding available.

TUBULAR—Ribwound: Vitreous Enamel—Fixed and Adjustable—35 thru 2000 Watts. Taps and non-inductive winding available.

OVAL: Vitreous Enamel—Fixed and Adjustable—10 thru 75 Watts. Taps and non-inductive winding available.

AXIAL LEADS: Vitreous Enamel—Fixed only—1 thru 30 Watts. Non-inductive winding available.

"W" SERIES: Silicone Coat—Fixed only—5 thru 30 Watts. Taps and non-inductive winding available.

"BATHTUB": Ceramic Case—Fixed only—4 thru 2 Watts.

"ENCAPSULATED": (in Ceramic Core)—Fixed only—thru 100 Watts.

"TOPSIDE": Ceramic Outer Tube—Fixed only—10 thru 25 Watts.

STRIP: Cement and Sand or Silicone Coat—Fixed—thru 30 Watts. Taps available.

FUSE RESISTORS: Strip Type—Cement and Sand Coat—4.7 thru 150 Ohms. Patented no-flame construction.

HEAVY-DUTY GRID RESISTORS: For Motor Control—Non-inductive Load Banks, Welders, etc.

RHEOSTATS: Heavy-duty push-pull type.

ALSO MIL-R-26C and NAVY TYPE 15109A RESISTORS

Heat-Sink Type Resistors with Potted Winding in Metal Casing

25 watts and up

Heavy duty resistors with the resistance winding imbedded in a high grade potting compound. The resistors are especially useful where extremely heavy-duty operation is required and where one or more resistors are desired in one case. Ratings start at 25 watts. The resistors can be furnished with quick-connect terminals, standard tabs, or studs.

MILWAUKEE RESISTOR COMPANY

Milwaukee, Wisconsin

PENN

RESISTOR CORP.

designs and produces Fixed Film and Precision Power Wire Wound Resistors to deliver total performance under all operating conditions. Each step of manufacture, from the selection of materials through final testing and inspection, contributes to PENN's consistent delivery of the most quality, reliability and stability for the price. Whatever your application, it will pay you to contact PENN. Write, or call 215-855-9516.

FIXED FILM FCA

FCA Deposited Carbon Coated Type Resistors offer great stability and extended reliability and accuracy, particularly in high frequency circuits where wire wound or other resistors are not applicable. Widely used in amplifier and computer circuits, voltmeter multipliers, filtering and other metering circuits.

ELECTRICAL & MECHANICAL DIMENSIONS

FIXED FILM FCE

Series FCE Deposited Carbon Insulated Resistors deliver high stability and accuracy, meet MIL-R-10509D requirements. Resistance element encased in molded epoxy sleeve and end-sealed, completely protected from moisture, salt spray, and other environmental conditions.

ELECTRICAL & MECHANICAL DIMENSIONS

HERMETIC SEALED FCH

Type FCH Hermetic Sealed Carbon Film Resistors provide extra stability under adverse conditions in critical circuits, meet MIL-R-10509D specifications for characteristic B, and fit high frequency applications not suited to wire wound resistors.

ELECTRICAL & MECHANICAL DIMENSIONS

TYPE	WATTS @ 70°C	W.V. D.C.	RESISTANCE		DIMENSIONS

Leads: #22 AWG Tinned Copper on 1/8 watt, #2 AWG on others.

WIRE WOUND WS

Type WS Fixed Wire Wound Precision Power Resistors are supplied for lead mounting, and meet all applicable MIL-R-26C requirements. Impervious to moisture and salt spray, and highly resistant to abrasion, they are wound on special ceramic cores and coated with multiple layers of specially formulated silicone.

STACKPOLE

FIXED
COMPOSITION
RESISTORS

Stackpole Coldite 70+ Resistors offer superior performance in terms of long life, moisture resistance, shelf life, and other important characteristics. Available in 1/4, 1/2, 1, and 2 watt insulated types in resistance values with 5%, 10% and 20% tolerances as shown below.

EASIEST SOLDERING

is assured thanks to an exclusive extra solder coating applied after the usual tin dipping. Leads of Stackpole Coldite 70+ Resistors solder readily by any method—dip or iron—stay tarnish free even after months in storage. And, their baked-on color code resist solvent scrubbing operations to maintain uniform, attractive appearance.

320° min. between stops
(continuous rotation available)
-65°C to +175°C
0.500" diameter x 0.170" height
\$3.95 (84-3-8)

SPECTROL**TRIMMING POTENTIOMETERS**

Stocked at your local distributors for immediate off-the-shelf delivery

MODEL 50 Square-Military**Electrical Specifications**

Standard Resistance Range 50 Ω to 50K
 Resistance Tolerance $\pm 5.0\%$ ($\pm 1.0\%$ available)
 Power Rating 1.0 watt at 50°C

Mechanical Specifications

Number of Turns 25 ± 2
 Rotation Continuous
 Operating Temperature Range -65°C to $+150^\circ\text{C}$
 Case Dimensions $\frac{3}{8}" \times \frac{3}{8}" \times \frac{3}{16}"$ (50-1-1)
 Weight 1.75 grams
 Price in 1-9 Quantities \$7.50 (50-1-1)

50-1-1
Teflon
insulated
leads

50-3-1
Printed
circuit
pins, 180°

50-4-1
Printed
circuit pins,
base

50-1-1P
Panel mt.

MODEL 55 Square-Military

Meets MIL-R-27208

Electrical Specifications

Standard Resistance Range 50 Ω to 50K
 Resistance Tolerance $\pm 5.0\%$ ($\pm 1.0\%$ available)
 Power Rating 1.5 watts at 70°C

Mechanical Specifications

Number of Turns 25 nominal (42 available)
 Rotation Stops, clutch standard
 (continuous rotation available)
 Operating Temperature Range -65°C to $+150^\circ\text{C}$
 Case Dimensions $\frac{1}{2}" \times \frac{1}{2}" \times \frac{3}{16}"$ (55-1-8)
 Weight 2.5 grams
 Price in 1-9 Quantities \$6.35 (55-1-8)
 \$6.85 (RT22C2L)

55-1-8
55-1-12

55-1-8-XXP
Panel mt.

MODEL 80 Round-Military**Electrical Specifications**

Standard Resistance Range 50 Ω to 50K
 Resistance Tolerance $\pm 5.0\%$ ($\pm 1\%$ available)
 Power Rating 1.0 watt at 50°C

Mechanical Specifications

Number of Turns 1
 Rotation 320° between stops
 (continuous rotation or
 stops/clutch available)
 Operating Temperature Range -65°C to $+105^\circ\text{C}$
 Case Dimensions .345" diameter to .241" height
 Price in 1-9 Quantities \$6.00

80-3-4
TO-9 Transistor Type
1½" solid wire leads

MODEL 82 Round-Industrial**Electrical Specifications**

Standard Resistance Range 50 Ω to 10K
 Resistance Tolerance $\pm 10\%$
 Power Rating 0.5 watt at 50°C

Mechanical Specifications

Number of Turns 1
 Rotation 320° between fixed stops
 (stops/clutch available)
 Operating Temperature Range -65°C to $+105^\circ\text{C}$
 Case Dimensions .345" diameter to .241" height
 Price in 1-9 Quantities \$4.00

82-3-9
TO-9 Transistor Type
1½" solid wire leads

SPRAGUE RESISTORS

KOOLOHM® AXIAL-LEAD WIREWOUND RESISTORS FOR INDUSTRIAL APPLICATIONS

- Types 450E, 452E, 454E, 456E and 458E are Standard Resistors. Types 451E, 453E, 455E, 457E and 459E are Non-Inductive Resistors

- Insulated-Shell Design for Easy Mounting
- Feature Improved Internal Construction in Which Windings and Leads are Welded to End-Cap for Superior Mechanical Strength
- Ceramic-Insulated Wire is Space Wound and Cemented, to Prevent Turn-to-Turn Shorting. Permits Higher Resistance Values in a Given Size Than in Conventional Resistors
- Non-Porous Tubular Ceramic Shells Sealed With High Temperature Silicone Cement
- Unexcelled Insulation and Mechanical Protection. Can be Mounted in Direct Contact With Chassis
- Call Your Sprague Industrial Distributor for Quantity Prices.
- For Complete Technical Details, Refer to Latest Issue of Sprague Engineering Bulletin 7300

SPRAGUE RESISTORS

BLUE JACKET® INDUSTRIAL WIREWOUND RESISTORS

- Improved Minified Resistors Designed for Thorough Reliability and Stability Under Extreme Operating Conditions
- Matched Coefficient of Expansion Allows Uniform Expansion of Vitreous Enamel Coating, Ceramic Base, and End Caps, Eliminating Cracking, and Protects From Fumes and Humidity
- Windings and Leads Welded to End-Caps for Superior Mechanical Strength
- For 2BJ, 3BJ, 5BJ and 10BJ Commercial or Service Equivalents to These Resistors, Refer to the Latest issue of Sprague Catalog C-616
- See Your Sprague Industrial Distributor for Quantity Prices

SPRAGUE RESISTORS

FILMISTOR® METAL-FILM RESISTORS

- Filmistor® C Series Resistors are Ideal for Circuits Requiring High Accuracy, Reliability, and Stability with Low Temperature Coefficients.
- Physical Size of Types RN55 and RN60 is Compatible With Those of Other Resistors, Capacitors, and Diodes for "Cordwood" Packaging.
- Designed to Meet the Stringent Performance Requirements of Spec. MIL-R-10509-D.
- Low Self-inductance, Low Distributed Capacitance. Equal or Surpass the Characteristics of Precision Wirewound Resistors, Yet Are Smaller in Size.
- Metallic Resistive Film is Firmly Bonded to Special Ceramic Core, Automatically Spiraled to Desired Resistance Value.
- Tough Molded Shell Provides Protection Against Mechanical Damage as Well as Catastrophic Failures From Electrolysis Caused by Moisture Penetration.
- Standard Resistance Tolerance, $\pm 1\%$
- For Complete Technical Data, Refer to Latest Issue of Engineering Bulletin 7025
- Call Your Sprague Industrial Distributor For Quantity Prices.

1/10 WATT METAL FILM TYPE 416E/RN55C

.095" Dia. x .250" Long
49.9 ohms thru .1 meg.

1/8 WATT METAL FILM TYPE 418E/RN60C

.135" Dia. x .400" Long
49.9 ohms thru 499 K

1/4 WATT METAL FILM TYPE 419E/RN65C

.200" Dia. x .600" Long
49.9 ohms thru 1 meg.

1/2 WATT METAL FILM TYPE 420E/RN70C

.250" x Dia. .750" Long
49.9 ohms thru 1 meg.

1 WATT METAL FILM TYPE 421E/RN75C

.375" Dia. x 1.062" Long
49.9 ohms thru 2 meg.

VICTORY ENGINEERING CORPORATION

SPRINGFIELD, NEW JERSEY

THERMISTORS • VARISTORS

VECO DESIGNER'S KITS

A variety of Thermistors or Varistors to simplify the selection of the proper unit to use. Each kit contains schematics and technical characteristics.

KD25	13 THERMISTOR DISKS	\$10.50
KP50	6 THERMISTOR PROBES	14.50
KR75	8 THERMISTOR RODS	8.75
KT81	8 THERMISTOR BEADS	19.50
KW125	12 THERMISTOR WASHERS	13.50
	(6 TYPES WITH MTG. KIT)	
KV1001	9 VARISTOR DISKS	7.50

PRODUCT

RELIABILITY

VECO TECHNICAL LITERATURE

V 42 Price \$1.00
VECO Thermistor-Varistor Data Book: Contains historical background, technical data, typical circuits, curves, and a complete bibliography.

V 1133 Price \$2.00
VECO Thermistor Circuit Applications and Characteristics: A "must" for designing and developing circuits requiring the use of VECO Thermistors. Described, step by step, are schematics covering zero-power, voltage-current, and current time applications using VECO Thermistors.

V 1166 Price \$1.00
The Theory concerning VECO Thermistor type hypsometers: A treatise concerning the use of VECO Thermistors to measure altitude by means of pressure. (VECO thermistors act as transducers, converting pressure measurement to an electrical resistance output.)

VECO EXPERIMENTOR'S KITS

Each kit includes forms showing typical circuitry and specific characteristics of units in kit.

M168 Experimentor's Kit, 7 assorted units for \$ 5.00 net, p.p.d.
M168A Experimentor's Kit, 10 assorted units for \$10.00 net, p.p.d.

VARISTORS

CHOPPERETTES • TEMPERATURE SENSING DEVICES

VITREOUS ENAMELED FIXED RESISTORS

Fixed wire wound, vitreous enameled resistors. Stock resistance values range from 1 ohm thru 250,000 Ω . Standard tolerance of $\pm 5\%$. Closer resistance tolerances available on order.

The sturdy terminals are hot-tinned for soldering ease, and the holes in the terminal are of suitable size to accommodate screws.

Values of resistance listed are in stock for immediate delivery. Special resistance values or terminal dimensions are given prompt attention and Tru-Ohm's famous delivery is assured.

VITREOUS ENAMELED ADJUSTABLE RESISTORS

These resistors are used in applications where it is necessary to make adjustment in resistance periodically; where intermediate values of resistance are required; or when provided with more than one adjustable lug as multiple tap resistors.

The wattage rating between the adjustable band and either end terminal is proportional to the distance between the terminal and the band and should be considered when figuring any maximum section wattage dissipation.

VITREOUS ENAMELED FIXED RESISTORS

Midget Oval Type MOR-Series

These units are very desirable for applications where the size of components must be kept to a minimum. Integral mounting brackets are supplied standard and are designed for stack mounting

of the resistors. Three standard sizes are available. Ratings are based on metal panel mounting, on plate $10'' \times 10'' \times .040''$.

VITREOUS ENAMELED RESISTORS

Axial Lead Val-Type

The cores are of a high grade ceramic material to which are affixed lead and cup assemblies of low expansion alloys. After winding, the units are coated with high temperature vitreous enamel which makes them resistant to humidity. This type unit is capable of continuous operation at 340°C.

This type resistor lends itself to application where size is a factor in the design and miniaturization of equipment. They are capable of dissipating power equal to their larger counterpart tab type terminal resistors, but because of the axial lead construction they require less space for mounting.

WATTS	DIAMETER "D"	LENGTH "L"	LENGTH "A" ± 1/16"	LEAD SIZE A.W.G. #	MIN. RES.	RES. MAX.
3	1/4	9/16	1-1/2	#20	0.1 Ω	10,000 Ω

Metohm[®] RESISTORS

Metal Film Precision Type

THE STANDARD OF QUALITY FOR MILITARY AND INDUSTRIAL PURPOSES

FEATURES

- High stability and reliability
- Designed to exceed MIL-R-10509E
- Close resistance tolerance
- Wide range of resistance values
- Stock or made-to-order types
- 1/10, 1/8, 1/4 and 1/2 watt sizes

In critical space-age electronic circuitry, METOHM metal film precision resistors guarantee high reliability, high stability, close accuracy, low TC and miniature size. Metohms are precision made under "white-room" conditions in the industry's most modern plant.

MIL SPECS. — All Metohm precision resistors are designed to exceed MIL-R-10509E char. C, D and E.

POWER RATING — is based on full rated load in an ambient of 125°C.

WELDABLE LEADS — gold plated Dumet leads and nickel "270" leads are available for weldable applications.

STOCK METOHMS — RN55, 60, 65 and 70 Metohm resistors, char. C, TC Code T2 (± 50 PPM) are stocked in MIL standard values listed below. Standard tolerance is $\pm 1\%$.

MADE-TO-ORDER TYPES — see data in accompanying tables for non-stock resistors available in production order quantities.

CONFORMAL COATED TYPES — also available in 1/20, 1/10, 1/8, 1/4 and 1/2 w. sizes. Durable solvent resistant coating allows smaller size. Ideal for micro module circuitry where space is at a premium.

RATINGS AND SIZES — METOHM Metal Film Precision Resistors

METOHM Type	MIL Type	Watt Rating†	Resistance Values		Max. Voltage Rating (Continuuous)	Standard Resistance Tolerance	Temperature Coefficient	A Length	B Diameter	C Axial Lead	
			Max. Ohms	Min. Ohms						Length	Diameter
WL 55	RN 55	1/10	20	301K	200v	1%*	**	.260 $\pm$.010	.120 $\pm$.005 $\pm$.015	1½ $\pm$ ¼	.025 $\pm$.002 (#22 AWG)
WL 60	RN 60	1/8	20	500K	250v	1%*	**	.406 $\pm$.015	.130 $\pm$.015	1½ $\pm$ ¼	.025 $\pm$.002 (#22 AWG)

WARD LEONARD

Axiom[®] RESISTORS
Vitreous Enamel Wire-Wound Power Type

AXIOM FEATURES

- Vitrohm enamel construction
- Space saving design
- 5 stock sizes; 8 made-to-order sizes
- Wide range of resistance values
- Standard tolerance $\pm 5\%$

Axiom, the miniaturized, space-saving power resistor line is designed for automation, printed circuits and advanced miniaturization use. Recommended for electronic and industrial use where high O.L. capacity and high stability are a "must". Four stock sizes and seven made-to-order sizes. Order by Stock Type and Ohms.

Order by Type Number and Resistance Value.

S-COAT FEATURES

- Low TC: ± 20 PPM
- Close accuracy: $\pm 1\%$ standard, to $\pm 0.1\%$ special
- 1000 volt dielectric—"V" block test
- Wide resistance ranges
- 8 space-saving sizes

S-COAT RESISTORS

Silicone Precision Power Type

S-Coat resistor line represents the latest advance in silicone coated wire-wound power resistor design. S-Coat resistors are precision-made for precision applications requiring characteristics such as low TC, close tolerance, no noise, low drift, high O.L. capacity, vibration resistant and zero voltage coefficient. Order by Type Designation, Ohms and Accuracy if other than $\pm 1\%$.

WARD LEONARD

Types 5F, 10F, and 20F.
Furnished with wire terminal leads. Brackets supplied on request.

Types 10A, 25A, 50A, 80A, 100A, 160A, 200A. Furnished with mounting brackets and one adjustable band.

Vitrohm® RESISTORS

Vitreous Enamel Wire-Wound Power Type

Vitrohm fixed and adjustable power type resistors from 5 to 200 watts are designed and produced for high reliability. All cores, terminals and vitreous enamels are manufactured by W/L to guarantee top quality.

STRIPOHMS

Order by Type Number and Resistance Value

features

- 6 space-saving sizes
- low mounting brackets
- strong flattened cores
- suitable for multiple stacking
- Vitrohm construction

Vitreous enameled wire-wound resistors built on a strong refractory core, and provided with low mounting brackets. Particularly suited for applications where space is limited. Specially adapted to stacking for networks.

Vitrohm® RING RHEOSTATS

Ward Leonard Ring Rheostats are especially suited for use in electronic and electrical circuits where gradual and positive resistance change is essential. Balanced contact arms, self-lubricating metal graphite contact shoes, and no backlash in the drive shaft combine to assure uniform contact pressure and smooth operation.

Standard shaft length for back-of-board mounting on 1/4" panel.

Standard Resistance Tolerance $\pm 10\%$.

DL100W	100 Watt	13.70	12" x 1"
DL500W	500 Watt	46.20	18" x 2"
DLSP-50	150 Watt	26.25	13-1/2" x 1"

FUSED RESISTORS

MODEL	DESCRIPTION	LIST	DLR.
F4.7	4.7Ω - 5 Watts	.55	.33
F5	5Ω - 5 Watts	.55	.33
F5.6	5.6Ω - 5 Watts	.55	.33
F6	6Ω - 5 Watts	.55	.33
F7	7.5Ω - 3 amperes	.72	.43
F80	7.5Ω - 3 amperes	.55	.33
F9	9Ω - 5 Watts	.55	.33
F10	10Ω - 5 Watts	.55	.33
F10-45	4.5Ω - 10 Watts	.75	.45
F18	18Ω - 5 Watts	.55	.33
F22	22Ω - 5 Watts	.55	.33
F47	47Ω - 5 Watts	.55	.33
F100	100Ω - 5 Watts	.55	.33
F150	150Ω - 5 Watts	.55	.33
F12A	100Ω - 0.12 amperes	.55	.33
FRK	Kit of 10 Resistors	5.00	3.00
F24.7	4.7Ω - 3 amperes	.36	.22
F25.6	5.6Ω - 3 amperes	.36	.22
F27.5	7.5Ω - 3 amperes	.36	.22
F29	9Ω - 3 amperes	.36	.22
F24.7-5	Pk. of 5, 4.7Ω-3 amps	1.60	.99
F25.6-5	Pk. of 5, 5.6Ω-3 amps	1.30	.99
F27.5-5	Pk. of 5, 7.5Ω-3 amps	1.60	.99
F29-5	Pk. of 5, 9Ω-3 amps	1.60	.99
FB1	Universal replacement	2.00	1.20
F28	No. AWG 28 Wire, 5 pcs.	.25	.16
F15-7.5	7.5Ω - 15 Watts	.96	.58
F7-5	5Ω - 7 Watts	.72	.43

BL-5	Pk. of 5 chem. Fuses	3.95	2.37

WIREWOUND RESISTORS

MODEL	DESCRIPTION	LIST	DLR.
6W-B	6W Bendholm, 34 values	.49	.30
6WB-34	6W Bend. 34 vals. on card	16.60	9.95
148	41Ω - 25 watt	.85	.51
151	51Ω - 30 watt	.95	.57
MO1	59Ω - 25 watt	.85	.51
E10	10 watt - 8 values	1.40	.84
30W	30W - 18 values	1.60	.96
25W	31Ω or 2250Ω - 25 watt	.85	.51
25W-3	3pk. Dropping 41, 51, 59	2.50	1.50
25W-DR	3-25W - 42 values	1.10	.66
VR1	10W 48 values, -5 to 15Ω	1.10	.66
VR2	10W 48 vals. -5 to 150Ω	1.10	.66
VR3	10W 48 vals. -500 to 15KΩ	1.10	.66
VR4	10W 48 vals. -500 to 15KΩ	1.10	.66
VR5	10W 12 vals. -3K to 50KΩ	1.10	.66
WR-50	5-15W 50 values Each	.55	.33
WR-50C	Card of 50 values	27.50	16.50
WS	2W 21 vals. - .22 to 10Ω	.36	.22

SQUARE OHMS

MODEL	DESCRIPTION	LIST	DLR.
5W-SQ	5W 69 Values 1-6KΩ	.36	.22
10W-SQ	10W 85 Values 1-25KΩ	.40	.24
15W-SQ	15W 87 Values 1-35KΩ	.50	.30
20W-SQ	20W 87 Values 1-35KΩ	.65	.39
25W-SQ	25W 121 Values 1-50KΩ	.75	.45

CARBON BAR RESISTORS

MODEL	DESCRIPTION	LIST	DLR.
2M	2 meg - 4 watts	1.10	.66
2L	2 meg - 4 watts	1.50	.99
1W	2, 2 1/2, 3, 4, 4 1/2, 5, 5 1/2 k	1.10	.66
1W2	2, 2 1/2 - 4 resistors 1 watt	1.10	.66
1W3	3, 3 1/2 - 4 resistors 1 watt	1.10	.66
1W4	4, 4 1/2 - 4 resistors 1 watt	1.10	.66
1W5	5, 5 1/2 - 4 resistors 1 watt	1.10	.66

CARBON RESISTORS

MODEL	DESCRIPTION	LIST	DLR.
CA	1/2W ± 10% 77 vals. bulk	.20	.12
CB	1W ± 10% 77 vals. bulk	.30	.18
CC	2W ± 10% 77 vals. bulk	.40	.24
CE	1/2W ± 5% 153 vals. bulk	.40	.24
CA-6	1/2W ± 10% 77 vals. 6 pk.	.70	.42
CB-4	1W ± 10% 77 vals. 4 pk.	.80	.48
CC-3	2W ± 10% 77 vals. 3 pk.	.85	.51

PRICES SUBJECT TO CHANGE WITHOUT NOTICE.
FOR A COMPLETE LISTING OF EXACT REPLACEMENT COILS ASK YOUR JOBBER FOR OUR COIL CROSS REFERENCE.

WORKMAN PART NUMBERS FOR COILS, FUSING DEVICES, WIREWOUND AND SPECIAL PURPOSE RESISTORS ARE LISTED IN HOWARD SAM'S PHOTOFACTS AND COUNTER FACTS.

—For Replacement—not for new design.

Note: (1) A—alloy
P—planar
E—epitaxial
DJ—diffused junction
GB—gold bonded
J—junction

Note: (2) SI—Silicon
Ge—Germanium
CS—Cadmium sulfide
PbS—Lead sulfite

Note: (3) T—transistor
D—diode
Z—zener diode
P—photosensitive device
R—rectifier
V—varactor diode

ASTRO DYNAMICS, INC.

HEAT SINKS

forced convection

2401-12B

2401

2402

2403

The Models 2401, 2402, and 2403 utilize a light compact integrated blower, which maintains the transistor shelves at minimum temperature even under conditions of high heat load. This modern highly efficient concept is achieved by means of a revolutionary production method which permits the attachment of many fins to a base, giving a large surface area for cooling. Banks of four, eight, twelve or sixteen heat sinks may be provided with each sink electrically insulated from the other.

PRICES START AT \$1.50

2601-40B

PRICES
START AT
\$5.10

The 2601 Series employs the same unique design of the 2401. Within relatively small physical area, up to 64 sinks may be mounted to one fan, insulated electrically, separated physically, with each mounted component completely accessible for servicing, replacement, or experimental monitoring.

natural convection

2501

2502

The 2501, 2502, and 2503 Heat Sinks, as a result of the patented "T" construction, have unusually large surface areas providing the same dissipation as commercial units twice the size. They are designed to be used where the maximum dissipation is needed in the smallest physical area. A variety of semi-conductor hole patterns, lengths, and mounting kits are available on request.

2503

	2501	2502	2503
Overall Dimensions	4 x 3 x 1 1/16	4 x 3 x 1 1/4	5 1/2 x 3 x 1 1/4
Weight	.3 lbs.	.4 lbs.	.56 lbs.
Surface Area	62 sq. in.	100 sq. in.	127 sq. in.

PRICES START AT \$1.04

2504

2505

The 2504, 2505, 2506, 2510, 2513, 2515, and 2518 are designed to answer the need of versatile, inexpensive, highly efficient heat sinks. They incorporate a number of design features including universal transistor hole patterns. More efficient than their commercial counterparts, the low selling prices of these units make it unnecessary and undesirable to utilize standard commercial units or design your own units. These models are also available in a variety of lengths and hole patterns.

2507

The Model 2507 Heat Sink is designed to be used in systems where the efficient operation of high power components demands a superior system of free convection cooling. It is ideally suited for use with high power silicon rectifiers with a mounting surface wide enough to fit all of the larger semiconductor devices. The mounted components remain completely accessible for wiring, monitoring, or replacement.

The versatility and high thermal efficiency of the 2509 heat sink stack simplifies the majority of problems in circuit design and component packaging.

Units are available, assembled or unassembled, to suit the customers needs.

PRICES START AT \$3.00

2509

2510-BR-1
\$1.302510-BR-2
\$2.30

The 2510-BR bridge assembly provides high thermal efficiency in a new compact inexpensive package. The flexibility of various components and mounting hardware permit a wide selection of assembly combinations. The special fin design optimizes the effect of the heat transfer coefficient available in free convection flow.

2701...\$.65

2702...\$.70

2703...\$.70

2704...\$.70

This new series of small, light natural convection heat sinks provide the maximum ratio of heat dissipation to volume occupied. Their configuration represents a major improvement over conventional designs, — the fins are designed to permit optimum free air flow and minimum conduction losses.

Model 2700 heat sinks will accommodate both the TO-5 and the TO-9 transistor cases. Mounting holes for the transistors are also made to customer specifications.

2802...\$.65

2801...\$.65

The Model 2800 series heat sinks provide a combination of effective heat dissipation with easy, secure mounting in a compact space.

Unlike conventional transistor mounting clips which cannot function adequately as heat sinks, the Model 2800 series effectively conduct heat from the transistor by providing sufficiently large surface contact with the chassis or other metallic mounting area.

Both Model 2801 (1 transistor heat sink) and Model 2802 (2 transistor heat sink) are designed to accommodate TO-5 and TO-9 transistor cases, but mounting holes for other sizes are available to customer specifications.

2201
\$.12

2901

2902

Although the Model 2201 retains the proven reliability of the "gear" design, it has by virtue of its angled fins, increased the area available for heat dissipation. The additional area results in an efficiency increase of approximately 10% without increasing the overall size of the Heat Sink.

The 2900 series heat sinks were designed to be used either as natural convection heat dissipators or with forced air in very compact assemblies. These units are easily mounted and extremely well suited for very high packing densities. In particular, they are suited for circuit board applications. The 2900 series heat sinks are manufactured with a black ebanol surface finish.

Physical dimensions: 2901 9/16 x 1 13/16 dia.
2902 1 x 1 1/8 x 1 1/2

CONANT *Miniature Metallic Rectifiers*

CONANT MINIATURE METALLIC RECTIFIERS

All Conant rectifiers are manufactured to the highest quality standards from individually tested and graded cells. Copper oxide cells are produced by the exclusive Conant Process and have 24K gold contacts applied in high vacuum.

The Conant Complete Color Code permits identification of rectifier type by color and physical form. Only basic standard rectifier types are listed below. Many other standard catalog items are available and we are prepared to produce special items to meet customers' special requirements.

TRANSISTOR MANUAL

19 fact-filled chapters containing transistor theory, specifications, characteristics, and applications. Valuable information needed by every engineer, hobbyist, experimenter. Price \$2.00.

NEW G.E. GE-504 UNIVERSAL RECTIFIER

A silicon rectifier with a 45-amp surge rating. Recommended as a replacement for all selenium, germanium and silicon rectifiers used in TV receivers. The 45-amp surge rating eliminates the need for the surge limiting resistors normally required when silicon rectifiers are used. PIV is 400 volts; max. I_{DC} , 750 ma. Shipping weight: 2 oz. List Price \$2.00

G.E. SILICON AND GERMANIUM RECTIFIERS

These top hat, hermetically sealed rectifiers are designed for general-purpose applications requiring maximum economy.

G.E. SEMICONDUCTOR REPLACEMENT KIT

Model K-915A convenient kit covers a majority of entertainment-type semiconductor replacement needs — an ideal aid for radio and TV servicemen. Contains 22 units of service-designed semiconductors including 7 universal transistors, 3 silicon rectifiers, 6 crystal diodes, 5 dual diodes, and 1 power transistor. Units are housed in a sturdy cabinet with 15 clearly labeled drawers. Every unit always within hand reach. Cabinet size, $8\frac{1}{2}$ x $12\frac{1}{2}$ x 9". Shipping weight: 4 lbs. List Price \$38.83.

"5A" SERIES SILICON RECTIFIERS

FIG. 4

The Universal combines high power capability (to 1000 ma) and peak surge current capacity to 50 amps (about 10 times standard units) in a rugged miniaturized package. It will replace virtually any rectifier, selenium or silicon, in all circuits drawing up to 500 ma dc, including TV, radio, hi-fi systems, filament supplies and motor control. Type 5A4D is recommended for radio, TV and other systems not equipped with a power transformer. For color TV, citizens band radios and similar systems equipped with transformer, the Type 5A6D is recommended.

**Current rating shown is for resistive and inductive load at 50°C. For capacitive load use 80% of value.

SELENIUM RECTIFIER STACKS

FIG. 8

Combine reliability with economy and small size

Compact, high density types designed for long life and reliability in radio, TV, record players, amplifiers and experimental applications. Output ratings from 50 ma to 650 ma at 130 volts RMS input. Economy, stable characteristics, and negligible leakage and aging of selenium provides long, economical rectifier operation. Replacement type rectifiers are individually boxed and are furnished with mounting bracket and hardware.

TRANSISTOR RADIO SOLAR PAKS

I.R.'s Transistor Radio Solar Paks are available in two of the most popular voltage ratings: 4.5 volts and 9 volts. Both types are designed to feed a constant charge to the batteries while the Solar Paks are supplying the radio with its power. Both types are housed in a handsome plastic case which protects the solar cells from damage.

IR COMMERCIAL ZENER DIODES

The Zener diodes listed are a "commercial version" of the JEDEC—military types. Their performance is comparable for practically all commercial applications where environmental temperature extremes do not prevail. All devices listed are selected to plus and minus 10% tolerances. Five percent tolerance values are available on special order at an additional charge of 50¢ per unit.

SELENIUM BATTERY CHARGER RECTIFIER

Type JD 4346B is the most universal rectifier for commercial "fast chargers" as used in service stations. It fits most models without circuit or mechanical modifications. Single plate rectifiers are used for replacement of low-current chargers such as used at home, as "trickle" type in garages and for constant current models. By using single plates of proper size, any current rating and circuit configuration (e.g. center tap, bridge, etc.) may be assembled.

MALLORY

SILICON RECTIFIERS

PRE-PACKAGED RECTIFIER CIRCUITS

Mallory pre-packaged rectifier circuits are available in three basic styles: voltage doubler, full-wave rectifier, and full-wave bridge rectifier. Supplied in pre-formed molded case (.688" L x .469" H x .25" T) with 1½" (min.) leads. Pel-Cel® rectifiers are mounted on heat sinks before encapsulation. Individual cells are rated at 750 ma @ 25° C (full-wave circuits rated 1.5 amps @ 25° C).

*DC current ratings based on conduction cooling—plates not more than ½" from cabinet wall or other large area member.

**Reduces by 55% for ½-wave capacitive and battery load.

†In center-tap, full-wave circuits, AC voltages shown are for full transformer secondary.

‡One insulated and cycled cell per plate assembly; R26T has two.

†Two plate assemblies per circuit for full-wave center tap, four per circuit for full wave bridge except R26T has one per circuit center tap, one and two for bridge.

MAGNESIUM-COPPER SULFIDE RECTIFIERS

Mallory magnesium-copper sulfide rectifiers are assembled in stacks under extreme pressure for maximum resistance to physical and thermal shock. They contain no temperature sensitive films and may be operated continuously over a very wide temperature range from -90° to +265° F. Unlike other rectifiers, MgCuS types will "self-heal" after exposure to overvoltage surges. MgCuS rectifiers are ideal for electroplating and other heavy-duty industrial applications.

Where reliability is mandatory and operating conditions are severe. They are also widely used where momentary or inadvertent short circuits are to be expected such as in battery chargers, model railroads, and model automobile courses. Types shown are available from stock. Hundreds of other ratings and mounting arrangements are available on special order. MgCuS stacks should always be mounted so that the individual plates are vertical.

Mounting Prefix: IB = Insulated Bolt; F = Grounded Foot; IF = Insulated Foot; IS = Insulated Stud. P suffix designates reverse polarity stacking. Center terminal is DC positive. J suffix designates universal construction with loose mounting feet for foot, bolt or stud mounting replacement.

†To determine AC Amps: Multiply the DC amps by the following factors: Inductive load by 1.1; resistive load by 1.2; capacitive load by 1.4.

MALLORY ZENER DIODES

ZA

ZD

ZS

Diffused silicon junction zener diodes in two power ratings (1 and 10 watts) and three standard case styles. Offer low thermal resistance and excellent forward characteristics. Exceed military requirements. Rugged cell construction for exceptional surge handling capability. **Tolerance:** No suffix (1N3016), $\pm 20\%$; suffix A (1N3016A), $\pm 10\%$; suffix B (1N3016B), $\pm 5\%$.

• TYPE ZA

High temperature regulator meets commercial, industrial, computer and home instrument requirements. Transistors molded for moisture-resistant, high strength package. Non-conductive, eliminating need for insulating sleeves. Low forward voltage drop and high temperature operation. **Power Dissipation:** 1 watt. **Size:** .220" dia. x .375" l., max.; leads $1\frac{1}{4}$ " lg. minimum.

TYPE ZD

EIA standard DO-13, flangeless hermetically-sealed package. **Power Dissipation:** 1 watt. **Temperature Range:** 65°C to -175°C , operating in storage. **Size:** .235" dia. x .357" l., max.; leads $1\frac{1}{4}$ " lg., minimum.

TYPE ZS

Series 1N2970 thru 1N3015 EIA standard DO-4, all-welded package for heavy-duty stud mounting. Very low thermal resistance characteristics. **Power Dissipation:** 10 watts. **Temperature Range:** 65°C to -175°C . **Polarity:** Cathode to stud as listed. Anode to stud available on special order, add suffix R (example: 1N2970R, 1N2970RA, etc.); same price. **Size:** $\frac{1}{8}$ " hex x $\frac{3}{4}$ " h., from base; #10-32 NF threaded stud $\frac{1}{4}$ " lg. HDO-4 hardware kit supplied.

DIODES, GERMANIUM AND SILICON LOW POWER

A wide choice of popular characteristics in low power germanium and silicon diodes is available immediately from Ohmite stock. Both the germanium and silicon types are supplied in the subminiature, hermetically sealed glass envelope (see diagram). The silicon envelope is light-shielded.

High stability is achieved through temperature cycling and aging. All units must meet severe environmental, electrical and mechanical requirements with a liberal safety factor. Stock listings include JAN types meeting the requirements of military specifications MILE-1D and MIL-S-19500C.

GERMANIUM DIODES—Ohmite supplies the gold-bonded variety. Power rating is 80 mw at 20°C except where otherwise indicated. Operating temperature range is -65°C to +90°C.

SILICON DIODES—Employ either the alloy or diffusion method of junction formation. Power rating is 400 milliwatts at 20°C except where otherwise indicated. Operating temperature range is -65°C to +150°C.

Hundreds of other diodes are available on ten day delivery (request Ohmite bulletin 802). Request Catalog 801 for germanium diodes and Catalog 804 for silicon diodes.

①Video Detector Test ②0.2 μ sec. ③0.5 μ sec. ④0.4 μ sec. ⑤0.3 μ sec. ⑥75°C ⑦Consists of two matched diodes shipped as a pair with the forward current at 1 volt of the lower resistance diode within 10% of the current of the higher resistance diode. ⑧Duty cycle must be adjusted in testing at these high forward currents so that average power dissipated does not exceed 80 mw. *At 0.25 volts. †At 0.8 volts. ‡At 1.1 volts. #600 mw.

DIRECTRON

SILICON POWER RECTIFIERS

HY-A-SIL
High - Ampere - Silicon

FEATURES

- High operating temperature, 190°C (Up to 120°C ambient)
- High operating voltage (Up to 600 p.i.v.)
- High efficiency (99% compared to about 75% for selenium)
- Excellent regulation (4% compared to about 15% for selenium)

All above ratings based on 30°C ambient. Fan-cooled ratings based on air velocity of 1000 linear ft/minute. For resistive or inductive loads, as rated. For capacitive or battery loads, derate ampereage 20%. Doubblers, triplers, 3 phase half wave and 3 phase center-tap also available. Custom-built stacks, 24 hour service.

SCHAUER INSTRUMENT RECTIFIERS

TYPE A4A

TYPE BP2B

TYPE C4A

Schauer copper oxide rectifiers for instrument and other uses are processed and individually tested to meet the requirements of the user. Versatile processing techniques make possible variations in characteristics for special or unusual applications. Each rectifier is rated conservatively for long life and dependable operation. Lead lengths to customer specifications.

"A" SIZE CELLS have good frequency response above the audio range and can be used at higher frequencies. Recommended for meter applications needing 1MA or less for operation. Can be used for other applications requiring up to 5MA.

"B" SIZE CELLS (encapsulated) are for meter, relay and other applications requiring 1MA up to their maximum rating. Recommended for commercial and low audio frequency operation.

"C" SIZE CELLS are for general applications requiring larger output currents, and operation of meters, relays and other apparatus. Special process cells for varistor applications.

Write, wire or telephone for complete information. We welcome your inquiries concerning any special rectification problem. Schauer has been manufacturing high quality, dry-disc rectifiers since 1930.

NOTE: The Schauer Manufacturing Corp. is the exclusive manufacturer of replacement Westinghouse copper oxide rectifiers

SCHAUER ADJUSTABLE 6 VOLT and 12 VOLT BATTERY ELIMINATORS

MODEL SA-48006

MODEL AR 5612

MODEL SA-48006—6 volt and 12 volt adjustable battery eliminator for AM and FM 2-way and marine radios. A.C. input: 115 volts, 60 cycle, single-phase. D.C. output: either 6 volts D.C. up to a maximum of 48 amperes; or 12 volts D.C. up to a maximum of 24 amperes. To maintain required voltage output under various load conditions, a dial-type tap switch provides adjustment from less than 1 ampere up to maximum rated output. Case is 10" wide x $9\frac{1}{2}$ " deep x 15" high, arranged for either bench or wall mounting.

MODEL AR 5612—6 volt and 12 volt adjustable battery eliminator for servicing auto radios. Output adjustable by rugged, silver contact tap switch. Low range output: $7\frac{1}{2}$ volts at 12 amps., continuous; 20 amps., intermittent. High range: 15 volts at 6 amps., continuous; 11 amps., intermittent. Housed in sturdy steel case $7\frac{1}{2}$ " wide x $9\frac{1}{2}$ " deep x 9" high.

SCHAUER SEMICONDUCTORS

HEAVY DUTY ½ WATT ZENER DIODES

A 10 watt Silicon Junction in a ½ watt package for maximum surge capacity and stability. 25 watt-ms surge from 1.0 to 10ms.

Cool operation for maximum reliability and freedom from temperature drift and thermal fatigue. (Rated for a 100°C. junction temperature at maximum current.)

Mass-produced on automatic equipment for lowest cost and maximum similarity.

ELECTRICAL CHARACTERISTICS

Schauer Type No. 10% Tolerance (Note 1)	Nominal Zener Voltage $V_Z @ I_{ZT} = 20 \text{ ma}$ $T_A = 25^\circ\text{C.}$	Dynamic Impedance $Z_D @ I_{ZT} = 20 \text{ ma}$		Maximum Recommended Zener Current I_{ZM}	Typical Temperature Coefficient of Voltage %/°C.	Price 1-99 10% Tol.

NOTE 1. Add suffix "A" for 5% tolerance (i.e., SZ4.7A) for $4.7 \pm 5\%$ volts.

NOTE 2. Series strings to close voltage tolerances available at low prices.

NOTE 3. Temperature compensated high voltage assemblies available.

SV1 Silicon Varistor as compared in size to 25¢ piece. Chart shows its I vs E characteristics over four decades.

NOTE: Prices subject to change without notice.

SCHAUER SV1 SILICON VARISTOR

SV1 Varistor consists of matched silicon junctions connected in parallel and oppositely poled. This voltage variable resistance goes through four decades of current for a half volt change in signal and makes possible its use as a single component to convert linear AC or DC information into logarithmic information following the curve $I_{ma} = e^{26(E-.59)}$ between the range $I = .02 \text{ ma}$ to 200 ma.

ELECTRICAL CHARACTERISTICS—Test limits: 50 microamperes max. at .2V D.C., 225 milliamperes min. at 1.0V D.C. Dissipation: ¼ watt at 25°C, ¼ watt at 100°C. Maximum ½ cycle surge current, 25 amps. peak.

SV1 is encapsulated with an alkyd molding compound. An inner epoxy seal, long leakage paths, and high pressure molding assure reliable performance in all environments. Prices, 1-99: \$.045 each.

Dimensions of SV1 Varistor. Also applies to Schauer ½ watt Zener Diodes. Zener cathode terminal is marked by red dot.

SPRAGUE TRANSISTORS

GERMANIUM AND SILICON TRANSISTORS

- Sprague Transistors are Produced by Advanced Equipment and the Latest Manufacturing Techniques.
- Excellent Design Flexibility and Electrical Properties Meet the Most Rigid Performance and Reliability Standards.

- Highest Quality and Outstanding Economy.
- For Complete Technical Data, Refer to Latest Issue of the Applicable Engineering Bulletin.
- Call your Sprague Industrial Distributor for current quantity prices.

*Reverse power rated types exhibiting controlled avalanche characteristics.
IS—Peak one-cycle surge current, under same conditions as I_o rating. (μA —Microamperes)

I_o —Max. rectified avg. DC output current, resistive or inductive load, 60 cps sine wave input.

I_L —Max. avg. reverse current measured over full sine wave cycle with max. rated reverse voltage and forward current applied.

Full field technical consultation or complete up-to-date listings on all Tung-Sol products are available through: Atlanta, Ga.; Columbus, Ohio; Culver City, Calif.; Dallas, Texas; Denver, Colo.; Detroit, Mich.; Melrose Park, Ill.; Newark, N.J.; Seattle, Wash. IN CANADA: Abbey Electronics, Toronto, Ont.; Canadian Electronics Ltd., Edmonton, Alta.

Tung-Sol silicon power rectifiers offer distinct advantages over similar competitive types. Exclusive design features combine with Tung-Sol's historically rigid quality control to assure designers unmatched operational reliability. Wide interchangeability permits specification of these outstanding components for most commercial and military applications

■ All the types shown are available in reverse polarity which may be ordered by the addition of the suffix 'R' to the indicated type number.

THERMAL JOINT COMPOUND

Improved thermal conductance from semiconductor to cooler may be obtained by applying a light coating of WAKEFIELD Thermal Joint Compound on the mounting surface. This Compound has a thermal conductivity approximately four times that of silicone grease.

WAKEFIELD Delta-T KING SIZE HEAT SINKS for High Power Rectifiers and SCRs.

WAKEFIELD Series GN and WN Natural Convection Heat Sinks are used in systems requiring high reliability such as telephone power supplies, mine equipment rectifiers, etc. These units replace forced convection flat plate techniques, which eliminate fans and the reliability problem introduced. A radial fin design is used to decrease conductor path length and thereby increase fin efficiency.

HEAT SINK Model No.	Hex Size of SCR or Rectifier	Wattage Dissipated for stud rise above ambient of 70°C
GN-1157-5	1 1/4"	100
GN-1251-5.5	1 1/4"	140
WN-1244-5	1 1/4"	100

SERIES GN and WN HEAT SINKS with FORCED CONVECTION

If high ambient temperatures or unusually high power dissipations mandate thermal impedances lower than those obtainable by natural convection, forced air may be used. The flow velocity can be quite low permitting use of low speed, quiet, reliable fans, because the surface area of these sinks is so much greater than the flat plates formerly recommended for large rectifiers and SCRs.

displays.
Easy to handle
for resale

The Elmenco Fused Plug is like any standard plug, is light in weight, but easier to handle because of finger grips. However, it contains 2 small fuses which provide complete protection against damage to the appliance and to the main line. The blown fuse is easy to remove and simple to replace. Fits any standard wall outlet.

**REPLACE
FUSE Instantly!**

Fuses are replaced instantly without need of opening plug. Can be used with standard 3AG and 3AB glass tubular fuses up to 20 amps.

ALCOSWITCH MANUFACTURED TO MEET HIGH STANDARDS OF QUALITY AND MINIATURIZATION REQUIREMENTS

ADJUSTABLE-STOP ROTARY PUSH BUTTON

MRA-1-10S, LESS KNOB, $\frac{1}{8}$ " DIA. SHAFTMRA-1-10, WITH KNOB, $\frac{1}{16}$ " DIA. SHAFT

First, new ultra-miniature rotary switches with the invaluable feature of an adjustable-stop. Ideal for installations where size and space limitations are a factor including applications in aircraft, computers, and all types of electronic equipment. The only one of its kind, the adjustable-stop miniature rotary switch has these additional features • non-shorting • 36° spacing • up to 4 poles on single deck

SPECIFICATIONS

Current Rating:
500 ma @ 125 VAC.

Initial Contact Resistance:
Below 20 milliohm at 2-4 VDC and at rated current.

Insulating Resistance:
Over 100 megohms between terminals and case ground (when measured with a megger of 500 VDC at room temp.)

Voltage Breakdown:
1000 VAC between terminals and case ground for a duration of one minute.

Life Cycle:
Over 10,000 switching operations at the rate of 15 to 20 full rotations per minute at the rated current.

Contacts and Terminals:

Solid silver.

Bushing Size: $\frac{1}{4}$.40.

Shaft: See Below

Humidity: Models MRA-S Only ($\frac{1}{8}$ " shaft)

Tested at a temperature of 40°C and relative humidity of 90-95% for 10 hours. Resistance between terminals and case ground will be more than 10 megohms.

Stop Guide Strain: Models MRA-S Only

The stop guide which limits rotation shall not be subjected to a force of more than 2 Kg-cm.

ALCOSWITCH

ALCOSWITCH

With the coming of the space age, weight, size, precision, stability, and difficult operating conditions place a mighty "squeeze" on electronic design. Along with miniature circuit components, engineers have to fit switches into exceedingly small areas. Today, new materials, new manufacturing techniques, new components and new switches enter into the final engineering product requiring miniaturization.

As a result, modern ALCOSWITCHES have been created to reduce size and weight to a minimum and bear little physical resemblance to the older switches designed during the 1930's and 1940's. These ALCOSWITCHES are the new shape of miniature switching devices, not of the future, but what is currently available in quantity for laboratory testing and production use.

SPDT AND DPDT SERIES

A new ALCOSWITCH SERIES of high quality ultra-miniature toggle switches is ideally suited for limited space requirements. Conservatively rated at 5 amperes @ 115 VAC.

3PDT AND 4PDT SERIES

The feature of the one-piece body construction is to ultra-miniaturize the case size and still be consistent with good engineering specifications. In the switch mechanism, the toggle is linked directly to the movable contact member, providing positive make and break. The switch is designed to obtain positive detent action for improved "operator feel". Solid silver contacts and terminals are well-spaced for clearance, easy wiring, and good soldering ability.

SPECIAL ON-ON-ON

This unique switching arrangement is completely enclosed in a compact black phenolic housing, and in certain applications takes the place of a 3-position rotary switch. Features a slim miniature bat handle, solid silver contacts and terminals.

ENGINEERS: If dimensions or specifications are critical, obtain drawings from ALCOSWITCH, Lawrence, Mass.

24-HOUR
DELIVERY
FROM STOCK

NEW CERAMIC TERMINAL STRIPS

Ceramic base terminal strips have copperplate inserts that are silverplated and tinned for good soldering ability. Bond between metal and ceramic is not just an adhesion, but "fired" to prevent metal from falling off.

CUTLER-HAMMER SWITCHES

ONE HOLE MOUNTING TOGGLE SWITCHES

Approved Under MIL-S-3950A Spec.

These switches are lever sealed with special silicone rubber between lever and bushing which will retain flexibility and reliability against sand, dust, water and other environmental conditions. They are unaffected by ozone or sunlight and do not absorb oil or water, meeting 15 ft. water submersion test. Pliability or firmness not affected by extremes in temperature, high or low. Terminals plated.

Rating: Current Capacity (amps.)

MS and AN types use internal sand and dust toggle seals. MS25098 and MS25100 series call for solder terminals only. MS types to MIL-S-3950A (recommended) have internal toggle seals to meet 15 ft. water submersion test. For heavy duty switches, MIL-S-3950A (-21 and higher) in MS25061, MS35058 and MS35059 series call for screw terminals only. These terminals are prepared for soldering and can be soldered when screw is removed.

Birnbach**CUTLER - HAMMER SWITCHES****POSITIVE ACTION SWITCHES**

Especially designed for aircraft, missile and electronic applications. Made in two types—one with lever seals, the other environment sealed. Lever seal is bonded to the bushing and lever—will withstand a 15 ft. head of water, or between 6.5 to 7 lbs. per sq. inch. The environment sealed switches have seals under each contact and also a seal between switch base and the shell and are designed to pass a glycol temp. cycling test submerged for 20,000 operations per minute. The contact wiping action keeps contacts clean and smooth. Superior design, smooth operation. Screw terminals are tin-dipped to facilitate soldering if required.

Lever Lock Switches—One, Two, Four Pole—Sealed Lever—MS 25125-6-7 Series— Per MIL-S-3950A

This series incorporates a lever lock mechanism designed to prevent accidental operation, thereby eliminating need for switch guards. The assembly of 2 die cast caps and a retaining clip spring assembled after the switch is mounted makes possible the locking feature. Switch is locked into position by the lever falling in position into deep slots in the die cast caps. To operate switch from locked position the lever must be pulled straight out and moved to desired position.

POSITIVE ACTION MINIATURE MILITARY SWITCHES

"As Small As A Dime"

Especially designed for aircraft, missile and electronic application

EXTREMELY COMPACT — highly reliable power or dry circuit switch, usable as a pre-set switch in aircraft recognition systems, for walkie-talkies, electronic instruments and communication systems.

NEW DESIGN — Toggle is linked directly with movable contact member, insuring positive make and break.

NEW TOGGLE LEVER SEAL — Protects switch enclosure under adverse environmental conditions; includes panel bushing seal.

NEW GOLD PLATED CONTACTS — Open and close with wiping action, for good contact even on low energy circuits. Contact bounce is extremely low.

NEW SUPERIOR MATERIAL — In molded parts, provides higher arc-tracking resistance and excellent recovery voltage.

NEW POSITIVE DETENT ACTION — For improved operator "feel."

MAGNETIC PROXIMITY SWITCHES

Precision, fast-acting devices, adaptable to sequential control functions on machine tools, packaging, material handling and equipment or for similar industrial devices. Rugged construction, encapsulated to assure freedom from contamination by cutting oils, dust, powder, metal chips, etc., this series will operate up to hundreds of millions of cycles at temperature ranges from -30°C to $+105^{\circ}\text{C}$. Switches will actuate when brought into proximity with ferrous metals or other magnetic materials. Operating sensitivity in nom. $1/8$ " make, $1/2$ " break. No mechanical linkage is required for operation. Typical actuators include rotating cams, wheels and indexing tables, reciprocating arms, push rods, die sets, jacks and assembly line objects such as food and beverage cans, stampings and components. Speed (max.), 200 cycles/sec., repeatability within .005". Switch elements are hermetically sealed in glass, then unit is potted in epoxy resin. Case is special rubber and plastic compounding which is impervious to oil, water, gas and all common solvents.

COUNTING — POSITION LIMITING — SEQUENCE CONTROL HERMETICALLY SEALED—MOUNTS IN ANY POSITION—NO MECHANICAL LINKAGE NECESSARY.

MAGNETIC PROXIMITY SWITCHES

Typical actuators include rotating objects, swinging objects, reciprocating objects, assembly line objects, vehicles.

BUSS Fuses

FUSETRON DUAL-ELEMENT Fuses and Fuse Holders

for Protection of TV, Radios, Instruments and Electronic Equipment

FUSETRON FIBRE TUBE FUSES

$1^{13}/32 \times 1^{1}/2$ inch

Dual-Element — Slow Blowing Type. Avoid needless blows from starting currents or

surges. Have fuse link that operates only on very high overloads or short-circuits, and thermal cutout on low overloads. Thermal cutout cannot operate quickly at any load, hence long time-lag is obtained. Yet protection is provided against short-circuits or continued overloads.

Test specification—carry 110%, open at 135% within 1 hour.
at 200% load 25 seconds.
at 300% load 8 seconds.
at 500% load 5 seconds.

125 and 250 volt sizes listed by Underwriters' Labs., Inc.

Voltage	Symbol	Amperes	List Price
250 or less	FNM	$1/10, 1^{13}/100, 3/10, 3/10, 3/10, 1/2, 3/10, 3/10, 1, 1^{13}/10, 1^{13}/10, 1^{13}/10, 1^{13}/10, 1^{13}/10, 2, 2^{13}/10, 2^{13}/10, 2^{13}/10, 3^{13}/10, 3^{13}/10, 4, 4^{13}/10, 5, 5^{13}/10, 6^{13}/10, 7, 8, 9$ or 10	\$0.37
125 or less	FNM	12 or 15	.37
32 or less	FNM	20, 25 or 30	.37

SIGNAL OR VISUAL INDICATING TYPE

FNA are FNM Fusetron fuses with silverplated indicating pin that extends from fuse when fuse blows. Pin can also be used to actuate a signal by using fuse in BUSS Signal Fuse Block. Fuses in sizes larger than 10 ampere have a dual tube construction. They can be used in BUSS Signal fuse blocks but not in the HPC-C fuseholder.

Voltage	Symbol	Amperes	List Price
250 or less	FNA	$1/10, 1^{13}/100, 3/10, 3/10, 3/10, 1/2, 3/10, 3/10, 1, 1^{13}/10, 1^{13}/10, 1^{13}/10, 1^{13}/10, 1^{13}/10, 2, 2^{13}/10, 2^{13}/10, 2^{13}/10, 3^{13}/10, 3^{13}/10, 4, 4^{13}/10, 5, 5^{13}/10, 6, 6^{13}/10, 7, 8, 10$	\$0.688
125 or less	FNA	12 or 15	.688
"	FNA	20, 25 or 30	.758
32 or less	FNA	20, 25 or 30	.758

BUSS FUSES 600 Volt. UL Listed. $1^{33}/32 \times 1^{3}/8$ inch.

Fibre tube. For protection of control circuits or wherever a fuse with "quick-blowing" characteristics is desirable. Listed by Underwriters' Laboratories Inc.

Voltage	Symbol	Amperes	List Price
600 or less	BBS	$1/10, 3/4$ or $3/10$	\$0.24
600 or less	BBS	1, 2, 3, 4 or 5	.22

Fuseholder for BBS fuses. Use HPC-L fuseholder or No. 3845 single pole, side barrier porcelain fuse block. Only BBS fuses (or others with exact same dimensions) will fit these holders. This assures replacement of proper size fuse.

BUSS Insulated TWIN-CLIPS

For $1/4$ inch FUSES.

Make it easy to replace blown pigtail fuses without cutting or unsoldering pigtails. Just snap Twin-Clips on blown fuse and insert ordinary or Fusetron fuse of same ampereage as blown fuse.

Strong spring clip pressure assures good contact.

No. 3434 BUSS Insulated Twin Clips One pair \$0.21

HIGH INTERRUPTING CAPACITY FUSES

$1^{13}/32 \times 1^{1}/2$ inch

Glass fibre melamine tube with sand filler surrounding a silver fuse element. For use on circuits capable of delivering currents as high as 100,000 amperes at voltages of 600 or less. AC only.

Test specification—carry 110%, open at 135% in 1 hour or less.

Voltage	Symbol	Amperes	List Price
600 or less	KTK	$1/10, 3/8, 3/10, 1/4, 3/10, 2/5, 3/4, 1, 1^{13}/10, 2, 3, 4, 5, 6, 8, 10, 15, 20, 25, 30$	\$1.33

BUSS GLASS TUBE FUSES

$9/32 \times 1^{1}/4$ inch

Formerly called 4 AG.

Test specifications — carry 110%, open at 135% within 1 hour except 35 and 40 ampere which open at 300% in 2 to 4 seconds when tested in a standard 30 ampere test circuit.

Voltage	Symbol	Amperes	List Price
250 or less	AGS	$1/16$	\$0.46
	AGS	$3/16$	.32
	AGS	$1/4$, or $1/2$	.16

BUSS FUSE TV Service

Kit Assortment

Contains 101 of the most popular fuses — 20 slide-cover boxes — and five pairs of BUSS No. 4121 Twin Clips for use in replacing blown pigtail fuses. All packed in a clear plastic box.

Symbol, TV-STD

List Price \$20.19

BUSS ELECTRONIC FUSE ASSORTMENTS

... with handy inventory feature

Helps serviceman have fuse he needs right in front of him... no delay in work to find a fuse. Keeps all the fuse stock normally needed for complete servicing of TV sets in smallest possible space.

Each 5-in box has its own shelf... Size and type of fuse shown on label at back of shelf... when shelf is empty label shows what fuses need to be immediately reordered.

List Price

No. 255 Full-Service Electronic Fuse Assortment

(255 fuses — 30 different sizes)

\$40.81

No. 130 Special Electronic Fuse Assortment

(130 fuses — 26 different sizes)

\$20.61

PANEL MOUNTED VISUAL INDICATING FUSEHOLDER for 1/4 x 1/4 inch GBA Fuse (or GLD fuse)

Has transparent, bayonet type knob

that permits indicating pin of open fuse to be readily seen. Gives positive identification of open circuit even if power is off.

Vibration cannot cause failure because terminals are held mechanically and by solder.

Neoprene washer and steel locking nut furnished with each holder.

Body is molded phenolic, can be used on panels up to 1/16 inch thick.

Normal current carrying capacity; 30 amperes.

List Price

HLD takes any size GBA fuse (or GLD fuse)..... \$0.62

No. 5487 Knob Only — will fit HKP holder, makes it visual indicating when used with GBA fuse..... .26

PANEL MOUNTED HOLDERS

for 13/32 x 1 1/2 inch Fuses

Screw type knob. Molded phenolic body. Holder attached to panel by screws or rivets. Strong coil spring provides contact pressure on ends of fuse. Normal current carrying capacity 30 amperes. Listed by Underwriters' Laboratories for 15

ampere rating for any voltage up to 250.

HPC (for FNM and KTK fuses) List Price \$0.84

HPC-C (Same as above, but has transparent knob) List Price \$1.05

HPCL Holder for 13/32 x 1 1/2 inch Fuses.

Like HPC Holder. Has Underwriters' Laboratories approved listing for 5 ampere rating and any voltage up to 600.

HPCL-L (for BBS fuses) List Price \$0.84

PANEL MOUNTED HOLDERS for 1/4 inch Fuses

Can be used on panels up to 1/16 inch thick.

Bayonet type knob. No

screw driver is needed.

Side terminal is held mechanically as well as by solder. Heat of soldering wire to it will not cause it to loosen.

Vibration will not cause failure of terminals as they are designed to stand severe service.

Neoprene washer and steel locking nut furnished with each holder.

Wire hole in terminals; .115 inch.

Normal current carrying capacity; 30 amperes.

Listed by Underwriters' Laboratories Inc.

List Price

HJM for 1/4 x 1 inch fuses (AGX, SFE 14) \$0.54

HJM-CC (Same as HJM but projects shorter distance behind panel)54

HKP for 1/4 x 1 1/4 inch fuses (ABC, AGC, SFE20, MDL, MDX, MTH)54

HKP-CC (Same as HKP but projects shorter distance behind panel)54

PANEL MOUNTED, LAMP INDICATING FUSEHOLDERS for 1/4 x 1 1/4 and 13/32 x 1 1/2 inch fuses

Made to Military Specifications.

Available as single or two pole units. Transparent knob permits neon indicating light to be readily seen. Body of molded alkyd.

Type	Pole	Fuse Size Inches	Circuit Voltage	Max. Amp. Rating	List Prices

BUSS Fuses

FUSETRON DUAL-ELEMENT Fuses and Fuse Holders

for Protection of TV, Radios, Instruments and Electronic Equipment

TRON PIGTAIL FUSES

Sub-miniature — hermetically sealed

Tron fuses can easily be incorporated into miniaturized devices or components without sacrifice of space. Designed for installation in high shock and vibration ambients.

They may be potted or encapsulated. Are self-protecting and operate without exterior flash or venting.

Available in ratings from 1/20 to 5 amperes — for use on circuits of 125 volts or less where available fault current is not over 50 amperes. Color coded to indicate ampere rating.

Made with 1½ inch axial pigtails or with 1 inch right angle pigtails of No. 24 tinned copper wire.

Test specifications —

Characteristic A — Carry 100% load, open within 10 seconds at 200% load.

Characteristic B — Carry 100% load, open within 10 seconds at 150% load.

BUSS GMT Fuses — HLT Fuseholders

Signal Indicating

Alarm Activating

For multiple circuit apparatus where space is at a premium

GMT fuses and HLT fuseholders permit multiple mounting of fuses in limited space, for protection of communication equipment, bus-

ness machines, computers, control circuits or any equipment operating at 300 volts or less.

Holders take panel mounting space of only ¼ inch horizontal by 1½ inches vertical.

Fuses give visual indication when blown by release of a spring indicator. The spring carries a colored plastic flag, in a different color for each fuse ampere rating.

The indicator spring when released makes contact with an alarm terminal in the fuseholder, which can be connected to activate a signal circuit.

Blown fuses are readily replaced without use of insulated tools. When mounted on minimum centers, removal of fuse is easy by use of a wire hook.

Buss GMT Fuses

Available Ratings and Color Code

300 volts or less

Test specification — carry 100% for 10 minutes; open at 150% within 5 minutes.

GMW Fuse and HWA Fuseholder

Sub-miniature fuseholder combination

Body size only .270 x .250 inches

Offering a light weight, space-saving protective device for space-tight applications in multiple circuit apparatus. GMW fuse has transparent window for visual inspection of element. Fuse may be used alone for mounting into printed circuit boards.

HWA holder can be panel mounted easily — or soldered on printed circuit boards.

AF knob for holder makes holder water-proof from front of panel.

Test specifications — carry 100%, open at 200% within 10 seconds or less.

Interrupting rating — 300 ampere at 125 volts

HKA SERIES

Lamp Indicating, Signal Activating holders for $\frac{1}{4}$ x $\frac{1}{4}$ inch BUSS type GLD fuses

Used on circuits of 125 volts or less. Flashes a light, rings a bell, trips a relay or gives other signals to tell you when and where a fuse blows.

Symbol	List Price
HKA for $\frac{1}{4}$ x $\frac{1}{4}$ inch GLD fuses, $\frac{3}{4}$ to 5 amps.	\$4.94

GLD fuses listed under Indicating fuses.

IN-THE-LINE HOLDERS for $\frac{1}{4}$ inch fuses

For mounting fuse in wire. Holders consist of body and bayonet type knob — two contacts ready to be staked on ends of wire — and a contact pressure spring.

Holders can also be mounted in panel up to $\frac{3}{16}$ inch thick by means of a No. 9969 Spring nut (Nut not furnished). Flat area on holder permits locking against rotation.

Normal current carrying capacity: 15 amperes. Maximum Voltage: 250.

Contacts designed to take different size wire. For 18 to 22 wire add "A" to symbol. For 14 to 16 wire add "B" to symbol. (Example HHJ-A).

Symbol	Fuse Size Inches	List Price
HHJ	$\frac{1}{4}$ x $1\frac{1}{4}$	\$0.26
HHI	$\frac{1}{4}$ x 1 or $1\frac{1}{16}$	.26
HHH	$\frac{1}{4}$ x $\frac{7}{8}$	.26
HIG	$\frac{1}{4}$ x $\frac{3}{4}$	.26
HIF	$\frac{1}{4}$ x $\frac{5}{8}$	.26

SERIES HD and HA

These holders are the same in all details and dimensions as the HH and HI series — EXCEPT that the holding ears in the bayonet knob are of molded phenolic instead of being of metal.

Symbol	Fuse Size Inches	List Price
HDJ	$\frac{1}{4}$ x $1\frac{1}{4}$	\$0.21
HDI	$\frac{1}{4}$ x 1 or $1\frac{1}{16}$	.21
HDH	$\frac{1}{4}$ x $\frac{7}{8}$	.21
HAG	$\frac{1}{4}$ x $\frac{3}{4}$	.21
HAF	$\frac{1}{4}$ x $\frac{5}{8}$	.21

No. 9969 Spring nut for panel mounting above holders .038

FUSETRON and BUSS MATCHED FUSES and FUSEHOLDERS

Safeguard against use of wrong size and type of fuse. FUSETRON Type N are "slow-blowing" fuses for use where harmless surges or starting currents might cause ordinary fuses to open needlessly. Use in Type HN fuseholder.

BUSS Type C are "quick-blowing" fuses for fast interruption of fault current. Use in Type HC fuseholder. Listed by Underwriters' Laboratories Inc.

BUSS Fuses

FUSETRON DUAL-ELEMENT Fuses and Fuse Holders

for Protection of TV, Radios, Instruments and Electronic Equipment

BUSS In-the-Line or Panel Mounted FUSE and HOLDER COMBINATIONS

For voltages up to 300

Safeguards against use of wrong type and size of fuse. Fuse and knob are in one piece — when fuse opens, entire fuse-knob assembly is replaced.

Fuseholder can be mounted in-the-line — or panel mounted for which a snap-in steel clip is available for mounting on any panel $\frac{1}{32}$ to $\frac{1}{16}$ inch thick.

Holders come with 6 inch leads of No. 18 solid copper insulated wire, unless specified otherwise.

HLR holder safeguards against use of wrong type of fuse — takes all ampere sizes of GLR and GMF fuses. List Price \$0.23

HLQ holder is size limiting type and are made in 6 fuse ranges. Takes either GLQ or GMQ fuses up to the largest ampere size marked in holder.26

SPACE SAVER Panel Mounted FUSEHOLDER

For $\frac{1}{4}$ x $1\frac{1}{4}$ inch fuses or $\frac{3}{32}$ x $1\frac{1}{4}$ inch fuses

A compact, space saver fuseholder only $1\frac{1}{8}$ inches long — extends just $2\frac{3}{32}$ inches behind front of panel.

Takes $\frac{1}{4}$ x $1\frac{1}{4}$ inch fuses and can easily be converted to take $\frac{3}{32}$ x $1\frac{1}{4}$ inch fuses simply by changing the screw type knob.

Knob is designed for easy gripping even with gloves.

Fuseholder is of molded phenolic and will withstand sever vibration, shock and other environmental conditions.

Neoprene washer and zinc plated, chromate dipped steel fastening nut furnished with each holder.

Normal current carrying capacity; 30 amperes for any voltage up to 250.

Symbol List Price
HLF for $\frac{1}{4}$ x $1\frac{1}{4}$ inch fuses. \$0.54
HCL for $\frac{3}{32}$ x $1\frac{1}{4}$ inch fuses.54

BUSS Add-On Fuse Blocks

for $1\frac{1}{32}$ x $1\frac{1}{2}$ inch Fuses

Single-pole fuseblock and separate end barrier assemble into unit of one or more poles. Units lock together. New poles can be added to either end of existing block. Made of molded phenolic. Marking strips to identify each circuit available.

Type	Description	List Price
3742	End-Barrier Only	\$0.172
3743	One-Pole Block Only	1.20
Marking Strip in 50 inch length		.578

When ordering, specify number of end barriers and one-pole blocks desired. Only one end barrier needed for each assembled fuse block of any number of poles.

BUSS STANDARD FUSE BLOCKS

Available from 1 to 12 poles. Have laminated black phenolic base. Clips of strong spring, Albaloy plated, highly resistant to corrosion with great gripping strength. Types 3823 and 3828 have solder terminals firmly seated in small base. Type 3833 has screw terminals on full base that provides ample insulation around terminals.

Other standard and special fuses, fuse blocks, fuse clips and fuse holders

If the fuses, fuse blocks, fuse clips and holders shown do not fit your requirements ask for information on other types.

Fuses and fuse mountings to meet JAN and Military

specifications also are available.

If you have a special problem in protection send description or sketch giving number of circuits, type of fuse, terminals, etc., desired. We welcome such inquiries.

BUSSMANN MFG. DIVISION McGraw-Edison Co. St. Louis 7, Mo.

BUSS LIMITRON FUSES

For Protection of Semi-Conductor Rectifiers

These BUSS Limitron fuses are especially designed for the protection of semi-conductor rectifiers. They provide extremely fast opening on overload and fault currents, with a high degree of restriction of the let-through current.

If each diode is protected by a BUSS Limitron fuse, the fuse will open very quickly when the current drawn exceeds the rating of the diode.

Thus when a short-circuit occurs in a diode the fuse

opens and takes that diode out of the circuit. This protects other good diodes in the rectifier which might otherwise be damaged.

For time-current characteristic charts ask for. BUSS Limitron fuse bulletin HLS.

Test specification for all types of BUSS rectifier fuses — carry 100% of rating, open at 1000 seconds on overloads between 120% and 180% of rating, open within 1 second at 250% of rating.

— 1S 5/8" Smooth
— 2L 5/16" Long Narrow
— 2S 5/16" Short Narrow s/ears
— 3L Offset 5/8" Long Lined
— 3C Offset 5/8" Cross Serrated
— 3S Offset 5/8" Smooth

For Double Actuator Add "D" to end of above number.

For Double Actuator with interlock, Add "DI" to end of above number.
Standard Colors are WHITE, -WH and BLACK, -BL. Other colors available upon request.

Imprinting on Actuators may be had upon request.

Brackets — In addition to the illustrations shown, we offer a variety of brackets — offset, flat, angled, open ear, snap-in, etc. Specials can be made upon request. Snap-in style is designed for panel thickness of approximately .040" to .100". For mounting information and dimensions consult factory. This model bracket is available on single,

double and three pole Tippettes — Single pole lighted Tippettes.

Wire Lead Enclosures — W10 This Snap-On enclosure is available in the double pole, Tippette and single pole Lighted Tippette series. It is designed to protect and provide safer insulation for normally exposed lead connections.

LIGHTED TIPPETTE FEATURES

Actuators, Brackets & Accessories — Available in the same styles as listed in the Tippette Series. Lenses are Red, Amber, Clear and White. Special variations and colors available.

The exclusive Hetherington snap-action mechanism reduces arcing and contact wear...provides far greater current capacity than the small sizes of these switches would indicate. Mechanism enclosed in dust and moisture-resistant anodized aluminum housings (phenolic in B2001 & B2002). 1-piece terminals and contacts firmly anchored to bases. Many types meet JAN and MIL Specs for aviation and military requirements.

Features and dimensions are subject to change based on engineering refinements. If dimensions or specifications are critical, obtain drawings from Control Switch engineering department.

LIGHTED PUSH-BUTTON PANEL SWITCHES				1-24
C6 type				
	Combine lighting, legend, and electrical control in one compact unit. Save panel space, simplify operation. Units can be stacked or mounted individually on control panels or consoles. Plastic push-button is available in colors, can be hot-stamped with words or symbols, button size 3/4" x 1". Light is provided by two separate 6- or 28-volt lamps wired in parallel. Switching component is DPDT, rated at 5 amps, 125 VAC or 4 amps, 30 VDC, resistive each pole. Either alternate action (push-on, push-off) or momentary action is available. Unit is also available without switch for use as pilot light. Two lamps included with each unit. Solid plastic or two-piece plastic button with clear slip-in insert for legend. 	NEW M-SERIES Mounts without hardware. Switch modules snap on. See description on Control Switch Division page in Section 3900—Indicator Lights.			

NOTE: Order buttons and mounting barriers separately

**Order these actuators separately. Assemble on switch when mounting.
NOTE: ALL SWITCHES MOMENTARY CONTACT UNLESS OTHERWISE NOTED

Miniature Switches, Parts

JV-9000
Series

**SERIES PA-2000 1½" DIAMETER
CERAMIC SWITCHES**

Insulated with L-533 stearlite; only 1¼" dia. (¾" smaller than standard switches). Same ratings as larger switches. Features maximum voltage bushing; high Q, low loss stearlite body; minimum intercircuit capacity; insulated front-back plates. Metal parts, except clips and contacts, cadmium plated, withstand 25-hour salt spray test. Rated: 2.75 amps, 15 v. DC; 230 ma, 115 v. AC, make-break resistive load. Breakdown, 1500 v. AC rms between critical parts. One-piece shaft for accurate indexing. Adjustable stop or continuous rotation mtg. using single hole with locating lug. Bushing ¾"-32 thread, ¾" long. Shaft, full round ¼" dia. v. 2½" long from mtg. surface. With mtg. nut, lockwasher and knob. Sphg. wt., 3 oz. per section.

For switches to meet military specifications, write for prices and information.

**SERIES PA-1000 1½" DIAMETER
PHENOLIC SWITCHES**

Insulated with type PBE laminated phenolic per MIL-3115-B. Same size as PA-2000 ceramic switches. Rated: 2 amps, 15 v. DC, 150 ma, 110 v. AC. Breakdown, 1000 v. AC. Positive, adjustable stop or continuous rotation; 30° or 60° detents available. Withstand 25-hour salt spray test. With knob. Shpg. Wt., 3 oz. per section. Military specifications available as above.

SEPARATE INDEX ASSEMBLIES

Index assemblies for series PA-1000 and PA-2000 interchangeable.

CRD No. PA-300 Assembly—Contains PA-300 (30°) index, P-120 pointer knob, adjustable stop plate, 1/4" spacers, 2 1/2" spacers, two 5/16" bolts, two 1/2" bolts, 21 tie bolts, nuts, lockwashers and fiber spacer washers. Rear shaft length 2". Use with 1 to 3 sections.

CRD No. PA-301 Assembly—Contains PA-301 (30°) index, P-120 pointer knob, adjustable stop plate, 1/4" spacers, 2 1/2" spacers, lock washers, four 1/4" spacers, 5 tie bolts and 21 tie bolts. Rear shaft length 2". Use with 1 to 5 sections.

CRD No. PA-302 Assembly—Contains PA-302 (30°) index, P-120 pointer knob, adjustable stop plate, four 1/4" spacers, two 1/2" spacers, sixteen 1/4" spacers, eight 1/4" spacers, 7 tie bolts, and 21 tie bolts. Rear shaft length 2". Use with 1 to 8 sections.

CRD No. PA-304 Assembly—Contains PA-304 (60°) index and hardware same as PA-300. Rear shaft length 2". Use with 1 to 3.

CRD No. PA-305 Assembly—Contains PA-305 (60°) index and hardware same as PA-301. Rear shaft length 4". 4 to 8 sections.

Rotary, Lever Switches

SERIES 2500 1 1/4" DIAMETER

ROTARY SWITCHES

Made of highest quality (grade L-533) Steatite insulation. Meet critical requirements of RF circuit applications. Bushing 3/4"-32 thread 3/4" long. Shaft 1 1/4" long, 3/4" full round. Sections 1 1/4" dia. Positive index 30° with adjustable stop. Index assemblies and hardware are identical and interchangeable with those of the 1400 Series. Switches include pointer knob, nut and lockwasher. Rated: 2.75 amps, 15 v. DC; 230 ma, 115 v. AC. Breakdown, 1500 v. AC between contact parts. Shipping Weight, 5 oz. per section.

SERIES 1400 1 1/4" DIAMETER

ROTARY SWITCHES

Extremely compact design. Mounting bushings 3/4"-32 thread, 3/4" long. Shafts 1 1/4" from end of bushing; 3/4" full round. Sections 1 1/4" dia. Positive 30° index with adjustable stop. With mounting nut, lockwasher and pointer knob. Index assemblies and hardware are identical and interchangeable with those of 2500 series. Rated: 2.75 amps at 15 v. DC; 230 ma at 115 v. AC. Breakdown, 1000 v. AC rms. Shipping Weight, 4 oz. per section.

STEATITE HAM-TYPE SWITCHES

Heavy-duty Grade L-533 steatite insulation for ham applications. Available in 60° and 90° index. All metal parts except clips and contacts are cadmium plated steel; all units have phenolic shaft through switch sections. Positive index with adjustable stop; 60° units have 2-6 active positions; 90° units—4. Single hole mounting: 3/4"-32 thread bushing 3/4" long. Shaft 1 1/4" dia., 2 1/4" long, full round. Rated: 250 milliamperes at 115 v. AC; 5 milliamperes at 1500 v. AC; 1.75 amps at 24 v. DC, will handle 15 watts; for tubes operating at voltages up to 1 kv and inputs to 150 watts. Unit complete includes mounting nut, lockwasher, pointer knob, and dial plate. Shipping Weight, 4 oz. per section.

ECONOMY LEVER ACTION SWITCHES

REPLACES PA-7000 SERIES

New nylon rotor design results in low cost for use singly or in groups. Have positive and spring return index design with shorting or non-shortening contacts. High quality laminated phenolic insulation, clips and contacts silver plated brass. Two hole type mounting bracket supplied with 6-32 thread tapped holes. Dimensions of single switch 1 1/4" high x 3/4" wide x 1 1/4" deep behind panel. Supplies with knob and mounting hardware. Rated: 2.75 amps, 15 v. DC, 230 ma at 115 VAC. Shipping Weight 4 oz.

ONE HOLE MOUNTING
QUICK MAKE, QUICK BREAK A-C, D-C SWITCHES

UTILITY TYPE

They have a quick make and quick break over center arrangement on the movable contact which permits exceptionally fast contact action minimizing pitting and erosion of the contact surfaces.

Available with screw terminals, solder lug terminals or with 6" lead wires stripped $\frac{3}{4}$ ". Bushing dia. $\frac{15}{32}$ ". Available with bushing lengths of $\frac{1}{4}$ ", $\frac{11}{32}$ ", $\frac{15}{32}$ ", $\frac{3}{4}$ " and 1" — $\frac{3}{4}$ " and 1" bushings furnished with ball type lever only.

Parts visible when switch is mounted are bright nickel plated.

† Not lever sealed.

When ordering, specify (1) catalog number and (2) circuit arrangement.

LEVER LOCK TYPE

These switches feature the same rugged construction as the standard switches listed above except that in addition they have a lever lock feature which permits the lever to be locked in the desired position. This feature prevents the switch from being tripped accidentally.

Cat. No. 8857

In order to operate the lever from a locked position, an upward pull must be exerted on the operating lever to disengage the lever from the milled slot.

Nominal ratings — 10 Amp. — 115 V. A-c, 20 Amp. — 28 V. D-c. For specific ratings for various loads and voltages see your C-H representative.

When ordering, specify (1) catalog number.

ROTARY SELECTOR SWITCH

The C-H single or multi wafer selector switch is designed for applications where a large number of circuits must be controlled in consecutive steps. The switches have an indexing action which gives a positive "feel" as the shaft is rotated. Switches can be furnished with from 1 to 6 wafers with each wafer having 8 positions — 7 "on" and 1 "off". A total of 42 circuits can be controlled by one 6 wafer switch.

Cat. No.
7271

When ordering, specify (1) catalog number.

POSITIVE ACTION ONE HOLE MOUNTING

he operating mechanism employed in the C-H line of "positive action" switches has a direct coupling arrangement between the operating lever and moving contacts which permit positive breaking action and still allows the contacts to move independently of the operating lever. The switching action takes place in less than 1° of movement on the operating lever. Once the contact movement is started the motion cannot be stopped until the switching is completed.

switches are available with either the lever seal or environment seal. Both feature a silicone rubber seal bonded to the bushing and operating lever.

Cat. No.
8836, 8840

Cat. No.
8844. 8847

They also are available in standard lever models or lever lock types. The lever lock switches have an integral bushing design which permits the operating lever to be locked into position. In order to move the lever from a locked position it must be pulled upward.

Nominal Rating — 25 Amp. — 28 V. D-c, 115 V. A-c on resistive loads. Max weight 0.1 - 0.2 lb. Bushing dia. $15/32"$. Bushing length $15/32"$.

Nominal Rating—25 Amp.—28 V. D-c, 115 V. A-c on resistive loads. Max weight 0.1-0.2 lb. Bushing dia. $\frac{15}{32}$ ". Bushing length $\frac{15}{32}$ ".

→ Indicates direction of movement against which lever is locked.

MINIATURE

These switches combine all of the construction and operating features of the standard size positive action switches plus ultra miniature size and light weight.

Nominal Rating — Wet Circuit, 4 Amp. — 28 V. D-c, Dry Circuit, 25 Micro Amp. — 5 Milli V. or less. For specific ratings for various loads and voltages see your C-H representative. Total weight — 5.0 - 6.5 grams. Bushing dia. $\frac{1}{4}$ " for .440" lever and $15\frac{1}{32}$ " for .667" lever switches.

Cat. No. 8866

Cat. No. 8868

MURRAY MAGNETIC PROXIMITY SWITCHFor Counting • Position Limiting
Sequence Control Mounts in Any Position

Precision, fast acting, suitable to sequential control functions on machine tools, packaging, material handling and similar industrial devices.

Strong, encapsulated, assures freedom from contamination by cutting oils, dust, powder, chips, etc. Operates up to hundreds of millions of cycles — temperature range —30°C to +105°C. Switch actuates when brought into proximity with ferrous metals or other magnetic materials. No mechanical linkage necessary for operation. Operating sensitivity in 100% make, 1/2% break. Switch elements sealed in glass, unit is potted in epoxy resin. Case is impervious to oil, water, gas, all common solvents.

Typical actuators include indexing tables, cams, wheels, push rods, die sets, line objects such as food and beverage cans, components, parts, vehicles, rotating and swinging objects, etc.

Cat. No. 34-226 DPDT lug (3 pos. center off) Net \$1.32

(M) MEDIUM-HEAVY DUTY TOGGLE SWITCH—Designed for applications where rugged bat handle switch is required.

Cat. No. 34-228 SPST screw (on-off) Net \$.87

Cat. No. 34-230 DPST screw (no "off pos.") Net \$1.02

Cat. No. 34-232 3 PST screw (2 pos. on-off) Net \$2.62

Cat. No. 34-234 3 PDT screw (2 pos. w/ "off") Net \$3.30

Cat. No. 34-236 SPDT (3 pos. center off) Net \$.87

Cat. No. 34-238 3 PDT (3 pos. center off) Net \$2.77

Cat. No. 34-240 3 PDT (3 pos. center off) Net \$3.30

(N) MEDIUM-HEAVY DUTY TOGGLE SWITCH—rating 6 amp, 250/V; 12 amp, 125/V, 1 HP.

Cat. No. 34-242 SPST Net \$1.38

Cat. No. 34-244 DPST Net \$1.38

(O) HEAVY DUTY TOGGLE SWITCH—rating 10 amp, 250/V; 15 amp, 125/V, $\frac{1}{2}$ HP.

Cat. No. 34-246 SPST Net \$2.33

Cat. No. 34-248 DPST Net \$2.33

(P) EXTRA-HEAVY DUTY TOGGLE SWITCH—rating 20 amps, 250/V, $1\frac{1}{2}$ HP, 125/250 V.

Cat. No. 34-250 DPST Net \$3.30

(Q) PUSH BUTTON, ON-PUSH-OFF SWITCHES—rating 3 amp, 250/V; 6 amp, 125/V; $1\frac{1}{4}$ " shank length, single pole, single throw type.

Cat. No. 34-252 SPST with lug terminal Net \$1.20

Cat. No. 34-254 SPST with screw terminal Net \$1.15

Cat. No. 34-256 SPST with wire leads Net \$1.15

(A) LIGHT DUTY, SMALL SIZE TOGGLE SWITCH—rating 3 amps, 250/V.
Cat. No. 34-180 SPST Net \$.75
Cat. No. 34-182 DPST Net 1.32
Cat. No. 34-184 DPDT Net 1.50

(B) "THREE WAY" AND "TWO CIRCUIT" SWITCH—Three way switch handles 2 circuits with common line; 3 terminals, with one terminal "common". Two circuit model 4 terminals, with no connections between circuits.

Cat. No. 34-186 SPDT (3-way) Net \$.93

Cat. No. 34-188 DPST (2-circuit) Net \$1.13

MISCELLANEOUS SMALL SWITCHES

The switches listed below are widely used on electronic equipment, automotive applications and small electrical appliances.

SLIDE SWITCHES—UL approved for 1, $\frac{1}{2}$ amp, 125/V. Mount with 2 screws #6 or rivets $\frac{1}{8}$ " with $1\frac{1}{2}$ " spacing.

1 amp.
Cat. No. 34-160 SPDT Net \$.18

$\frac{1}{2}$ amp.
Cat. No. 34-162 DPDT Net \$.22

ROTARY CANOPY SWITCH—With wire leads and $1\frac{1}{2}$ " shank length. Rating 3 amps, 125/V, 1 amp, 250/V. Mounts in $\frac{3}{8}$ " hole.

Cat. No. 34-166 Net \$.32

Note: Additional frame operations available. Contact General Control.

OPERATIONS

B12 POSITIVE LOCK-IN LOCK-OUT

Only one button can be depressed at a time. The Momentary Release button must be actuated to release any previously depressed button before any other button can be actuated.

B13 ACCUMULATIVE LOCK

Buttons pushed in remain locked in position until released by pushing reset button.

B14 NO-TWO-INTERLOCK

Only one button can be pushed in at one time, and releases any other button.

B15 LOCK-RELEASE

Any button pushed in releases any previously pushed in button.

B16 NO-LOCK

Has no locking action; returns to normal position on release of finger pressure.

B17 NON-LOCK, NO-TWO-OPERATIVE

The same as B16 except that no two buttons can be operated simultaneously.

B18 PUSH-LOCK, PUSH-RELEASE

Any button depressed remains locked in until that button is depressed again.

B19 PUSH-LOCK, PUSH-RELEASE,
(WITH LOCK-OUT)

This is the same as B18 except that only one button can be depressed at a time.

PIC Electric Counters are actuated by electric impulses (12 to 160 AC or 12 to 220 DC) which may come from any suitable switch, relay, photoelectric switch or other circuit breaking device. Counters rated for 1000 counts per minute (cpm) require .030 second minimum closed period and .030 second minimum open period for each count. Counters rated for 100 cpm require .040 second minimum closed period and .060 second minimum open period for each count. Models are available for 12 to 230 v. AC and DC. Send for literature or write us for prices and deliveries.

Count watts of power consumption. 1000 cpm (with suitable actuation); seven watts power consumption. Built-in rectification provides reliable operation on all AC voltages to 150 v. Quiet operation; no AC hum when energized. Continuous duty coils and balanced armature. White figures on black wheels are easy to read; die cast, dust resistant enclosure. No. CE600AS602, 1.668" w. x 3.5" h. x 1.875" d. No. CE600B602, 1.668" w. x 1.875" d. No. CE600BK602, 5.5" w. x 1.125" h. x 2.812" d. Models listed are for 115 v. AC, 60 cps.

CE-600AS602	Basemount with knob reset. 1 to 9 Net	\$22.40
CE-600BS602	Panelmount with knob reset. 1 to 9 Net	24.00
CE-600BK602	Panelmount with key reset. 1 to 9 Net	33.00

For laboratory and industrial service where duty is moderate. Estimated life six million counts. Counting rate 800 cpm, higher with electronic actuation. Has white figures on black wheels. Coils consume three watts. Tamper-proof metal enclosure has plastic window.

Size: Basemount model,	
2 $\frac{1}{4}$ " x 1 $\frac{13}{32}$ " x 2 $\frac{13}{64}$ " h.; panelmount model, 2 $\frac{13}{16}$ " x 1 $\frac{15}{16}$ " panel x	
2 $\frac{13}{64}$ " d. For 115 v. AC, 60 cps.	
CE-40AS402 Basemount. 1 to 9 Net	\$15.25
CE-40BS402 Panelmount. 1 to 9 Net	15.95

Min. light time .0125 sec.; min. dark time .0125 sec.; min. speed of object thru beam 1.86 inches/sec. Prices on request.

Building block of system. Eliminates human error, reduces cost of manually reading and recording. Transmits counter reading electrically and visually. External circuits used to transmit accumulated totals in binary international or digital form. Manual reset knob or non-reset available. Max. speed 1000 counts per minute. Pulse 60 milliseconds, 50% on, 50% off. Low power consumption. $\frac{1}{4}$ " high numerals. Prices on request.

Widely used on folding machines. Requires only $\frac{3}{4}$ in.-oz. torque. Arm motion: 24° min., 59° max. reciprocal; 10° to 45° overthrow. Arm position adjustable, easily shortened or bent. Rated speed, 300 cpm. SPST contacts rated 5 amps; 120 v. A.C. Body size, $2\frac{1}{2}'' \times 1\frac{1}{2}'' \times 1\frac{1}{2}''$ d. Furnished with straight spring steel arm $2\frac{1}{4}''$ long.

Only 200 million count rate; 1000 cpm (with suitable actuation); has five watts power consumption. Built-in rectification provides top reliability from all AC voltages to 230 v. Continuous duty coils and balanced armatures for dependability. Large, white-on-black figures are easy to read. Standard enclosure has tamper-proof, tamper-resistant front door. Tamper-resistant front door is plastic; separate wiring compartment with independent cover is tapped for conduit. Dustproof enclosure has same housing with dustproof gasket seal and cement sealed window. Size: Standard and dustproof models, 3.12" w. x 6.94" L x 4.69" h.; panelmount models, 3.12" w. x 5.60" panel x 4.39" d. Models equipped are for 115 v. AC, 60 cps.

CE-800CS602	Std. enclosure, knob reset. 1 to 9 Net	\$43.00
CE-800AS602	Dustproof enclosure, knob reset. 1 to 9 Net .	47.25
CE-800BS602	Panelmount, knob reset. 1 to 9 Net	41.50

Counts to 99,999 and then repeats. Widely used in vending machines and similar applications where duty is moderate. Estimated life, three million counts. Counting rate, 600 cpm. Coil consumes three watts. Has white figures on black wheels. Tamper-proof metal enclosure with plastic window. Size: Basement model, $2\frac{3}{4} \times 1\frac{3}{4} \times 2\frac{3}{4}$ in., panelmount, $2\frac{3}{4} \times 1\frac{3}{4} \times 2\frac{3}{4}$ in. For 120 v. AC, 60 cps operation.

CE-40BN502	Basemount, 1 to 9 Net	\$7.75
CE-40AN502	Panelmount, 1 to 9 Net	8.35

Arm has spring return. For operation by boxes, cans, packages, etc. Minimum torque of 3 oz.-in. Arm motion: 31° min., 65° max., reciprocal; 10° to 42° overthrow. Arm position adjustable. Rated speed 300 cpm. SPST contacts rated 10 amps, 120 v. AC. Size: 3½" x 2½" x 1½". Furnished with lever as shown in upper illustration.

Developed to provide remote reset through manually, mechanically, electrically or electronically operated contacts. The CE620 includes a 6 digit CE600 electric counter with electrically operated reset mechanism mounted on a subpanel. Available with push button reset built into panel or with terminals provided for connecting remote contactor furnished by user. Also available in 7 digit and coin counting models.

CE-620BA602	Remote reset 120v 60 cy.	
60 cy. 1 to 9 Net		\$67.00
CE-602BB602	Pushbutton reset 120v	
60 cy. 1 to 9 Net		72.00

25 YEARS OF INTEGRITY IN MANUFACTURING.....

J-B-T INSTRUMENTS, INC. NEW HAVEN 8, CONN.

LAMINATED ROTARY SWITCHES, INSTRUMENT AND TESTER TYPE

- 14- and 20-Position
- Single and Multi-Deck, Military or Commercial

SS-14-2 Laminated

SS-20-2 Laminated

• **USES** — J-B-T Instrument-type Rotary Selector Switches are extensively used in quality test equipment, portable instruments, inspection setups, military or civilian avionics wherever trouble-free, dependable performance is of major importance. Available as a 14- or 20-position in laminated construction shown here or molded types described on opposite page—the design gives extra contacts in minimum space. One to six decks.

• **FEATURES**

Reliability — Rigid, 3-post deck suspension, instead of the usual 2; all current carrying parts are brass or phosphor bronze, silver flashed and then heavily plated with fine silver to meet 100 hour salt spray test; ball bearing action, beryllium-copper balanced spring (SS-14); leaf type (SS-20), and sharp detent assure positive indexing. Springs are replaceable without disturbing soldered connections. Laminated plastic decks and rotors are selected for maximum mechanical and dielectric strength. Insulation resistance above 50,000 megohms.

Low Contact Loss — Double-grip collector arms, and large-area contacts, silver to silver, result in an average contact resistance of .007 ohms or less.

Ample Dielectric (Conservatively Rated) — Carries 1 amp., 125 volts VAC, inductive load; maximum momentary capacity (not make-and-break), 5 amp. AC or DC; maximum voltage between contacts 1500 volts AC, R.M.S.; between decks and ground, 2000 volts AC, R.M.S.

Military or Commercial Variations — The following are typical of switches supplied on special order at extra cost: (a) laminated plastic, Type PBE-P per Spec. MIL-P-3115B; (b) fungus-proofing by vacuum impregnation of rotors, decks, spacers, and ceramic spacers using approved fungicides; (c) hot tin dip on contact surfaces to be soldered; (d) 14 or 20 live positions, no off (add shaft F, as SS-14-2F or SS-20-1F); (e) common position in non-standard location. For description of SS-14 materials, finishes, and government-quality features, see Print SK-42, Rev. B and Print SK-116 Rev. A for SS-20.

BASIC 14-POSITION (SS-14): 13 circuits and "off" per deck in 2" circle for compactness, angular indexing 25°43'. 1 1/4" Bar Knob (KN-14) supplied only on individually boxed units—not on bulk orders unless specified. **Collector arm** normally placed directly opposite to flat of shaft so that knob pointer points to live contact. **Contact lugs** and common lugs positioned as shown below, 13 contacts per deck. **One to six decks;** for each additional deck (or gang) add 5/16" to depth. **Continuous rotation type** supplied unless otherwise specified. **Adjustable Stop** normally is supplied on standard cataloged switches. **Fixed Stops** can be supplied on quantity orders at moderate cost. **Panel locator** positioned as shown unless otherwise specified on bulk orders.

BASIC 20-POSITION (SS-20): 19 Circuits and "off" per deck in 2-23/32" circle for compactness, angular indexing 18°. 2" Bar Knob (KN-18) supplied on individually boxed units—not on bulk orders unless specified. **Collector arm** normally placed directly opposite to flat of shaft so that knob pointer points to live contact. **Contact lugs** and common lugs positioned as shown below, 19 live positions per deck, standard. **One to six decks;** for each additional deck or gang add 5/16" to depth. **Continuous rotation type** supplied unless otherwise specified. **Panel locator** positioned as shown; can be modified on bulk orders.

COMBINATIONS IN SS-14 AND SS-20 SERIES: Besides the military and commercial variations listed above, shorting and non-shorting decks can be assembled on the same switch shaft. Reference to the sketch below will be helpful in numbering decks and contacts when ordering non-standard assemblies. Specialized requirements for stainless steel shafts, no flats or double-flats on shaft, longer projections beyond bushing, and other variations can also be supplied, with necessarily longer delivery time and additional cost.

NOTE: Minor revisions in dimensioning of panel locator tab, length of threaded bushing, and overall depth have been made in this edition, and include drawings on opposite page.

MOLDED ROTARY SWITCHES, INSTRUMENT AND TESTER TYPE

14- AND 20-POSITION • STANDARD OR BONDED RUGGEDIZED TYPES • SHORTING AND NON-SHORTING
All moving contacts enclosed—minimizes dirt and corrosion; 3-post deck suspension for rigidity; double-grip collector arms for positive contact; and rectangular drive shaft for precision indexing.

MS-14-1 Molded

- Interchangeable, electrically and mechanically, with SS-14 and SS-20 laminated switches.

- **FEATURES AND USES:** These switches have values as stated for laminated switches on opposite page. Besides fully enclosing all moving parts, the molded switches differ in the design of the detent mechanism, but both types provide rigid 3-post construction and positive indexing. Test results are available on request covering certain procedures of MIL-E-5272A on insulation resistance; high and low temperature and temperature shock; humidity; altitude; salt spray; vibration; fungus resistance; rain; sand and dust; explosion; shock; and endurance values. (Ratings for MS-20-6DTS Types differ somewhat.

MS-20-3 Molded

BONDED RUGGEDIZED TYPES—As indicated in the tables, all molded rotary switches may be ordered with bonded construction as MS-14B or MS-20B types using cured laminations for ruggedization, shockproofing and further enclosure. Add cost of 35¢ per deck to catalog price of basic switch. Thus, 2-deck switch is MS-14B-2 at \$3.80. Bonding adds approximately 1/64" per deck.

MS-14-POSITION MOLDED (MS-14): 13 circuits and 1" per deck in 2 3/4" circle for compactness.

MS-20-POSITION MOLDED (MS-20): 19 circuits and 1 1/2" per deck in 2 5/8" circle.

Standard cover regularly supplied. 1 1/2" Bar knob (MS-14) included with individually boxed MS-14 units. Bar knob (KN-16) with MS-20 units, but not on bulk orders unless specified. Collector arm placed directly opposite to flat of shaft, so that knob pointer points to the contact. Common or "off" contact lug is rounded and bent down for ready identification. Extra decks add 1/4" per deck to depth; for 7 decks and over, add 1/2" for shaft support and 1/4" per deck for bonding. Continuous rotation type supplied. Permanent stop (MPS) types with pre-set fixed stops are available on special orders. Adjustable stop (MAS type) available only on MS-14 Series. Panel locator available at extra cost on quantity orders when specified. On MS-14-4, MS-14-6, MS-20-4 and MS-20-6, extra hex nut and longer screw can be supplied for inverting supporting screw nearest common, thus converting into panel locator. Complete dimensions: for MS-14, MAS-14, MPS-14 switches, 1 to 6 decks, request Print SK-111 Rev. D; for 7 decks and over, SK-112 Rev. C. For MS-20 and MPS-20, 1 to 6 decks, request Print SK-113 Rev. D; for 7 decks and over SK-114 Rev. C.

IMPORTANT: Enclosed adjustable stop mechanism of MAS-14 type increases switch length by 3/8" behind panel; decreases effective bushing length by 3/8"; and shortens shaft extending from bushing by 1/4". Rings RI-23 and RI-24 are supplied.

*For more than 6 decks, request prices.
†Standard items, but not regularly stocked; check with your electronic parts distributor.
Non-Shorting—Break before make. Shorting—Make before break.

6-POLE DOUBLE-THROW PER DECK—1 OR 2 DECKS
6-Pole Switches (DT Series). Double-throw switching of 6 circuits per deck through two positions (18° throw) becomes easy with this unique rotary-type molded switch. It is fully enclosed and similar in appearance to other molded MS-20 switches. (Illustration shows protective cover cut away.) Circuit arrangement is designated on the metal front of the switch. Quality features include .007 ohm average contact resistance; heavy, fine-silver plating for 100-hour salt spray test; double-grip collector arms. Made in non-shorting (break before make) and shorting (make before break) 2 5/8" max. diameter, one deck 2 3/4" behind panel; two deck, 1 3/4" behind panel. DTS Shorting Types are rated 1500 volts R.M.S. between contacts and ground, 1000 volts R.M.S. between contacts. See MS-20-1-6DT, MS-20-16DTS, and MS-20-2-6DT.

PRACTICAL NEW IDEA: RING-CONTACT SWITCH

Use the unique J-B-T ring-type (suffix R) molded switch to avoid the possibility of cold-soldered joints and the cost of assembling jumper wires when adjacent external contacts are to be joined. An integral ring holds all the contacts on a deck together and can be snipped where wanted. This feature adds 1/2" o.d. to the MS-14 or MS-20 models. Additional cost is nominal; for example, 2-deck MS-14R-2 is \$3.65 catalog price. Ask for Print SK-88 Rev. C on 14-position and SK-89 Rev. C on 20-position.

25 YEARS OF INTEGRITY IN MANUFACTURING

J-B-T INSTRUMENTS, INC. NEW HAVEN 8, CONN.

NEW MULTI-POLE MOLDED ROTARY SWITCHES, SERIES 20M.

- Superior Molded Material • All Models Bonded & Ruggedized • Panel Seal Available

Front View Showing Panel Locator which is Normally at 3 o'clock Position.

Rear View with Back Cover Cut Away to Show 4 Live Switching Contacts.

Although the new 20M-Series is 1/4" longer behind the panel than the 20-position molded switches described on the preceding page, the two styles are otherwise interchangeable in dimensions. Providing 19 live positions and off, the 20M-offers these additional features:

1. **Increased Versatility of Circuitry** — up to and including four poles per deck;
2. **Upgraded Insulation Resistance and Dielectric Qualities** — by use of melamine stations and sealed (or other MIL-M-14 molded materials when specially ordered);
3. **Built-in Panel Locator or Non-Turn Device;**
4. **Extended Switch Life** — new contact design with rotor brushes of phosphor bronze heavily silver-plated;
5. **Bonded and Ruggedized Construction;**
6. **Radial Alignment of Multi-Pole Contact Surfaces** — by means of newly-designed double-ball detent with diaphragm-type springs.

VARIATIONS OF 20M. — Please request SK-142 for full dimensions and circuit diagrams. Besides the condensed listing in the accompanying table, various combinations of **shorting and non-shorting contacts** for each deck may be made. **Fixed stops** are built-in but may be provided for single-pole switches when specially ordered. **Over six decks** can be supplied for a reasonable number of poles; extra decks add 5/16" per deck and 5/16" per switch for rear support SU-3. **Ring-contact** (suffix R) may be specially ordered.

PANEL SEAL PS20M-SERIES — Sealed shaft and bushing meet the requirements of MIL-S-3786A for sealing. For details ask for SK-143. The seal (prefix PS) adds \$1.75 per switch to catalog price.

SPECIFICATIONS AND TEST DATA — Available on request.

No. of Decks	Depth Behind Panel	Poles Per Deck	Model Number	Circuitry Per Pole	Rotation-Positions*	Boxed Incl. Knc.
1	1-3/16	1	20M-1201N	19 live, 1 off	Continuous	\$3.71
		1	20M-1191N	19 live, no off	1 thru 19	3.71

		2	20M-2104N	9 live, 1 off	20 thru 9	9.30
		3	20M-3054N	4 live, 1 off	20 thru 4	10.70
		4	20M-4054N	4 live, 1 off	20 thru 4	12.10
6	2-13/16	1	20M-1206N	19 live, 1 off	Continuous	10.80
		2	20M-2106N	9 live, 1 off	20 thru 9	13.20

* See MS-20 drawing on preceding page for location of positions.

Notes: (1) NON-shorting (N) type — (break-before-make) — is shown. For shorting type (S), add \$0.05 per pole per deck to catalog price. Example: 3 pole, 3 deck 20M-3053S is \$8.95.

(2) Switch with all live positions per pole or less than maximum live positions can be provided by fixed stops.

(3) **Panel Seal** is available including shaft seal within bushing. Use suffix PS. Example: PS20M-1203N. See Print SK-143.

LEVER ACTION SWITCHES — 6, 5, 4, 3, and 2-Position — LAMINATED, MOLDED, & SUB-MINIATURE

LAMINATED 3- AND 4-POSITION, POSITIVE INDEXING. These lever switches are derived from the J-B-T SS-14 instrument-type rotaries.

Specified for tube checkers, inspection equipment, communications systems, control consoles, and other uses where quality is important, 4-position types are interchangeable with 3-position except in length of throw — mounting holes for both, 1 3/8" between centers. Individually-boxed switches come with mounting hardware and KN-17 knob as illustrated; bulk shipments, without knobs. **SINGLE DECK** — spacing between centers: recommended, 3/4"; minimum, 9/16". **TWO DECK** — spacing: recommended, 15/16"; minimum, 13/16". 3/4" between decks matches TV twinlead wires. **SPRING RETURN TYPE** — single deck, 3-position switches may be ordered with spring return. Lever returns to position 1, giving momentary action at position 9 and 10. For dimensions, ask for marking SK-138.

Two-Deck Lever-Action Switch

SS-14-1L4F-2

Positions Per Circuit	Circ. (Poles) Per Deck	Decks or Gangs	Short. Non-Short	Stand. Contact Pos.	Model	Boxed Incl. Knob

*A — common at 12, contacts at 9, 10, 11; B — common at 9, 10, contacts at 6, 7, 8, 12, 13, 14; C — common and off at 12, contacts at 9, 10, 11; D — common at 12, contacts at 8, 9, 10, 11.

† — Spring Return.

Molded 5 or 6 Position Lever Switch

MOLDED 5- AND 6-POSITION, POSITIVE-INDEXING. 5 or 6 live positions, two circuits per deck, in enclosed lustrous black molded construction, adopted from the MS-20 series with electrical characteristics as shown on previous page. These models can simplify circuitry for sound systems, control, inspection, test, experimental, and hobby purposes. Individually-boxed switches come with KN-20 threaded black molded knob; bulk shipments, without knobs. For mounting data see SK-64, Rev. H on 5-position and SK-119, Rev. B on 6-position.

MS-20-115A-1, 5-position, 2-circuit (1 deck) \$3.25

MS-20-116A-1, 6-position, 2-circuits (1 deck) 3.50

2 AND 3 POSITION, 1 TO 4 DECKS, 2 TO 8 POLES PER DECK.

SUB-MINIATURE LEVER SWITCHES — Derived from the high-performance sub-miniature switches described on the next page, the VL-7000 and the VL-5000 positive indexing series and the VSRL-7000 and VSRL-5000 spring return types provide excellence in lever switches. MIL materials throughout; crisp 30° indexing. Max. depth behind panel, 1.250"; panel slot .962" x 0.62"; other details to SK-139, Rev. A and Catalog SM-32C.

Typical switches are: **VL-71031N**, single-pole, 3-position, one-deck, non-shorting — \$4.80

VSRL-71031N, same as above, with spring return to center position from either side — 5.80

VL-71032N, single-pole, 3-position, two-deck, non-shorting — 7.05

LEVER KNOBS

KN-17, black pointed with metal insert \$0.19

KN-18, walnut, same as KN-17 — 0.06

KN-19, black, round, flat-type, push-on — 0.06

KN-20, black, threaded, for MS-20-IL — 0.14

Sub-Miniature 1 Dual Duty Deck

25 YEARS OF INTEGRITY IN MANUFACTURING

J-B-T INSTRUMENTS, INC. NEW HAVEN 8, CONN.

SUB-MINIATURE SWITCHES

New! SUB-MINIATURE SWITCHES—TO ALL PERFORMANCE LEVELS OF MIL-S-3786A, TYPE SR05; ALSO NON-MILITARY X AND V VERSIONS.

SERIES 7000, FULL 12 LIVE SWITCHING CONTACTS PER DECK; SERIES 5000, UP TO 8 POLES PER DUAL-DUTY DECK.

NOMINAL
1 INCH

DECKS

Series 7000

Model Number

V-7006NSR05N30C3HP

Illustrative type illustrated: terminals have hole to accept two 0.032" dia. screws, and supersede 4 "m" terminals formerly supplied.

Precision built for Low-Current Usage where Size, Weight, Reliability are Important
Unusual Versatility—More Contacts per Deck
Accelerated Snap-Action Detent
MIL Materials Throughout for Military & Non-Military Applications

CAUTION—MIL-S-3786A, a sophisticated specification, spells out more than one performance level for each of several categories, such as Temperature-Life, Vibration, and Shock, with each level designated by its own symbol. Only J-B-T SR05 switches meet the highest (and all other) levels.

USES—For test equipment, airborne and transistorized equipment, geophysical apparatus, and other miniaturized electrical and electronic devices.
V-C BASIC SERIES—Full 12 live switching contacts per deck are available in Series 7000 using a patented wafer design feature where rotor contacts on the front, and switching contacts are on the rear of the same deck. 1 to 4 poles per deck 1 to 6 decks, standard.

Up to 8 poles per dual-duty deck are available in Series 5000 which has up to 12 contacts including 4 on the front, and up to 12 contacts including 4 on the rear of the same deck. 1 to 4 poles on each side of dual-duty decks; 1 to 4 decks, standard.

TYPE ROTARY TYPES—Both Basic Series are made in 3 types: **MILITARY STYLE SR05**, numbered for specific performance levels of MIL-S-3786A; **V TYPE**, similar construction to SR05, but not ordinarily subjected to full military test procedures; and **X TYPE**, using the same materials as V type switches, but intended as replacements for previous models or as original components for non-military uses where requirements are similarly exacting.

LEVER SERIES (L TYPE)—Made as VL-7000 or VL-5000 Series, 1 to 4 decks. Illustrated on preceding page.

BOXED—Supplied with individually boxed switches for V and X types; not supplied on SR05 because of separate military specification applies.

DIFFERENCES BETWEEN SR05 MILITARY, V, and X—Switches other than X types use extra rugged index mechanisms and rotor construction.

ITEM	X-7000 X-5000	V-7000 V-5000	MIL-S-3786A V-7000 SR05 V-5000 SR05

* Typical MIL-S-3786A complete number is V-71121N-SR05N30C3HP, unless specifically ordered otherwise. Temperature-Life Characteristic C also will meet Characteristic A or B requirements; Vibration Grade Symbol 3 will also meet Symbol 1 or 2 requirements. Shock Type H for High Impact does not automatically cover Type M, Medium Impact, which can be supplied upon order.

SPECIFICATIONS & TEST DATA ON SR05 MILITARY STYLE

NOTE: Most of the values shown here are given in the Specification and do not indicate the extent to which the test results of J-B-T switches were more favorable.

Current-carrying capacity: 5 amps at standard ambient conditions.

Current-breaking capacity: 750 MA at 30 VDC; 300 MA at 120 VDC; 1 AMP at 115 VAC Non-Inductive.

Initial Contact Resistance: .005 ohms max.

Contact Resistance: To MIL-STD-202B Method 307, which requires Initial—10 milliohms; After Moisture Resistance Test—15 milliohms; After Life Test—20 milliohms.

Materials: Terminals (double-wiping): gold-plated 90% silver alloy. Rotor Contact: 90% Silver Alloy. Shaft & Frame: Stainless steel, passivated.

Insulation: Wafer, glass epoxy laminate to MIL-P-18177C Type GEB, NEMA G-11; Rotor, ceramic to MIL-I-10A, Grade L-823.

Life Rotational: Temperature-Life Characteristic C, 25,000 rotational cycles at 10 cpm, Temperature—65°C to +125°C; 25,000 cycles at 70,000°.

Vibration: Grade 3 of Table III MIL-S-3786A 10 to 2000 cps. Tested in accordance with MIL-STD-202B, Method 204, Test Condition B.

SHOCK: Shock type H, High Impact per Table IV, MIL-S-3786A. Tested in accordance with MIL-STD 202B, Method 207. Mating contact did not open for more than 5 milliseconds; for Shock type M, Medium Impact, not more than 10 microseconds.

25 YEARS OF INTEGRITY IN MANUFACTURING.....

J-B-T INSTRUMENTS, INC. NEW HAVEN 8, CONN.

TOGGLE SWITCHES — HEAVY DUTY — SINGLE-, DOUBLE-, & 4-POLE — GOVERNMENT QUALITY

Series MS25068, MS35058, and MS35059 to MIL-S-3950A; Series ST40A-H, ST42A-H, ST50K-T, ST52K-T to JAN-S-23, MIL-S-21195A (Ships), or DDAX Drawings

OVER 130 MODELS
FOR USES WHERE
DEPENDABILITY COUNTS

● ALL HEAVY DUTY MS and AN models use solid coin silver contacts and rocker arms, exclusive in J-B-T construction, to add overload protection and keep contact resistance under .005 ohms. These and other features more than pay for themselves in trouble-free operation whether in normal use or exceptional environments.

MIL-S-3950A SERIES—Single-pole MS35058 with suffix -21 and above, and double-pole MS35059 types with suffix -21 and above are recommended when maximum reliability is required. Temperature, endurance, and altitude requirements exceed earlier MS types (suffix -1 to -19), AN3021 and AN3027 switches to MIL-S-6745, and ST styles to JAN-S-23 and MIL-S-21195A (Ships). All MS switches contain a silicone rubber bushing seal to meet sand and dust and 15-foot head of water submersion tests.

NOMINAL RATINGS: 20 Amp. at 125 VAC, 10 Amp. at 250 VAC.

.....25 YEARS OF INTEGRITY IN MANUFACTURING
J-B-T INSTRUMENTS, INC. NEW HAVEN 8, CONN.

GGLE SWITCHES — MEDIUM DUTY — SINGLE & DOUBLE POLE — GOVERNMENT QUALITY

Series MS25098 and MS25100 to MIL-S-3950A; Series ST12-27 to JAN-S-23, MIL-S-21195A(Ships), or DDAX Drawings.

● **MEDIUM DUTY** describes the current-carrying capacity—nominally 8 amps, at 125 VAC, 3 amp, at 250 VAC—rather than the life characteristics. Self-wiping heavily silver-plated double-grip contacts provide exceptional reliability. Typical uses: instruments, data processing, and communications circuits.

NEW DESIGN FOR MS25098 & MS25100—Significant internal changes now provide fast break, wide gap, and increased insulation values, to surpass the severe endurance tests of MIL-S-3950A. For example, after 20,000 cycles of operation at 65,000' altitude with resistive load of 5 amps, at 125 VDC, contact resistance was well within the permissible limits. This development is especially important for the double-throw models MS25098-23 and MS25100-23. All MS medium-duty models contain: (a) silicone rubber bushing seal for sand, dust, and 15-foot head of water submersion tests; and (b) case-to-terminal sealing.

SIZE AND TERMINALS—Whether MS series to latest MIL-S-3950A, or ST series to prior Specifications JAN-S-23, MIL-S-21195A(Ships), or DDAX drawings, all have solder terminals. Bushings are 1/4" (except as noted f).

RELAYS & OSCILLATOR CONTROLS

FREQUENCY-SENSITIVE RESONANT REED RELAYS AND OSCILLATOR CONTROLS

Applications: selective-calling mobile communication equipment, remote transmission, and simultaneous or sequential coding and decoding. For further data ask for Bulletins 162R and D664. RR-A11 and RR-A10-types frequency sensitive electro-mechanical relays (encoders) are highly stable control devices. They intermittently make and break contacts when a signal of the same frequency as the tuned coil is received. Although the reed has a high Q, the bandwidth at which the relay responds will be proportional to the input signal level. Use RR-A10 with clamp is recommended for mobile uses. RR-B Oscillator Controls (sometimes known as tone generators or

encoders) are dual-reed units internally shock mounted and of sealed construction. These units control the frequency of oscillation in vacuum tube or transistor oscillator circuits. The RO-B Type oscillator control is recommended where accurate and stable AC signals are required. RR-D Types are internally shock mounted resonant reed relays. These types are square, sealed, plug-in units with 7 pin miniature plug. RO-D Types are single reed, internally shock mounted oscillator controls for applications where space saving is of importance. Dimensionally these units are identical to RR-D relays and are plug-in types of the 7-pin miniature.

LICON® PRECISION SNAP-ACTION SWITCHES

LICON® "DOUBLE-BREAK" ACTION

A unique approach to the concept of double-break switching is the common denominator in a wide line of Licon miniature switches that speak for themselves . . . well over 20 million times. The Licon difference is in design and materials. Dual non-stressed blades and low-rate simple coil springs put life in the snap action. Double-break contacts increase the interrupting ability by providing eight surfaces and two gaps to boost capacity and life. Long-stroke wiping keeps the action alive, "cleans" contacts every actuation, minimizes chances of contact weld.

LINEMASTER, Jr. FOOT SWITCH

#121-S
& #122-S

Lightweight, sensitive...
ideal for women workers! Needs only a touch of the toe, while heel remains comfortably on the floor.

Aluminum housing, black crackle finish. Weight 1 lb. 5 1/2" long, 3 1/4" wide, 1 1/4" high. Rated at 15 amps., 115 volts A.C.; 15 amps., 250 volts A.C. Can be wired to operate as single pole, normally open; single pole, normally closed; or single pole double throw. Momentary Contact only.
#122-S—Rated at 20 amps., 115-250 volts A.C.

The LINEMASTER

CLIPPER SWITCH

in two models:

1. **Momentary contact**
(press to start—release to stop)
2. **Maintained contact**
(press to start—press to release)

Rugged Momentary Contact Clipper has proved invaluable to product engineers and machine operators. Maintained Contact Clipper is now available for heavy duty applications. Molded nylon actuating cams; rugged cast iron housings, sponge rubber skid pads. Weight: 2 1/2 lbs. Size: 4 1/2" x 3 1/2" x 1 1/2".

#632-S—AC Rating: 20-A, 125-250V, Momentary Contact, Single Pole, Double Throw.

#634-S—AC Rating: 10-A, 125-250V, Momentary Contact, Double Pole, Double Throw.

#632-D—AC Rating: 20-A, 125-250V, Maintained Contact, Single Pole, Double Throw.

#634-D—AC Rating: 10-A, 125-250V, Maintained Contact, Double Pole, Double Throw.

The LINEMASTER EXECUTIVE

Two Switches in
One • "On-Center"
Mechanical Interlock

This handsome switch is foot-proof and easy-to-operate! Selective circuits and guaranteed interlock eliminate possibility of accidentally tripping both circuits simultaneously, while low, wide casing saves excessive leg movement—foot pivots easily from one side to the other.

Easy to wire—remove only one screw and switch is ready. Either interior (or both) may be wired as normally open or normally closed—single pole—double throw.

Heavy steel housing, baked hammertone grey finish. Wt., 14 oz., 4 1/2" long, 4" wide, 1 1/4" high. Each interior rated at 15 amps at 125-250 volts A.C.

The B-4-S has a DPDT circuit on each side and is rated at 10 amps 125 VAC, 5 amps 250 VAC.

#B-2-S

#B-4-S

The LINEMASTER CADET

the "little giant" in
foot switches that
operates from any angle

#HB-2

Small, only 1 1/4" high, 3 3/4" in diameter... Lightweight, just 11 oz. including cordset... Rugged, with heavy steel housing and unbreakable plastic actuating cap, the Cadet is an extremely compact foot switch that will give years of service in hundreds of different applications. It is well designed with an attractive grey hammertone effect casing, maroon cap and non-skid sponge rubber base for perfect positioning. The slightest pressure on the actuating cap from any angle puts the switch in operation. The operator has better control of work resulting in better production. Single pole, double throw, momentary contact only. Wired normally open. Rating 5A at 110V and 250V. Furnished with heavy duty 5 ft. 18-25V black rubber cordset, series plug and molded strain relief grommet.

MANY OTHER STANDARD MODELS ARE AVAILABLE—WRITE FOR CATALOG

"When awkward jobs hold you up—a LINEMASTER FOOT SWITCH is your third hand!"

LINEMASTER

PRECISION-BUILT • DEPENDABLE • RUGGED • ECONOMICAL • OVER 1000 APPLICATIONS

LINEMASTER

"SENIOR" 4000 SERIES

10 Maintained and Momentary Contact Models

A sturdy industrial-type switch that operates with light pressure from foot or knee, leaving both hands free for work. Economical and built to give years of trouble-free service — fully enclosed and hooded for protection against dirt and chips, with additional heavy spring and cast stop under cover casting, to relieve pressure and strain on spring inside switch proper.

Heavy-duty cast iron housing; black crackle enamel finish. 7" long, 4" wide, 3 1/4" high. Weight, 5 1/2 lbs.

MAINTAINED CONTACT MODELS: Press to start—press to stop. MOMENTARY CONTACT MODELS: Press to start—release to stop.

The LINEMASTER COMPACT

Amazingly versatile—amazingly low-priced!

Small, lightweight — and instantly responsive to the slightest pressure of foot, finger, knee or elbow! Substantially built to insure long life, with an actuating mechanism superior to any other on the market today.

Available in a wide variety of wiring plans. Strong steel housing, black crackle finish. 2 3/4" long, 2 1/2" wide, 7/8" high. Weight, 6 1/2 ozs. Momentary contact only.

Cat. No.	DESCRIPTION	RATING
491-S	Single Pole, Double Throw A.C. only	10A at 115V 10A at 230V
491-SC	SPDT, Wired N.O. with 6 ft. cord and 2 prong series plug, A.C. only.	10A at 125V 1/2HP at 115V
491-S Twin	Two 491-S switches mounted on a twin base	10A at 115V 1/2HP at 115V
492-S	Single Pole, Double Throw A.C. only	20A at 115V 20A at 230V
493-S	Single Pole, Single Throw A.C. only, double break	10A at 115V 5A at 230V
494-S	2 interiors so arranged as to simulate D-P-D-T	10A at 115V 5A at 230V
496-S	Foto with cord & light, Single Pole, Double Throw A.C.	20A at 115V 20A at 230V

The LINEMASTER TREADLITE

Trim, small, lightweight, instantaneous!

MODEL T-51-S — Accurate control in a modern, minute, treadle switch! Single pole, double throw, momentary contact interior, that can be wired open or closed. Rubber base pad and rubber-ribbed treadle, formed steel casing with black crackle finish. Interior rated at 7 amps., 110 volts and 250 volts A.C. Weight 7 ozs.; 3 1/2" long, 2 3/8" wide, 1" high (model T-51-SC is wired with 6' cord and series plugs.)

MODEL T-51-D — Rocker type maintained contact action.

MODEL T-52-S — ONE treadle activates TWO switching operations! A partial downward stroke opens or closes one circuit; added pressure actuates the second circuit. Both interiors, as well as exterior, meet specifications for single-switching Model T-51-S.

LINEMASTER "NAUTILUS" FOOT SWITCH

waterproof • dustproof
oilproof • rustproof

A truly great development by Linemaster. The Nautilus is waterproof, dustproof, oilproof, rustproof. Rugged Aluminum casting for long life. Piston type actuator sealed with "O" ring. Electrical interior "well" sealed with "O" ring.

Size: 8" x 4" x 2 1/4" Wt.: 2 lbs., 8 1/2 ozs.

Cat. No. WP541-S 20 Amp. 125-250 VAC SPDT momentary
Cat. No. WP541-D 12 Amp. 125 VAC SPDT maintained

The LINEMASTER LEKTRO-LOK SWITCH

Small, sensitive, automatically safe

Particularly ideal for transmission equipment!

Mechanical interlock allows only one circuit to function at a time—and you can depend on it! LEKTRO-LOK operates on the teeter-totter system, with selective circuits. Pressure on one side actuates one circuit, release of pressure automatically returns switch to normal "off" position. Pressure on the other side is required before second switch is actuated, independent of first. Yet LEKTRO-LOK requires only a single cord—eliminates costly harness assemblies! Rugged stamped metal housing, black crackle finish. Weight, 10 ozs. 5" long, 2 3/4" wide, 1 1/4" high. Single pole, double throw. Rating (A.C. only) 15 amps at 125 volts, 15 amps. at 250 volts.

The L-4-S has a DPDT circuit on each side and is rated at 10 amps 125 VAC, 5 amps 250 VAC.

6, 7, 8, 10, 15, 20, 25, 30 amps. at 32 volts	.66/5	11.00/c

315(000) Series
Available under this series with 1 1/4" No. 20 tinned copper wire leads in comparable amperages as shown. Series approved by Underwriters' Laboratories through 3.2 amps.

1/100, 1/50 amp.	1.50/5	25.00/c
1/25, 1/10, 3/16, 1/8, 15/100, 2/10, 3/10, 1/2, 5/10, 3/4, 1 amp.	1.11/5	18.50/c
1 1/10, 1 1/4, 1 1/2, 1 3/4, 2 amp.	1.05/5	17.50/c
2 1/2, 2 3/4, 3, 3 1/2, 4, 5 amp.	.90/5	15.00/c

3AG Indicating Fuses (125 volts or less) 334(000) Series
Medium acting fuses. Pin "pops out" when fuse is blown providing visual indication or the pin can strike a bus bar actuating an audible alarm circuit or a light-alarm circuit.

3/4 amp.	2.00/5	33.00/c
1, 1 1/2, 2, 3, 4, 5 amp.	1.50/5	25.00/c
6, 8, 10, 12, 15, 20 amp.	2.10/5	35.00/c

3AB Fuses (250 volts or less) (steatite) 314(000) Series
Medium time lag steatite enclosed arc quenching powder filled fuses. Approved by Underwriters' Laboratories through 15 amperes.

1/8, 1/4, 3/8, 1/2, 3/4 amp.	.60/5	10.00/c
1, 2, 3 amp.	.57/5	9.50/c
5, 6, 7, 8, 10 amp.	.54/5	9.00/c
12, 15, 20, 25 amp.	.57/5	9.50/c
30 amp.	.66/5	11.00/c

4AG Aircraft Fuses (32 volts or less) (anti-vibration) 411(000) Series
Medium to slow fuses especially developed for aircraft use. Designed to withstand vibration, shock, fatigue and repeated off and on circuit operating conditions encountered in aircraft operation.

10, 15, 20, 25, 30 amp.	.39/5	6.50/c
35, 40 amp.	.42/5	7.00/c

4AG Aircraft Fuses (250 volts or less) (anti-vibration) 412(000) Series
Quick acting fuses—for low time lag applications. Developed for aircraft use. Designed to withstand shock and fatigue and afford maximum protection.

1/4 amp.	1.38/5	23.00/c
1/2, 15/100 amp.	.96/5	16.00/c
1/4, 1/2 amp.	.48/5	8.00/c
1, 1 1/2, 2, 2 1/2, 3 amp.	.42/5	7.00/c
5, 8 amp.	.39/5	6.50/c

4AG Slo-Blo Fuses (250 volts or less) 413(000) Series
High time lag fuses for extra protection against sustained overloads. Designed to meet aircraft vibration test requirements. Spring-and-link element construction takes up thermal expansion and contraction and eliminates cyclic fatigue, crystallization and resulting fracture of link.

1/100, 1/50, 1/25, 1/10, 3/16, 1/8, 15/100, 2/10, 3/10, 1/2, 5/10, 3/4, 1 amp.	1.17/5	19.50/c
2 1/2, 3, 3 1/2		
4, 5, 6 1/4, 8, 10, 15, 20, 25, 30 at 32 volts	.90/5	15.00/c

4AB Fuses (250 volts or less) (steatite) 414(000) Series
Medium lag, steatite-enclosed, shatterproof fuses. Spring and link construction under 5 amperes. Mechanical depolarization, non-crystallizing features incorporated into ratings over 5 amperes.

1, 2, 3 amp.	.87/5	14.50/c
5, 6, 8, 10, 15, 20 at 125 volts	.81/5	13.50/c
25, 30 at 32 volts	.81/5	13.50/c
35, 40 at 32 volts	.87/5	14.50/c

5AG Aircraft Fuses (32 volts or less) 511(000) Series
Medium to slow fuses for general aircraft applications. Design incorporates anti-vibration type element, twisted to 90° angle and mechanically depolarized construction.

10, 15, 20, 25, 30 amp.	.51/5	8.50/c
35, 40, 50, 60 amp.	.54/5	9.00/c

LITTELFUSE

LIMITED CURRENT FUSES & HOLDERS

The Limited Current Fuse Holder is designed to accept only the size, amperage, range and type (regular or slo blo) in its amperage range. The fuse locks into the holder by means of a bayonet lock which permits easy and quick insertion and removal of fuses.

limited Current Fuse Holders 346(000) Series)

LITTELFUSE

DES PLAINES, ILLINOIS, U.S.A.

LITTELFUSE

MICROFUSE

A completely different development in circuit protection for subminiature applications.

The PIGTAIL VARIETY (278000 series) is especially adaptable for soldered connections in minimum space.

The PLUG-IN VARIETY (272000 series) is designed for use with the No. 281001 sub-miniature fuse holder which is easily mounted to chassis or printed circuit board.

The SUB-MINIATURE FUSE HOLDER #281001 allows fast simple fuse replacement, will handle continuous currents up to 5 amps at 125V or less.

Size: $1\frac{3}{4}$ " Dia. x $1\frac{1}{2}$ ". Available from 1/500 amp. through 5 amps. Maximum voltages—125V. Blowing Specifications: Series 272000—278000, 110% Life; 200% 0-10 Seconds.

FUSE MOUNTING PANELS

MOUNTINGS WITH SOLDER TERMINALS—TYPE "S" Phosphor-Bronze, bright-dipped finish Lug Clips are firmly anchored to black Bakelite base—have non-turning anchors. For AG (387000 series) and 3AG (357000 series) fuses.

MOUNTINGS WITH SCREW TERMINALS—TYPE "T" Spaced U/L requirements for equipment circuit protection. Nickel plated brass screw terminals, nickel plated fuse clips. For AG(356000 series), 4AG(456000 series) and 5AG(556000 series) fuses.

Open type fuse panels, stocked in 12-pole units as shown—we cut them to 2, 3, 4 or more poles as ordered, or you may cut them in your plant ($\frac{1}{8}$ " allowance for saw cut).

STANDARD FUSE CLIPS

For the exacting performance often required in the electronics communications, radio, television, aircraft and marine equipment industries, we recommend our beryllium copper fuse clip. Beryllium copper clips have lower contact resistance and higher conductivity than ordinary fuse clips. They are silver plated, a finish well suited to fuse applications.

MALLORY SWITCHES

PHENOLIC WAFER ROTARY SWITCHES (FIG. A)

MIL grade phenolic wafers with self-cleaning silver-plated contacts. Adjustable stops, 30° Index. Max. O.D. 1 1/4". 3/8"-32 x 3/8" bushing. 1/4" dia. x 2" shaft grooved for cutting. Space between index and #1 wafer, 1/2". Spacing between other wafers, 1". Ratings: 6 amp at 300 v. DC; 8 amps at 60 v. DC; 1 amp at 300 v. AC; 10 amps at 6 v. AC; max. non-breaking resistive load, 10 amps; breakdown, 1000 v. DC or AC. With hex nut, lockwasher and 366-1 knob.

Mallory Number	No. of Circuits	No. of Positions	No. of Sections or Gangs	Net Each
Shorting Type	Non-Shorting Type	Per Section	Switch	
1211L	1311L	1	2 to 11	\$2.10
1215L*	1315L*	2	2 to 5	2.10
1213L*	1313L*	3	2 to 3	2.10

1222L*	1322L*	4	2 to 2	2.58
1231L	1331L	1	3 to 11	3.24
1235L*	1335L*	2	2 to 5	3.24
1241L	1341L	1	4 to 11	3.81
1245L*	1345L*	2	2 to 5	3.81
1251L	1351L	1	5 to 11	4.11
1256L	1356L	2	2 to 6	4.53
1261L	1361L	1	6 to 11	4.83
1266L	1366L	2	2 to 6	5.52

*These switches are provided with an "off" position which is in addition to the number of positions listed in the fifth column.

24 POSITION TAP SWITCH (FIG. B)

Ratings same as 12/1300 Series. Continuous rotation, 15° Index. With nut, washer, 366-1 knob and 394 dial.

Mallory No. 13124L Switch—Net Each... \$276

5 POSITION HAMSWITCH® (FIG. B)

For measuring up to five circuits on single meter. Same ratings as 12/1300 Series plus conservative 1000 v. AC rms or 1500 v. DC rating. 60° Index; adjustable stop.

Mallory No. 151L Hamswitch—Net Each... \$270

CIRCUIT OPENING SWITCH (FIG. B)

For meter switching or inserting resistors, capacitors, etc. Ratings same as 12/1300 Series. Adjustable stop; 30° Index.

Mallory No. 1400L Circuit Opening Switch—Net Each... \$468

DECADE SWITCHES (FIG. B)

Requires only four resistors or capacitors for full decade. Ratings same as 12/1300 Series, 36° indexing.

Mallory No. 153L Capacitor Decade Switch—Net Each... \$270

Mallory No. 154L Resistor Decade Switch—Net Each... \$294

CERAMIC WAFER SWITCHES (FIG. C)

MIL grade ceramic wafers for RF switching. Non-shorting. Indexes: 170/180 Series, 30°; 160 Series, 90°. Bushing, shaft and wafer spacing same as on 12/1300 Series. Ratings: 5 amps, 300 v. AC or DC; 6 amps, 6 v. AC or DC (160 Series 1000 v. DC and up to 100 watts). Series 170/180 breakdown, 500 v. AC or DC. Max. non-breaking resistive load, 5 amps. With nut, washer and 366-1 knob.

Mallory No.	No. of Sections	Circuits	Spacing Between Sections	Contacts Per Circuit	Net Each
161C	1	1	1 1/4"	4	\$2.16
162C	2	2	1 1/4"	4	3.06
163C	3	3	1 1/4"	4	3.96
164C	4	4	1 1/4"	4	4.86
165C	5	5	1 1/4"	4	5.76

Mallory No.	Number of Gangs	Number of Circuits Per Gang	Number of Positions	Net Each
172C	1	1	2 to 11	\$2.37
173C*	1	2	2 to 5	2.37
174C*	1	3	2 to 3	2.37
176C	2	1	2 to 11	3.39
177C*	2	2	2 to 5	3.39

180C	3	1	2 to 11	4.32
181C*	3	2	2 to 5	4.32

*Has additional "off" switch preceding numbered positions.

SINGLE SECTION ROTARY SWITCHES (FIG. D)

Multi-purpose phenolic switches. Index: 1 1/4" dia., 30°; 1 1/4" dia., 20°. Ratings: 125 amp, 300 v. DC; 3 amps, 6 v. DC; 2 amp, 300 v. AC; 5 amps, 6 v. AC; breakdown 500 v. AC or DC; max. non-breaking resistive load, 5 amps. Bushing, 3/8"-32 x 3/8"; shaft, 1/4" x 2". With nut, lockwasher and 366-1 knob.

Mallory Number		No. of Cir- cuits	No. of Positions	Dia. of Base	Adjust- able Stop	Net Each

ANTENNA SWITCH (FIG. D)

For switching two separate TV or FM antennas on single set. Dia., 1 1/4". With bracket, self-tapping screws, all hardware and 366-1 knob.

Mallory No. 3122TV Antenna Switch—Net Each... \$131

LEVER ACTION SWITCHES (FIG. E)

Phenolic wafers for audio systems. Positive Indexing. Mtg.: 5000 Series, elongated holes on 3/8" ctrs.; 6000 Series, rd. holes on 1/8" ctrs. Multiple mtg. spacing, 3/4". Ratings: 125 amp, 300 v. DC; 3 amps, 6 v. DC; 2 amp, 300 v. AC; 5 amps, 6 v. AC; breakdown, 500 v. AC or DC. With two #6-32 screws, nuts and knob.

Mallory Number		No. of Poles or Circuits	No. of Positions or Contacts	Net Each

1017	DP—Make 2, Break 1	1.05
1018	DPDT—Make before break	1.44

GENERAL PURPOSE AND LEVER ACTION SWITCHES

Miniature phenolic switches. Series 4M, 5M for tone control, radio-phone, etc.; Series 6M for audio switching. Series 4M and 5M with nut, washer and 366-1 knob; 6M with 635149 knob and two #6-30 screws. Suffixes: D, has AC line switch; K, knurled shaft (others 1/4" dia. rd.); S, spring return; U, spring return and positive index.

MALLORY-GRIGSBY MINIATURE SWITCHES

Mallory-Grigsby miniature rotary switches feature exclusive Wedglock contacts which insure positive alignment, avoids frame and contact distortion and wide insulating path between adjacent contacts. Max. wafer dia. $1\frac{3}{4}$ ". Index: Phenolic types, 30°; ceramic types, 30°, 60° (H), and 90° (N). Phenolic types use Richardson 1725 grade phenolic; ceramics, MIL grade L5 Steatite treated with Dow-Corning 200. Ratings: 350 ma, 500 v. rms resistive; breakdown, 1700 v. rms, 60 cps; max. initial contact resistance, .005 ohm; Bushing, $\frac{3}{8}$ "-32 x $\frac{3}{8}$ "; shaft, $\frac{1}{8}$ " dia. x 2". With nut, washer and 366-1 knob.

MALLORY-GRIGSBY SUBMINIATURE SWITCHES

Glass-epoxy wafers per MIL-P-18177. Only $\frac{3}{4}$ " diameter. Series 12M rotary types available with up to three sections ($\frac{3}{4}$ " spacing); Series 12L are lever action type. Index, 30°. Ratings: 150 ma at 150 v.; max. voltage, 225 v.; max. current, 2.5 amps at 6 v. AC rms (all resistive load). Bushing (12M), $\frac{3}{8}$ "-32 x $\frac{1}{4}$ "; shaft $\frac{1}{8}$ " dia. x $1\frac{1}{4}$ ". Rotary types furnished with nut, washer and 366-1 knob; lever types with two #4-40 screws and GS5149 knob. Suffixes (12L): S, spring return; U, spring return and positive index.

FUSE MOUNTING BASES

Fuse Mounting Bases to accommodate the 3AG Cartridge type auto fuses. Bases are made from 1/16", 1/8" and 3/16" thick XP laminated phenolic. Clips are made from spring brass nickel plated terminals .018 brass hot tinned.

Rectifier mounting bases made from XP laminated phenolic, clips are made from .020 spring

brass cadmium or silver plated. Stops are lanced in clips and are assembled in a manner to insure polarization.

Diode clip base assemblies made to suit your specific needs. The diode clip employed, cuts soldering costs and insures good electrical connection.

#450 cartridge panel mount fuse holder is molded from black general purpose phenolic powder. All metal parts are plated to resist corrosion and solder lugs plated to facilitate production soldering. Rated at 15 Amps .250 volts and is underwriter laboratories approved.

semiconductor diodes • r.f. chokes

POWER TAP SWITCHES NON-SHORTING TYPE

Each switch is a non-shortening, single pole, rotary, multi-position unit, but switches can be ordered assembled 2 or 3 in tandem (2 maximum, for Model 111) to form multipole assemblies. All ceramic insulation, large, solid silver-to-silver contacts, and "slow-break" action especially designed for alternating current use establish new standards of dependability and performance. Switch shafts are electrically "dead"—insulated by strong ceramic hubs. Contacts and mechanism are entirely enclosed and protected (except for the Model 111).

MODEL 111 TAP SWITCH

Alternating Current Rating 10 Amps. 150 Volts — Diameter $1\frac{1}{4}"$ — Shaft Diameter $\frac{1}{4}"$ — Standard Mounting: For $\frac{1}{4}"$ panel maximum, by means of $\frac{3}{8}"$ -32 threaded bushing and hex. nut.

3. Twist end of wire around shaft.
4. Crimp ends of slot to lock wire in place.

MILITARY SWITCHES

HEAVY DUTY — SINGLE-, DOUBLE-, & 4-POLE — GOVERNMENT QUALITY

OVER 130 MODELS OF MIL (MS), AN, AND
JAN (ST) TYPES

- ALL HEAVY DUTY MS and AN models use solid coin silver contacts and rocker arms, exclusive in J-B-T construction, to add overload protection and keep contact resistance under .005 ohms. These and other features more than pay for themselves in trouble-free operation whether in normal use or exceptional environments.

MIL-S-3950A SERIES — Single-pole MS35058 with suffix —21 and above, and double-pole MS35059 types with suffix —21 and above are recommended when maximum reliability is required. Temperature, endurance, and altitude requirements exceed earlier MS types (suffix —1 to —19), AN3021 and AN3027 switches to MIL-S-6745, and ST styles to JAN-S-23 and MIL-S-21195A- (Ships). All MS switches contain a silicone rubber bushing seal to meet sand and dust and 15-foot head of water submersion tests.

Pacific Switch Controls is a California Corporation specializing in distributing electric switches, relays, pilot lights, and related control devices to the electrical and electronic industry.

Being oriented toward manufacturers and distributors, Pacific Switch Controls has available adequate inventory to fully satisfy needs at factory

prices. We also have a switch circuit design and circuit engineering service. Facilities will include a model shop for building prototypes of special switches and switching circuits as needed.

For further information, please contact Shepard Goodman, Vice Pres., at Pacific Switch Controls.

MOTOR STARTING SWITCH

FEATURING

- Universal application—only two switches needed to service all single phase, split phase, or capacitor motors of 1/6 to 1/3 hp inclusive.
- Quickly and easily installed—internally, externally, or remote...in any position.
- Simple, but rugged and foolproof.
- Fully enclosed—dust and dirt proof.
- Long, dependable life.
- Dimensions: 1-11/16" long x 1" wide x 1-1/8" deep.
- The Sorenson switch is designed to replace the conventional centrifugal type switch on single phase, split phase, or capacitor motors, ranging from 1/6 to 1/3 hp inclusive, 110/220 volts, 50/60 cycles. The switch will start motors in the above range within any standard rpm rating, even under the heaviest starting loads, plus or minus 15% to 30% voltage variations, according to the design of the motor.

CATALOG Nos.

- RM 01620 (1/6 to 1/5 HP)
- RM 02533 (1/4 to 1/3 HP)

Patented No. 2,629,792, others applied for

HOW THE SORENSON SWITCH OPERATES

The switch operates on the magnetic principle. It is simply connected in series with the working winding of any type motor. It operates by the momentum of the starting current, and responds to open the starter winding circuit at the pre-determined rpm rating. No internal adjustment required. An adjusting screw (externally operated) provides a means of universal application of the switch to all motors within the above mentioned hp ratings, under all voltage conditions. Specific instructions for making this adjustment are included with each switch.

QUICKLY AND EASILY INSTALLED INTERNALLY, EXTERNALLY or REMOTE

The slotted metal strap attached to the switch case provides the means for extremely flexible mounting, internally, externally or remote.

SORENSON LIGHTED CONTROLS, INC. WEST HARTFORD, CONNECTICUT

SoLiCo

Versatile, low cost STACK SWITCHES TO THE CUSTOMERS' REQUIREMENTS

An unlimited number of switch blade combinations and circuit arrangements, including Push Button types are available. Precision construction and expert factory adjustment to meet your specific needs.

COMBINATIONS—

Switches with $\frac{1}{4}$ " and $\frac{3}{8}$ " mounting centers offered in a variety of combinations, such as those illustrated.

BLADE MATERIALS—

Phosphorous Bronze is standard. Other materials available upon request.

BLADE LENGTHS—

Up to 1 $\frac{1}{2}$ " max. from center of first hole with $\frac{1}{4}$ " mounting centers. Up to 2 $\frac{1}{2}$ " max. from center of first hole with $\frac{3}{8}$ " mounting centers.

CONTACT MATERIALS AND RATINGS—

Fine silver contacts are standard. Contact ratings to users particular application.

SEPARATORS—

XP Bakelite standard—Military and U/L types available upon request.

LIFTERS—

Available in nylon and black hard fibre in various lengths and diameters.

TERMINALS—

Solder lugs are standard. Lug adaptors are also available with both $\frac{1}{4}$ " and $\frac{3}{8}$ " mounting centers.

MOUNTING BRACKET—

Reversible bracket provides either $\frac{1}{4}$ " or $\frac{3}{8}$ " mounting. (See illustration)

Send us your complete requirements, so that we can give you a prompt quotation and engineering sample for your specific needs.

SPEMCO H & H SUBMINIATURE SWITCHES

SUBMINIATURE TOGGLE SWITCHES

Meeting requirements of MIL-S-3950
as applicable to SCL-6305

Spemco Subminiature Switches are 1/10 the volume of the standard switch shown in dotted outline.

DIMENSIONAL TOLERANCES
ON FRACTIONS $\pm .004$ ON DECIMALS $\pm .002$

OPERATING CHARACTERISTICS

CONTACT RATINGS: 5 amp resistive at 29 volts DC or 115 volts AC.

ELECTRIC STRENGTH: 1000 volts RMS at sea level.

OPERATION: 5-28 CPS at 0.5 inch double amplitude; 28-2000 CPS at 20 G.

SHOCK: 50 G for 11 milliseconds.

ELECTRICAL LIFE (minimum): 20,000 make and break cycles.

ENVIRONMENTAL: Low temperature rubber boot for panel is available.

WEIGHT: From 3.0 to 5.0 grams maximum.

TERMINALS: Solder lugs.

SWITCH TO TECH LABS for the Most Versatile Line of Precision Switches & Attenuators

FOUNDED 1935

These switches are representative of the many types produced by TECH LABS meeting applicable Government Specs. Wire or teletype for further information.

TEL: 201 - WI 4-2221

TWX: 201-947-4730

TAP SWITCHES

TYPE 3A MINIATURE TAP SWITCH

Molded from
Diallyl Phthalate

\$3.00 List

Specifications

Size: 1" diameter, 1 1/4" with terminals.
1 deck, 1 1/4" long, 1/2" for each additional deck.
Rating: 1200 volts rms, 2000 VDC, 5 amps. (carrying) 115 V.
Insulating resistance: 100 megohms minimum at 500 volts DC.
Life: 1.5 - 2 million revolutions.
Temperature range: -65°C to 100°C.
Mounting: single hole.

TYPE 2A & 2M

TYPE 10A TAP SWITCH

The Type 2A, a standard control switch for precision instruments and equipments, comes in 2-24 positions and 1-4 poles per deck, with phenolic insulation. The 2M is identical except for Melamine insulation. Both are rated for 3 AMP.

Code "S" denotes "shorting" and "N" "non-shorting".

Type	Code	No.Pos.	No.Decks	Poles/Deck	Price
2A	1S24	24	1	1	\$4.50
2A	4S5	4	1	5	\$6.00
2A	N10-2	10	2	1	\$7.00
2M	1S24	24	1	1	\$5.50
2M	4N3	3	1	4	\$7.00

A multi-deck switch of small dimensions, 1 3/8" sq. This is a precision switch designed to meet high requirements in smallest possible space. Up to 24 positions, shorting. Price approx. \$10 per deck, plus frame \$5.

THUMBWHEEL SWITCHES

"PANEL-MITE"

A compact, molded, printed-circuit wafer switch for limited space and in line read-out. Modular type for either front or back of panel mounting: modules 1/2" between center lines, height 2". Single or double pole, 10 position, binary or complementary codes, standard. Other codes available on request.

CAM SWITCHES

TYPE 8A CAM SWITCH

A new development of great interest. Small size, long life and great flexibility. Have been made with from one to 30 contact springs. Will carry 3 amp. Standard unit has four contact springs and 10 positions, price \$12.50.

TYPE 600

TYPE 800

TYPE 900

SQUARE SWITCHES

These standard rugged control switches are the standby for equipment calling for dependable switches in a hurry. Will meet all standard government specs. All parts carried in stock. An infinite number of combinations possible. Teletype your specs.

The price of the basic frame is the same for all, viz. \$4.00 each. The type 600 and 800 are priced at \$8.00 per deck plus frame price, and the type 900 switches are \$9.50 per deck plus frame \$4.00.

Type	Size	Rating	Max. Pos. Short.	Max. Pos. Non-Short.
600	1 3/4" sq.	5A.	24	12
800	2 1/4" sq.	5A.	32	16
900	2 3/4" sq.	10A.	48	24

STEPPING SWITCHES

TECH LABS switches are now standard equipment in missiles as well as in ground controls. Furnished sealed to meet all specs. Write for details. Prices on request.

ATTENUATORS

A complete line of audio and r.f. attenuators with both manual and REMOTE CONTROL. We will design components to meet your specific requirements, if standard units are inadequate. Please write for catalogue and send us your specs for estimate.

AMERICAN BEAUTY ELECTRIC SOLDERING IRONS

American Beauty is known throughout the world as the quality-standard for electric soldering tools. Stocked in all models and watt-inputs—plus tips, parts and accessories.

B-SERIES MINIATURES

Newest advance in truly miniature irons. Precise balance. Cool handle. Long-life, "floating", heating element. Anti-roll baffie. Simple three-piece assembly. Boxed with 6' detachable cord set, 3 assorted tips. Packed 6 to case.

CAT. NO.	TIP DIA.	WATTS	NET WT.	LIST
B-2000-L	1/8"	22½	3 oz.	\$12.00
B-2500-L	3/16"	30	3 oz.	\$12.00

Two-wire cord is standard. For same irons equipped with 3-wire grounding cord and NEMA type plug, add "S3" to CAT. NO. and \$1.00 to list price.

*Other options available

BANTAMS

Small American Beauty irons in wide range of watt-inputs and tip diameters to cover entire range of fine and medium-line jobs on electronic and electrical production lines.

CAT. NO.	TIP DIA.	WATTS	NET WT.	LIST
3114	1/8"	60	8 oz.	\$10.40
3118	3/16"	30	6 oz.	7.20
3120	3/16"	30	6½ oz.	7.20
3118-X	1/8"	50	6 oz.	8.00

*Other models & options available

TRANSFORMER TYPES

Made in two series. Extremely lightweight, hi-heat, slim-casing irons of very small tip-diameter. For use where transformer type irons (providing complete isolation from line voltage) are desirable or necessary.

CAT. NO.	TIP DIA.	WATTS	NET WT.	LIST
T-12	1/16"	17	1 lb. 3 oz.	\$20.00
T-30	1/16"	30	1 lb. 12 oz.	22.00

*Other options available

STANDARD SERIES

Hundreds of thousands of these models of American Beauty irons are on production lines all over the world. Stocked in tip sizes from 1/4" to 1 1/8", input wattages from 60 W to 550 W.

CAT. NO.	TIP DIA.	WATTS	NET WT.	LIST
3125	1/4"	60	7½ oz.	\$ 9.00
3138	3/8"	100	16 oz.	12.10
3158	5/8"	200	28 oz.	14.50

3198	1 1/8"	550	60 oz.	24.20

*Nine models available

ANGLE TYPES

Conventional irons but with casings angled for work on hard-to-reach jobs. Balanced. Available in tip-sizes from 1/8" to 3/8" diameter, watt inputs from 30W to 100W.

CAT. NO.	TIP DIA.	WATTS	NET WT.	LIST
3118-A	1/8"	30	6½ oz.	\$ 8.20
3125-A	1/4"	60	10 oz.	10.20
3138-A	3/8"	100	16 oz.	13.20

*Other options available

SOLDERING TIPS—THREE GRADES

Made of commercially pure copper rod. Shapes and sizes for all AB irons and other makes as well. Three grades: (1) Nickel-Plated. (2) "Superior" Quality—iron-clad working end silver-plated overall. (3) "Paragon" Quality—best

tips made for high-spec. soldering; iron-clad; chrome-plated; pre-tinned; maintenance-free; for extra clean work. (Ask for FREE American Beauty Tip Chart.)

PARTS AND ACCESSORIES

You can always get original-equipment-quality parts for any American Beauty Soldering Iron—standardized for quick, easy repair. Also: AB cord sets; spooled and bulk heater cord in 250' lengths; branding irons; soldering iron temper-

ature regulating stands; safety guards for same; general-purpose solder pots; melting cups or ladles.

American Beauty
MADE IN ONE QUALITY ONLY THE BEST

Busy designer/author/inventor Brice Ward uses his UNIMAT to machine printed circuit boards, drill chassis holes, and wind special coils. UNIMAT takes less space than the average oscilloscope.

A CUSTOM ELECTRONICS WORKSHOP

...for Metals • Plastics • Wood • in just 16" of bench space!

With UNIMAT you're always ready to originate or duplicate that one-of-a-kind component that so often holds up a job. UNIMAT's versatility and machine tool precision do away with makeshift improvisation . . . give your breadboards and prototypes that clean, professional look. Nine quick change setups handle metals, plastics, wood with toolmaker precision. UNIMAT turns, drills, bores, mills, threads, cuts gears, grinds, sharpens, saws, files, divides, buffs, polishes. Eleven-speed self-contained motor drive provides the ideal spindle speed for each tool and material. Thousands are now in use by top electronic manufacturers, defense contractors, radio/electronic service firms and advanced hobbyists. ■ Get complete details before you order. The free UNIMAT catalog contains closeups of the various setups, plus a variety of in-use photos. Or, send \$1.00 for the new **MINIATURE MACHINING TECHNIQUES**, a general handbook and operator's manual that is packed with shop tips and tells the UNIMAT story in step-by-step detail, including 180 photographs!

			COPPER BIT	ERSADUR BIT*			COP- PER	ERSA- DUR*	CAT. NO.	PRICE
 ERSA-MICROTYPE 6 VOLT 8 WATTS—15 WATTS Subminiature soldering iron for pinpoint soldering on miniaturized printed circuits and other micromodulation techniques. Provided with ERSADUR long life bit. Good for 100,000 soldering operations. Built-in solid heater element. Weight under 3 ozs. Length of 8 watt unit 6.3", length of 15 watt unit 9.8". Temp. range 240°C to 380°C. For use with 6 volt transformer or battery, 5 foot cable and banana plugs. Temp. can be regulated with Control Transformer ERSR R30. For more details ask for Bulletin #E-500.	20L/8W	8 (Short Heating Unit)		\$9.50					22L/8W (Element & Bit)	\$5.50
	20B/8W	8 (Short Heating Unit)		\$9.50					22B/8W (Element & Bit)	\$5.50

	JZ/90W	90	23.75		82JZ		1.90			
ERSA CONTROL TRANSFORMER MODELS R30 AND R10 Both transformer models have a primary voltage regulator for 110, 125, 150, 220 and 240 volts. The secondary voltage is also variable within the range of 5 to 6.5 volts, thus making it possible to select a temperature range between 240 to 480°C. When not in use, the ERSR iron rests on a special nozzle provided on the transformer. This protects against overheating. Control Transformer R10 was solely made for use with the ERSR-MINIATURE Iron Model 10W. The R30, with a greater output, permits universal use of all the various ERSR irons with their different capacities. Price MODEL R30, rated 30 VA, 5.1# \$25.00 MODEL R10, rated 10 VA, 3.5# \$15.00 T2 SOLDERING BATH Rated 240 watts, temp. approx. 600°C. Holds approx. 23 cc, internal dimen. 1 3/4" dia. x 1 3/4". Weight with cord 3 lbs. 5 foot cord and plugs, switch. (Other solder pots available.) PRICE \$25.00										
 R30 R10

'ERSADUR'-DURABLE IRON-CLAD COPPER BITS

Made of pure electrolytic copper with an iron coating. Soldering surface of bit pre-tinned ready for use. Shaft is chromium plated to prevent baking in. ERSADUR bits in normal use last for more than 100,000 solderings. Ask for Bulletin on ERSADUR.

AFTER EQUAL SERVICE TIME

TREATED

UNTREATED

DESIGN IN-DUS-TRONIC tools are more streamlined, with slender jaws and fine points, to reach into the tight spots and perform the specific work required of the electronics technician.

TEST AND INSPECTION Individually tested for hardness, each tool must maintain highest standards for handle strength and cutting ability. To assure perfect jaw alignment, pliers must cleanly cut single bond paper strips and snip cotton-covered lamp cord without fraying. Each tool is guaranteed against defects in workmanship and materials.

WORKMANSHIP IN-DUS-TRONIC tools are hot drop-forged from special analysis alloy steel, machined and finished with the same care and precision which have made world-famous BOKER TREE BRAND Fine Cutlery and surgical instruments for over a century. Individually fitted and adjusted, each is accurately heat-treated by HYDRIZING, which minimizes "carburization" and "decarb." Cutting blades are precision-hardened with electronic controls, and honed by hand for keen edges that retain their sharpness.

Individually Boxed

H. BOKER & CO., INC. • NEW YORK, N. Y.

RADIO AND TV NOSE CUTTING PLIERS

Reaches into tight spots to cut small wires, and to grip at the tips.

NEW! INLAID TIP CUTTING PLIERS

Special high-speed inserts provide diamond-honed cutting edges of extreme hardness, extending service life in continuous cutting of abrasive wires and ribbons of nickel, silver, gold and copper. Will cut and dress medium diameters of Nichrome, Kovar, Dumet, and fine diameters of full hard wires. Special joint assembly assures precise cutting of component leads and wires in confined areas.

Pliers by

CHAN NEL LOCK®

Specially Designed ELECTRONICS PLIERS

You'll do hundreds of jobs easier, faster with these Channellock Pliers because they are **specially designed** for all types of electronics work. You'll like the long reach . . . the precision-matched jaws . . . the hand-honed, specially hardened cutting edges . . . the easy-to-handle "feel" of the blue plastic grips. And you'll appreciate the top quality of Channellock Pliers . . . they're forged from high grade steel, properly heat treated. Best of all, because they are specially designed for fine electronics work, these four pliers will satisfy more than 90% of your Service and Repair needs. Ask your Electronics Equipment Supplier for Channellock Electronics Pliers . . . by name.

**No. 718G
FLAT-NOSE
PLIER**

Watchmaker's precision PLUS a bull-dog grip in hard-to-reach places.

**No. 728G
DIAGONAL
CUTTER**

A wire-stripping notch (Patent Pending) that really works!

**No. 738G
ROUND-NOSE
PLIER**

You can pick up a human hair with these precision-machined points.

**No. 748G
END
CUTTER**

Fine enough to cut a human hair — sturdy enough to cut 12 gauge copper wire.

TONGUE AND GROOVE PLIERS

The **original** tongue and groove pliers. Patented, non-slip undercut channels. Patented reinforcing rib for extra strength. Dipped plastic grips optional at slight extra cost.

No.	Size	Capacity	No.	Size	Capacity
420	9 1/4"	1 1/2"	430	10"	2"
424	4 1/2"	1 1/8"	440	12"	2 1/4"
426	6 1/2"	2 3/8"			

ELECTRICIAN'S WIRING PLIER

Triple-use wiring plier: cuts, strips insulation, loops wire. Patented wire stripping notches strip insulation from 14 and 12 gauge wire quickly, cleanly. Length 7". No. 337-W. Dipped plastic grips optional at slight extra cost.

WIREMASTER PLIER

Finest wire-cutting plier ever made. Joint rivet closer to cutting edges, provides 40% more cutting power than standard design pliers. Special enclosed-joint construction holds cutter in perfect alignment for life of plier. Length 9". No. 349. Dipped plastic grips optional at slight extra cost.

HEATSORB CLAMP

A specially designed "heat sink" that prevents heat damage to electronic components during soldering. Also a handy, self-gripping "third hand" that holds and retrieves small parts in close work. Length 5". No. 46.

LINEMEN'S PLIER — Bevel Nose

Polished steel finish. Knurled grips. Side cutter. Dipped plastic grips optional at slight extra cost.

PLASTIC HANDLES—(TN-22, TN-33, TN-44, TN-55) (M2T, M3T, M4T, M5T) are of Tenite II, hex and will not roll off the work bench. Shock-proof, practically unbreakable and will stand rough use on industrial production lines.

METAL HANDLES—(AL-22, AL-33, AL-44, AL-55) are aluminum alloy 4" x 3/8" hex and won't roll off the work bench. Being metal, are NOT SHOCK-PROOF and hence not recommended for ordinary radio-TV service work, especially on a 'live' unit. However, these handles are practically unbreakable and were designed to take rough use on industrial assembly lines and can be used as PRY BARS in lining up components.

METAL ENDS—(separated from each other) non-magnetic stainless steel, to which solder won't adhere. Are firmly seated in handles and are twist-proof.

FORKED END—straddles the wire and with a slight twist, grips it for easy unwinding and removal, or guides it into another lug for soldering. Since plastic handles act as insulation, there is no danger of shock when working on sets in operation. 1/8" forks are made especially for use on printed circuits and transistors.

SPADE END—is a reamer to clean lug holes of solder.

CURVED END—can be used as a scriber for marking chassis. As a circuit tracer when looking for loose connections. As a dial cord stringer. Hook can be bent to a 90 degree angle if desired.

KNIFE & SCRAPER—for cutting and repairing printed circuits.

WIRE BRUSH—has approx. 200 bristles of stainless wire .0035 in dia, to which solder will not adhere. For use in cleaning connections before soldering, brushing out splattered solder and in repairing printed circuits.

STAINLESS STEEL WIRE BRUSHES

on steel shaft approximately 2" long overall. Can be used in a regular pin vise. .33 net

ERIKSON SPECIALIZED TOOL COMPANY, PICO RIVERA, CALIF.

GC ALIGNMENT TOOLS and Service Aids

(A) GC DUO-TONGS—Universal Fuse Pullers . . . They're brand new . . . GC Duo-Tongs, these amazing new nylon fuse pullers will accommodate all kinds and types of fuses, including household screw-in plug type, industrial cartridge fuses up to 3/4" or 100 amp. capacity, as Automotive, Aircraft, Television and Electronic Industries. New GC Duo-Tongs are non-conductive, non-inflammable, and virtually unbreakable thus exceeding all Military Specifications.

Cat. No. 9356 Net \$.89

(B) HEAT SINK—Protects Transistors and Diodes when Soldering . . . Lightweight, first quality, firm grip. Aluminum will not stick to solder.

Cat. No. 9077 Net \$.36

(C) NEW 16-OZ. SIZE SPRA-KLEEN—Works upside down, as well as right-side up! Now servicemen can get to those hard-to-reach places. Stops radio and TV control noise. No need to dis-

mantle the chassis to get at the parts when you use Spra-Kleen. Both cleans and lubricates contacts, controls, relays, switches, and other sliding contact devices in one fast operation.

Cat. No. 8666-16 Net \$1.95

(D) GC JIF—Contact and Control Cleaner . . . Cleans—Lubricates—Long-lasting protection. Jif away noise due to dust, dirt and corrosion on Electronic/Electrical contacts, switches, controls with this NEW siliconized contact-control cleaner. Jif cleans and lubricates plus providing contacts and controls with the longest possible protection. Fast and efficient Jif saves the serviceman time and money in this new three-in-one operation, CLEAN—LUBRICATE—PROTECT. Simply apply and work controls a few times. Jif contains no solvents to harm plastics. Safe, quick, easy to use—Jif will do an excellent job for the serviceman.

Cat. No. 8670-6 Net \$1.79

(E) GC RULER AND TUBE PIN STRAIGHTENER—Unique, double purpose service aid . . . This new GC item will prove to be the serviceman's constant companion. A plastic 6" ruler and a Tube Pin Straightener to accommodate Compactor, Large 7 Pin, 9 and 10 Pin, and 7 Pin Tubes.

Cat. No. 9135 Net \$.59

(F) SHAFT EXTENSION INSULATOR—Standard TV control—21 Sure-grip ribs . . . Fits all shafts. Cut off worn ends, or to desired length.

Cat. No. 5150 Net \$.36

(G) HI-VOLTAGE GAUGE—Measures TV Voltage Pulse . . . No current drain during operation. Snaps directly to plate cap of any listed tubes. Push plunger in slowly till neon light glows. Voltage read on calibrated rod.

Cat. No. 8840 Net \$2.30

(H) TWISTMASTER—Twice the Leverage of the Bare Hand . . . Slips easily on any standard

screwdriver. Insulates against shock, prevents blisters.

Cat. No. 9320 Net \$.29

(I) PIGTAILER—Makes connections quickly and easily . . . For lengthening pigtails, repairing broken leads, connections, tuners, printed circuits, to hold a part, until solder is applied, or for making solderless connections, for testing and reconnecting, for replacing resistors and condensers. Will wind a pigtail that slips over 18-gauge wire. (Used in most Radio and TV work.)

Cat. No. 5077 Net \$1.20

(J) and (K) SOLDERING AID TOOLS—Won't Stick to Solder . . . Heat-treated tool steel, chrome-plated, won't stick to solder. Wraps or disconnects wire-wrapped soldered joints quickly. Double ended to ream solder from lug holes as well as for holding or prying parts to be soldered.

Cat. No. 9075 Straight Net \$.80

Cat. No. 9076 Angled Net \$.80

(L) CAPACITOR AND TUNER ADJUSTING TOOL—New adjuster for trimmer capacitors, sealed capacitors, and miniature L. C. Tuners. Made of white Delrin with .050" hex head one end and screwdriver tip on the other end. Overall length of tool is 5 1/8".

Cat. No. 8605 Net \$.63

(M) GC CAPACITOR TAB TWIST TOOL—For replacing twist lock condensers. This handy Service Aid is easier to use than needle-nose pliers—saves time on service calls and at the bench. The slotted end fits over capacitor tabs; won't slip off. A quick twist locks or unlocks the tabs. 8" long; plastic handle. One of

the most useful Service-Designed tools for the bench.

Cat. No. 9446 Net \$.89

(N) GC MAGNAVOX TUNING TOOL—Head for Magnavox chassis Nos. 201 and 202, Delrin hex wrench alignment tool for Magnavox and other sets. Hex wrench on both ends, one end under-cut so it will reach bottom slugs in iron coils.

Cat. No. 8284 Net \$.48

(O) DOUBLE END HEX CORE ALIGNER—Adjusts Coil Slugs . . . General purpose alignment tool as well as a coil slug adjuster. Both ends are .075" Hex, with one end under-cut.

Cat. No. 9300 Net \$.48

(P) 3-IN-1 HEX CORE ALIGNER—Adjusts Coil Slugs . . . For Magnavox sets and others. Hex ends, one .100" with under-cut shaft; other end is .075" and .100".

Cat. No. 9302 Net \$.55

(Q) DOUBLE END ALIGNER—Adjusts Coil Slugs . . . For coil slugs on Webcor and other sets. One end .075" Hex shaped with under-cut shaft; other is a handy screwdriver.

Cat. No. 9304 Net \$.48

MAGNETIC MICROPHONE HOLDER

—for Citizens Band and other Mobile Radio units . . . Puts the microphone where you want it . . . when you want it. Here one day, there the next. Move it all you want, yet you know it's always safe. No holes to drill, no brackets to mount. Attach to any steel surface. Capable of holding up to 12 lbs. Clip to Microphone and have ready made magnetic microphone or attach magnet to steel surface and clip phone. Designed to fit most microphones, goes wherever you want it, easily, quickly, conveniently.

Cat. No. 65-525 Net \$ 99

ALIGNMENT TOOLS...

(A) **G-C NEW NYLON TV LONG-REACH ALIGNER**—Handy new long-reach TV aligner with insulated metal shaft and nylon tip. 12 $\frac{1}{4}$ " long overall, .195 Shaft Dia.
Cat. No. 8607 TV Tool Net \$1.60

(B) **G-C ALIGNMENT TOOL**—Handy to align and adjust TV sets, radio sets, etc. Made of clear plastic 5" long x $\frac{3}{16}$ " dia.
Cat. No. 8609 Net \$.63

(C) **G-C TV 2-IN-1 LONG-REACH DUPLEX ALIGNER**—Made of clear, unbreakable plastic material. Ends colored red and blue for size identification. Tips are made of spring steel recessed for easy location of stud.

(D) G-C INSPECTION MIRROR—Handy inspection mirror to inspect parts, coils, wiring, etc. Made of metal shaft with glass mirror and a plastic handle.

Cat. No. 5090 $7\frac{7}{8}$ " Inspection Mirror

Net \$.42

(E) G-C NEW ALL-PLASTIC INSPECTION MIRROR—Use to inspect coils, resistors, sockets, etc. while the chassis is hot. No danger of shorting.

Cat. No. 5090-P $7\frac{7}{8}$ " Plastic Mirror Net \$.38

(F) G-C K-TRAN TOOL—Specially designed for K-tran and I.F. transformers. Butyrate material, screwdriver on both ends.

Cat. No. 5097 6" long, $\frac{3}{16}$ " Delrin Tip, $\frac{1}{8}$ " metal Tip

Net \$.78

(G) G-C TV CHANNEL TUNING TOOL—Completely insulated, non-metallic tool with long $\frac{1}{8}$ " narrow blade. Made of bone fibre.

Cat. No. 8195 $7\frac{1}{4}$ " long, $\frac{1}{8}$ " shaft dia.

Net \$.72

(H) G-C TV AND FM TUNING TOOL—Special short tool with fine recessed screwdriver tip for Television and FM adjustments. Made of Butyrate.

Cat. No. 8196 $2\frac{1}{2}$ " long, $\frac{3}{16}$ " shaft dia.

Net \$.42

(J) G-C TV CORE ALIGNER—For Motorola and other sets using Stackpole or other stud type cores that are not slotted. Milled steel insert on one end, thin screwdriver blade on other end.

Cat. No. 8271 6" long, $\frac{3}{16}$ " shaft dia.

Net \$.60

(K) G-C TV I.F. OSCILLATOR ALIGNER—Specially made for I.F. and oscillator adjustments. Will fit all makes of sets—R.C.A., G.E., Philco, Admiral and others.

Cat. No. 8272 $6\frac{1}{2}$ " long, $\frac{1}{4}$ " tip dia.

Net \$1.20

(L) G-C TV ALL-PURPOSE ALIGNER—Specially made for TV I.F. adjustments. Very thin spring steel tip is recessed so the tool will guide itself over the screws.

Cat. No. 8273 8" long, $\frac{3}{16}$ " shaft dia.

Net \$.92

(M) G-C TV LONG REACH ALIGNER—Specially made for Admiral, Zenith, R.C.A. and other sets for adjustments of nested iron cores that are hard to reach.

Cat. No. 8274 9" long, $\frac{1}{8}$ " shaft dia.

Net \$.90

(N) G-C TV ZENITH UNIVERSAL ALIGNER—Specially designed for Zenith and other sets. Made of bone fibre and plastic handle.

Cat. No. 8275 5" long, $\frac{1}{8}$ " shaft dia., $\frac{1}{4}$ "

Net \$.52

(O) G-C TV DUPLEX ALIGNER—An all-purpose TV aligner for trimmers and I.F. transformers. Made of Butyrate material with extra thin spring steel tips.

Cat. No. 8276 6" long, $\frac{3}{16}$ " shaft dia.

Net \$.52

(P) G-C TV "SHORTY" DUPLEX ALIGNER—Specially made for trimmer and I.F. transformers where space does not permit the use of a longer tool.

Cat. No. 8277 $2\frac{1}{2}$ " long, $\frac{3}{16}$ " shaft dia.

Net \$.52

(Q) G-C TV TUNING WAND—Brass insert on end reduces inductance and iron core on other end increases the inductance.

Cat. No. 8278 6" long, $\frac{3}{16}$ " shaft dia.

Net \$.60

(R) G-C TV CORE ALIGNER—Tool has a recessed steel milled slot to fit over the Stackpole and other type stud cores that are not slotted.

Cat. No. 8279 $7\frac{1}{2}$ " long, $\frac{3}{16}$ " shaft dia.

Net \$.75

(S) G-C NEW ZENITH TV WRENCH & ALIGNER—New nylon plastic molded special tool made specially for Zenith TV sets.

Cat. No. 8282 $5\frac{1}{4}$ " long, .100 Dia. Hex Wrench, .109 Screw Driver

Net \$.37

(T) G-C "SHORTY" TV ALIGNMENT SCREW DRIVER—Only 2" long overall to adjust hard-to-get-at places under TV tubes, etc.

Cat. No. 8289 2" long, $\frac{3}{16}$ " shaft dia.

5070 Kit of 6 Assorted Wrenches in Leatherette Case .80

INDIVIDUAL WRENCHES
Cat. No. 5071 No. 4 Set Screw Net \$.12
5071-A No. 5 Set Screw .12
5072 No. 6 Set Screw .12
5073 No. 8 Set Screw, No. 4 Cap Screw .12
5074 No. 10 Set Screw, No. 5-6 Cap Screw .13

(H) G-C HEX-KEY AND SPLINE WRENCH KIT—A complete wrench kit for both hex and spline type screws. Twelve wrenches in an attractive leatherette case.
Cat. No. 5028 Net \$1.35

(J) G-C POCKET HEX KEY WRENCH SET—Seven popular size wrenches, .050 to 3/4" fitted in a steel case-like pocket knife blades.
Cat. No. 9124 Net \$1.83

(L) G-C PLASTIC BOXES—Clear plastic boxes for stocking small parts, screws, nuts, bolts, condensers, resistors, etc.
Cat. No. 8022 4"x4"x2 1/2" deep Net \$.40
8023 4"x4"x8" deep Net \$.77

(M) G-C LONG NOSE CLAMP PLIERS—Like an extra hand. Spring tension keeps the jaws closed unless handles are squeezed.

(N) G-C TV-RADIO KNOB PULLER—Simply slip the G-C Puller behind the knob and pull it off. Saves time, the cabinet and the knob.
Cat. No. 23-954 Net \$.30

(A) G-C TWEEZER KIT—For the shop or laboratory to pick up and examine small parts, start screws and nuts, etc.
Cat. No. 7950 Net \$2.28

(B) G-C TWEEZERS
Cat. No. 7946 6 1/2" Self-closing tweezer opens when squeezed; serrated, blunt points. Net \$.78

(C) G-C TWEEZERS
Cat. No. 7947 6 1/2" Heavy-duty type, with slide lock feature; holds wires or parts tight like an extra finger; serrated, blunt points. Net \$.90

(D) G-C TWEEZERS
Cat. No. 7948 4 1/2" Precision tweezer, narrow pointed ends for delicate work. Net \$.52

(F) G-C HANDY PICK-UP TOOL—One of the handiest tools you can have in your home, shop, office or farm. Tool is 15 inches long.
Cat. No. 5089 Net \$1.15

G-C TV 3-WAY ANTENNA KLIP—Buy them by the bag and have clips ready to sell and ready to install on TV sets.
Cat. No. 9015-X Bag of 10 Net \$1.43

G-C INTERCHANGEABLE HEX NUT DRIVER KIT—6 assorted nut drivers in a handy plastic case. Handle is non-inflammable amber plastic with a quick change chuck.
Cat. No. 9206 Net \$3.30

(G) G-C LONG-REACH TV AND RADIO LUBRICATOR—For radio and TV controls, bearings, phono motors, etc. Buy them by the pair—one for grease and one for light oil.
Cat. No. 8690 Net \$.53

(J) G-C NO-JOLT TOOL GRIPS—Modernizes old tools with new safety grip handles. Grease and oil resistant.
Cat. No. 5647 Small No-Jolt Plastic Tool Grips (1 pair) Net \$.23

5648 Medium No-Jolt Plastic Tool Grips (1 pair) .27

5649 Large No-Jolt Plastic Tool Grips (1 pair) .33

(K) G-C PRY-UP TUBE LIFTER—Handy tool for removing tight tubes. Saves the fingers and the tubes.
Cat. No. 9213 Net \$.30

(L) G-C 4-in-1 TUBE CADGET—Four tools in one. Pure rubber, will not break.
Cat. No. 9130 Net \$.92

(M) G-C NEW TV AND AUTO RADIO WRENCH—Special female slotted wrench to remove screws and stud screws from auto radios and backs of TV sets, etc.
Cat. No. 9211 Net \$1.20

(N) G-C NEW LOW LOSS TV LINE KLIP—A new all plastic clip with metal ends only. The best for UHF or fringe areas. Made of genuine polyethylene.
Cat. No. 9055 Net \$.15
9055-X Bag of 10 1.47

6. G-C DUAL SHEET METAL PUNCH—Punches holes for Tube Sockets and Condensers for hand or power operation. Two punches 7/8" and 1 1/2", for one price.
Cat. No. 9260 Net \$4.93

7. G-C DUAL SHEET METAL PUNCH JR.—Punch neat, clean holes in chassis for tube sockets, condensers and for mounting other components. For 1/2" and 3/4" holes.
Cat. No. 9261 Net \$4.00

8. NEW G-C PRECISION 300-OHM TOOL—This specially designed tool cuts slots, strips and crimps. Has shock-proof, oil resistant plastic grips.
Cat. No. 9220 Net \$3.95

SOLDERING IRONS

6 to 230 VOLTS 12 to 140 WATTS

A complete line of high quality soldering irons specifically designed for production-line soldering in the electronic, instrument, and communications industries—including irons for soldering miniature and subminiature components. Also ideally suited for intermittent operations such as repair, maintenance, laboratory work, and electronic kit construction. Irons up to 1250 watts are available.

PENLINE-120 SOLDERING IRONS — 120 VOLTS; 25, 30, 40, AND 45 WATTS — UL LISTED

Lowest cost G-E iron; ideally suited for light to medium production in electronics, communications, and allied industries, for repair and maintenance operations, and by the "do-it-yourself" electronics kit builder. Choice of 30- and 45-watt low-cost, easy-to-change tip and heater assemblies; or 25-, 30-, and 40-watt heater assemblies with 20 different interchangeable ironclad or copper threaded tips.

	3/16" Ironclad Pyramid Tip	6A301	6.95
	3/16" Ironclad Chisel Tip	6A301G4	6.95
Heater Assemblies for Threaded Tips (Use Penline-120 Tips listed above)			
	40 watts	6A304	\$6.05
	60 watts	6A301G7	6.70

PISTOL-GRIP SOLDERING IRONS — 120 VOLTS; 40 AND 60 WATTS

Maneuverable and comfortable, excellent for light to medium production. Unique design gives operator a clear view of the work. Complete versatility with choice of three 60-watt tip and heater assemblies; or 40- and 60-watt heater assemblies with 20 different interchangeable ironclad or copper threaded tips.

Description		Cat.No.	List Price Each†
	Handle and cordset, three-wire with NEMA plug	6A303	\$8.50

Can be used with Lightweight tip and heater assemblies above, or with Lightweight heater assemblies and Penline-120 tips listed above.

† Manufacturer's suggested resale price.

MIDGET SOLDERING IRONS — 6 VOLTS; 25 and 45 WATTS (Also tapped transformers) — UL LISTED

A versatile iron for light production in electronics, and communication industries — handles like a pencil, weighs but 1 3/4 oz. Tip renewal is easy and fast — complete tip and heater assembly can be changed in a few seconds. Heat output can be varied from 18 to 45 watts with standard G-E transformers.

Description	Cat. No.	List Price Each†
Handle and Cord Set		
For single- and 4-tap transformers	6A203	\$3.65
For transformer with 3-heat switch	6A203G2	4.15
Tip and Heater Assemblies — All ironclad tips		
1/4" Chisel Tip 25 watts	6A211	\$4.05
1/8" Cone Tip 25 watts	6A213	4.05
3/16" Pyramid Tip 25 watts	6A215	4.05
3/16" Chisel Tip 25 watts	6A217	4.05
3/8" Chisel Tip 45 watts	6A211G31	4.60

MIGHTY MIDGET SOLDERING IRON — 12 VOLTS; 100 WATTS

A lightweight iron with high heat capacity for heavy soldering where larger irons, up to 200 watts, prove unwieldy for rapid repetitive soldering, such as production soldering of tuner chassis, tinware, can seams, etc.

Tip and Heater Assembly		
1/2" Ironclad Chisel Tip	6A211G33	\$4.50

Description	Cat. No.	List Price Each†
Heater Assembly for Threaded Tips (Use Penline-120 Tips)		
25 watts	6A221	\$4.05
Transformers for Midget Iron — 115-volt Primary*		
Single Tap—35 watts	6A362G2	\$6.90
Four Tap—for 26/29/32/35 watts	6A364G2	9.20
With Three-heat Switch 18 to 35 watts, for use only with 6A203G2 Handle and Cordset	6A434	17.00

* Single- and four-tap transformers are available with 240-volt primary in quantities 36 or more. Specify Cat. No. desired and note on order, "except with 240-volt primary."

† Suitable for use only with Handle and Cordset 6A203G2.

Handle and Cordset — Two-conductor

6A210G61 \$8.00

Transformer for Mighty Midget — 115-volt primary

Four Tap — for 55/70/85/100 watts 6A364G7 16.00

MINIATURE SOLDERING IRONS — 6 VOLTS; 12 WATTS

Ideal for production line soldering of sub-miniature equipment, printed circuits, and instruments. Weighs only 1 1/2 ounces. Integral transformer plugs into any standard 115-volt outlet, makes iron portable for maintenance work.

Complete Iron — Includes handle and 6-foot cordset, tip and heater assembly, and transformer

1/8" Chisel Tip 3" Shank	6A428G3	\$15.00
1/8" Chisel Tip 6" Shank	6A428G4	15.00

LONG-LIFE SOLDERING TIPS

OUTLAST COPPER TIPS UP TO 20 TO 1

DUROTHERM NON-FREEZING TIPS: Iron coated and immunized. Absolutely prevents tips from sticking. Minimum loss of heat delivery. Also available; **XTRADUR** Iron-coated Pretinned Tips. Multi-coated for extra long wear which immunizes shank of tip from solder, thus preventing adhering of solder, except on working surface of tip—prevents creeping and spilling of solder.

Prevents harmful effects of excess capillary action of solder along stranded wire beneath insulation. Order tool number by wire size being used.

"N" Type Tweezers are made for one gauge wire only (not for a range of sizes). Therefore give better fit on wire for greater efficiency. Shorter tip hole provides for close inspection gap on precision soldering such as called for in current NASA specifications.

SOLDERING PENCILS

AND HEAVY-DUTY IRONS

"KWIKIE" TYPE 4000

PENCIL IRONS (Non-thermostatic)

7 STANDARD TEMPERATURES AVAILABLE

This newest Kwikie provides unexcelled efficiency and economy with its interchangeable plug-in tips, and unparalleled versatility with its standard irons in wattages and temperatures ranging from 10 watts (450°F) through 50 watts (1000°F). This selection permits easy standardization as well as precise temperatures for exacting production requirements without added cost of transformers.

Small, (7") lightweight (1 3/4 oz.) and finely balanced, the new models are provided with a comfortably sized, extra-cool grip of rugged plastic, allowing their use in minimum contamination work areas (no cork). Though designed for prolonged high production precision soldering of miniature components, the Kwikie is small enough for safe fast work in densely packed circuitry with power in reserve. Engineered to melt more solder by comparison with other interchangeable tip type irons of comparable wattage.

All models available with 3 conductor safety-grounded 6' cord sets and irons in 3 smart colors . . . green, white, and black. All irons and temperatures rate at 115V.

DEPENDABLE PRODUCTION IRONS

TYPE 200

TYPE 300

TYPE 3100

TYPES 200 and 300- THERMOSTATIC MODELS

(Vanata Automatic Thermostat)
Lightweight and heavy duty irons for high-speed work. Dependable and rugged. Interchangeable tips are easily replaced. Preset to 700°F for intermittent standby or to 800°F for constant high-speed soldering. Can be preset from 275° to 875° for additional charge of \$1.00 each for 1 to 49 irons; 50¢ each for 50 to 99. No extra charge for 100 or more. Temperature creep reduced by the use of special alloys.

TYPE 3100- TEMPERATURE CONTROLLED MODEL

Rugged, lightweight, and economical general purpose iron for continuous or intermittent soldering. One-piece shell and heating element attached to air-cooled plastic handle by 2 screws for rapid replacement. Temperature allows wattage increase as demand increases. Forged tellurium copper core. Screw type tips easily changed or replaced.

NEW KWIKIE FEATURE

Kwikie pencil irons now have a Kwik-Disconnect element which provides complete interchangeability and assures positive electrical contact. Cord/handle assemblies can now be readily converted to 2 or 3 conductor cords, and any one of the 7 different heating elements can be quickly changed to handle new jobs.

Interchangeable copper (C), iron clad (K), and iron clad immunized (K-I) tips available for all Kwikie irons.

ELECTRICAL SIZES

All but No. 1732 (above) available with shockproof, Vinyl covered tubing, 15¢ additional per screwdriver. Specify "E" after number.

IDEAL**Stripmaster®****2 SECOND "ONE SQUEEZE" OPERATION**

Unexcelled for fast assembly work, this 10 oz. stripper can be used all day without fatigue. Exclusive "automatic" feature holds jaws open after stripping to permit removal of wire and to prevent crushing. No nicking, fraying, or cutting of wire ends possible. 7 models for all wire gauges from 8 to 30.

**MODELS FOR ALL WIRE GAUGES — FROM 8 TO 30**

Catalog No.	Wire Gauge	No. of Holes	List Price	Suggested Resale
45-090	8 to 12	3	\$9.60	\$5.75
45-091	10 to 18	4	9.60	5.75

*Also strips 2 and 3-conductor low-voltage wire used in G.E. and Touchplate remote control wiring systems.

**SWING-GRIP (TM)
THERMAL
STRIPPER**

One squeeze automatically melts and removes all thermo-plastic insulations — even Teflon — without nicking or scraping wires. Exclusive one-piece heating element melts insulation all the way around wire without twisting tool. Separate grippers remove insulation. Element doesn't scrape wire or drag-out insulation. Adjustable wire depth-stop. Replaceable heating elements for 30 to 12 AWG wire. Tool is furnished with 16 to 28 ga. element as standard. Use with 45-133, 45-135, or 45-136 Power Units.

THERMO-STRIP (TM) THERMAL STRIPPERS

Choice of tools: plier-type Pincer Tool for normal production use; probe-type Single Loop Tool for miniaturized or crowded assemblies. For Pincer Tool, use 45-133 Power Unit only. For Single Loop Tool, use 45-133, 45-135, or 45-136 Power Units.

Model 45-133

Model 45-134
Model 45-135**POWER UNITS**

Model 45-133 operates on 115v, 60cy current. Has pilot light, thermal over-load protection, and infinitely variable heat control. Model 45-135 operates on 115v, 60cy current; and Model 45-136 on 230v, 50-60cy current. Both have an 8-step temperature control, pilot light, and thermal over-load protector.

IDEAL**WIRE
STRIPPERS**

**FOR ALL TYPES OF THERMO-PLASTIC
INSULATIONS... EVEN TOUGH TEFLONS***

IDEAL**CUSTOM Stripmaster®**
Patented No. 2,889,728**FOR PRECISION WIRE STRIPPING**

Removes Teflon* and other hard-to-strip insulation. New "concentric hole" stripping blades and special design of jaws prevent damage to insulation and wires. Matched sets of blades are precision drilled on watchmaker's equipment to exact wire sizes. Chucking action on insulation guides conductor through stripping hole, preventing nicks and scrapes. 3 models, wire sizes from 10 to 30.

EXTRA FEATURES (optional)**"SHORT-STOP" LATCH**

protects wire by limiting stroke to 5/32" — disengages without removal for full 7/8" strip.

**"SEE-THRU" WIRE STOP**

assures uniform lengths by adjusting to strip length desired.

Shown with
optional Stop
Latch (1) and
Wire Stop (2)Counterbored

IDEAL INDUSTRIES Inc.,**Sycamore, Illinois**

RESISTANCE SOLDERING TOOLS

Because Ideal Thermo-Tip soldering equipment uses the resistance heat principle, you can get more work done faster and safer at lower cost and still achieve higher quality, stronger, more uniform joints. Cold flow is practically impossible. High amperage, low voltage current passes through and heats work only. Burning of nearby parts, or operators, never occurs because heat is concentrated at point of contact. No setup or pre-heating is necessary. Solder adheres instantly all around, making the strongest possible joint.

A wide range of Pencil-Grip attachments are available. You select from double or single metal or carbon electrode styles to fit your soldering needs. A perforated aluminum sleeve dissipates heats and provides exceptionally cool operation. Three different power units provide from 2 to 9 heat variations. All units come equipped with a 5-ft. power cord.

COMPLETE THERMO-TIP ATTACHMENTS AND POWER UNITS

DOUBLE METAL ATTACHMENTS

"Pencil" Type attachment with double metal electrodes. "Feed-thru" electrodes, adjustable for length.

Cat. No. 12-167 with double metal electrodes. List Price \$18.35 ♦ Suggested Resale \$11.00.

SINGLE METAL ATTACHMENT

Collet chuck holds feed-thru electrode. For smallest work. Complete with ground clamp and lead assembly for jig-soldering.

Cat. No. 12-169 Pencil Grip. List Price \$18.35 ♦ Suggested Resale \$11.00.

Cat. No. L-5241 Replacement Electrodes for 12-169, packaged 6 per tube. Shipping wt., 2 oz. List Price \$9.00 ♦ Suggested Resale \$.55.

FOOT SWITCH

Cat. No. 12-146

List Price \$11.90 ♦ Suggested Resale \$7.15
Used to eliminate arcing at point of electrode contact. Also permits the use of electrodes to position or hold work after heat has been applied. Small and convenient to use (3/8" dia. x 1 1/4" high). Wired normally open (with series plug). Rated 5 amps., 115V. Shipping Wt., 12 oz.

DOUBLE CARBON ATTACHMENTS

Carbons provide more heat than metal tips. Available in two sizes — 1/8" for small work, 3/16" for larger work.

Cat. No. 12-166 Pencil Grip with 1/8" carbons. List Price \$18.35 ♦ Suggested Resale \$11.00.

Cat. No. 12-165 Pencil Grip with 3/16" carbons. List Price \$18.35 ♦ Suggested Resale \$11.00.

Cat. No. L-4866 3/16" dia. replacement carbons for 12-165, six per pkg. Shipping wt., 2 oz. List Price \$2.10 ♦ Suggested Resale \$1.25.

Cat. No. L-4848 1/8" dia. replacement carbons for 12-166, six per pkg. Shipping wt., 2 oz. List Price \$1.15 ♦ Suggested Resale \$.70.

SINGLE CARBON ATTACHMENTS

Collet chuck holds feed-thru carbon. Permits adjustment. Complete with ground-clamp and lead assembly for jig-soldering.

Cat. No. 12-168 Pistol Grip. List Price \$18.35 ♦ Suggested Resale \$11.00.

Cat. No. L-5202 Replacement Carbons 1/8"x3" for 12-168, packaged 6 per tube. Shipping wt., 2 oz. List Price \$3.90 ♦ Suggested Resale \$2.35.

REPLACEMENT CARBON HOLDERS

Cat. No. L-5246 — 3/16" Dia. List Price \$1.15 ♦ Suggested Resale \$.70.

Cat. No. L-5247 — 1/8" Dia. List Price \$.60 ♦ Suggested Resale \$.35.

Provides easy replacement of only part attacked by corrosive fluxes. Holders can be used interchangeably with either the 12-165 or 12-166, depending on diameter of carbons desired.

POWER UNITS

125-Watt Power Unit. Cat. No. 12-124
List Price \$31.85 ♦ Sug. Resale \$19.10

For light production and intermittent work. Selector switch for choice of three heats. Complete with power cord and clip for holding pencil style attachments. 115V — 60 cy.

250-Watt Power Unit. Cat. No. 12-123
List Price \$46.15 ♦ Sug. Resale \$27.70

For heavier production work. Faster. Handles larger components than 12-124. Choice of two heats through "high" and "low" secondary connections. Complete with power cord. 115V — 60 cy.

500-Watt Power Unit

Cat. No. 12-163

List Price \$76.00

Suggested Resale \$45.60

For continuous production work. Widest selection of heats — nine choices through 3-position selector switch plus "high", "medium" and "low" secondary terminals. Complete with power cord and pilot light. 115V — 60 cy.

KELSEY-HAYES TOOL DIVISION • ORANGEBURG, S. C.

WORLD'S MOST COMPLETE LINE OF STANDARD AND SPECIAL ELECTRONIC PLIERS!

NEW UA-300 POWER WRITER

Just as the name implies, the UA-300 Power Writer is a power writing tool. It's a pencil styled, air-activated tool for inscribing, coding, labeling or marking all types of materials such as hard and soft metals, plastics, ceramics and glass.

NEW UA-200 THE VERSATILE MULTI-PURPOSE POWER CUTTER With Interchangeable Cutting Heads

This latest and most versatile addition to the Utica line of production tools is available with four optional, interchangeable cutting heads. Each head is designed for a specific cutting purpose and all have electronically induction hardened jaws.

A REVOLUTIONARY NEW WIRE STRIPPER

Strip fast and clean! Eliminate nicking! Reduce insulation marking! Handle any wire size from #12 to #26... and do it all with Stripwright®... Utica's revolutionary new wire stripper.

No. 31 DUCK BILL WIRING PLIERS

Long reach duck bill pliers. Serrated jaws. Size: 8".

No. 896 RADIO AND IGNITION CUTTING PLIERS
For cutting and forming wire. Center cutter near tip of jaws. Size: 6".

No. 261 SPECIAL SHORT CHAIN NOSE CUTTING PLIERS

Flush cutter near tip of jaws for close cuts. Size: 4½" (formerly custom tool No. B801).

No. 23 NEW MIDGET SHORT CHAIN NOSE PLIERS

Very thin nose for delicate electronic subminiature assembly. Sizes: 4", 4½", 5".

No. 46 MIDGET DIAGONAL PLIERS

Small, light, sturdy diagonal for work on small electronic assemblies. Size: 4".

No. 774-5-1/2 PICK-UP AND WIRING PLIERS

Ideal for looping, twisting, bending and picking up finest wires.

No. 1033 LONG CHAIN NOSE PLIERS

For general wiring. ½" nose and deep serrated jaws. Sizes: 6", 7".

No. 25-5 BENT CHAIN NOSE PLIERS

Finely serrated jaws for sensitive circuit wiring. Size: 5".

No. 777 LONG NEEDLE NOSE PLIERS

Long, spring tempered jaws for very fine work in assembling small electronic apparatus. Size: 6".

No. 776 CURVED LONG NEEDLE NOSE PLIERS

Fine, spring tempered pliers with bent nose for offset work. Size: 6".

No. 265-5 WIRING PLIERS

Cutter designed to snap-cut, loop or twist. Size: 5".

No. 47 MIDGET DIAGONAL PLIERS

Fine tapered nose for delicate work in confined areas. Flush jaws for close cutting. Size: 4".

TOOLS FOR TECHNICIANS

**FOR OVER
100 YEARS
THE FINEST IN
HAND TOOLS**

KRAEUTER PRECISION AND PROFESSIONAL PLIERS—FULL POLISHED FINISH

Extra fine pliers designed for exacting work. Drop forged from selected tool steel, accurately machined and carefully heat treated. In the hands of skilled radio and electronics technicians, these tools may be depended upon for exceptional service. Pre-

cision and Professional Pliers illustrated show vinyl cushion grips (prefix "CG" with stock number) which are furnished at NO extra cost (factory bonded). Color: G-Green; O-Orange; R-Red; LB-Light Blue; DB-Dark Blue.

KRAEUTER VINYL CUSHION GRIP "CG" HANDLES AT NO EXTRA COST

All the "CG" Kraeuter tools listed on these pages have the Cushion Grips bonded on at the factory... actually become part of the tool. Won't crack, peel or chip. They're brightly colored to help you find them when you need them... easier to hold, easier to use... cushion your hand so you do the job with less effort. Cushion Grips give pliers the "feel" of comfortable, more accurate control. And they come to you at no extra cost.

TECHNICAL ADVANTAGES

Ersin Flux is exclusive to Multicore and will not be found in any other solder. It is a high-grade, water white resin, homogeneously activated.

Ersin Flux has a vigorous fluxing action and possesses the non-corrosive and pro-

ductive features of the original resin. Soldered joints made with Ersin Flux do not corrode, even after prolonged exposure to any degree of humidity. It has been tested under climatic conditions ranging from the Arctic to the tropics.

Ersin Flux reduces the surface tension of molten solder causing it to wet metals rapidly, increasing speed of operation with resultant production economies.

Free from objectionable odors. Non-toxic in use.

Leaves nothing but pure resin on the work after soldering and may be used whenever plain resin is specified.

Complies with all pertinent federal specifications.

Multicore construction. 5 separate cores of flux eliminate possibility of no flux in a portion of the wire, which may occur in single cored solder. Guaranteed continuity of the flux stream prevents dry joints, i.e., those having high electrical resistance.

Although there are 5 cores of flux in Multicore, the total percentage of flux to solder is less than many single cored solders.

Very rapid melting results from the multiple core construction, which provides thinner walls of solder, than are found in same gauge single cored solder.

Multicore's unique properties make perfect joints possible on difficult metals and alloys, even if oxidized.

Ability to tin rapidly produces perfect joints with less solder. Greater coverage per pound.

Ersin Multicore Solder is non-toxic in use. Cadmium is completely eliminated. The quantity of antimony is less than government standards allow. There is no danger of harmful effects caused by such impurities.

Every package of Ersin Multicore is labelled with the exact tin/lead content. This precise labelling results from Multicore's precise manufacturing methods.

STANDARD GAUGES TIN/LEAD ALLOYS

63/37	16-18-20	Eutectic—361°F
SAVBIT	14-16-18-20-22	Copper-Loaded—419°F

NOTE: Bit of soldering iron used should always be 108°F above melting point of alloy.

*ERSIN Multicore's national network of industrial distributors—in 50 states—facilitates prompt off-the-shelf delivery at factory-low prices.

COPPER-LOADED SAVBIT ALLOY

Copper-loaded SAVBIT stops the wear and erosion of copper soldering iron tips . . . increases tip life by 1,000%.

Characteristics and specifications:

Savbit Alloy is available in Ersin Multicore 5-Core Solder containing non-corrosive extra fast Ersin flux in 14, 16, 18, 20 and 22 gauge.

Melting point: Virtually the same as standard tin/lead alloys.

Excellent conductivity, tensile and shear strength.

Multicore's SAVBIT Alloy is entirely new and different—it is patented.

Available in 7 lb. reel
& 1 lb. dispenser carton

INSIST ON SIDCO**SIDCO®**
INTERCHANGEABLE INDUSTRIAL SOLDERING TIPS
 Manufactured by Electronic IDEAS Incorporated, Wyncote, Penna.

PATENT NO. 2,997,684   **MADE IN U.S.A.** / Meets Spec. W-S-570a / Choice of major Missile & Industrial Mfrs.
ANOTHER NEW SIDCO PRODUCT!!

THERMOSHIELD™ catches the heat normally radiated from the metal body and SQUEEZES it out the end thru the tips' working surface. Available on all 50W tips. Tests indicate 25% greater soldering efficiency with THERMOSHIELD. EXTRA BONUS - No burned insulation in tight spots - only the working surface is hot.

+Add TH to Model No. & .60 to unit price.

FAMOUS KISS 'N COOL HANDLES**SIDCO COOL**

Special heat stabilized Nylon-will not crack or break (if dropped). Boilable - dust repellent - Patented - self-adjusting spring socket holds tip in perfect contact. Cannot loosen. KC-1200 - \$1.44 complete with cord. Ivory color Standard (also available in other colors on quantity orders).

THE SIDCO "SENTRY"**THE WORLD'S ONLY INDICATING SOLDERING IRON**

Built-in lamp gauges tip temperature and wattage. Lights brightly on 50W. - dimly on 10W., plus same outstanding features as on standard SIDCO handles. KC-1200B-Cool Pastel Blue-only \$1.98, complete with cord.

TIPS

- Resists freezing and oxidizing.
- Pre-tinned soldering surface.
- Ready to use, no filing or reshaping
- No need to remove from iron during life of tip
- Pyramid, chisel, needle shapes available

SIZE	PRICE
1/8" Dia. x 1 1/4" Length	\$1.44
3/16" Dia. x 2 1/4" Length	1.60
1/4" Dia. x 2 1/4" Length	1.80

Super efficient heat transfer—heating element located right at working surface. Thermal time constant approx. 80 seconds.

DESCRIPTION	MODEL	Heat Capacity	Heat Trans. Rate	Unit Price (Net)
All Ratings at 115 V-AC or DC				
50 watt, plated steel body tapped for 1/8" tiplet; 1 1/4" long x 3/8" diam.	50-W-35	3800 Joules	120 watts (with T-1 tiplet)	\$1.98
40 watt, plated steel body tapped for 1/8" tiplet; 1 1/4" long x 3/8" diam.	40-W-35	3300 Joules	100 watts (with T-1 tiplet)	\$1.20
25 watt, plated steel body tapped for 1/8" tiplet; 1-1/8" long x 5/16" diam.	25-W-35	1750 Joules	60 watts (with T-1 tiplet)	\$1.00
Same as 50W35, except tapped for 3/16" tiplet	50-W-46	4500 Joules	240 watts (with T-57 tiplet)	\$1.98
50 watt chisel tip, premium quality, heavy iron plated, solid copper; 1-5/8" long x 3/8" diam.	50-W-33	3400 Joules	970 watts	\$2.40
50 watt chisel tip, solid iron, plated; 1-5/8" long x 3/8" diam.	50-W-33AR	4300 Joules	80 watts	\$1.60
40 watt pyramid tip, solid iron, plated; 1-5/8" long x 3/8" diam.	40-W-36	3000 Joules	80 watts	\$1.20
25 watt chisel tip, unplated tellurium copper; 1-5/8" long x 5/16" diam.	25-W-33	2500 Joules	450 watts	\$1.00
25 watt pyramid tip, unplated tellurium copper; 1-1/8" long x 5/16" diam.	25-W-36	1400 Joules	450 watts	\$1.00

**TIPLETS**

Chemically Treated - positively will not bind or freeze. Pure copper - pre-tinned. PRICES: 1/8" T-Series .16 each; PL Series, (Iron & Silver plated) will last more than 10 times as long, .48 each.

T-57 - 3/16" Desoldering Tiplet fits 50W45 Tip only—priced at .48

ORYX

PRECISION SOLDERING INSTRUMENTS

FIVE REASONS WHY PRODUCTION MANAGERS CHOOSE ORYX SOLDERING IRONS

1. MINIATURE SIZE

ORYX soldering irons are small and easy to handle as pencils. Their miniature size helps to speed any precision soldering operation. Damage to adjacent components is eliminated. If you can see it, you can solder it with ORYX!

2. FEATHER WEIGHT

A standard, utility-type 100 watt soldering iron weighs about 2 lbs. The so-called pencil-type irons typically weigh between 2 and 6 ounces. ORYX soldering irons, by contrast, weigh as little as 1/4 ounce. This true feather weight virtually eliminates hand fatigue. Workers can turn out many more joints per hour with fewer rejects.

3. HIGH EFFICIENCY

All ORYX soldering irons utilize a unique element-in-the-tip design principle. By generating the heat within the tip, far fewer watts are needed to achieve results comparable to much larger irons. This principle also provides quicker heat recovery because the heat path between element and joint is so very short. The need for large insulating handles is eliminated.

4. SAFETY

ORYX low-voltage irons are polarized, making it possible to directly ground the shaft, tip, and one side of the heating element. This provides a maximum degree of safety, both to the operator and to delicate circuitry. The ORYX line of 115 V. plug-in models includes 3-wire styles whose shafts and tips may be connected to ground for safety.

5. ECONOMY

A standard ORYX low-voltage industrial iron costs less than \$5 in production quantities.

LOW-VOLTAGE , MINIATURE PRODUCTION SOLDERING IRONS

MODEL 6—A precision Oryx soldering tool with fixed 1/4" solid nickel tip. Solders hair-spring movements, semiconductors, rf coils, fine assemblies. Nominal temperature 625° F. Weighs only 1/4 oz. 6-volts, 6-watts.....Net \$5.45 ea.
(12 or more \$4.95 ea.)

MODEL 6A—The most popular Oryx soldering iron. Designed for printed circuit soldering. Weighs only 1/4 oz. Nominal temperature 690° F. Furnished with 3/32" removable B tip. Also takes 1/4" P tip and new long-life V tip. 6-volts, 6-watts... Net \$5.45 ea.
(12 or more \$4.95 ea.)

MODEL 9-6—Similar to model 6A, but greater heat capacity. Weighs 1/4 ounce. Nominal temperature 750° F. Furnished with 1/2" A tip. Also takes B tip. 6-volts, 8.3 watts. Also available for 12 volts (model 9-12) and 24 volts (model 9-24).
Net \$5.45 ea.
(12 or more \$4.95 ea.)

MODEL 11-6—Special model for high-temperature solders. Temperature 835° F. Weighs 1/4 oz. Furnished with 3/32" solid nickel D tip. Also takes new 3/32" E tip. Nickel tips provide long life at high temperatures. 6-volts, 10-watts.....Net \$6.95 ea.
(12 or more \$6.45 ea.)

MODEL 5A—Microcircuit model for joints with negligible heat loads. Weighs only 8 grams. Nominal temperature 600° F. Furnished with 1/8" P tip. Also takes S tip and new T and U gold tips. 6-volts, 5-watts
Net \$5.45 ea.
(12 or more \$4.95 ea.)

MODEL 5-S—(As shown in photograph). Eyepiece model less than 5/8" long, for precise finger control. Weighs 7 grams. Nominal temperature 575° F. Furnished with 1/8" S tip. Also takes T and U tips. 4.5-volts, 4.5-watts (Use 54204-T tapped transformer for 4.5 volts)...Net \$5.45 ea.
(12 or more \$4.95 ea.)

MODEL 12-6—Standard model for production soldering of radio, TV, radar, telephone, and switchboard assemblies. Weighs 1/2 oz. Nominal temperature 700° F. Furnished with 3/4" C tip. 6-volts, 12-watts. Also available for 12 volts (model 12-12) and 24 volts (model 12-24).....Net \$5.45 ea.
(12 or more \$4.95 ea.)

MODEL 18-6—A heavy-duty production iron equal in performance to conventional 80 watt irons. Weighs 3/4 oz. Nominal temperature 800° F. Furnished with 3/4" F tip. Also takes new 3/2" M tip. 6-volts, 18-watts.....Net \$7.50 ea.
(12 or more \$7.05 ea.)

MODEL 25-12—Heavy-duty, high-temperature iron for large loads. Weighs 1 oz. Develops nominal tip temperature of 1000° F. Furnished with 3/4" G tip with solid nickel end. Also takes H tip. 12-volts, 25-watts.....Net \$8.00 ea.
(12 or more \$7.55 ea.)

REPLACEMENT TIPS for low-voltage soldering irons.

ACCESSORIES

TW-6E REPLACEMENT ASSEMBLY—Includes element, tip, and bushing (for one TW-6 tweezer arm only).....Net \$5.30 ea.

ST-6E REPLACEMENT ASSEMBLY—Includes element, blade, and bushing (for one ST-6E stripper arm only).....Net \$5.30 ea.

S-1 SOLDERING IRON STAND.....Net \$1.50 ea.

6-VOLT TRANSFORMER—Model 54203-6V. Output 6-volts, 18-watts. For use with all 6-volt Oryx tools. Operates on 115 V. AC. With 4 1/2' cord set — ready to plug in. Clip-holder on top for iron.....Net \$5.50 ea.

12-VOLT TRANSFORMER—Model 54204-12V. Output 12-volts, 25-watts. For all 12-volt Oryx tools. Operates on 115 V. AC. With 4 1/2' cord set—ready to plug in.....Net \$6.45 ea.

TAPPED TRANSFORMER—Output 4 1/2 to 6-volts in 1/2 v. steps. For exact temperature control on all ORYX 6-volt tools. Operates on 115 V. AC—ready to plug in. Model 54204-T.....Net \$6.50 ea.

PLUG-IN 115 V. MINIATURE IRONS

- **NO TRANSFORMER.** Standard models furnished with U/L approved 4½' cord set. Ready to plug in!
- **COMPACT DESIGN** for light production, laboratory, and service use. Irons weigh only 1 oz., plus cord.
- **HEAT QUICKLY** (about 1 minute) to 675° F. (10 W.) and 725° F. (15 W.)
- **REPLACEABLE TIPS.** 10 W. model furnished with ⅜" J tip (also takes K tip). 15 W. model furnished with ⅜" K tip (also takes L, Q, and R tips and solder cups listed below).

MODEL 115-10J*	Complete with J tip and cord set. Ready to plug in.	Net \$5.95 ea.	(12 or more \$6.45 ea.)
MODEL 115-15K*	Complete with K tip and cord set. Ready to plug in.	Net \$6.95 ea.	(12 or more \$6.45 ea.)
MODEL 115-10X	(no tip)—Complete with cord set. Ready to plug in. Less tip	Net \$5.50 ea.	(12 or more \$5.00 ea.)
MODEL 115-15X	(no tip)—Complete with cord set. Ready to plug in. Less tip	Net \$5.50 ea.	(12 or more \$5.00 ea.)
MODEL 115-10J-3	Complete with J tip and 3-wire grounding-type cord. Less plug	Net \$5.95 ea.	(12 or more \$6.45 ea.)
MODEL 115-15K-3	Complete with K tip and 3-wire grounding-type cord. Less plug	Net \$6.95 ea.	(12 or more \$6.45 ea.)
MODEL 115-10X-3	(no tip)—With 3-wire grounding-type cord. Less plug and tip	Net \$5.50 ea.	(12 or more \$5.00 ea.)
MODEL 115-15X-3	(no tip)—With 3-wire grounding-type cord. Less plug and tip	Net \$5.50 ea.	(12 or more \$5.00 ea.)

*Approved by Department of Building and Safety, City of Los Angeles.

SOLDERING TWEEZERS

MODEL TW-6—Precision model for semiconductors, solid state, hairspring movements, miniature relays, thermostats, etc. Solid nickel ⅜" fixed tips. Nominal temperature 500° F. Weighs 1 oz. 6-volts, 18-watt, AC or DC.

MODEL TW-6, complete with 4½' cordNet \$14.95 ea.
(12 or more \$14.95 ea.)

Unique tools with heating elements in each arm. Speed soldering time by heating both sides of joint. Tweezer action conducts heat quickly into joint. Low-voltage operation assures safety to circuitry and to operator.

MODEL TW-12

Heavy duty model for regular production-line soldering of radio, TV, radar, telephone, and switchboard assemblies. Furnished with replaceable ⅜" N tips. Nominal temperature 625° F. Weighs 2 oz. 12-volts, 25-watts, AC or DC.

MODEL TW-12, complete with 4½' cordNet \$14.95 ea.
(12 or more \$14.45 ea.)

Spare tip N for model TW-12Net \$1.25 ea.

Wire stripper heads for TW-12 (kit of 2 heads and 2 screws), Cat. No. SK-12. Net \$1.35 kit

THERMAL WIRE STRIPPERS

Each those hard-to-get-at spots. Miniature tweezer design.

Ideal for repair and prototype work where a bench stripper is unsuitable. Strips nylon, rubber, PVC, Kel-F, Polystyrene, and similar medium-temperature insulations. Stainless steel stripping heads are abrasive-tumbled to eliminate sharp edges which might damage conductors. Operating temperature 400°F (ST-6) and 500°F (ST-18). Furnished with 4½' cord.

MODEL ST-6. For 6-volts, AC or DC, 12 watts
MODEL ST-18. For 12-volts, AC or DC, 25 watts.
EITHER MODELNet \$14.95 ea.
(12 or more \$14.45 ea.)

MINIATURE SOLDER POT

Quick-heating, miniature solder pot for production, service, or laboratory use. Heats to 550°F in just 4 minutes. For tinning wires and component leads; heating waxes and potting compounds. Capacity 2.5 cc. For 115 V. AC or DC.

SP-115. With cord set ready to plug in.
SP-115-3. 3-wire grounding model, less plug.
EITHER MODELNet \$14.95 ea.
60/40 Solder Slugs for aboveNet \$3.30 ea.

SOLDER CUPS

Solder cups replace tips on Oryx model 18 and 115-15 soldering irons. For tinning wires and component leads. Hold 2.5 cc. Nominal temperature 550-600°F.

SC-18 (Use with Oryx 18-6 soldering iron.)
SC-115 (Use with Oryx 115-15 soldering iron.)
EITHER MODELNet \$2.25 ea.

ELVAC PRECISION FILES

- FINEST SWISS QUALITY
- VINYL CUSHION FINGER GRIPS

High-quality precision needle files for delicate work. Made in Switzerland to ORYX CO. specifications. Vinyl cushion finger grips reduce fatigue. Available in other lengths and cuts on special order.

THE ORYX COMPANY

TARZANA, CALIFORNIA

Ungar® STANDARD LINE SOLDERING IRON

New UNGAR HEATING UNITS AND THREAD-ON TIPS for Hi-Speed Repeat Soldering

Ungar's exclusive new development provides these important advantages...

- New thread-on copper tips, iron clad, silver plated or plain copper.
- 100% increase in heat recovery rate.
- 4 times greater heat transfer.
- Positive seal between heating unit and tip.
- New passivated plating reduces barrel oxidation and surface flaking of heating units.

#4037 Hi-Speed Heating Unit—850°-900°F. 47½ Watts.

#1237 Hi-Speed Heating Unit—750°-800°F. 37½ Watts

All electrical components are for use on 115 v. AC-DC.

#PL 111 PENCIL TIP. ¼" x ¾" iron clad, Silver Plated.
#111 Plain Copper

#PL 113 CHISEL TIP. ¼" x ¾" iron clad, Silver Plated.

#113 Plain Copper.

#8001 ANTI-SEIZE.

2 oz. can New Ungar Anti-Seize guards against "freezing," protects against corrosion and aids heat transfer to tip.

NEW MICRO- TIPLETS

#7154 Stepped Pencil, ¼" pencil tip. Iron clad, silver plated. Fits #535, 1235 and 4035.

#7155 Stepped Chisel, ¼" chisel tip. Iron clad, silver plated. Fits #535, 1235 and 4035.

UNGAR fast, safe De-Soldering Tips

Helps remove components 70% faster. Melts solder on all terminals at once. For use with #4045 Heating Unit.

#270 UNGAR De-Soldering Kit. Complete, 7 pieces including handle, Heating Unit #4045 and five De-Soldering Tips in metal case.

#856 5/8" Cup Tip

#855 3/4" Cup Tip

#854 1" Cup Tip

#858 Bar Tip

New #862 Offset Slotted Tip

#857 Slotted Tip

New #863 Cube Tip

New #861 Triangle Tip

UNGAR TIPLET Soldering Tips for Heating Units shown below

actual size

#PL 340 Micro-Needle. ¼" x ¾", for microscopic soldering. Iron clad, Silver Plated—Actual size.

#PL 331 Pencil Tip. ¼" x 1", iron clad, Silver Plated.

#331 Plain Copper.

#PL 332 Pencil Offset. ¼" x 1", iron clad, Silver Plated.

#332 Plain Copper.

#PL 333 Chisel, Long Taper. ¼" x 1", iron clad, Silver Plated.

#333 Plain Copper.

#PL 338 Tapered Needle. ¼" x 1¾", iron clad. Silver Plated.

#PL 833 Chisel, Long Taper. ¼" x 1¾", iron clad. Silver Plated.

#PL 834 Chisel, Long Taper, Offset. ¾" x 1¾", iron clad, Silver Plated.

#PL 823 Pyramid, ¾" x 1", iron clad, Silver Plated.

#823 Plain Copper.

#PL 824 Chisel, Long Taper. ¾" x 1", iron clad. Silver Plated.

#824 Plain Copper.

800 Series TIPLETS fits Ungar #4045 heating unit only.

Improved #776 handle

NEW STAINLESS STEEL HEAT DEFLECTOR

NEW OCTAGON GUARD WASHER

NEW "SOFT TOUCH" GRIP

NEW FULL CONTACT SPRING SOCKET NO TIP WOBBLE

NEW CERAMIC AND GLASS INSULATOR

NEW THERMO. STABILIZED PHENOLIC

NEW POLYVINYL INSULATED CORD

#8000 Soldering Iron Holder

Exclusive Ungar double safety guard design protects operator against accidental burns and 2) protects iron against breakage. Individually boxed

KLEEN-TIP SPONGE

Removes oxidation, doubles life of tips. #400 with tray.

#455 refill sponges

Ungar Interchangeable Tips...the right tip at the right temperature.

UNGAR ELECTRIC TOOLS

HAWTHORNE, CALIFORNIA

MOST VERSATILE SOLDERING IRON EVER INVENTED

IMPERIAL Ungar

COOL, LIGHTWEIGHT, EASY-HANDLING

Ungar... developers of the industry's first miniature, low wattage, high temperature, pencil type iron... now brings you the ultimate in time-saving, money-saving soldering irons.

PERMA COOL COLORED HANDLES

#6100 Turquoise, Beige, Ivory*

INTERCHANGEABLE CORD SETS 2-wire or grounded 3-wire

#6102 2-wire.

#6103 Grounded NEMA.

NEW 60 WATT

"Long Life" Interchangeable Heat Cartridges.

- #6203 60 Watt (850-1050°F temperature range)
- #6200 40 Watt (750-950°F temperature range)
- #6201 30 Watt (650-850°F temperature range)
- #6202 25 Watt (600-800°F temperature range)
- #6206 15 Watt (700-750°F temperature range)

*NOTE: Designate color for handles and cord sets by adding suffix (-1 for Turquoise; -2 for Beige; -3 for Ivory).

IMPERIAL MINI-TIP®

Thread-on soldering tips

All easy-thread tips are completely interchangeable.

#6304 Micro-Chisel, Iron Clad, Gold Plated (24 kt.)
3/64 x 1/2

#6305 Micro-Spade, Iron Clad, Gold Plated (24 kt.)
3/64 x 1/2

1/4 x 3/4

#6474 Long Taper Chisel, Iron Clad, Gold Plated (24 kt.)
3/8 x 3/4

NEW MICRO-TIPS

For use with Imperial
15 watt cartridges only.

#6550 Tapered Screwdriver, Iron Clad, Gold Plated (24 kt.) .040 x .40

#6551 Stepped Spade, Iron Clad, Gold Plated (24 kt.)
.050 x .40

#6553 Stepped Chisel, Iron Clad, Gold Plated (24 kt.)
.050 x .40

#6554 Stepped Pencil, Iron Clad, Gold Plated (25 kt.)
.050 x .40

Specially Designed IMPERIAL HOLDER

Rugged holder, built especially for the IMPERIAL, protects iron, keeps it safely out of the way. Black with gold cage guard and heat sink. #6800.

COIL-A-CORD

#7625. Eliminates tangled and twisted cords... Automatically keeps cord coiled and out of the way. Use it with either the standard or grounded Imperial Cord sets... Slips on Easily... Can also be used on many electrical hand tools and appliance cords.

Precision Ground, Unconditionally Guaranteed

SCREW DRIVERS • NUT DRIVERS • HAND TOOLS

- Nickel-Chrome Plated #6150 Steel Blades will not rust or corrode
- Comfordome Slo-Burn S/B® Amberyl® Handles are easy on the hands

Vaco Amberyl® S/B® Handles bear the Underwriters' Laboratories Re-examination Service Marker.

Chrome Vanadium Steel Blades are precision tempered and Nickel-Chrome plated for highest finish and lasting durability.

Vaco Amberyl® Handles are a dense, resilient, thermal plastic material that is break-proof, shock-proof, fire-safe, non-absorbent and therefore impervious to most acids and alkalis.

Blade Tips are precision ground and designed to perfectly fit the screw slot.

VACO RADIO and TV KITS**ZBX 51****ZBX 51 Screw Driver Kit.....\$5.22**

A fine, all-purpose kit of interchangeable regular and Phillips blades that fit same handle. 6" extension makes 10 combinations possible. In durable leatherette bag.

**ZSX 61****ZSX 61 Nut Driver Kit.....\$6.30**

A most versatile and complete hexagon wrench kit for radio, television or any other work requiring speedy nut setting. All sockets are super hard for maximum utility and long life. 6" extension makes 10 blade lengths possible. In handy leatherette tool roll.

**ZA 70****ZA 70 Allen Driver Kit.....\$5.12**

This useful kit consists of 6 hexagon drivers, handle and bag. Will service hexagon recessed opening screws Nos. 4, 5, 6, 8, 10, 1/4", 5/16", and 3/8". Each bit is extra long and may ground back as wear occurs.

**ZU 75****ZU 75 Universal Driver Kit.....\$5.22**

Here is a kit that is universal in its applications since it will serve all three types of the most popular screws in use today—regular slotted, Phillips, and clutch head. All popular size blades are included—3/16", and 1/4" for regular slotted screws; No. 1 and No. 2 Phillips; 5/32" x 3/16" clutch head.

**ZU 75****27-Piece TV and Radio Kit.....\$26.42**

NO. TV 27 KIT—Contains practically every hand tool necessary for television and radio work, plus extra pockets for pliers and other personal tools according to individual preferences. Contains one each of the following: ZH 1 medium duty handle; ZH 2 heavy duty handle; ZX 56 extension; A 132 1/4" stub; 1/4", 3/16", 1/8" regular bits; No. 1 Phillips and No. 2 Phillips bits; 3/16", 1/4", 5/16", 11/32", 3/8", 7/16" and 1/2" hex. wrenches; AT 45 metal tip aligner; A 116-2 3/32" pocket clip; P 01 #0 Phillips thin blade; OK 24 1/8" screw holding; VR 261 1/8" insulated blade; OK 38 3/16" screw holding; VR 381 3/16" insulated blade; VB 210 1/8" x 10" non-magnetic adjuster; AT 510 5/32" fiber aligner; VO 2 medium offset; VO 1 small offset.

**TV 27****14-Piece TV and Radio Kit \$11.98**

NO. RT 14 KIT—Here's a handy, convenient kit for radio and TV service men. Contains nut drivers, Phillips and regular drivers, plus ZH 2 heavy duty handle and famous Vaco 6" extension which doubles the usefulness of each driver. In durable leatherette tool roll.

CHASSIS PUNCHES

NEW "LT" (LOW TORQUE) CHASSIS PUNCHES

A brand-new electro-coating process (which can't wear off) reduces friction, thus lowers torque. You get a much cleaner hole with much less effort. The Walsco "L.T." Chassis Punch requires no lubrication of any kind and will give perfect service almost indefinitely.

50% LESS
EFFORT REQUIRED
THAN
COMPETITIVE
PUNCHES

ROUND CHASSIS PUNCHES

Made of hardened, precision-ground, tool steel. Quick and easy to operate. Saves hours of hard work.

Weller DUAL HEAT Soldering Guns

Dual heat. All Weller guns offer Dual Heat, an original Weller feature that provides two tip temperatures from the same gun. Two trigger positions permit instant switching to high or low heat, whichever is best suited for the job. The use of low heat prevents damage when soldering near heat-sensitive components and prolongs tip life. High heat is instantly available when needed.

Instant heat. Solders in seconds. No waiting for the tip to heat. No wasted current.

High-Efficiency Tip. Made of copper for superior heat transfer and optimum soldering results. Slips easily into difficult places.

Exclusive Tip Grip. Wiping action of tip fastening nuts eliminates contact resistance and oxidation. This assures full, constant heat.

Spotlight. Illuminates the work and eliminates shadows.

Fingertip control. Heat is instantly "on" when trigger is pulled, instantly "off" when trigger is released. No need to unplug the gun. No danger of damage from an idling hot tool.

Operating comfort. Compact design and perfect balance make precision soldering easy and eliminate fatigue.

Guaranteed one year. All Weller guns are UL and CSA approved, and guaranteed for one year against defects in material and workmanship.

Weller MAGNASTAT® Soldering Irons

for controlled temperature soldering

Only Weller brings you soldering irons with temperature control in the tip. One Magnastat iron with 3 different controlled temperature tips does the work of 3 different irons. And it maintains proper temperature for secure, reliable soldered connections.

- Tip temperature will not vary more than $\pm 3\%$ when idling.
- A Magnastat iron provides efficient soldering temperature under load and excellent recovery.
- Your choice of 3 different controlled temperatures by interchanging Magnastat tips.
- Weller Magnastat irons do the work of uncontrolled irons that require much higher wattage and weigh twice as much.
- The light weight of a Weller Magnastat iron reduces operator fatigue. Handle remains cool.

Over 90 Magnastat Wellertips are available. Tips come in 3 controlled temperature ranges—600°F, 700°F and 750°F—and in many different shapes.

Weller® PENCIL Soldering Irons

Temperature Controlled "Low Voltage" Soldering Pencil with $\frac{1}{16}$ " 700°F tip and power unit—MODEL W-TCP

SPECIFICATIONS

Wattage	Voltage	Weight with Tip, Less Power Unit and Cord	Overall Length of Iron with Tip	Tip Retainer O. D.
60	120 V.* 50/60 Cycles	1 $\frac{1}{4}$ oz.	7 $\frac{1}{2}$ "	$\frac{1}{16}$ "

220 V., 50/60 Cycles available upon request at same price.

Temperature Controlled "Low Voltage" Soldering Pencil

For production line and research laboratory use where accurate control of tip temperature is essential to meet rigid soldering specifications. Choice of 3 different tip temperatures from one soldering pencil merely by interchanging 3 different controlled temperature tips.

- Temperature control is in the tip. Choice of 500°F, 600°F and 700°F tip temperatures.
- Extremely small and light in weight. Easy to control.
- Suitable for miniature or general soldering.
- High efficiency and rapid recovery. Packed with plenty of reserve power.
- Low 24 volt operation for component and user protection.
- Isolated for elimination of leakage current.
- Handle of high-impact plastic remains cool.
- Interchangeable tips are premium plated.
- Soldering iron stand attached to power unit.
- Power cord is silicon rubber covered, extremely flexible and easy to maneuver. Doesn't break or burn.

Interchangeable tips available: $\frac{1}{16}$ ", $\frac{3}{32}$ ", $\frac{1}{8}$ " and $\frac{1}{4}$ " screwdriver with choice of 500°F, 600°F and 700°F controlled temperatures.

Continuously Variable Temperature Controlled Soldering Pencil with $\frac{1}{16}$ " tip and power unit—MODEL W-TCP-2

SPECIFICATIONS

Wattage	Voltage	Weight with Tip, Less Power Unit and Cord	Overall Length of Iron with Tip	Tip Retainer O. D.
15	120 V.* 50/60 Cycles	1 $\frac{1}{4}$ oz.	7 $\frac{1}{2}$ "	$\frac{1}{16}$ "

220 V., 50/60 Cycles available upon request at same price.

Continuously Variable Temperature Controlled Soldering Pencil with SCR and Thermistor Control Circuit

Has exclusive features found in no other soldering iron. Offers a wide range of controlled tip temperatures via Electronics SCR and Thermistor circuitry, and is designed for low temperature, miniature soldering applications.

- Continuously variable temperature controlled at the tip from 200°F to 450°F.
- Dial the tip temperature that's best suited for the job.
- Extremely small and light in weight.
- Operates at 24 volts from an isolated secondary winding for complete operator and equipment safety.
- Handle of impact resistant plastic remains cool.
- Interchangeable tips are premium plated.
- Soldering iron stand attached to power unit.
- Power cord is silicon rubber covered, extremely flexible and easy to maneuver. Doesn't break or burn.

Interchangeable tips: $\frac{1}{16}$ " screwdriver and $\frac{1}{32}$ " conical flat. Others available on special request.

"Industrial Rated" Pencil Soldering Iron

Low cost 115 volt iron has tip temperature of 860°F with 25 watt input. Ideal for miniature type soldering.

High efficiency and rapid recovery.

Does the work of irons that require much higher wattage.

- Lightweight design reduces operator fatigue, provides accurate control.
- Rugged heating element designed for durability, long service.
- Readily replaceable parts. Change your own heating element or cord set.

Interchangeable tips available: $\frac{1}{16}$ ", $\frac{3}{32}$ " and $\frac{1}{8}$ " screwdriver. Premium plated for long life.

WELLER ELECTRIC CORP., EASTON, PA.

NATIONALLY ADVERTISED WEN HAND POWER TOOLS

SOLDERING all GUN MODEL 450 NEW

Long reach, single post, long life rigid copper tip; instant heat, fast cooling; lightweight, perfect balance; pre-focused spotlight.

No. 45F7 25-100 watt heat power for printed circuit boards \$1.30

No. 45M7 100-200 watt power for home wiring, appliances \$1.30

No. 45A7 200-450 watt heat power for gutters, plumbing \$1.30

\$13.95
Includes heavy duty tip

No. 45P7 Flat iron attachment removes wood dents, seals plastic bags \$6.00

No. 45S7 Plastic cutting attachment cuts plastic, tile \$6.00

The new Wen "All" Gun does any soldering job you can think of from delicate kit work and printed circuits to appliance repair to heavy jobs formerly requiring an industrial type soldering iron. Convenient trigger on/off switch, shock resistant black case. A full range of heat power... just select the proper tip.

SOLDERING PISTOL WITH ATR

MODEL 75
\$4.95

Perfectly sized and balanced for work normally done by a soldering "pencil" yet with plenty of capacity for heavy jobs. Use of a new space-age metal produces heat of 100 watt device from a peak surge rating of 50 watts and a normal draw of only 30 watts. Heavy copper tip permits repeated dressing down for long life. Convenient trigger switch, spotlight, pistol grip with perfect balance. Operates on 110-120 volts, 60 AC.

MODEL 100 SOLDERING GUN KIT \$7.95

All the plus features of the 100 watt Model 100 Soldering Gun in a convenient, colorful book-fold carton. An extra plastic tile cutting tip and rosin solder included.

MODEL 199 "QUICK HOT" SOLDERING GUN

\$7.95

Low priced, general purpose. An electronic gun ideal for soldering wires, connection light gauge metals, 130 watts 1½ lbs. wt., has new type Long Nose-Long Life tip. Melts solder in 2½ seconds.

\$9.95 MODEL 199K HOME UTILITY KIT

Includes Model 199 Soldering Gun with long-life, long nosed Soldering tip; plastic tile cutting and putty removing tip; flat iron tip for removing dents from wood and sealing plastic bags.

HEAVY DUTY 200 W. SOLDERING GUN

MODEL 288
\$9.95

Has modern long-nose, long life tip. Melts solder in less than 5 seconds. Perfect balance. Spotlight and shatter proof case. Transfers more heat volume, yet weighs less than other comparable guns.

HEAVY DUTY 250 W. SOLDERING GUN

MODEL 250
\$12.95

This "quick hot" electronic gun is the standard one of the industry. Greater volume of heat enables it to solder relatively heavy materials, handle production jobs, and do intermittent soldering.

MODEL 250K KIT \$15.95

Includes the famous heavy duty "quick hot" 250 watt soldering gun with feroloy tip for heavy soldering, a plastic cutting tip, a flat iron tip for furniture dent removal.

MULTI-SPEED ALL-DRILL

MODEL 950
\$44.95

Light weight, easy to handle Brite Finish aluminum die castings; perfect balance heavy duty auxiliary handle. Built for heavy duty continuous operation.

This four-speed range, (plus reversible) drill assures perfect workability in any material—alloy and cold rolled steel, cast iron, brass aluminum, bronze, plastics and masonry. Two-gear reduction speed positions, with lever action gear shift; two-electronic reduced speeds in each gear position; ¼" geared Jacobs chuck; tremendous torque, without heat, in low gear position; ample torque in high gear position; 6 amp. ½ HP motor, welded burnout proof armature; safety switch motor reverse; rugged needle and ball thrust spindle bearings; heavy duty gear train; locking trigger switch.

2-SPEED POWER DRILL

MODEL 808 \$29.95

Operates from 1000 to 3000 RPM ¾" capacity... geared chuck, Ball Thrust bearings, Maximum torque underload.

Drill in steel, masonry... sand, polish, drill. Here's the double duty drill that solves all drilling problems for home and professional craftsmen. It has two power takeoffs to handle both heavy duty and light precision jobs. Simply change speeds... 3000 RPM for boring into steel, brass, copper, aluminum—even masonry and concrete. Wen accessories come with it... allowing you to wax, buff, polish, mix paint—even sharpen knives and tools. Finest stressproof steel cut gears, ¾" Jacobs geared chuck, on-off switch and lock button, lightweight cast aluminum housing.

TOTER DRILL ACCESSORY KIT

MODEL 80 K 35 \$9.95

The perfect supplement to your drill: every attachment operates at the correct speed. It buffs, polishes, scratches, brushes, sands, drills, grinds, sharpens, stirs paint—has literally a hundred other uses. Drill holder, included, allows you to have both hands free. A whole workshop in one kit! Components include paint mixer, 3" wire brush, 3" buffing wheel, 3½" grinding wheel, 9 drills (1/16 to ½") in plastic case, 15-5" sandpaper discs, and other extras.

"BLUE CHIP" TRANSFORMERS

62 TYPES

5 DIFFERENT SIZES

Tiny, plastic cased, Blue Chip transformers for printed circuit applications, are available for a wide choice of power ratings.

Five different sizes, from .10 to 1.2 cubic inches with a total of 62 new ratings are listed below to indicate the available power levels for both voice frequency range and extended frequency operation. These ratings take into account not only power handling capacities at minimum frequencies, but also total harmonic distortion under stated conditions. Within the limits shown on the rating charts, variations in both power and distortion levels are possible depending upon the minimum operating frequency.

Blue Chip transformers meet Mil-T-27A, Grade 5, Class S requirements. These versatile transformers are available from ADC, or through your distributor.

Pin Diameter:
.030"
Pin Length: 1/8"
Weight: 0.15 oz.

RESPONSE: ± 2 DB 300 to 100,000 CPS.
DISTORTION: 10% at 30 MW, 300 to 100,000 CPS, except as noted.

Pin Diameter:
.030"
Pin Length: 1/8"
Weight: 0.4 oz.

POWER TRANSFORMERS FOR MILITARY AND INDUSTRIAL APPLICATIONS

Reliability, minimum size and long life under rugged environmental conditions are prime requisites in today's military electronic equipment. To meet these modern standards, ADC offers a complete line of hermetically sealed power transformers. Designed to meet MIL-T-27A specifications and utilizing MIL cases and mounting dimensions, these units offer our customers a ready source for prototype and produc-

tion applications. All military contractors and commercial electronic engineers with stringent environmental conditions will find these carefully rated units ideally suited. For those applications where hermetic sealing is not necessary, we offer the conservative transformer designs of our hermetically sealed line, in drawn steel cases of MIL size and mounting dimensions with phenolic terminal plates and solder lug terminals.

POWER TRANSFORMERS—60 Cycle

ADC offers these standard power transformer designs to cover a wide range of requirements for electronic circuit application. They are available in standard MIL case sizes, hermetically sealed to meet all requirements of MIL-T-27A, Grade 4, Class R, life expectancy X. Maximum operating altitude is 10,000 feet.

The same electrical ratings are also available as commercial grade fully enclosed units for non-military applications in the same MIL case sizes. This version is furnished with a phenolic terminal board and heavy duty solder lug terminals. Mounting screws and tapped inserts provide the same mounting centers as MIL-T-27A versions.

POWER TRANSFORMERS—400 Cycle

These items are especially designed for maximum performance in 180 to 1500 CPS applications, with maximum altitude ratings of 50,000 feet. They are hermetically sealed to meet all requirements of MIL-T-27A, Grade 4, Class R. Standard MIL case sizes and construction are used.

MILITARY STANDARD TRANSFORMERS

These Military Standard transformers have been specified by ASES and are established by the three Military Services and the transformer industry as standards for Military transformer applications. Each item is available as either Grade 1 or Grade 4 (ruggedized) as requested. Tests have been conducted in ADC's environmental laboratory which indicate that these units will meet the requirements of MIL-T-27A, Grade 4, Class R operating temperature; life expectancy X 10,000 hours minimum).

INDUCTORS FOR MILITARY AND INDUSTRIAL APPLICATIONS

ADC's line of inductors are circuit running mates to ADC's power transformers. They are available hermetically sealed, to meet MIL-T-27A requirements Grade 4, Class R, life expectancy X. For commercial applications, where hermetic

sealing is not necessary, these same ratings are available in MIL cases and mounting dimensions, but with phenolic terminal board and solder lug terminals.

AUDIO TRANSFORMERS FOR MILITARY AND COMMERCIAL APPLICATIONS

ADC offers the following designs to cover a wide range of standard audio applications, from low power transistors through heavy duty output circuits. They are conservatively rated at ± 1 db from 30 to 15,000 cycles at the maximum rated power. Each is designed for minimum insertion loss, is fully impregnated before potting and rated for dependable continuous duty operation.

These audio transformers are available in standard MIL cases, hermetically sealed to meet all requirements of MIL-T-27A. THE SAME RATINGS ARE ALSO AVAILABLE AS COMMERCIAL GRADE COMPONENTS, featuring the lower cost construction of a phenolic terminal board with solder lug terminals in the same drawn MIL cases.

INPUT TRANSFORMERS Response $\pm 1/2$ db, 30-15,000 cps

Catalog No. Com- Her- metric Seal	Application	Primary Impedance Rating (Ohms)	Secondary Impedance Rating (Ohms)	Max. Level	Hum Reduction	Case Size
222A 223A	Line to Single or Push Pull Grids.	600 ¹	60,000 ¹ Split	+10 dbm	-65 db	AJ

MILITARY STANDARD AUDIO TRANSFORMERS

These Military Standard audio transformers have been specified by ASES and are established by the three Military Services and the transformer industry as standards for Military transformer applications. Tests have been conducted in ADC's environmental laboratory which indicate that these units will meet the requirements of MIL-T-27A, Grade 1, Class R operating temperature, life expectancy X (10,000 hours minimum).

NOTES:

- ¹These items are not normally carried in stock.
- ²"Split" indicates 2 separate, symmetrical windings. Impedances shown are for series connection. Where impedances are shown in parenthesis, they indicate the impedances resulting when windings are connected in parallel.
- ³Balanced, for Williamson type circuit operation.
- ⁴Has primary taps suitable for Screen loading

⁵Power response $\pm 1/2$ db, 50-15,000 cps.

⁶Response is ± 1 db, 30-15,000 cps.

All of these designs are available on special order with output impedances of other values than shown above.

MINIATURE AUDIO TRANSFORMERS

2-56
Screws
Bottom
View

These transformers offer a variety of special design features on a catalog basis for particular circuit and chassis applications. They are available for plug-in and printed circuit applications as well as standard installations. The special cases shown allow the maximum of electrical performance for each type as well as variety and flexibility in mechanical arrangement. All electrical ratings are shown for continuous duty at full specified power levels. Dia. $\frac{3}{8}$ ", Ht. $1\frac{1}{8}$ ", 2-56 Mtg screws on 11/16" centers.

TELEPHONE COILS

For many years, ADC has been a dependable source of transformers and filters for the telephone and telegraph industry. Recently, we have designed and tooled for additional items in a series of "coils" which are electrically and physically interchangeable with similar components made by Western Electric. These items are listed below with the equivalent Western Electric number. All items in this series can be supplied in MIL cases if desired.

ADC REPEATING COILS

104A—Cord Circuit. This repeating coil is designed to have good transmission efficiency for voice frequencies. Low frequency ringing currents are attenuated and circuit will not ring through. Case is heavy steel to eliminate all cross-talk. Core will not saturate at maximum normal current.

104B—Phantom. The 104B Repeating Coil is a 4-winding coil, for use in phantom circuits. The phantom winding (5-6-7-8) is parallel wound. Heavy Formvar wire is used for maximum surge voltage or lightning protection. This coil has good transmission efficiency at both ringing and voice frequencies.

Type	PRI. DCR		SEC. DCR		Case	Screw	Mounting	
	1-2	3-4	5-6	7-8			Centers	
104A	10.3	16.5	12.5	14.5	2½x1½x3 high	(4) 6-32	1½x1½	
104B	16.5	20	24	24	2½x2½x3 high	(4) 8-32	1½x2½	

INDUCTION COILS

103A—Induction Coil is a 2-winding coil for local battery telephones.

103B—Anti-Sidetone Induction Coil is similar to 103A, but with an additional winding for anti-sidetone connection.

103C—Anti-Sidetone Induction Coil is designed for common battery telephone use.

PROFESSIONAL GRADE COMPONENTS

This group of components has been designed for use in high fidelity and professional equipment and for public address service. Freed has developed this series of units employing the latest design techniques and the best commercially available materials. Except for units carrying unbalanced direct current the frequency response is ± 1 DB from 30 to 15,000 cps. All units feature excellent performance characteristics with minimum size and weight.

All units are vacuum varnished and then potted in compound to insure long life and trouble free performance.

Professional Grade components are supplied cased. Upon request these units can be supplied open or in shell type construction.

All cased Professional Grade Components supplied with terminals meet "EIA" standards.

Transformers PGA 1 through PGA 10 are supplied in hermetically sealed cases.

U-16 IMPEDANCES IN OHMS:

2, 4, 8, 12, 16

U-500 IMPEDANCES IN OHMS:

50, 125, 200 C.T., 250, 330, 500 C.T., 125 and 500 ohms can be used for 150 and 600 ohms.

*PGA 28, 29 & 30 supplied with terminals, all other units with leads.

A 70 volts level can be obtained for the following impedances:

500 ohms — 10 watts + 40 DBM
330 ohms — 15 watts + 42 DBM
250 ohms — 20 watts + 43 DBM
200 ohms — 25 watts + 44 DBM
125 ohms — 40 watts + 46 DBM
50 ohms — 100 watts + 50 DBM

FREED TRANSFORMER CO., INC.

HIGH "Q" REACTORS

QGC—are hermetically sealed, MIL-T-27A, Grade 4, Class R, High Q Reactors for low audio frequency application with an excellent inductance stability with variations of A.C. and D.C. currents, frequencies and temperatures.

SPECIAL REACTORS:

- (1) with a center tap
(2) with a split winding
(3) with inductances other than those listed can be supplied.

STANDARD MILITARY TRANSFORMERS

The group comprises audio and power units designed to meet MIL-T-27 A specifications.

The functional characteristics of these transformers were established by the Armed Service Standardization Program. These units are supplied in standard MIL cases.

Transformers meeting MIL-T-27A specifications Grade 1 through 6 with temperature characteristics of Class S, T, or U can be supplied on special order.

Encapsulated units using either Epoxy-Resins or Fosterite can be supplied for Grade 2 and 5. Class U components can be supplied molded in special high temperature Freed resin.

HERMETICALLY SEALED PULSE TRANSFORMERS

Hermetically sealed Pulse Transformers for use in blocking oscillator, low level interstage coupling, and modulator output circuits. These components meet MIL-T-27 A specifications. The pulse transformers are designed for maximum power, efficiency, and optimum pulse performance. Balanced coil structures permit series or parallel connection of windings for turn ratios other than unity. Pulse characteristics, voltages and impedance levels will depend upon the interconnections made.

TOROIDAL INDUCTORS

Using the latest developments in the field of magnetic materials and new impregnation and molding techniques the Freed Transformer Co. makes available to the industry the most extensive line of toroidal inductors.

Freed toroids are available in three types of constructions. Open units coated with a special high temperature extremely low loss compound, hermetically sealed in metal cases or molded in special **Freed Epoxy Resin**. Both hermetically sealed and molded units meet the latest military specification MIL-T-27A (graded 1 or 4 and 2 or 5 respectively.) Freed toroidal inductors are supplied with either molypermalloy or carbonyl iron powder cores.

1. Temperature Stabilization:

The molypermalloy and carbonyl iron powder cores have a temperature coefficient of inductance. Depending on the degree of temperature stabilization the cores have different temperature coefficients. The degree of stabilization is denoted by a two-letter code.

- SF Non-stabilized cores, $\pm 2\frac{1}{2}\%$ inductance variations from -55°C to $+85^{\circ}\text{C}$.
- SN Non-stabilized cores, $\pm 2\%$ inductance variations from -55°C to $+85^{\circ}\text{C}$.
- SE Temperature stabilized cores, $\pm 0.1\%$ to -0.4% inductance variations from -1.5°C to $+54^{\circ}\text{C}$.
- SB Temperature stabilized cores, $\pm 0.1\%$ inductance variations from $+13^{\circ}\text{C}$ to $+35^{\circ}\text{C}$.
- SD Temperature stabilized cores, $\pm 0.1\%$ inductance variations from -1.5°C to $+54^{\circ}\text{C}$.
- SW Temperature stabilized cores, $\pm 0.25\%$ inductance variations from -54°C to $+85^{\circ}\text{C}$.
- SM Temperature stabilized cores, $\pm 0.25\%$ -65°C to $+125^{\circ}\text{C}$.
- SP Temperature stable carbonyl iron cores, $\pm 0.3\%$ inductance variations from -55°C to $+85^{\circ}\text{C}$.

The temperature (stabilization) coefficient of an inductor will depend upon the nominal inductance value, operating frequency and A.C. voltage across the coil. Under some unfavorable working conditions the temperature coefficient of inductance corresponding to a given stability characteristic may be exceeded.

Toroids with special requirements such as tapped toroids, toroidal transformers, molded and cased units with dimensions other than standard sizes and high temperature toroids can be supplied on request. Our engineering and laboratory facilities are available for consultation, research and development.

TI-16	600	16	21	0.13	TI-36	3,950	10	11	0.07
TI-17	1,200	20	29	0.18	TI-37	23.5	10	32	0.20
TI-18	2,600	30	40	0.25	TI-38	100	4	9.5	0.06

*TI-20 through TI-23 have a very low voltage coefficient and inductance will change very little with voltage. Because of high frequency application, the maximum voltage is limited rather by breakdown than by saturation.

FREED TRANSFORMER CO., INC.

MAGNETIC AMPLIFIERS AND SATURABLE TRANSFORMERS

The ever increasing demand for reliability, ruggedness, miniaturization and high performance has made the magnetic amplifier an indispensable component of many military and industrial automatic control and servo systems. Recent advances in materials and techniques permit an even greater utilization of the well-known inherent advantages of magnetic amplifiers such as direct operation from line voltage, no warm-up time, long-life components, ease of signal mixing and hermetic sealing.

Freed Transformer Co. manufactures an extensive line of magnetic amplifiers, ranging from saturable transformers to half-wave type, fast-response servo amplifiers. Choice of catalog amplifiers assures standardization, lowest possible cost and rapid delivery.

All standard units are designed for continuous operation and will operate in an ambient temperature range of -55°C to $+75^{\circ}\text{C}$.

In addition to standard items, Freed Transformer Co. has extensive facilities for the design and production of special amplifiers, saturable reactors and magnetic components.

ALL ITEMS LISTED ARE AVAILABLE FROM STOCK.

FAST RESPONSE MAGNETIC AMPLIFIERS

The MAF Type of fast response magnetic amplifier combines high power gain, ruggedness and reliability with a maximum 2 cycle response. All MAF units are phase-reversible.

TRANSISTOR CONVERTERS

THE FREED LINE OF DC TO AC AND DC TO DC TRANSISTOR CONVERTERS PROVIDE A HIGH EFFICIENCY VOLTAGE CONVERSION FROM BATTERY SOURCES TO AN AC LINE VOLTAGE OR HIGH DC VOLTAGE WITHOUT THE USE OF MOVING PARTS.

Freed Transformer Co. maintains a stock line of reliable, highly efficient static DC to DC and DC to AC converters. DC to DC converters in hermetically sealed cans. RF filters included inside case.

The MAC Line of Static DC to AC Converters provide a highly efficient voltage conversion from battery sources to AC voltage without the use of moving parts.

The output voltage and/or frequency is directly proportional to source voltage variation.

Special regulators can be supplied to compensate for this variation.

• RUGGED, QUIET, MAINTENANCE FREE, LONG LIFE OPERATION.

• HIGH POWER TO WEIGHT RATIO, ARC-FREE OPERATION.

UNREGULATED TDC STOCK UNITS

Type No.	NOM. V in	V out	MAX 1 out MA	Case Size	Type No.	NOM. V in	V out	MAX 1 out MA	Case Size

TELEMETERING COMPONENTS

A complete line of Band Pass Filters, Low Pass Filters and Discriminators is available for multi-channel telemetering applications. These components cover the frequency range from 400 cps to 70,000 cps. The filters feature exceptional phase linearity, excellent selectivity characteristics and plug-in construction. The Discriminators, either fixed or slug tuned, have exceptional linearity, high amplification, and utmost stability.

TELEMETERING BAND PASS FILTERS

Hermetically sealed to MIL-T-27A and MIL-F-18327

These filters cover the frequencies from 400 c.p.s. to 70,000 c.p.s. of center frequency B.P.F. have a band width of $\pm 1\%$ of center frequency and 45 DB (minimum) points at $\pm 1\%$ of center frequency of higher or lower adjacent channels. Wide frequency B.P.F. have a band width of $\pm 15\%$ of center frequency and 50 D.B. points at $\pm 15\%$ of center frequencies of higher or lower second adjacent channels.

FREED FILTERS

To MIL-T-27A and MIL-F-18327

Freed Standard Filters are Hermetically Sealed Miniature and Sub-Miniature high performance components designed for both production and laboratory applications in the Communications and Electronic industry. In order to achieve attenuation requirements not obtainable with one single filter, one can combine several standard filters of different transmission characteristics. Wide Band Pass characteristics are obtainable by combining low and high Pass Units. The astatic construction of inductive components together with special shielding reduces the hum pick-up of the standard filters.

The standard filters are available in Low Pass, High Pass and Band Pass Filters.

Low Pass Filters: The attenuation characteristics of Low Pass Filters are 6db or less at cut-off frequency, 35db or more at 1.5 cut-off frequency and 40db or more at 2 cut-off frequency.

ILP Interstage Low Pass Filter. Characteristic Impedance 10,000 ohms, in and out.

LLP Line Low Pass Filter. Characteristic Impedance 500 to 600 Ω , in and out.

High Pass Filters: The attenuation characteristics of High Pass Filters are 6db or less at cut-off frequency, 35db and 40db or more at 0.67 and 0.5 cut-off frequency.

IHP Interstage High Pass Filter. Characteristic Impedance 10,000 ohms, in and out.

LHP Line High Pass Filter. Characteristic Impedance 500 to 600 Ω , in and out.

Band Pass Filters: The attenuation characteristics of Band Pass Filters are 2db or less at plus or minus 3% of center frequency 40db or more at 0.5 and 2 center frequency.

IBP Interstage Band Pass Filter. Nominal input impedance—10,000 ohms. Nominal output impedance 5 megohms or grid of vacuum tube. Effective voltage step-up 2:1. (Output voltage to source voltage.)

LBP Line Band Pass Filter. Nominal input impedance 500 to 600 ohms. Nominal output impedance 5 megohms or grid of vacuum tube. Effective voltage step-up 9:1. (Output voltage to source voltage.)

SERIES 1950 NULL "T" FILTERS

The Freed Series 1950 Null T networks consist of two resistance capacitance networks, whose outputs completely cancel each other at the balance frequency. They may be used as rejection networks particularly at low frequencies where LC filters become excessively large and unstable.

Standard models are available for 30, 60 and 120 cycles in a wide range of impedances. Each network will give a minimum of 50 db attenuation at the null frequency.

The null frequency is adjusted to a tolerance of $\pm 2\%$.

All Null T Filters are hermetically sealed.

Prices on request.

Catalog No.	Frequency
NTF- 30	30 cps
NTF- 60	60 cps
NTF-120	120 cps

FREED TRANSFORMER CO., INC.

TELEGRAPH TONE CHANNEL FILTERS

HERMETICALLY SEALED TO MIL-T-27A AND MIL-F-18327 SPECIFICATIONS

Freed Band Pass Filters are extensively used in multiplex frequency shift transmitting and receiving. Stock filters cover all narrow and wide band channels. All units are built with a standard octal socket.

FBT Transmitting Filters are built for a 600 ohm in and out characteristic impedance. Filter configuration allows paralleling of channel outputs. 10db adjacent channel crossover attenuation.

FBR Receiving Filters are designed for a characteristic impedance of 600 ohms in and out. Filter configuration permits paralleling of channel inputs. 20db adjacent channel crossover attenuation.

ULTRASONICS

New developments and applications of ultrasonics for industrial cleaning, soldering, welding, and mixing have created a demand for generators and components specifically designed for ultrasonic applications.

Using the latest developments in the field of special magnetic materials the FREED ultrasonic transformers are designed for greatest efficiency and maximum reliability. They feature small size excellent performance and long life under continuous duty operation.

Transformers with an extended frequency range (frequencies up to 2 MC) can be supplied upon request.

FREED TRANSFORMER CO., INC.

SECTION 5600

COMMERCIAL GRADE COMPONENTS

These components are designed to meet the demand for low-cost replacement parts for commercial electronic equipment. The best commercially available materials have been utilized in the design of these units, to insure reliability and excellent performance characteristics. Vacuum penetration with a non-pyrosopic varnish to prevent penetration of humidity are employed to give these units long life and trouble-free performance. 230-115 V, 50-60 C.P.S. Stepdown Transformers rated from 25 V A up to 5,000 V A Rating and line booster transformers are included in this series. All units, with only a few exceptions, are uncased or of shell-type construction. Isolation transformers and Stepdown transformers are equipped with line cord and receptacle.

FILAMENT TRANSFORMERS

All primaries are for 115V, 50/60 c.p.s.

Catalog No.	Secondary Voltage	Secondary Current Amps	Secondary Test Voltage RMS	Case Size
TF 1	2.5 (C.T.)	7.5	1500	CH60
TF 2	2.5 (C.T.)	10	1500	CH70
TF 3	2.5 (C.T.)	5	7500	DC2B
TF 4	2.5 (C.T.)	10	1500	DC4A
TF 5	5.0 (C.T.)	4	1500	CH60

TF 17	10 (C.T.)	5	2500	FV10
TF 18	10 (C.T.)	12		
TF 19	11 (C.T.) (tapped primary)	11	7500	DC-SC
TF 19	12.6 (C.T.)	2	1500	CH62

TF 3, 4, 10 & 18 supplied with terminals. All others with leads.

AUTO TRANSFORMERS

To be used as step-down transformer. Equipped with standard receptacle and line cord.

Catalog No.	Transformation	VA Rating	Weight (lbs.)	Case Size

SDY 15*	230/115 V, 50/60 c.p.s.	5000	72	HB-920

*Supplied with leads without line cord and receptacle.

LINE BOOSTER TRANSFORMERS

Operates from 90 to 110 volts input to provide 10% step-up.

Catalog Number	Primary Voltage	Secondary Voltage	VA Rating	Case Size
LB-1	90-110	1.1 x input	350	VS-300
LB-2	90-110	1.1 x input	2000	VS-611

ISOLATION TRANSFORMERS

Autotransformer shield between primary and secondary. Equipped with standard receptacle and line cord.

Catalog Number	Primary Voltage 50/60 c.p.s.	Secondary Voltage	VA Rating	Case Size
IT 1	115	115	50	VS-501
IT 2	115	115	100	VS-700
IT 3	115	115	500	VS-714
IT 4	220/440	110/220	250	VS-612
IT 5*	220/440	110/220	500	VS-714

*Supplied with leads without line cords and receptacle.

PRICES

All prices listed in The MASTER are subject to change without notice — they should not be considered final.

Get quick-on-the-spot quotations from your distributor who subscribes to the up-to-the-minute

UNITED PRICING REPORTS

The Perpetual Pricing System for
Radio-Television-Electronic Parts and Equipment

- Over 750 manufacturers
- Over 400,000 catalog numbers tabulated with current prices
- Revised pages mailed semi-weekly: insert new pages—discard old pages
- Compression type loose-leaf binder for rapid replacement of revised pages
- Weekly summary sheet—Ups, Downs, Additions, Deletions

DELIVERY

Delivery is often dependent on availability of raw materials. Check with your distributor for delivery information at the time you place your order.

VARIABLE TRANSFORMERS

Typical volt-pac variable transformers. On the left is a manual, three-phase, 240-volt, 10-amp unit; second from the left is a motor-operated, single-phase, 120-volt, 15-amp unit; third from the left is a cased, manual, single-phase, 120/240-volt, 4-amp unit; and on the right is a manual, single-phase, 120 volt, 20-amp unit. All are for 50/60-cycle operation.

STANDARD RATINGS

Single-core construction: 120 or 240 volts, 2 to 65 amp

Multiple-core construction: 120, 240, or 480 volts; up to 390 amp

Single-phase, three-phase; 50/60 cycles

AVAILABLE DESIGNS

Manual: for variable output from stable input voltage

Plug-in: for laboratory or shop source of adjustable a-c voltage

Motor-operated: for variable output from stable input voltage

Automatic: for closely regulated output from varying input voltage

DOLLAR SAVINGS...

19 Basic Single-core Ratings, Wider Selection

LONGER LIFE...

30-100% Greater Overload Capability

SPACE SAVINGS...

Up to 33% Greater Over-all Capacity in Same Physical Size

Manual, single-phase, cased — terminals enclosed

Plug-in unit, 120-volt, 7.5-amp. Available with NEMA standard 2- or 3-blade plug and receptacle

Single-phase automatic unit rated 115 volts, 8.5 amp

NEW EXCLUSIVE FEATURES

The volt-pac design incorporates many important new features which provide new levels of performance for users. Significant among these are the heat-sink ring, quick-transfer current collector, and grain-oriented solid-carbon brush. These three exclusive features help increase the load capacity of present core sizes as much as 33 percent. The ability to pack more capacity in less volume is of vital importance in many applications where space is very limited.

- ① Brush design, with solid-carbon brush, eliminates carbon-to-metal soldering, keeps brush temperature down by lowering resistance to load currents
- ② Quick transfer current collector increases performance and reliability by eliminating hidden contact surfaces and providing a direct low-resistance path for load current
- ③ New unique heat-sink ring located beneath the gold-plated brush track quickly dissipates heat from the hot spot

When Overvoltage Connection is used, rated current should not be exceeded. Output kva for Overvoltage Connection is maximum output voltage times actual current.

When using extended tap connections, operation is for 60 cycles per second only.

Output at Overvoltage Connection is 0-132 volts.

§ When operated on lower input voltage tap, rated current must be reduced when output voltage exceeds 140 percent of input voltage.

† For Line-voltage Connection only — No Overvoltage Connection provided.

■ For 240-volt input, 0-240-volt output, application only.

• For 480-volt input, 0-480-volt output, application only.

MICRO-MINIATURE AUDIO AND TRANSISTOR TRANSFORMERS — MM AND MMT SERIES

MM-M (Fig. E): Molded, for plug-in printed circuit applications. Cast epoxy resin for high resistance to extremes of ambient temperature. MIL Type TFRX — ZZ (Insert MIL No. from table). Size $\frac{7}{8}'' \times \frac{3}{4}'' \times \frac{1}{2}''$ with $\frac{3}{16}''$ pins, $.020''$ dia. Weight, $\frac{1}{2}$ oz. MM-H (Fig. F): Hermetically sealed with high compression glass terminals. Gray enamel

finish. MIL Type TFRX — YY. Size, $\frac{1}{4}''$ dia. $\times \frac{1}{4}''$. Weight, $\frac{3}{4}$ oz. MM-FB (Fig. G): Open frame with channel on special order. MIL Type TFRX — ZZ. Size, $\frac{1}{4}'' \times \frac{1}{4}'' \times \frac{1}{4}''$, plus tabs. MM-CM (Fig. H): Contour molded on special order only, size $\frac{7}{8}'' \times \frac{1}{4}'' \times \frac{1}{2}''$. Designed for chassis mounting with solder terminals on top of transformer.

MINIATURE TRANSISTOR AND AUDIO TRANSFORMERS—MT AND M SERIES

M-M (Fig. C): Molded, for plug-in printed circuit use. Cast epoxy resin provides highest resistance to temperature extremes. MIL Type TF5RX—ZZ (Insert MIL No. from table). Max. Size, 1 $\frac{1}{2}$ " x $\frac{1}{2}$ " x $\frac{1}{2}$ ". Weight, 1 $\frac{1}{2}$ oz. M-AAG (Fig. D): Enclosed in modified MIL-T-27 BG case with compression sealed ceramic terminals. MIL Type TF4RX—YY. Max. Size, 1" x 1" x 1 $\frac{1}{2}$ ". Weight, 2 $\frac{1}{2}$ oz. M-H (Fig. E): Hermetically sealed with high compression glass terminals, gray enamel finish. Available on special order with .120" holes. MIL Type TF4RX—YY. Size 1 $\frac{1}{2}$ " dia. x 1 $\frac{1}{2}$ " max. Weight, 1 $\frac{1}{2}$ oz. M-A (Fig. F): Aluminum case with 2-56 screws. MIL Type TF6RX—ZZ. Size, .875" dia. x 1 $\frac{1}{2}$ ". Weight, 1.25 oz. M-FB (Fig. G): Open frame with channel. Available

with plug-in tab channel or without channel on special order. MIL Type TF6RX—ZZ. Size, 1 $\frac{1}{2}$ " x 1 $\frac{1}{2}$ " x $\frac{1}{2}$ " max., plus tabs. Weight, 1.13 oz. M-P (Fig. H): Octal plug-in type in sealed plastic housing. MIL Type TF6RX—ZZ. Size, 1 $\frac{1}{2}$ " x 1 $\frac{1}{2}$ " x $\frac{1}{2}$ ". Weight, 2 oz. M-A-Sh Shield: 25 db magnetic shield to match Type M-A. Two clearance holes on 1 $\frac{1}{4}$ " centers. M-PC (Fig. J) Open Frame printed circuit with terminals molded into bobbin to maintain accurate dimensions for printed circuit board, weight 1.2 oz. Size 1 $\frac{1}{2}$ " x 1 $\frac{1}{2}$ " x 1 $\frac{1}{2}$ ". Terminals 1 $\frac{1}{2}$ " below bobbin. MIL Type TF6RX—ZZ. M-CH (Fig. I) Contour molded, not stocked on special order only. Size 1 $\frac{1}{2}$ " x 1 $\frac{1}{2}$ " x $\frac{1}{2}$ ". \$12.50 setup charge.

Miniaturized Transformers

LOW LEVEL CHOPPER INPUT TRANSFORMERS

Efficiently transfers 30—500 cps. Transducer or thermocouple signals to instrument amplifiers. Resin impregnated to minimize mechanical vibration noise signal. Three mu-metal and two copper shields insure low hum pickup. Accurate center taps and external electrostatic shield connection improve low level operation. Signal level range: 0.5 μ v to 0.5 v. 90 db magnetic shielding. Size, 1 3/8" dia. x 1 1/2" h. with two 6-32 3/4" mtg. studs on 1 1/2" centers. Weight, 4.5 oz.

PLUG-IN TRANSFORMERS (FIG. B)

Broadcast fidelity type, double mu-metal shielded. Octal base, except M8032 and M8033, 9-pin.

M8030 is designed as a replacement for Ampex No. 1733-1; M8032 and M8033 mate with sockets on many RCA amplifiers. Frequency Response: $\pm$ 2 db, 20-20K. (M8031, $\pm$ 2 db, 30-20K.) Magnetic shielding, 90 db. Level, $\pm$ 5 dbm.

MODEL 400K TRANSISTOR TRANSFORMER SELECTOR KIT (FIG. C)

IDEAL FOR BREADBOARD CIRCUITRY • FULL DESIGN DATA
Set of nine transistor transformers covers impedance range of 150 ohms to 200K ohms, matching most new transistor impedance ratings. Sizes range from a 3/8" cube to 3/4" x 3/4" x 1". All units vacuum resin impregnated for long, reliable life and for protection against rough handling. Each type has 4 color-coded leads. Includes full design data, nomographs and circuitry for determining correct impedances for Class A and B transistor amplifiers; power versus dbm chart; terminal connection sheet; guide to MIL-T-27B; cross reference index; line drawings for later selection of stock items with same electrical ratings in many other mechanical constructions. Individually boxed in transparent plastic case. Model 400K Transistor Transformer Selector Kit Net Each \$29.50*

*Standard quantity discounts do not apply.

MICROTRAN TRANSFORMERS ARE AVAILABLE IN MANY OTHER MECHANICAL AND ELECTRICAL TYPES ON SPECIAL ORDER. WRITE FOR COMPLETE INFORMATION.

Separate Sampling Department for quick delivery. Immediate service assured by large stocks of high temperature insulation and other specialized materials. IN-PLANT TESTING assures full compliance with military requirements and often saves weeks on contract completion. Units can be supplied to meet MIL-T-27B, MIL-T-9219, CAA-R-9786, MIL-E-5400, MIL-E-16400, MIL-E-4159, MIL-E-8189A, MCREE-553, MIL-T-21200, MIL-Q-9858.

DIRECTRON

Industrial Transformers, Selenium and Silicon Rectifiers, Chokes and Power Supplies

RECTIFIER TRANSFORMERS

Transformers are with 2 — 18 volt center-tapped windings. Connected in series delivers 36 volts as rated. Connected in parallel — delivers 18 volts at twice rated current. (Taps 9, 18, 27, 36 V.)

Primary taps at 100, 105, 110 and 115 volts available on 12 amp, 24 amp, 30 amp and 50 amp transformers. No extra charge.

12 amp. Transformer 18T12

* 10 watts

Data sheets for all types on request.

frequency range on most of these units is contained within 100 to 100 mc band except for the 1702 and 1901 which cover 20 kc to 8 mc. Data sheets with individual curves are available upon request.

North Hills wideband transformers have been designed for low insertion loss (less than 1 db) and good matching characteristics over wide frequency ranges. Balanced windings feature extremely low unbalanced voltages and have a center tap. Complete specifications are available upon request.

Several case styles are offered. Series AA models are potted in metal cases with a terminal board on the bottom and two 6-32 spade mounting bolts. Series BA are hermetically sealed with glass terminals at the case ends and two 4-40 studs on the bottom for mounting. Series BB is similar to BA except that the unbalanced connection is provided by a BNC connector. The above three styles are rated at 2 watts and the GA and the FA package are rated at 1/2 watt. Both GA and FA packages are hermetically sealed. Note that the types AA, BA and BB feature lower cut-off frequency than that of type GA and FA because of the larger core dimensions.

TYPICAL CHARACTERISTICS (0501)*

V.S.W.R. OF 50 ~ INPUT

INSERTION LOSS

*Data sheets for all types on request.

Custom units designed to your specifications include power wideband transformers, pulse transformers, filters and adjustable inductors. See Radio Masters for standard line of inductors.

See Section 4000 for Precision AC and DC Power Sources in current edition of eem.

See Section 2900 for Bridges, Potentiometers, Galvanometers, etc. in current edition of eem.

See Variable Inductors in Section 1800 of current edition of Radio-Electronic Master.

variable transformers • tantalum capacitors
semiconductor diodes • r.f. chokes

"V.T." VARIABLE TRANSFORMERS

NEW!

roidal core type autotransformers providing distortion-free minimum adjustable voltage from fixed AC input. Highly advanced Ohmite design. Sizeable bonus in current available at all units where output greater than line volts ("overvolt" is not required ("N" suffix); "LN" suffix indicates input (40V max.) and high current output; positive current transfer achieved with direct brush to slip spring unit. Mounting: VT2 panel mounting by 3/32 bushing; VT2

tandem units by 1/4-20 bolts; all VT4 and VT8 types panel or table mounting by 1/4-20 bolts; VT20, VT20B, panel or table mounting by four 3/4" dia. bolts or three 3/4-24 bolts. Shafts of VT4, VT8, VT20 units slide to brass or base side. Units not cast except where indicated; over-all dimensions shown in chart. Suffixes "-2" and "-3" indicate number of units in tandem assembly (shipped with connection instructions).

MODULATION TRANSFORMERS — THE "FIVE" SERIES

SNC universal modulation transformers are specifically designed to provide maximum application possibilities per type. All units are provided with two identical secondary windings, permitting series or parallel operation. Changes in the ratio can be readily accomplished, when desired, without removing the unit from the chassis. Most units available in either air cooled or compound filled cases.

NOTE

Basic mounting types are classified as "A," "B," "C," "D," "E," "F," "G," "H," "J," and "K."

Explanation of Suffix Symbols
L = Leads
T = Lugs
P = Cord and Plug
SP = Switch, Cord and Plug

POWER TRANSFORMERS — THE "EIGHT" SERIES

All units conservatively rated for operation on either 50 or 60 cycles and contain an electrostatic shield between primary and all other windings.

NOTE

Basic mounting types are classified as "A," "B," "C," "D," "E," "F," "G," "H," "J," and Bx.

Explanation of Suffix Symbols
 L = Leads
 T = Lugs
 P = Cord and Plug
 SP = Switch, Cord and Plug

PLATE TRANSFORMERS — THE "SEVEN" SERIES

All SNC plate transformers have dual secondary ratings. Most units available in either air cooled or compound filled cases. All units electrostatic shields between primary and high voltage windings. 50/60 Cycle Operation

Type Number	Primary Voltage	Pri. V.A.	Secondary R.M.S. Voltage	D.C. Voltage From Filter*	D.C. Current	Mtg. Style	Dimensions					Net Wt.	Net Price

*All units may be operated with simultaneous loads—provided the total D.C. Current of the two loads does not exceed the rating listed.

FILAMENT TRANSFORMERS — THE "FOUR" SERIES

Most SNC Filament Transformers are constructed to provide two identical center tapped secondary windings and offer a minimum of three applications. They provide three-fold the number of possible applications of ordinary filament types. A few are single secondary units and are so designed. All have 117 V. 50/60 cycle primary.

S N C MANUFACTURING CO., INC., OSHKOSH, WISCONSIN

*AUTOMATIC, INSTANTANEOUS VOLTAGE
REGULATION FOR A WIDE VARIETY
OF ELECTRIC AND ELECTRONIC DEVICES*

Constant-voltage Sola transformers provide a stabilized output voltage even though the input voltage varies over a considerable range. Their applications are numerous and varied. CV's are especially ideal for high-accuracy requirements such as in computers and data-processing equipment.

Another advantage in CV transformers is their ability to prolong the life of electronic components by eliminating injurious over- and under-voltages. The Sola transformer's current-limiting factor protects semiconductors and other components from excessive inrush and fault currents.

Sola Sinusoidal Type (CVS) *LESS THAN 3% HARMONIC CONTENT*

Letter following a catalog number designates units which may be converted to cord input and receptacle output. See Adapter Kit table on page 3.

Outline dimensions are the overall outside dimensions of the unit, not including separate capacitor where employed. Dimensions are subject to manufacturing tolerances of $\pm 1/32$ to $\pm 1/8$ inch.

For more information on the SOLATRON Voltage Regulator, see page 1066 in Sec. 4000.

SECTION 5600

Electronic-Power Types

 $\pm 1\%$ REGULATION FOR FILAMENT TYPE, $\pm 3\%$ FOR PLATE-FILAMENT TYPE

The electronic-power type of Sola transformer is designed as a component for simple assembly into many kinds of electronic equipment. The filament type (CVF) provides 6.0 or 6.3 volts of output regulated within $\pm 1\%$ over line variations of $\pm 15\%$; the combination plate-and-filament type (CVE) regulates within $\pm 3\%$.

for filament service (Type CVF)

*Voltage values are taken at output of 5Y3GT rectifier for No. 7104 and No. 7106 transformers and at output of 5U4GA-GB for No. 7107. Guaranteed regulation of $\pm 3\%$ on plate voltage output is contingent

on the use of Sola-regulated 5.0v filament supply winding for the rectifier tube.

*Mechanical Structures

"STRUCTURE CODE" LETTER REFERS TO ONE OF THESE GENERAL TYPES OF MECHANICAL ASSEMBLIES:

D — Drawn case, integral capacitor unit, flex leads.

S — Hermetically-sealed case, separate capacitor, solder lugs.

E — Exposed core, end bells; separate capacitor, flex leads.

W — Exposed core; end housings, screw-type terminals in outlet box.

Y — Same as W, but duplex assembly.

Z — Same as W, but triplex assembly.

Cord/Receptacle Adapter Kits

Adapter kits may be used when the convenience of input plug and output receptacle is preferred to the standard arrangement of terminals in the transformer housing. See accompanying chart.

Code	Adapter Kit Catalog No.	Input Cord	Output-Connections	Net price each to industrial users
(a)	999-004	2-wire	2-wire receptacle	\$1.75
	999-018	3-wire	3-wire receptacle	2.50
(b)	999-005	2-wire	2-wire receptacle	1.75
	999-019	3-wire	3-wire receptacle	2.50
(c)	999-009	2-wire	2-wire receptacle	2.00
	999-020	3-wire	3-wire receptacle	2.50

The transformers described in this folder are manufactured under one or more of the following United States Patents: Nos. 2,694,177; 2,753,513; 2,806,199, and patents pending.

For more information on the SOLATRON Voltage Regulator, see page 1066 in Sec. 4000.

All-New From Sola!

112 REGULATED OUTPUT VOLTAGES IN ONE OFF-THE-SHELF UNIT!

Sola's Multi-Tap constant voltage transformer is so completely new that it gives your electronics lab, prototype shop, service or repair department the boon of real voltage versatility — all in one new package. It is the equivalent of having 112 different special-output constant-voltage transformers immediately available — and at less cost. One unit covers the entire output range.

Typical AC & DC Output Voltages

SPECIFICATIONS: Input range for all units: 105-125 volts.

NEW compact 1-kva SOLATRON VOLTAGE REGULATOR (static-magnetic principle)

The new 1-kva Solatron is designed for use as an OEM component, or for applications where size and weight are critical factors. One-fourth the size, one-third the weight of previous Solatron models — yet it provides closer regulation and lower harmonic distortion.

The new compact Solatron is available in three separate versions: external mounting, rack-panel mounting, and open core-and-coil for component installation. A wide range of styles ranging from .5 kva upwards are available in these three styles, in controlling fluctuation ranges of $\pm 10\%$, $\pm 20\%$ and $+10\%$, -20% . For complete information on the compact Solatron regulator, please write for bulletin No. VR-200.

MOST COMPLETE LINE IN THE INDUSTRY

HIGH CURRENT TRANSFORMERS & CHOKES

SERIES CONNECTED SECONDARIES

PARALLEL CONNECTED SECONDARIES

ALL ITEMS AVAILABLE IMMEDIATELY FROM STOCK

The line is designed conservatively for a max of 50° C rise above ambient, for use on 115V power line from 50-500 cps. Only prime raw materials are used. Units are thoroughly impregnated and baked with Signal's own high gloss black baking varnish. The transformers and chokes are rugged in construction, well-insulated, and have a consistently uniform appearance. All ratings are at full load current continuous operation.

Electrical ratings have been chosen to cover a wide range of applications. All transformers have two center-tapped secondary windings. This is indicated on the schematic diagram below.

It is possible to make connections for many different voltage and current combinations. A number of possible applications are illustrated in the diagrams to the left. It should be noted that Part No. 38-1 is used in these specific examples. Since the user can choose from a line having 12, 8, 24, 36, 56, 68, 80, 160 or 230 volt output with current ratings from 1/2 to 100 amperes, it is apparent that an almost limitless number of combinations can be selected.

If you should have any questions regarding these or any of the possible combinations which may occur to you, our engineering staff will be pleased to furnish prompt answers.

METHOD OF DETERMINING SECONDARY CURRENT RATING

Since our transformers may be used in many possible configurations, the current shown is rms secondary winding current. Secondary current ratings are rms ac values, NOT dc values. When selecting the "Secondary amp" rating, the conversion chart at the right should be used.

HIGH CURRENT CHOKES

Signal's line of High Current Chokes is designed to complement the selection of rectifier transformers, that a set may be specified for power supplies using choke input filters.

Inductance ratings are minimum guaranteed at full rated dc current. Resistances are maximum values.

Special variations or intermediate values of inductance, current, or resistance can be supplied promptly and accurately.

At higher power loads (above 2-3 KVA) it becomes inefficient to use single phase 115 or 230 volt standard lines. With this in mind, our engineering staff has developed a line of 3 phase transformers for use off 208 or 220V 3 phase power lines. These offer the significantly higher

conversion efficiency and lighter power line drain of 3 phase systems.

Since the principal application of these items is in high power dc power supplies, output ratings are given in dc voltage and current assuming the use of a 3 phase full wave rectifier.

BROOKLYN, NEW YORK

INDUSTRIAL GRADE STEP-UP OR STEP-DOWN POWER ISOLATION OR AUTO-TRANSFORMERS

HIGH DEGREE OF VERSATILITY OFFERS MANY POSSIBLE VOLTAGE RATINGS

AVAILABLE FROM STOCK FOR IMMEDIATE SHIPMENT

The "DU" and "UP" lines are designed for a maximum of 55°C rise above ambient, for use on standard power lines from 50 to 500 Cps. Only prime raw materials are used. Units are thoroughly impregnated and baked with Signal's own high gloss black baking varnish. The transformers are rugged in construction, well-insulated, and have a consistently uniform appearance. All ratings are at full load current, continuous operation.

Heavy ¼ inch phenolic terminal boards are provided with plated brass screws and flat washers. Connections can be easily made with a nut driver. It is also simple to alter the inter-connections to change transformer ratings.

"DU SERIES" 110/220 Dual Primary To 110/220 Dual Sec.

As shown on the schematic diagram the "DU" line is designed with dual primaries and secondaries. All four windings are identically rated at 0/104/110/120 volts. This permits series or parallel connections on either primary or secondary. Therefore, a nominal 110 to 110 volt, 220 to 220 volt, 110 to 220 volt, or 220 to 110 volt transformer can be set up. The winding taps permit intermediate series ratings such as

208, 214, or 230 volts.

It is also possible to make auto-transformer connections by connecting a primary group in series with a secondary group. Such nominal ratings as 440 to 220 volts or 220 to 440 volts can be set-up, in addition to the standard ratings described above. A further advantage to auto-transformer connection is the fact that the KVA rating of a particular type is doubled.

"UP SERIES" 110/220 Dual Primary To 0/130/135/140 V. Sec.

The "UP" line utilizes the same dual primary as the "DU" line. It has, however, a single secondary rated at 0/130/135/140 volts.

This type is quite useful to boost low line

voltages or raise line voltages to compensate for drops in series elements. It also finds application in bridge rectifiers for DC voltage outputs of approximately 115 to 130 volts.

SIGNALS CUSTOM SERVICE

Many of our customers do not realize that the major portion of our shipments consists of "special" or "custom" items.

Usually, the final application of one of our stock transformers does not require the full number of taps or windings provided. These naturally are part of the cost of the item. If

we are advised as to the specific taps used or as to what intermediate voltage or current is required we can begin production quickly on this variation of our stock item. If we define production quantities as roughly over 25 pieces, the customer will do better price-wise on his custom made item than on the standard.

SPRAGUE

PULSE TRANSFORMERS AND DECADE INDUCTORS

TYPE 850W PRECISION DECADE INDUCTORS

- Indispensable For Design and Experimental Work on Audio Filters, Equalizers, and Tuned Circuits. Frequency Range is 150 to 20,000 Cycles per Second
- Excellent Stability With Respect to Current and Ambient Temperature Changes

- All Four Decade Inductors May Be Connected in Series to Provide 11,110 Steps of Inductance
- Housed in Blue Aluminum Case with Sloping Front to Facilitate Bench-Top Readings. Measures 3" Wide, 2 1/2" High, 5 1/2" Long. Fitted with Five-way Binding Posts.

Cat. No.	Inductance Steps	Optimum Freq. Range in cps	Average Q Factor		Max. Milliamperes		Net Each

850WA4	10 x 1.0H	400 to 5,000	60	125	8	22	31.90

- For Complete Technical Data, Refer to Latest Issue of Engineering Bulletin 90,500.

TYPE 31Z 'PANCAKE' PULSE TRANSFORMERS

- Miniature Units with Transformer Section Embedded in Epoxy Resin Inside a Pre-molded Outer Shell.
- "Pancake" Design is Excellent for Mounting on Printed Wiring Boards as Well as On Conventional Chassis.
- For Complete Technical Data, Refer to Latest Issue of Engineering Bulletin 40,230.

- 31Z382 Is Recommended for Pulse Voltages up to 200 Volts at Average Power Rating of 1.0 Watt. Maximum Suggested Volt-microsecond Product is 1200.
- 31Z204 and 31Z286 Are Recommended for Pulse Voltages up to 100 Volts at Average Power Rating of 0.5 Watt. Maximum Suggested Volt-microsecond Product is 340.

PULSE TRANSFORMER ASSORTMENT No. 100Z41

- A Special Selection of Pulse Transformers for Low-Power High-speed Computer Circuitry
- Covers a Wide Range of Turns Ratios and Primary Inductance Combinations
- Ideal for Experimental Circuit Design on Transistorized or Electron Tube Circuits.
- Transformer Cores and Windings are Potted in Pre-Molded Epoxy Cases for Mechanical and Moisture Protection
- Can Be Mounted Flush on Printed Wiring Boards or Used in Conventional Point-to-Point Wiring
- For Complete Technical Data on Assortment 100Z41, Refer to Latest Issue of Engineering Bulletin 40,002.
- Packed in Clear, Hinged-Lid Reusable Plastic Case

Cat. No. 100Z41 Net, \$65.00

Industries widest selection of adjustable variable auto-transformers designed to deliver variable output voltages with high efficiency, reliability and minimum maintenance. Ratings from .165 to 265 KVA. Bench and panel mounting. Manual or motor driven. Single or ganged assemblies. Military designs, specials, 36 volt types. All Adjust-A-Volts feature zero wave form distortion with high voltage resolution, and regulation with conservative ratings. Design features rugged mechanical construction and precious metal-plated commutators.

Brush design provides smooth flow of input current and voltage and ease of brush replacement which is seldom required. All Adjust-A-Volts operate on 50/60 cycle current except certain SQ models which are 60 cycle*. Operation is permissible at 50% of rated power output. Bench models are housed in grey wrinkle painted die-cast aluminum cases equipped with pilot light, switch, line cord, and an output receptacle. Write for complete catalog.

† Split and balanced windings.

MS (MILITARY STANDARD) TRANSFORMERS

Housed in one-piece steel cases, dimensions for case and mountings within tolerances of MS specifications. All units meet requirements of Grade 4, MIL-T-27A for Class R operation. All secondary AC voltages, $\pm 3\%$. Maximum operating altitude, 10,000 feet.

SILICON RECTIFIER POWER TRANSFORMERS

COMMERCIAL GRADE

Combination plate and filament power transformers bridge the gap between low voltage, high current output for use with transistor power amplifiers and the lower range of plate voltages used with electronic tubes. Two 6.3 v. filament windings, on each unit supply heater power for tubes or low voltage DC for many applications when used with suitable rectifier. Mtg. type C. Size: 4 1/2" x 3 1/2" x 4 1/2".

STANCOR ELECTRONICS, INC.

MIL-T-27A Transformers, 400 Cycle

400-CYCLE TRANSFORMERS, MILITARY STANDARD CASES

POWER TRANSFORMERS—MOUNTING TYPE H

Designed and built in accordance with MIL-T-27A specifications, Grade 4, Class S, for high temperature operation at 85° C ambient, 45° C rise. Life expectancy, 10,000 hours; maximum operating altitude, 70,000 feet.

All Primaries 105/115/125 Volts, 380-1000 Cycles.

Transistor Transformers

MIL-T-27A PRINTED CIRCUIT "POLYCHROMATRANS"

Printed circuit board transistor transformers. Test volts, 500 rms. Color-coded by application. Up to 50% reduction in distortion over other brands. Improved lower-end frequency response. Leads are fatigue resistant nickel-iron alloy, .020" dia., .363" long, gold-plated to MIL-G-45204, Class I. Size: .405" w. x .305" d. x .460" h.

Power, Bias & CRT Transformers

SPECIAL POWER TRANSFORMERS

POWER TRANSFORMERS AND FILTER REACTORS

Three types of construction are available: Hermetically sealed, semi-sealed, and compound sealed. All units have high grade magnet wire coils wound on non-aging, silicon steel cores. Core and coil are vacuum-impregnated with varnish and baked at high temperatures to achieve a vibration-proof unit. Housed in seamless, drawn-steel cases and sealed with a special moisture-resistant compound. Hermetically sealed units, H-Type meet the rigid standards of Grade 4, MIL-T-27A specifications for Class R operation. One-piece steel covers are bonded by deep-seal soldering. Semi-sealed units, S-Type have steel base covers fitted with phenolic terminal boards, numbered solder lugs. Compound-sealed units, C-type, have fiber-board covers and 10" color-coded leads.

F-SERIES FILAMENT TRANSFORMERS

Units with secondaries rated for less than 6 amps have solder-lead terminals; those with secondaries rated at more than 6 amps have screw-type terminals. Numbers F-210, F-210H and F-520HB are for high voltage rectifier supply. All primaries: 115/230 v. AC, 50/60 cps.

STANCOR ELECTRONICS, INC.

CHICAGO STANCOR

Filter Reactors; Isolation, Line Adjusting Transformers

FILTER REACTORS

Units have high grade magnet wire coils wound on non-aging, silicon steel cores, housed in seamless, drawn steel cases and sealed with special moisture-resistant compound. Hermetically sealed units, H-Type meet the rigid standards of Grade 4; MIL-T-27A specifications for Class R operation. One-piece steel covers are bonded by deep-seal soldering. Semi-sealed units, S-Type, have steel base covers fitted with phenolic terminal boards, numbered solder lugs. Compound sealed units, C-Type have fiber board covers and 10° color-coded leads.

POWERGRAD VOLTAGE STABILIZERS—60 Cps. Single Phase, AC—Mounting Type CV

Automatically provide stable output voltages ($\pm 1\%$) for input voltage variations of $\pm 15\%$. No moving parts and compact, shock resistant construction insure maintenance-free operation. Regulation occurs within 25 milli-seconds or $1\frac{1}{2}$ cycles. Safeguard and improve the operation, efficiency and life of equipment being regulated. Completely integrated construction except* units below have separate capacitors.

NO MORE HUNTING THROUGH PILES OF LITERATURE OR SMALL CATALOGS

1728 pages illustrate and describe every product you'll ever need for buying, specifying, designing, servicing, kit building, experimenting — anything that you do in the field of electronics. And, it's all in one big catalog. No need to look through piles of literature or go from small catalog to small catalog. The MASTER has more information on each product and contains more products than any other electronic catalog. The MASTER answers these questions:

*What product best fills my needs?
What does it look like?
How does it compare?
Who makes it?
What does it cost?*

the 1965 MASTER helps engineers, servicemen, buyers, hobbyists

Saves "shopping" time — no looking from catalog to catalog, no wading through piles of literature for the product you want. It's all in The MASTER.

Aids in selecting the right product to do the job best — comparison of specs, features, prices of many makes of similar type products is simplified. All similar products in same product section.

Leads to extra service income — in addition to radio-TV products, The MASTER describes in detail thousands of products for profitable hi-fi, sound and industrial servicing.

Includes new items indispensable in servicing — new sub-miniature and printed circuit components, new color TV and hi-fi test instruments.

Increases profits for service technicians — buy and sell direct from The MASTER. It contains prices.

Guides radio amateurs — select the best equipment to get the most out of your hobby, shows latest SSB, mobile and CB gear.

Spells better kit building for experimenters — it contains thousands of useful items not contained in smaller, incomplete catalogs.

8 Short-cuts delivery time — products shown in The MASTER are available from local distributors — just a phone call away.

9 Saves design time — the product you are looking for is illustrated and completely described with specifications and prices.

10 Saves buying time — truly an electronics supermarket, so great a variety, so detailed, you can purchase directly from its pages.

11 Cuts production costs — the widest selection helps you locate standard items that meet your requirements. Eliminates need to order a custom item.

12 Keeps production lines moving — get that much needed product that's holding up production, from your local distributor's stock.

13 Eliminates errors in buying — The MASTER makes an excellent common reference when you are ordering from distributors by phone or mail.

14 Makes it easy to find the product you want immediately — 32 product sections thoroughly indexed makes the world's biggest electronic catalog also the easiest to use.

TRANSFORMERS — LARGE, SMALL, ENCAPSULATED, MOLDED, HERMETICALLY SEALED, AND OPEN — ALL WIDELY ACCEPTED AS FIRST QUALITY AND SURE PERFORMANCE. WE INTRODUCE SOME OF THE SPECIAL STERLING TRANSFORMERS ALONG WITH APPLICATIONS WHERE THEY HAVE PROVEN THEMSELVES SUPERIOR.

1. Transistor Power Module Transformer. Ideal for use in computers where precision and long component life are necessary for optimum performance.
2. Miniature Molded Transformer. Small in size, light in weight, suitable for gyro applications.
3. Encapsulated Transformer. Precision constructed for use in high quality commercial and industrial electronic equipment and systems.
4. Three Phase Multi-Output Transformer. Capable of exceptionally long life in the rugged operation conditions of ground support and ground test equipment.

5. Commercial "End Bell" Transformer. Widely accepted Sterling 2K series for application in regulated power supplies.
6. Space Saving Molded Transformer for printed circuit board plug-in application. Provides the necessary power and longevity needed to operate precise computer circuits.
7. Encapsulated Transformer for Military Applications. Heavy duty, high voltage, three phase, multi-output autotransformer for use in radar tracking stations.
8. Commercial Channel-Mount Transformer. Useful in industrial applications such as boiler control operation, commercial receivers, and entertainment consoles.

9. High voltage Dip Encapsulated Low Capacitance Filament Transformer. For special test equipment. Provides constant voltage output for precision operation of specialized test equipment.
10. Commercial Open Frame Transformer. Sturdy, high power unit for use in spot welding and induction heating equipment.
11. Lightweight Miniature Military Transformer. Ruggedly constructed to withstand shock and handling encountered in mobile communication systems.

STERLING TRANSFORMER CORP.

BROOKLYN 11, N. Y.

DENSE-PAK miniature transformers DP SERIES

(manufactured to MIL T 27A)

On this page are listed units designed for the extremes in miniaturization. The 4 inch #28 color coded leads (DP-F type) supplied, are suitable for dip soldering in printed circuits. The M type use rugged terminals (.032 dia.) which assure easy plug-in and positive location. Finished in polished epoxy case.

Thorough baking and resin impregnation assure reliable life. Insulating materials used are compatible for later epoxy potting of complete assemblies. Highest efficiency — space factor obtained by use of high permeability Nickel-Alloy Cores, Nylon Bobbins, Formvar Wire. Available from stock.

NANOSPEC 900 SERIES

Designed for printed circuit transistor use in high component density applications. Nickel alloy leads on 0.1 inch centers and stepped mounting face to insure ease of installation. Epoxy resin encapsulated.

TRANSISTOR POWER MODULE TRANSFORMERS—7K SERIES

PRIMARY 115V, 50/60 CYCLES (Tapped for dual secondary voltages) The chart below shows the secondary voltages available and the approximate DC voltages which result in typical silicon rectifier circuits (at MIL currents shown). Primary taps can modify nom. AC voltages by -6%, +6%, and +12%. Since the capacitor following the rectifier affects the DC voltage, values used (in 1000 mfd) are shown, in parenthesis (), after each current rating.
*Nom. AC and DC volts are at 115 volt input... primary taps can modify -6%, +6%, and +12%. 50/60 CPS

PRIMARY 115V, 50/60 CYCLES (tapped on 7K10 thru 7K13 for dual secondary voltages). DC ratings are approximate, based on silicon bridge rectifier (except 7K8, 7K9, also shown F.W.C.T.). Choke input DCV is based on 10% voltage drop in choke. Condenser value, C, is in 1000 mfd. 7K8, 7K9, 7K14 listing under "Secs in parallel" is single winding.

POWER

FOR MINIMUM SIZE & MINIMUM WEIGHT
• CONTOUR MOLDED
• HIPERSIL CORES

Built to pass MIL-T-27A specifications, including Grade 2 humidity tests, and to operate continuously at 150° C.

Result: Savings up to 50% in space and weight without sacrifice in performance.

NOTES

- All Primaries 115 Volts 50/60 Cps
- Ratings Based On Capacitor Input Output of Supply.
- Dielectric Test Voltages: Primaries: 1500 V. RMS All Secondaries: 2500 V. RMS

- ONE UNIT PROVIDES PLATE AND FILAMENT POWER FOR ENTIRE SUPPLY.
- RATINGS BASED ON D.C. OUTPUT OF SUPPLY.
- APPLICATION BULLETIN WITH EACH UNIT.

hi-Q toroidal inductors

MANUFACTURED TO MIL-T-27A. ALL HERMETICALLY SEALED UNITS (STYLE H) ARE MIL TYPE TF4RX20YY

■ ALL MOLDED UNITS STYLE M ARE MIL TYPE TF5RX20ZZ

■ ALSO TOROIDAL INDUCTORS IN OTHER SIZES AND VALUES AVAILABLE ON SPECIAL ORDER.

■ MOLYBDENUM PERMALLOY POWDER CORES USED IN ALL UNITS.

STYLE F

■ ALL INDUCTORS SHOWN AVAILABLE IN OPEN STYLE F.

QA SERIES

FREQUENCY TO 20KC-ACCURACY $\pm 1\%$

The QA series is designed to optimize small size and high "Q" for miniaturized applications. These units are available on special order with stabilized cores and inductance from 1MH to 4.0H.

AVAILABLE ON SPECIAL ORDER
HERMETICALLY SEALED

Part No.	Inductance	Approx. DCR Ohms	Approx. Distributed Capacity PF	Style F	Style M
QA-1	5MH	2.5	30	4.35	5.70
QA-2	10	5	33	4.35	5.70
QA-3	15	8	34	4.50	5.85
QA-4	20	11.2	36	4.60	6.00
QA-5	30	17	37	4.65	6.15

QA-11	500	290	48	5.40	7.20
QA-12	1.00H	530	51	6.15	7.95
QA-13	1.50	825	53	6.30	8.70

MOLDED STYLE M

Encapsulated in Epoxy Resin. Pigtail leads for printed circuit applications.

QB SERIES

FREQUENCY TO 20KC-ACCURACY $\pm 1\%$

The QB series is designed for airborne applications where stable high "Q" is needed with minimized size and weight. Available on special order with stabilized cores and inductance to 7.0H.

Part No.	Inductance	Approx. DCR Ohms	Approx. Distributed Capacity PF	Style F	Style H	Style M
QB-1	5MH	1.1	38	3.90	6.75	5.25
QB-2	10	2.1	40	3.90	6.75	5.25
QB-3	15	3.3	42	3.90	6.75	5.40
QB-4	20	3.7	43	3.95	6.85	5.50
QB-5	30	5.8	45	4.00	7.00	5.55
QB-6	50	11	47	4.05	7.20	5.65
QB-7	100	22	49	4.20	7.65	5.70
QB-8	150	34	50	4.35	7.80	5.85
QB-9	200	47	52	4.55	8.15	6.05
QB-10	300	60	53	4.65	8.40	6.15
QB-11	500	95	55	4.80	8.55	6.30
QB-12	1.00H	213	57	5.10	9.00	6.75
QB-13	1.50	335	59	5.85	9.45	7.35

MOLDED STYLE M

Encapsulated in Epoxy Resin. Silver plated turret lugs.

HERMETIC STYLE H

Hermetically sealed in metal case. Teflon terminals assure permanent seal at temperature extremes.

hi-Q toroidal inductors

QC SERIES

FREQUENCY TO 10KC
ACCURACY $\pm 1\%$

The QC series is designed for high "Q", increased power level & stability. Available on special order with stabilized cores and inductance to 20H.

Part No.	Inductance	Approx. DCR Ohms	Approx. Distributed Capacity PF	Style F	Style H	Style M
QC-1	5MH	0.62	60	4.35	7.05	6.15

QC-18	10.00	1175	112	7.50	12.45	9.60

MOLDED STYLE M
Encapsulated in Epoxy Resin. Silver plated turret lugs.

HERMETIC STYLE H
Hermetically sealed in metal case. Teflon terminals assure permanent seal at temperature extremes.

QD SERIES

FREQUENCY TO 10KC-ACCURACY $\pm 1\%$

The QD series is designed for very high "Q" in the audio band allowing for application in sharp frequency filters with high power levels and low losses. They are excellent for tuned transformers and oscillators. Available on special order with stabilized cores and inductance to 50H.

Part No.	Inductance	Approx. DCR Ohms	Approx. Distributed Capacity PF	Style F	Style H	Style M
QD-1	20MH	1.0	97	7.05	10.50	8.70
QD-2	30	1.5	100	7.05	10.50	8.70

QD-18	25.00	1500	150	13.05	17.55	15.45

MOLDED STYLE M
Encapsulated in Epoxy Resin. Silver plated turret lugs.

HERMETIC STYLE H
Hermetically sealed in metal case. Teflon terminals assure permanent seal at temperature extremes.

QE SERIES

FREQUENCY TO 15KC
ACCURACY $\pm 1\%$

The QE series is most widely used in low audio frequency applications where high "Q" is essential. They are used where inductance stability over a wide voltage range is required. Available on special order with inductance to 75H.

Part No.	Inductance	Approx. DCR Ohms	Approx. Distributed Capacity PF	Style F	Style H	Style M
QE-1	25MH	0.85	127	10.80	13.50	12.60

MOLDED STYLE M
Encapsulated in Epoxy Resin. Silver plated turret lugs.

HERMETIC STYLE H
Hermetically sealed in metal case. Teflon terminals assure permanent seal at temperature extremes.

STANDARD INTERSTAGE AND LINE TRANSISTOR AND TUBE APPLICATIONS

filters

Hermetically Sealed — Manufactured to MIL-F-18327B Available in Other Frequencies

LOW PASS

INTERSTAGE

LI units have a loss of approximately 3 db at cutoff frequency, and an attenuation of 35 db at 1.5 cutoff frequency. Input and output 10,000 ohms. LI units are MIL type FR4RX11YY.

Part No.	Frequency	Case Size	Net Price
LI-60	60 cps	A	31.50
LI-100	100 cps	A	31.50
LI-200	200 cps	B	31.50
LI-400	400 cps	B	31.50
LI-500	500 cps	B	31.50
LI-800	800 cps	B	31.50
LI-1,000	1,000 cps	B	31.50
LI-1,500	1,500 cps	B	31.50
LI-2,000	2,000 cps	B	31.50
LI-2,500	2,500 cps	B	31.50
LI-3,000	3,000 cps	B	31.50
LI-4,000	4,000 cps	B	31.50
LI-5,000	5,000 cps	B	31.50
LI-10,000	10,000 cps	B	31.50

LINE

LL units have a loss of approximately 3 db at cutoff frequency, and an attenuation of 35 db at 1.5 cutoff frequency. Input and output 500/600 ohms. LL units are MIL type FR4RX11YY.

Part No.	Frequency	Case Size	Net Price
LL-600	600 cps	A	31.50
LL-1,000	1,000 cps	A	31.50
LL-1,500	1,500 cps	A	31.50
LL-2,000	2,000 cps	A	31.50
LL-2,500	2,500 cps	A	31.50
LL-4,000	4,000 cps	A	31.50
LL-8,000	8,000 cps	A	31.50
LL-10,000	10,000 cps	A	31.50
LL-12,000	12,000 cps	A	31.50

HIGH PASS

INTERSTAGE

HI units have a loss of less than 6 db at cutoff frequency, and an attenuation of 35 db at .67 cutoff frequency. Input and output 10,000 ohms. HI units are MIL type FR4RX33YY.

Part No.	Frequency	Case Size	Net Price
HI-100	100 cps	A	31.50
HI-200	200 cps	A	31.50
HI-300	300 cps	A	31.50
HI-400	400 cps	A	31.50
HI-500	500 cps	A	31.50
HI-800	800 cps	A	31.50
HI-1,000	1,000 cps	A	31.50
HI-2,000	2,000 cps	A	31.50
HI-3,000	3,000 cps	A	31.50

LINE

HL units have a loss of less than 6 db at cutoff frequency, and an attenuation of 35 db at .67 cutoff frequency. Input and output 500/600 ohms. HL units are MIL type FR4RX33YY.

Part No.	Frequency	Case Size	Net Price
HL-200	200 cps	A	39.00
HL-300	300 cps	A	39.00
HL-500	500 cps	A	39.00
HL-1,000	1,000 cps	A	39.00

FOR WIDE BAND PASS FILTERS
THE LI & HI OR LL & HL MAY BE
CONNECTED IN SERIES.

BAND PASS

INTERSTAGE

BI units have 2:1 voltage gain. They are sharply peaked, having approximately 2 db attenuation at plus or minus 3% from center frequency and attenuation greater than 40 db at 1/2 and twice center frequency. Input 10,000 ohms, output to grid. BI units are MIL type FR4RX22YY.

Part No.	Frequency	Case Size	Net Price
BI-50	50 cps	A	30.00
BI-60	60 cps	A	30.00
BI-100	100 cps	A	30.00
BI-120	120 cps	B	30.00
BI-200	200 cps	B	30.00

POWERSTAT® Variable Transformers

- ZERO WAVEFORM DISTORTION ● RUGGED CONSTRUCTION ● GOLD-ALLOY PLATED COMMUTATORS

Deliver continuously-adjustable voltage from a-c power lines. All manually-operated types listed in charts except 10B, EN116-EN216 and EN117-EN217 Series are also available with motor-drives if desired. Motor-driven speeds are 5, 15, 30 or 60 seconds for full range travel except types suffixed 4P, 4PS, 4D, 5P, 6P, 6PS, 6D and 6Y which do not offer the 5 second speed. 117-217, 126-226 and 136B-236B types are also available with 2- or 3-wire cord-plug sets. 1156D-1256D Series types are available in ratings up to 244 KVA.

FOOTNOTES

- *Rating if mounted on a metal panel. When mounted on a bracket or nonmetallic panel, derate to 1.75 amperes with corresponding reduction in maximum KVA.
†Rating if mounted on a metal panel. When mounted on a bracket or nonmetallic panel, derate to 2.5 amperes with corresponding reduction in maximum KVA.
‡Also available with open construction for back-of-panel mounting (suffix U when ordering). Prefix Q if square frame is desired instead of round frame on open construction (U) types.
§Also available with metered knobs. Add prefix V when ordering.

*Requires also one paralleling choke type T5000.

**126-226, 136B-236B and LW136B Series also available with open construction for back-panel mounting (suffix U when ordering).

††LW136B Series ratings are for use as low voltage isolated output transformer. Also permits connection for use as limited range transformer or as a line corrector. Full connections and ratings on request.

§§1156D-1256D Series types also have terminals for limiting output voltage to line voltage.

†‡Also available with metered knobs. Add prefix Y when ordering.

METERED KNOB TYPES

POWERSTATS of the V116-V216, V117-V217, V126-V226 and V136B-V236B Series have an accurate voltmeter integral with the knob. They have the same ratings and mounting dimensions as single types with enclosed construction (with and without cord-plugs) in the 116-216, 117-217, 126-226 and 136B-236B Series listed in the charts. Voltmeter is insensitive to stray magnetic fields. Conversion kits also available to modify currently cataloged types not having metered knobs.

TYPE MSC33

POWERSTAT® DC MOTOR SPEED CONTROLLERS

Provide continuously adjustable speed control of d-c shunt-wound or series motors from a-c power lines. Full rated torque available at any speed. Instant start, stop and reverse; dynamic braking in "stop" position. Type MSC16 designed for motors up to 1/2 hp and type MSC33 for motors up to 1/2 hp. Rated for 120 volt, 60 cycle single phase input. NEMA frame 56, 1725 rpm, d-c motors in 3/4 and 1 1/2 hp also available.

COMPLETE LITERATURE
on all standard
and special use POWERSTATS
is available on request.
Specify whether 50/60 cycle,
400/800 cycle or complete file is desired.

POWERSTAT® Variable Transformers

40-VOLT SERIES

Meet high current, low voltage requirements of low voltage power supplies and a wide range of transistor circuit applications. Manually-operated and motor-driven single, 2- and 3-gang single phase types available.

TYPE 10B-40

TYPE 21-40

TYPE 116U-40

LINE CORRECTORS

Used to correct line voltage variations to maintain a constant output voltage or to supply a limited range of output voltage from a stable a-c source. Manually operated and motor-driven types available.

TYPE LC2106C

TYPE 5MLC2115C

OIL-COOLED AND EXPLOSION-PROOF

Oil-cooled POWERSTATS substantially increase ratings above equivalent air-cooled types and provide a measure of safety; Explosion-proof POWERSTATS are Underwriters' Laboratories Approved for Class 1, Group D service. Both types are manually operated only.

OIL-COOLED
TYPE 0-116EXPLOSION-PROOF
TYPE X-116

High Frequency POWERSTATS

TYPE 5-1011

TYPE 1HMD07CK1

TYPE AM1HMS07U

Standard types designed to meet applicable military specifications are available: manually operated and motor-driven types for 28, 120, 240 and 480 volt, 400/800 cycle single and three phase operation in ratings from 56 VA to 8.7 KVA; manually operated types for 115 volt, 400/800 cycle single phase service with outputs of 0-28 volts, 2.5, 5 or 8 amperes and 0-5 volts, 6 or 12 amperes; manually operated types for 400/1600 cycle service as limited range variable transformers, low voltage output variable transformers or line correctors.

OTHER TYPES AVAILABLE ON SPECIAL ORDER

FLEXIFORMER® Packaged Transformer Primary

This "do-it-yourself" transformer is essentially a self-contained toroidal primary coil encased in durable high impact plastic. Colored SUPERIOR 5-WAY Binding Posts for connections are integrally mounted. When used as a source of a-c voltage, the center opening permits hand-threading the correct number of secondary winding turns to obtain the desired output voltage. When used as a current transformer, the FLEXIFORMER winding is shunted by an ammeter which indicates the current flow in a conductor hand-threaded through the center opening.

THE SUPERIOR ELECTRIC COMPANY
Bristol, Connecticut, U.S.A.

SEE OTHER SUPERIOR ELECTRIC PRODUCT PAGES IN SECTIONS 2100, 3500 AND 4000

STABILTEMP Proportioning Temperature Coupler

TYPE PTC5

Automatically maintains voltage required to keep electric furnaces and ovens at correct temperature when incorporated into control systems using most commercially available current proportioning temperature

controllers. Designed for use with cataloged motor-driven POWERSTAT Variable Transformers rated for 120 or 240 volt, 50/60 cycle single phase service. For three phase operation, the unit can be used to monitor one line-to-neutral or one line-to-line voltage depending on POWERSTAT used. To maintain the desired temperature a STABILTEMP type PTC5 is designed for 5 milliamperes maximum command signal; shunting resistors must be provided by user for 20 or 50 milliamperes command signals.

SOLIDSTAT®

Variable Voltage Controls

Solid-state, semiconductor type variable a-c voltage controls for all loads from unity power factor to zero power factor lagging inductive load. Can be controlled by small indicating potentiometer, current feedback sensing or voltage sensing circuits. For 60 cycle service.

TYPE CSR106

INPUT		OUTPUT			TYPE	APPROXIMATE NET WEIGHT (POUNDS)

480	60	0-470	100	48.0	CSR448	38

*208 and 277 volt types available on special order.

VOLTBOX® A-C Power Supply

TYPE UC1M

Compact versatile instrument containing all the necessary components for tests involving a-c voltage: POWERSTAT Variable Transformer, direct reading voltmeter, three output receptacles; two SUPERIOR 5-WAY Binding Posts, "on-off" switch, line-load meter switches, fuse and 6-foot cord-plug. Designed for 50/60 cycle service. Type UC1M ratings are 120 volt input and 0-140 volt, 7.5 ampere, 1.0 KVA output; type UC2M ratings are 240 volt input and 0-280 volt, 3 ampere, 0.84 KVA output. Other types available on special order.

STABILINE® Full Range Regulator Controller

TYPE FR500MP

Designed for use with motor-driven POWERSTAT Variable Transformers to maintain constant output voltage, adjustable to any value within the full range of the POWERSTAT used. Can regulate output voltage from any motor-driven POWERSTAT rated for 120 or 240 volt, 50/60 cycle single phase duty. Depending on the POWERSTAT used, the unit may be used for three phase applications to maintain one line-to-neutral or one line-to-line voltage. It can also be used in 480 volt, 50/60 cycle, three phase applications but an auxiliary step-down transformer is required when sensing line-to-line voltage. Output voltage will remain within a 2 volt band when used with 120 volt POWERSTATS and within a 4 volt band when used with 240 volt types. Has 0-300 volt-meter mounted on front panel to monitor POWERSTAT output voltage.

EXEL Loading Reactor

TYPE LR2

Designed to provide a convenient inductive load which can be made adjustable when used with a POWERSTAT Variable Transformer. Used primarily for testing apparatus at various lagging power factor loads, i.e. to simulate an inductive load. Ratings: 120 volts, 60 cycles; 2.0 amperes at 120 volts; inductive reactance 60 ohms; d-c resistance 4.0 ohms; inductance 0.16 henrys. At 60 cycles, the EXEL has essentially a linear current curve from 0 to nominal 2.0 amperes for continuous duty and up to 3.0 amperes for intermittent duty.

FULL WAVE BRIDGE	1.0	1.0	1.8
FULL WAVE C.T.	.7	.7	1.1

This series of high current transformers and chokes are most widely used for high power rectifier and high current A.C. applications. It is one of the industries most popular items. All types are designed for a nominal temperature rise of 45°C at full load and will easily withstand unusual overloads. The regulation is extremely low, varying from 5% on the smallest unit to 1% on the largest. All units have name plates and wiring diagrams for installation ease, future reference and permanent identification.

Five constructional types are available for maximum flexibility for use in either the laboratory or production. HORIZONTAL BRACKET MOUNT (STYLE B) is an "open" unit, double vacuum varnish impregnated to insure long life and give maximum protection against humidity.

EPOXY UNITS (STYLE BE) are electrically and mechanically identical to style B and are vacuum encapsulated to withstand environmental conditions per MIL-T-27B, Grade 5, Class S.

SHELL ENCLOSED (STYLE V) offers excellent mechanical protection to the coil. This is in addition to functional appearance and the ease of "wiring with leads." Double vacuum varnish impregnation further assures adequate moisture protection and long life.

CAN ENCLOSED (STYLE C) units are ruggedly constructed and embedded in a rigid potting compound to insure maximum heat transfer. Professional Todd finish enhances any chassis.

HERMETICALLY SEALED (STYLE CM) units are manufactured to MIL-T-27B, Grade S to withstand the most rigorous environmental conditions.

Printed Circuit - Open Frame-Transistor

INCLUDES: (A) INPUT, (I) INTERSTAGE, (D) DRIVER, (S) OUTPUT TO LINE, (C) OUTPUT.

This new line of printed circuit transformers has been developed to fill the gap between the wire-in units and the molded-print circuit type transistor transformers. The tag numbers on the schematic to the right corresponds to the tag numbers on the P.C.T. & P.C.T.-C. tag numbers will have tag 72 in the tag number.

Miniature Audio Inductors

OPEN FRAME AND ENCASED

Similar in operation to the military units above these units are ideally suited for coupling inductors, filters or audio suppressor applications in either transistor or tube type circuitry.

Miniature Transformers

INCLUDES: (A) INPUT, (I) INTERSTAGE, (S) OUTPUT, (C) REACTOR, (L) LINE TO LINE.

The most complete line of top efficiency miniature transformers ever made available. These Miniature transformers are designed for a wide range of civilian and government applications. Used by many manufacturers of hearing aids and a variety of miniature electronic devices where maximum efficiency is necessary. Ideally suited for installation in original equipment and for replacement.

Miniature Transistor Converters

INCLUDES: (A) INPUT, (I) INTERSTATE, (D) DRIVER, (M) MIXING OR MATCHING, (P) HAS PULSE APPLICATION, (S) OUTPUT.

Designed and built to meet MIL-T-27B Grade 4, Class C specifications. Ruggedly constructed, these units have exceptional reliability along with the highest reliability for their size. They can be used for different impedances than specified, the impedance ratio being constant. Usable frequency range is 100 cycles to 20,000 cycles. The dimensions shown in the RAY-6 drawing are optimum.

Blocking Oscillator-Converters

Designed specifically for use in single transistor blocking oscillator circuits. The DC output voltage of TR 464 is rated for a quiescent amplifier circuit and may vary from these ratings due to bias and component values. All other DC voltage ratings are with 1/2 wave single capacitor input filter.

Output INC

Designed and built to meet all the requirements of MIL-T-278 specifications for their specified

class of operation. Listed in order of the primary impedance—this complete list of transformer models available under one listing a wide variety of high quality oil-filled transformers for both indoor and outdoor use.

Dual Winding - Chokes and Inductors

Designed and built to meet MIL-M-27B specifications. These units provide the maximum inductance at the given current ratings in a minimum size. All AJ, JA, GA, etc. case sizes are identical to MIL-M-27B specifications.

1 Maximum MADC Inductance rating for 0 MADC. # Inductance tolerance $\pm 2\%$. * Inductance tolerance $\pm 2\%$.

Aligner Inductors-Variable

These Aligner Inductors are ideally suited for hard to align or frequently changed circuits such as low frequency oscillators, antenna, low frequency tuned amplifiers, filters and delay lines. The high frequency and temperature stability built into these units make them most applicable to mid-radio tuned frequency circuits.

Provided in a wide range of inductance values, these units require only a single screw driver adjustment to achieve the exact inductance required for the circuit. Less than three turns of the aligner screw are necessary to move the internal plates through its complete range.

Internal construction of the AL-1 is similar to the AL-1 and AL-2 but have an all aligner screw on the side of the case.

Filament-Multiple Secondary

These transformers have been designed and built to meet all requirements of MIL-T-278 for their specific class of operation. All E, GA, GB, etc. case sizes are identical to MIL-T-278 specifications.

Power PRIMARY 105/115/125 VOLTS 380-1,000 CYCLES

These transformers have been designed to meet all requirements of MIL-T-278 for their specific class of operation. All EB, CA, GB, etc. case sizes are identical to MIL-T-278 specifications. These units meet the rigid requirements for aircraft and mobile communication, control equipment, ballistic and guided missile control, marine equipment, as well as any field where maximum useful quality is a prime requirement.

* Secondary windings may be used independently to supply two isolated 115 Volt windings at 2.9 amps each.
 † Static Shielded

Multi Shielded-Line Isolation

50/60 CYCLES

These Multi-shielded line isolation transformers have been specifically designed for critical circuitry where minimum coupling capacity is imperative and battery-type isolation is desired. 2V747, 2V748, 2V749 are vacuum potted with epoxy resin in standard MIL-T-27 case and have less than .03 MAFD capacity coupling between windings. Other units in YY cases have coupling capacities of less than .1 MAFD. 2V743 is for 400 cycle operation only.

Line Isolation Transformers

380 TO 1,500 CYCLES

These units have been designed and built to MIL-T-27B, Grade 4, Class 8 specifications. Applicable to communications, lighting, and equipment systems requiring isolation. All units are static shielded.

† May be used for Full Wave Bridge or Full Wave Center tap applications

1 100 VA output for industrial applications

‡ Multi-shielded; Less than .1 MAFD coupling between windings.

Step Down Transformers

THREE PHASE - 400 CYCLES

These transformers are designed primarily for airborne communication and control equipment. 2V717 and 2V718 are YY connected 400 cycle, three-phase, Primary - 115 volts per phase. 2V790 is delta-delta connected, Primary - 200 volts per phase.

Part No.	MIL-T-27B Classification	Primary Voltage	Secondary Voltage	VA Output	Case Size	Wt. Lbs.

Band Pass Filters
These units have been designed and built to meet MIL-F-18327B for their specific class of operation and are high performance units applicable to production or laboratory communications and electronic equipment. They have been carefully adjusted to the specified frequencies with proper input and output impedances. Output impedances indicated on "To Grid" should be terminated in an open grid circuit. Tapped outputs - marked (*) - provide for either 10,000 ohm resistor termination or high impedance grid termination.

Telemetering Band Pass Filters										
These units have been designed and built to meet MIL-F-18327B for their specific class of operation. The Seal Jacket Filters in YF cases are designed with 4 pin plug-in type terminals and the Molded (ZZ) units have straight wire terminals. Twenty-three separate choices are provided with a choice of either Molded or Seal Jacket case types.

MIL-T-27B Low Frequency High Q Inductors

These Inductors have been designed and built to meet the requirements of MIL-T-27B for their specific class of operation. Constructed with only the highest grade materials these units have magnetic shielding as well as handwinding construction. Designed to a Q of 40 or more on frequencies ranging from 60 to 300 cycles. Split winding termination permits series, parallel or series center tap connections, such as might be used in filters, tuned circuits or coupling inductors.

Pulse Transformers DESIGNED AND BUILT TO MEET MIL-T-21036B

When used as coupling transformer this group of units have the following additional parameters: Overload range from 5 to 30 micro-seconds with the lower overload at the higher pulse widths. Output voltages 15 to 25 volts may be expected with a normal drop of 10 to 15 %. Blocking oscillator overloads are held to less than 2%.

Pulse Transformers DESIGNED AND BUILT TO MEET MIL-T-21038B

Additional parameters for these transformer type pulse transformers are: 0% overloads in almost all of these units. Output voltage of approximately 8 volts may be expected with no drop on units below 2 micro-second pulse width and approximately 15% drop on units above .5 micro-second pulse width. The average blocking will be 20-30% when connected in the transformer blocking oscillator circuits.

1

MADC rating for choke input filter. For Capacitor input filter MADC rating by 1.30

2

Refer to the Silicon Rectifier type and the end of this section for complete voltage and circuit details

3

MADC rating for bridge rectifier circuits. Deduct secondary current 10% for 50 cycle operation

4

The ratings listed here are for industrial applications. For MIL-STD-883C refer to the operation section of this catalog

5

Pr. 220 Volts 50/60 Cycles

6

Pr. 115-220 Volts 50/60 Cycles

18

Pr. 113 Volts 50/60 Cycles

1 MADC rating for choke input filter. For capacitor input filter divide MADC rating by 1.30

4 The ratings listed here are for industrial applications. For MIL-T-278 rating refer to the green section of this catalog

5 Prio. 230/115V 50/60 Cycles 6 Prio. 115/125/15V 54/64 Cycles 8 Primary 115/220 Volts 50/60 Cycles

9 Prio. 115/112/15 Volts 380/1000 Cycles

11 Primary 107/117 Volts 50/60 Cycles

12 500 MA Rating is for use in doubler circuits

13 Exact replacement for Solar Model CF-10 Condens. Tester. Use original mounting brackets

16 Exact replacement for Hewlett Model OP-1 Scope. To replace complete power transformer use 21768 and 24879

17 Highly shielded scope transformer

18 Primary 115 V. @ 400 Cycles

19 Voltage Doubler Application

20 Primary 110 V. @ 60 Cycles

21 Ratings for Full Wave Bridge Choke input application.

22 Unit also has Antennae ports at 15V @ 10 MA, 10V. @ 250 MA, 10V. @ 230 MA, 15V @ 10 MA

23 Bridge Application

24 Primary 110/112/115/117/120 V. @ 60 Cycles

25 Secondary tap 65 V. @ 5 MADC (A) Half-Wave (N) Half-Wave (S) Half-Wave

26 Primary 111/123 @ 50/60 Cycles (A) Primary 120/120/120/150/150 @ 60 Cycles

Low Voltage Rectifier Transformers 50/60 Cycles

[illegible]

SILENIUM OR SILICON RECTIFIERS

PRIMARY 117 VOLT 50/60 CYCLES

Multi-Tapped-Low Voltage Rectifier

Each Selenium Rectifier Transformer listed in this section has terminal numbering and winding arrangement as shown in schematic. Primary connections are made to terminals 1, 2, 3, 4, 5, 6, and 7. The winding connected to terminals 5, 6 and 7 is separate, isolated primary winding, designed for the purpose of extending the voltage range of the transformer. This is accomplished by connecting the winding in series adding or in phase bucking with terminals 2, 3, 4, 5, 6 and 7. Two identical secondary windings are connected to terminals 8 and 9 and to 10 and 11. Complete connection data supplied with each unit.

Part No.	Rectifier Circuit	Secondary AC Volts (Approx.)	OUTPUT*		Rat. or Ind. DC Volts	Capacitive DC Volts	Recom-mended Capacitor	Mfg. Centers

1. Unshielded - epoxy potted with leads

2. Complete with tap switch

1. Split winding

2. Has octagon outlet box for house wiring connections

Autotransformers

These Autotransformers provide a smaller and more economical method of changing from 115 to 220 or 220 to 115 Volts.

They provide correct line voltages for machine tool control units such as sequence timers, solenoids and lighting systems.

COMPLETE WITH TAP SWITCH TO COVER 95 TO 145 V. RANGE

Line Voltage Regulators-Autotransformers-With Meter

These Line Voltage Regulators provide the correct voltage to resist, TV Sets, air conditioners, refrigerators, deep freezers, auto, mobile washers and many other appliances, even with variation in line voltage of 60-75-95-100-110-120 or 145 volts. They are also useful in shoring the 115 volt line above and below the line voltage. An output receptacle and volt meter are internally connected to the 115 volt tap. All units are supplied with 6 ft. line cord and plug. All units have GATV Type Mounting with Meters.

Dry Type - Distribution

INDOOR - SINGLE PHASE - DOUBLE WOUND - 50/60 CYCLES 2-4 MOUNTING.

DRY TYPE GENERAL PURPOSE TRANSFORMERS are supplied in either double winding isolation or single winding auto-transformer types for 50/60 CPS applications. Either type may be used single phase or connected in a group of three for three phase.

All units are Class B insulation for 80°C rise except the units marked (1) Class A for 55°C rise.

CASE AND JUNCTION BOX. A stamped steel case encloses the entire coil assembly and prevents an attractive appearance. The junction box is an integral part of the case and provides easy access and wiring to the individually metered primary and secondary leads. Knock outs are provided on the junction box for attaching conduit or bushings.

WIRING DIAGRAMS AND INSTRUCTIONS are furnished with each unit. On the inside of the junction box cover, a detail shows the schematic diagram and ratings of each transformer.

1. To provide 120 Volt Lighting or 120/240 Volt Power from 240-480-600 Volt distribution circuit.

2. To isolate or isolate lighting circuits from power circuits allowing the use of grounded or ungrounded circuits independent of power or other lighting circuit ground.

3. The auto-transformers provide a smaller and more economical method of voltage changing. These auto-transformers may be used to obtain 120 Volts from a three phase line, to establish a neutral ground from a 240 Volt circuit, or to balance the 120/240 Volt loading on a 240 phase line to obtain lower demand billing by the utility company.

Case A

Case A

Triad J Series offers flexibility enabling your amplifiers to exceed broadcast standards. Although economy in construction has cut costs, these transformers approach and closely approximate performance characteristics found in more costly hermetically sealed parts. Single hole mounting provides for rotation for maximum reduction of hum... alloy shielding gives you 40-60 db hum reduction (60-80 db in Types A-11J & A-12J)... you can obtain wide frequency ranges... flexible leads facilitate ease in mounting... input units are electrostatically and magnetically shielded... light weight and encased in Triad's satin smooth baked gray enamel cases, 1 3/8" diameter, 1 3/4" above chassis... legible circuit diagrams are permanently affixed to every case.

* Less than 100 m.m.f.d. capacity to ground and insulated for high voltage damper tube.

Height of transformers in BC cases is measured from chassis line to top of case. Copper shading ring on all BC cases to reduce external magnetic field.

Note: Last letter of Type No. denotes case style.

AUDIO

Triad Replacement Output Transformers furnish a wide range of size and mounting characteristics... specifically engineered for mounting in precise location in chassis. Climatite treated... manufactured to exacting quality standards of more costly types... progressively designed for advanced circuitry and audio tubes... total complete coverage over impedance and wattage ranges... Triad units provide finest response in minimum space... and outlive all others.

CHOPPER INPUT TRANSFORMERS

Triad Chopper Input Transformers provide exceedingly close balance between the two halves of the primary winding . . . minimum noise in microvolt ranges of input signals is assured with Triad's special core treatment techniques. For demanding transistor and tube applications, Triad's special design capabilities have an outstanding record. For special applications, consult Triad.

Sub-miniature Encapsulated TOROIDAL INDUCTORS

Triad sub-miniature toroidal inductors, designed for quick, easy printed-circuit board mounting, are now stocked for immediate delivery in a range of standard ratings from 50 micro-henries to 500 milli-henries. Many uses, especially in airborne telemetering applications incorporating Triad's sub-miniature filters FL-384 through FL-388. Case size of units is $\frac{1}{8}$ inch diameter by $\frac{1}{4}$ inch high. Providing an optimum combination of high Q and extremely small-size, this series is ideal for printed board, transistor or vacuum tube application.

Triad sub-miniature inductors are toroidally wound on permalloy powdered cores. Encapsulated in high temperature epoxy resin. Solderable or solderable leads of gold plated nickel alloy. Highly resistant to severe acceleration, shock or vibration. Manufactured to MIL-T-27A, Grade 5 Class S (MIL type TF5SX20ZZ).

NOTE: Ma. DC maximum is for approximately 5% drop in inductance. Those figures marked * will give less than 5% inductance drop but should not be exceeded under operating conditions.

Inductance tolerance of EX-P05A through EX-P50A is $\pm 5\%$; EX-001A through EX-500A is $\pm 2\%$.

Cat. No.	Inductance (0 DC)	DCR (ohms) $\pm 25\%$	Maximum Ma. DC
EX-P05A	50 μ h	1.0	150*

SHIELDING

- P-1—One nickel alloy high permeability shield — 45db. reduction in pickup.
P-3—Two nickel alloy shields interleaved with one heavy copper shading ring — 70db. reduction in pickup.
P-5—Three nickel alloy shields interleaved with two heavy copper shading rings — 95 db. reduction in pickup.

TRANSISTOR TRANSFORMERS Hermetically sealed to MIL-T-27B

DO-T* AND DI-T*
TRANSISTOR TRANSFORMERS

Revolutionary transistor transformers hermetically sealed to MIL-T-27B specs. Plastic insulated solderable leads, firmly anchored to withstand 10 pound pull. Ideal for printed circuits. DO-T: $\frac{3}{16}$ " dia. x $\frac{1}{16}$ " long, wt. 1/10 oz. DI-T: $\frac{3}{16}$ " dia. x $\frac{1}{16}$ " long, wt. 1/15 oz. These compact units provide frequency response, high efficiency and low distortion. U.S. Pat. No. 2,949,591

DI-T200* SERIES TRANSISTOR TRANSFORMERS

These revolutionary transistor transformers embody the same rugged reliable construction afforded by the unique winding techniques and physical construction found in the DO-T & DI-T transformers. DI-T200 series differ by having straight pin, 1" long, .017 d. Dumet wire, gold plated leads.

To MIL-T-27B, size $\frac{3}{16}$ x $\frac{3}{16}$ ", wt. 1/15 oz. U.S. Pat. No. 2,949,591

NEW PIL* ULTRAMINIATURE AUDIO INDUCTORS

The new PIL* series constitutes the smallest audio inductors available. These units are metal encased, ruggedized manufactured and guaranteed to MIL-T-27B. They are MIL Type TF4RX-20YY. Physical construction is that of the PIP (DO-T, DI-T) units shown on this page.

TRANSISTOR TRANSFORMERS *Hermetically sealed to MIL-T-27B*

Primary 115V. 50/60 cycles (tapped on H-143 thru H-146 for dual secondary voltages). DC ratings are approximate, based on silicon bridge rectifier (except H-141, H-142 also shown F.W.C.T.). Choke input DCV is based on 10% voltage drop in choke. Condenser value, C, is in 1000 mfd. H-141, H-142, H-147 listing under "Secs in parallel" is single winding. All units MIL type TF4RX02.

HERMETIC COMPONENTS

Hermetically sealed to MIL-T-27B

HERMETIC AUDIO UNITS

RC-25

RC-50

FH

SM

These extremely compact units are proved to specifications of MIL-T-27B. Response & level ratings: RC-25: Similar to Oncers for case (1 1/2" x 1 1/4" x 1 1/2" h. 1.5 oz.). RC-50: Similar to ultra compact units for case (1 1/2" x 1 1/4" x 1 1/2" h. 8 oz.). SM: Similar to SSO units for case (1 1/4" x 1 1/2" x 1 1/2" h. 0.8 oz.). FH: 2 1/2" x 2 1/4" x 1 1/4" h. .8 oz.

HERMETIC SEALED POWER AND PLATE TRANSFORMERS

H-114, H-115, H-117 have terminals opposite mounting.

Power transformers: primary 115V, 60 cycles suited to 50-1000 cycles service. Plate transformers: primary 105/115/210/220 volts, 50/60 cycles. All ratings are choke input. All ratings are condenser input. H-80 thru H-117 MIL type TFARX03, H-110 thru H-117 MIL type TFARX02. The tapped high voltage winding provides either of two secondary voltages for greatest versatility. The power transformer listings indicate DC voltages and permissible currents for both choke and condenser input filters are for military and industrial applications.

"W" suffix units designed for full wave center tap and full wave bridge application. Center tap of secondary may be disconnected from ground.

HERMETIC COMPONENTS *Hermetically sealed to MIL-T-27B*

MAT* MAGNETIC AMPLIFIERS FOR SERVO MOTOR APPLICATIONS

VACUUM TUBE TYPE

The MAT 1-4 Magnetic Amplifiers are exceptionally stable units designed for the control of 2 phase, 115V., 400 cycle servo motors. They are compact... hermetically sealed... magnetically shielded... and meet MIL-T-27B and MIL-E-5400 Specifications. The output is sinusoidal, amplitude variable, and phase reversible. Control is provided by a dual triode such as 12AU7 operating with a plate voltage of 115 volts, 400 cycles, or higher. The signal to the triode grids can be polarity reversible DC or phase reversible 400 cycles with or without suppressed carrier modulation. These units eliminate DC power requirements as well as temperature sensitive diode rectifiers. The high input impedance provides minimum loading on sensing elements and high power gain. Ringing at low load level has been reduced to a minimum through high internal damping factors. The power output figures are conservative... power gain of the Magnetic Structure is approximately 40... response time approximately 7.5 milliseconds. The maximum null voltage is 3 volts RMS. For single phase supply voltage the load capacitor should effect 90° phase shift with motor load... for 3 phase, 30° phase shift.

ULTRASHIELDED POWER-LINE ISOLATION TRANSFORMERS

Simulates battery operation for critical circuits requiring extreme isolation from power line.

Designed to give the ultimate in isolation, for line-powered equipment, which formerly could only be obtained from battery power. The effective capacity coupling between primary and secondary windings is less than 0.1 MMFD.

PRECISION MINIATURE WIDE APPLICATION PULSE TRANSFORMERS

UTC miniature, wound core, pulse transformers are individually precision adjusted in standard test circuits to close tolerances. They are high reliability units, hermetically sealed by vacuum molding and suited for service from -70° C. to +130° C. Wound core structure provides excellent temperature stability (un-

like ferrite). Designs are high inductance type to provide minimum of droop and assure true pulse width. H-45 thru H-57 ratio 1:1. H-60 thru H-69 ratio 4:1. Others ratio 5:1.

See PIP pulse units on UTC page 1

ELECTRIC WAVE FILTERS Manufactured to MIL-F-18327B

BM & LM Series

HM Series

INTERSTAGE AND LINE FILTERS

Available in cutoff frequencies listed below (numerical part of type number is cutoff frequency in cps). Compact shielded cases hermetically sealed to MIL-T-27B specs. BML, LML, HML cases: $1\frac{1}{4}'' \times 1\frac{1}{4}'' \times 1\frac{1}{2}''$ h.; wt., 6 oz. HML, HML cases: $1\frac{1}{4}'' \times 1\frac{1}{4}'' \times 2\frac{1}{2}''$ h.; wt., 9 oz. The BML filters are band pass interstage units designed to operate between a vacuum tube plate (or 10,000 ohms) and a grid. They provide a gain of 2 at center frequency. BTL units are same as BML, but 10,000 ohms output.

BML band pass filters, similarly, work into a grid, but have an input impedance of 500/600 ohms. They provide a gain of 9.

HML filters are high pass interstage units.

LML filters are low pass interstage units.

HML filter is high pass with input and output impedance of 500/600 ohms.

LML filters are low pass filters with input and output impedance of 500/600 ohms.

LLP low frequency low pass filter, loss of less than 40 db at 20 cycles. Source & load 100K ohms.

NEW 400-CYCLE 115 V. LINE FILTERS

Intended for use on 115 v., 400 cps line to eliminate harmonic distortion.

UTC No. PLF-25 — Gives 150 v. output into 500 ohm load with ± 1 db, 375-425 cps. Will attenuate 800 cycles by 30 db; 1200 cycles and higher by at least 50 db. MIL type, FR4X11NB. Meets MIL-F-18327B. Size $4\frac{1}{2}'' \times 1\frac{1}{2}'' \times 5\frac{1}{4}''$ d. x $5\frac{1}{2}''$ h. Weight, 10 lbs. Net Each\$66.00

UTC No. PLP-13 — Eliminates harmonic distortion, rejects 60 and 120 cycles, and gives zero phase shift at 400 cycles. Operating into 1000 ohm load, provides 115 v. output at 400 cycles, within ± 1 db, 375-425 cycles. Attenuates 800 cycles by 15 db; 1200 cps by 45 db; above 1200 cps by at least 35 db; 120 cps by 20 db; and, 60 cps by 30 db. MIL type FR4X22-LB; meets MIL-F-18327B specifications. Size, $3\frac{1}{4}'' \times 1\frac{1}{4}'' \times 4\frac{1}{2}''$ d. x $4\frac{1}{2}''$ h. Weight, 6 1/2 lbs. Net Each\$66.00

TELEGRAPH TONE CHANNEL FILTERS

UTC band pass filters for multiplex transmitting and receiving provide maximum stability in miniature sizes. Stock filters cover all standard transmit and receive bands. All units employ 7 terminal header matching subminiature 7 pin socket.

TGR (receiving) & TGT (transmitting) filters are
600 ohms in and out. They are down less than 3 db at ± 170 cycles from center frequency. TGR units are down more than 30 db at ± 170 cycles. Attenuation is greater than 15 db at adjacent channel crossover. TGT units are down more than 16 db at ± 170 cycles. Attenuation is greater than 7.5 db at adjacent channel crossover. All units are MIL type FR4X-22Y.

Screws 6-32
Weight 15 oz.

IMMEDIATE DELIVERY ON ALL ITEMS

BPM

MINIFILTERS*

HPM & LPM

These units provide almost the same characteristics as the standard interstage units listed to the left, although extremely miniaturized. Hermetically sealed to MIL-T-27B specs. B type case: $5\frac{1}{4}'' \times 3\frac{1}{4}'' \times 1\frac{1}{2}''$ h.; wt., 1 oz. H and L cases: $1'' \times 1'' \times 1\frac{1}{2}''$ h.; wt., 2/4 oz. Cutoff frequencies in cps indicated by type number.

BPM units (BAND PASS) have 2:1 gain. Attenuation is approximately 2 db $\pm 3\%$ from center frequency, and 35 db above and below. Input 10,000 ohms, output to grid, tapped for 10,000 ohms to provide for transistor circuits. For tube circuits continuity is on grid side, for transistor use continuity is on in grid side. BPH units (BAND PASS) attenuation less than 3 db $\pm 5\%$ from center frequency, and 40 db per octave. Source and load 500 ohms. HPM units (HIGH PASS) are down less than 6 db at cutoff frequency, and more than 30 db at center frequency, 40 db at ± 6 cutoff frequency. Input and output 10,000 ohms. LPM units (LOW PASS) are down less than 6 db at cutoff frequency, and more than 30 db at 1.5 cutoff frequency, 40 db at 1.65 cutoff frequency. Input and output 10,000 ohms.

TELEMETERING BAND PASS FILTERS

TMN-4 thru TMN-1.7
 $1\frac{1}{4}'' \times 1\frac{1}{2}'' \times 2''$
Weight 1.5 oz.
TMN-2.3 thru TMN-70
 $3\frac{1}{2}'' \times 2\frac{1}{2}'' \times 1\frac{1}{2}''$
Weight 1.2 oz.

MNF-5.4 thru MNF-5.4
 $1\frac{1}{4}'' \times 1\frac{1}{2}'' \times 2''$
Weight 1.5 oz.
MNF-7.35 thru MNF-70
 $3\frac{1}{2}'' \times 2\frac{1}{2}'' \times 1\frac{1}{2}''$
Weight 1.2 oz.

Both TMN and TMW types are designed for 100 K input and output impedance and have an insertion loss of less than 6 db. Four pin hermetic header matches small Winchester socket. TMN filters are down less than 3 db at $\pm 7.5\%$ of center frequency. They are down more than 18 db at $\pm 25\%$ of center frequency. Attenuation is greater than 40 db beyond 1.75 Fc and 58 Fc. TMW filters are down less than 3 db at $\pm 15\%$ of center frequency. They are down more than 20 db at $\pm 50\%$ of center frequency. Attenuation is greater than 40 db beyond 2.5 Fc and 4 Fc. MNF and MWF (Minifilter) provide same performance as filters described above but are extremely miniaturized. Slanted toward use in transmitters. Pin terminals ideally suited for printed circuits.

HIGH Q PRECISION INDUCTANCE DECADE

Invaluable instruments for design and experimental work with tuned circuits, wave filters, and equalizers. The low hum pickup toroid coils employ a new permalloy dust core which, combined with special winding methods, provides very high Q, excellent voltage and temperature stability, and high self resonance frequency. The inductance values are laboratory adjusted to better than 1% precision, with calibration noted on base.

HIGH Q COILS & INDUCTORS

MINIDUCTORS *

All these ultracompact high Q units are grade 5, hermetically sealed to (MIL-T-27B). All give extra temperature stability rated at 1%, -55°C to +100°C.

MM—Ultraminiature epoxy molded toroidal inductors with pin terminals for printed circuit application. Maximum Q at 30 KC. $\frac{1}{8}$ dia. x $\frac{1}{4}$ w. .07 oz.

MH—Ultraminiature epoxy molded toroidal inductors similar to MM except maximum Q at 100 KC. Size & wt. as MM.

ML—Ultraminiature hermetically sealed inductors with epoxy board and pin terminals for printed circuit application. Maximum Q at 800 cps to 2 KC, depending on inductance. $\frac{3}{16}$ x $\frac{3}{16}$ x $\frac{1}{8}$ w. .2 oz.

MO—Miniature epoxy molded inductors with pin terminals for printed circuit application. Maximum Q at 600 cps to 1500 cps depending on inductance. $\frac{1}{4}$ x $\frac{1}{4}$ x $\frac{1}{8}$ w. 1 oz.

MW—Miniature epoxy molded toroidal inductors with pin terminals for printed circuit application. Maximum Q at 5 to 10 KC. $\frac{3}{16}$ dia. x $\frac{1}{8}$ w. .25 oz.

HIGH Q TOROID INDUCTORS

Favorites for over fifteen years, UTC HQ Toroids are only excelled by the preferred new "M" series. As typical Q curves show, HQ coils are available for application from 100 cycles to 100 KC. Adjusted to 1%, the inductance is virtually independent of frequency, temperature, and vibration. Voltage stability is excellent, and shielding case assures 80 db coupling attenuation. Hermetically to MIL-T-27B. All units MIL type TFXRX-20YY.

VARIDUCTORS

These variable inductors are ideal for use in tuned circuits, equalizers, oscillators, etc. TYPE HVC—Gives highest Q and stability; adjustable -75% to +200% of mean value. Hermetically sealed to MIL-T-27B.

HVV Types: For precise matching; vernier inductance variation, nominal value. Offer high Q over a wide frequency range and high temperature stability.

VIC—Adjustable -45% to +85% of mean value.

Size: HVC, TVC and HVV types, $1\frac{1}{8}"$ lg. x $\frac{3}{16}"$ w. x $1\frac{1}{2}"$ h.; weight 2 oz. VIC type, $1\frac{1}{8}"$ lg. x $1\frac{1}{4}"$ w. x $1\frac{1}{4}"$ h.; weight $5\frac{1}{2}$ oz. HVC, TVC, U. S. Pat. No. 2,879,489; HVV, Pat. Pend. TVC type inductors are identical to HVC units, but provide taps at 30% and 50% of total turns—ideal for oscillator circuits, etc. HVC & TVC, U. S. Pat. No. 2,879,489.

PLATE TRANSFORMERS

Primarys for 105, 115, 220, 230 volts; 50/60 cycles. For reduced power, secondary can be cut in half, using 220 v. primary on 110 volts; may be used on 25 to 43 cycles in this case. "W" suffix units designed for full wave center tap and full wave bridge application. Center tap may be disconnected from ground.

MINIATURE, OUNCER, SUBOUNCER & SUB-SUBOUNCER UNITS

SUBOUNCER* & SUB-SUBOUNCER* AUDIO TRANSFORMERS TRANSISTOR & TUBE TYPES HERMETICALLY SEALED

TO MIL-T-27B

UTC SSO-#P and SO-#P units are ideal miniaturized components having high efficiency and wide frequency response. Special nickel iron core materials and winding methods provide exceptional performance and reliability.

These units are vacuum molded to MIL Grade 5. They employ 50 mil deeply anchored pin terminals ideally suited for printed circuit and transistor application. Terminals are strong enough to support these light weight units.

The UTC SML-70 is an ultra miniature transformer providing high shielding, extremely low insertion loss with wide band response, 200 cycles to 20 kc. These units are provided with pin terminals (.025 dia.) strong enough to support the unit and are ideal for printed circuits.

AMATEUR & PUBLIC ADDRESS TRANSFORMERS "S" SERIES

DIMENSIONS, SPECIAL SERIES TRANSFORMERS

G-1 thru
G-4G-5 thru
G-12

UTC Special Series transformers are specifically designed for amateur and popular-priced PA service. These units are finished in a rich, commercial type medium gray enamel. A recessed terminal strip is provided, permitting above chassis or bread-board wiring in addition to standard chassis type.

PHOTOFLASH TRANSFORMERS

STANDARD 982

Can be used for either standard (Anglo type) or trigger (Sylvania type) multiple flash tubes. Circuit details included with transformer.

PF-1 Primary for 115 volts, 50/60 cycles. Secondaries for power supply delivering 2200 volts DC to condenser up to 100 Mfd. Compound sealed in G-3 (Pg. 11) case 2 1/8 x 2 3/4 (3 3/4 including flanges) x 2 1/2 inches high. Weight 2 lbs. Net Each \$8.40

PF-3 Trigger Transformer 15 KV peak. 7/8 O.D. x 3 long. Weight 2 oz. Net each: \$6.00

TRANSISTOR TYPE

These are miniaturized light weight units for transistor type photo-flash supply.

PF-5 Primary for 115 volts, 50/60 cycles or for 4 1/2 V. battery switched by PF-6 inverter transformer. Output delivers 400 V. DC when used in voltage doubler circuit to charge photoflash capacitor (typically 40 watt-sec.). G-1 case (Pg. 11) Net each: \$8.40

PF-6 Inverter transformer transforms 4 1/2 V. DC from battery to input for PF-5 stepup transformer. Ouncer case (Pg. 11) Net each: \$5.10

PF-7 Trigger transformer. Shorting .25 mfd. capacitor (charged to approx. 225 V. DC) across terminals 1-2 produces 6 KV pulse at terminal 3 for triggering flash tube. 7/8" Dia. x 1 1/8" H. Wt. 1/2 oz. Net each: \$3.60

R-64	2500 watts, no cord	10 1/2	4 3/4 6 1/4	30	57.00

ISOLATION TRANSFORMERS (FIG. F SEE PG. 11)

Ideal for isolating line noise. AC-DC sets, etc. Excellent electrostatic shielding 1500 volt breakdown test. Six foot cord and female receptacle, except R-77.

Primary 110-120 volts 50/60 cycles—Secondary 110-120 volts
Except R-97 220 volt Primary—120 volt Sec.

LINE VOLTAGE ADJUSTERS WITH METER (FIG. G SEE PG. 11)

The perfect answer to abnormal or fluctuating line voltage. Adjust switch so that meter reads at red line and you know that your equipment is working at correct voltage. These units combine a tapped auto-transformer with a switch and meter in a compact, rugged assembly. The nine tap switch provides for line voltage of 60 to 140 volts on 115 volt output models and 160 to 240 volts on 230 volt output model. All units are designed for 50/60 cycles service and come complete with 6 foot input cord and plug and outlet receptacle.

Type No.	Primary Voltages	Sec. Volts	Watts Rating	L	W	H	Wgt. Lbs.	Net Each
R-78	†	115	150	7	4	4 3/4	6	\$17.70

†	160, 170, 180, 190, 200, 210, 220, 230, 240							

EXPORT VOLTAGE ADAPTER (FIG. D SEE PG. 11)

Complete with cord and plug and special locking switch providing for line voltages of 105, 115, 125, 135, 150, 210, 230, 250 volts; 42 to 60 cycles. Output voltage 115.

Type No.	Rating Watts	L	W	H	Mtg. Dim.	Wgt. Lbs.	Net Each

TV VOLTAGE REGULATOR (FIG. D SEE PG. 11)

Complete with cord, plug, and special locking switch. Permits operation of 115 volt 50/60 cycle TV sets on line voltages of 85, 90, 95, 100, 105, 110, 120, 125 V.

Type No.	Rating Watts	L	W	H	Mtg. Dim.	Wgt. Lbs.	Net Each
R-49	350	5	3 1/4	4	2 1/2x2 3/4	5	\$12.00

SIGNALLING AND CONTROL TRANSFORMERS (FIG. H SEE PG. 11)

Primary 110-120 volts, 50/60 cycles—Secondary

4/8/12/16/20/24 volts

High power transformers suitable for operating relays, sirens horns, gongs, etc. from 115 V. 50/60 cycle line. These units have four secondary terminals providing 4, 8, 12, 16, 20 and 24 volt output. The volt output rating is based on the 24 volt secondary tap with corresponding reduction at the lower voltages. Underwriters' approved primary leads are employed, and screw-type binding posts.

Type No.	Rating Watts	L	W	H	Mtg. Dim.	Wgt. Lbs.	Net Each

Amperex®

AUTOMATIC

AMPERITE

REGULATOR

BALLAST TUBE FOR AUTOMATIC REGULATION OF CURRENT AND VOLTAGE

AUTOMATIC REGULATION

WHAT IT IS

The AMPERITE Ballast-Regulating Tube is an automatic "rheostat" designed to keep the current in a circuit at a definite value, for example, 0.5 amp.

Should the supply voltage increase, the Amperite will automatically increase in resistance enough to take up the increase in supply voltage — keeping the voltage on the load constant. It consists of an iron wire hermetically sealed in a bulb containing hydrogen or helium — the two gases with the highest heat conductivity. Its regulating action is based on the high temperature co-efficient of resistance of the iron wire and the rapid cooling of hydrogen or helium gas.

Being a constant current device, the AMPERITE Ballast-Regulating Tube can be used only to regulate a constant load—fixed wattage. Thermostatic relays can sometimes be included in these regulators to reduce initial surge.

We strongly recommend that you send us your specifications on special problems, and let us recommend the BALLAST TUBE you need.

STANDARD

MINIATURE

T = Threshold Current & Voltage

Characteristic curve of a typical Amperite. Approximate curve of any other Amperite can be obtained by multiplying or dividing the current or voltage scale by any number.

Standard Types of Amperite Ballast Tubes Net \$1.80
Amperite NE70V Neon Lamp Net \$1.80

*T denotes T5½ bulb-7 pin miniature, e.g., 3T4.
*TF denotes T6½ bulb-9 pin miniature, e.g., 3TF4.
Base Wiring: Octal, 7 and 9 pin miniature—prongs 2-7.

AMPERITE NEON LAMP
TYPE NE70V Net \$1.80

GENERAL ADVANTAGES:

- Light, compact • No moving parts • Rugged; will withstand vibration of 10G. minimum
- Hermetically sealed; not affected by altitude or humidity changes • Can be changed as easily as a radio tube • Operates equally well on A.C. or D.C. • Inexpensive

CAPACITIES AVAILABLE

Current values of 60 ma. to 5 amps; threshold voltage 0.4 to 40 V. Maximum dissipation per AMPERITE 50w per tube (ST19 bulb). Any number of AMPERITES with the same voltage range can be operated in parallel. AMPERITES should not be used in series.

AGEING

AMPERITE Ballast Tubes may change approximately up to 3% in current if aged for 4 to 8 hours, at maximum voltage. They will change very little thereafter.

LIFE EXPECTANCY

Average life if operated as recommended **2000 Hours**
If operated continuously at maximum voltage **1000 Hours**
If operated continuously at 80% maximum voltage **5000 Hours**
If filament is operated below glow point **5000 Hours up**

In operation, the Amperite filament starts to glow at one point; as the voltage is increased, the glow spreads over the entire filament. Like incandescent lamps, turning Amperite on and off reduces its life, especially if operating near its maximum voltage.

TIME LAG CHARACTERISTICS

Time lag encountered in an Amperite Ballast Tube depends upon the wattage consumed by the ballast and the size of the bulb. Where the wattage is small for the size of the bulb, the action can be made practically instantaneous — less than 1 second. In such cases the bulb will remain at practically ambient temperature. When the wattage is high enough to heat the bulb to a temperature uncomfortable to the hand (160°F) the lag might be as much as several minutes for final readings— but normally reaches within 90% of final readings within a few seconds.

AMPERITE NUMBERING SYSTEM

In general, the AMPERITE number approximately denotes the current-voltage threshold value. For example:

Amperite Number 3-4 3H4 10-7 12-11 12H11
Threshold Current 0.3 0.35 1.0 1.2 1.25
Threshold Voltage 4.0 4.0 7.0 11.0 11.0

We strongly recommend that you send us your specifications on special problems, and let us recommend the BALLAST TUBE you need.

AUTOMATIC

AMPERITE

REGULATOR

BALLAST TUBE FOR AUTOMATIC REGULATION OF CURRENT AND VOLTAGE

AMBIENT EFFECTS

Ambient temperature variation of -50° to $+70^{\circ}$ C will change the current value of an Amperite approximately 2% on regulating portion of curve as shown directly below. Being hermetically sealed the Amperite is not affected by altitude or humidity changes.

We strongly recommend that you send us your specifications on special problems, and let us recommend the BALLAST TUBE you need.

Amperite Ballast-Type 6-4 current voltage characteristic under ambient conditions of -55° , 24° , and 85° C. The percentage change with ambient is approximately the same with all type Amperite ballasts.

This diagram illustrates far superior regulating characteristics of the Amperite Ballast-Regulating Tube. STANDARD SIZES available for various wattage consumption . . . For good regulation, a bulb should not be required to dissipate more than 50% of maximum wattage.

BATTERY CHARGING AND DISCHARGING

Amperite Ballast Tubes are very successfully used for keeping the current constant in charging and discharging batteries. Any number of Amperites of the same voltage range can be placed in parallel to obtain proper current. The current can be kept to $\pm 1\%$. Advise voltage variation and currents desired.

A light, compact, and inexpensive method of obtaining close regulation is to use an Amperite Ballast Tube with an Amperite Neon Lamp — type NE70V. Base octal-base wiring-prongs 2-5. One NE70V is used for all loads up to 100W.

POWER SUPPLIES

We strongly recommend, for any particular application, to fill in and return one of our special problem sheets (ASP 343) and permit us to recommend the most suitable AMPERITE.

POWER SUPPLY	Dry Cells	6 Volts	12 Volts	26 Volts	115 Volts
Supply Variation	2.2-3.0V	5.5-7.5V	11.4-13.8V	22.0-30.0V	105-125V
Desired on Load	1.8-2.0V	3.9-4.1V	6.1- 6.4V	12.4-12.8V	90- 95V
Required on AMPERITE	0.4-1.0V	1.6-3.4V	5.3- 7.4V	9.6-19.2V	15- 30V
Current Variation	.29-.32a	.29-.32a	.29-.32a	.29-.32a	29-.32a

The above chart shows the maximum load voltage for the given supply to obtain $\pm 2\%$ current regulation on load. Better regulation is obtainable by increasing the voltage across the AMPERITE. Up to a point, the higher the percentage of the supply voltage taken up by the AMPERITE, the better the regulation.

Radio tube filament loads — have low cold resistance which causes a high initial surge. For such loads we recommend a bleeder of 20 to 50% prox. of load and the corresponding AMPERITE, e.g.

FILAMENT LOAD	USE AMPERITE	TOTAL CURRENT
0.3a	4HTF4	0.45a
0.6a	8-4	0.8a
0.7a	9H4	0.95a

On Radio tube filament loads the bleeder will also improve the regulation.

EIMAC POWER GRID TUBES and Accessories

(24 hour factory delivery on most distributor orders)

At Eimac you'll find the most complete line of power grid tubes available today: triodes, tetrodes, pulse modulators, diodes, zero-bias tubes, ceramic tubes, glass tubes, air cooled, water cooled and vapor cooled tubes. And there are more to come! Continuing Eimac projects are ever increasing the scope of power grid tube capabilities.

ELECTRONS COMPANY

A Unit of General Signal Corporation

Newark, New Jersey

PRICES

Prices in this MASTER should not be considered as final.
Inquire about latest prices and delivery.

DISCOUNTS

Trade discounts apply in most cases
where *list prices* are shown.

ORDERING

Since previous editions of The MASTER are frequently referred to, it is important, when ordering, to mention specifically the edition and page number, also the catalog number of each item. This will avoid possible confusion and delay.

TV PICTURE TUBES

GE ELECTRONICS

General Electric TV picture tubes feature many multipurpose designs that replace several of the most commonly used types. Each SG type replaces a number of other types, as shown in the tables.

All material and parts used in the manufacture of General Electric picture tubes are new except for the envelope (and screen and aperture mask assembly in the case of color tubes) which, prior to re-use, have been inspected and tested to meet our high quality standards.

NEW G-E INDUSTRIAL TUBE CATALOGS

ETI-719D 25¢

Alpha-numerical listing of G-E replacements for nearly 3,000 types of industrial tubes.

ETI-2387A 25¢

Complete specifications of G-E industrial receiving, communications, 5-Star and ceramic receiving tubes.

ETI-2388A 25¢

Specifications and data on 80 types of G-E Ignitrons and Thyratrons, plus operating guide.

ETI-2389A 25¢

Lists 125 special-purpose and broadcast power tubes and rectifiers, including installation information.

ETR-15L \$1.50

Lists all receiving, TV picture, 5-Star, and small special-purpose tubes, and G-E capacitors.

These Catalogs Are Available From Your General Electric Tube Distributor

GENERAL  ELECTRIC

Mullard

PREFERRED ENTERTAINMENT RECEIVING TUBES

- For • High-Fidelity • AM-FM
- Television • Industry
- Foreign Replacement

Mullard electron tubes, universally recognized for their advanced designs and reliability, offer a comprehensive range of tubes for High-Fidelity, AM-FM, Television, and Industrial Applications. The vast manufacturing resources of the Mullard organization, including the world's most modern research laboratories, is your assurance of guaranteed tube design advantages for maximum performance in electronic equipment.

Performance Of
Hi-Fidelity Equipment

IEC

International Electronics Corporation

Melville, L. I., N. Y.

Master 10M Series

- TUBE-TO-TUBE UNIFORMITY
- SECTION-TO-SECTION UNIFORMITY
- LONG LIFE
- GUARANTEED PERFORMANCE
- FOR THE BALANCE ORIGINALLY DESIGNED INTO THE CIRCUIT

A selected series of individually laboratory-tested tubes, ideal for today's technically-advanced and exacting electronic equipment... meets more stringent requirements... individual foam cushion packaging for protection during handling and shipping. Each Master 10M tube guaranteed for 10,000 hours of effective performance within two years from date of purchase. Recommended for the full range of electronic equipment.

TYPICAL TEST SPECIFICATIONS 12AT7 DOUBLE TRIODE

TEST CONDITIONS:

V_i 12.5 V

V_a 250 V

V_{g2} -2 V

LIMIT EACH TRIODE

I_a Min. 8.8 Ma

Max. 12 Ma

I_{g1} Less than 1 μA

The Triode No. 1 vs.

Triode No. 2

Less than 15% deviation.

Cutoff less than 20 μA with 8V on grid.

Insulation heater to cathode less than 7 μA.

Insulation heater positive, cathode negative with 125 V on plate: Less than 20 μA.

Cutoff less than 20 μA with 8V on grid. Insulation heater to cathode less than 7 μA. Insulation heater positive, cathode negative with 125 V on plate: Less than 20 μA.

HUM AND MICROPHONICS

Check to close parameters special test specifications and circuits to be given upon request. Typical I_a curves with voltage ratings from 100 to 250 V.

PENTA POWER TUBES

Beam Pentodes • Tetrodes • Triodes • Vacuum Switches

Proven reliability, long life, and high efficiency are the resultant effects of "extra care" production and test methods employed by Penta in the manufacture of power tubes. Enjoy all of the benefits that hundreds of power tube users and equipment manufacturers receive by specifying Penta Power Tubes.

PL-191	21,000	6	—	Not supplied; requires 1000 ampere-turns	\$28.00

Penta vacuum switches are single-pole, double-throw switches enclosed in evacuated glass envelopes. They are ideal for use wherever compact, fast-acting relays are required to switch high-voltage circuits under a wide range of ambient atmospheric conditions, including explosive atmospheres, and in other applications where exposed-contact relays would be unsuitable.

These vacuum switches are operated by external actuating coils, which are excited by direct current and designed so that the soft-iron pole piece and the armature assembly enclosed in the envelope act to complete the magnetic circuit.

ACCESSORIES

Type	Description	Price
PL-C1	Glass chimney for PL-8438/4-400A, PL-175A, PL-6580, PL-6775.	\$ 6.50
PL-C184	Plastic chimney, only for PL-8295/172 and PL-8295A. Same chimney as used on PL-184 and PL-184A sockets (see below).	\$ 5.00
PL-C205	Chimney only (for PL-195 and PL-210). Same chimney as used on PL-205A and PL-261A sockets (see below).	\$12.00
PL-C209	Chimney only (for PL-8432). Same chimney as used on PL-209A socket (see below).	\$ 6.50
PL-C265	Chimney only (for PL-8576/PL-264). Same chimney as used on PL-265A socket (see below).	\$12.00
PL-184	Socket for PL-8295/172 and PL-8295A, including the chimney; built-in screen-grid and suppressor-grid by-pass capacitors. Includes contact provisions for all base pins and screen-grid and suppressor-grid ring terminals. Provides proper air distribution for correct tube cooling at full plate dissipation rating.	\$53.00
PL-184A	Socket for PL-8295/172 and PL-8295A, including the chimney. Same as socket PL-184 (above), except that suppressor-grid contacts are grounded.	\$48.00
PL-205A	Socket for PL-195. Includes chimney, built-in screen-grid by-pass capacitors. Suppressor-grid contacts grounded. Provides proper distribution of air for correct cooling of tube at full plate dissipation.	\$60.00
PL-209A	Socket for PL-8432. Includes chimney, screen-grid by-pass capacitors. Suppressor-grid contacts grounded. Distributes air for adequate cooling at full rated plate dissipation.	\$48.00
PL-261A	Socket for PL-210. Same features as PL-205A socket (above), similar in appearance.	\$60.00
PL-265A	Socket for PL-8576/PL-264. Includes chimney, screen-grid by-pass capacitors. Provides for correct distribution of air for proper tube cooling at full rated plate dissipation.	\$48.00

RCA PICTURE TUBES

June 1, 1964

RCA SILVERAMA

Black & White Picture Tubes

All materials and parts used in the manufacture of RCA Silverama Picture Tubes are new except for the envelope which, prior to re-use, are carefully inspected to meet the standards of the original new envelope.

RCA COLORAMA

Color Picture Tubes

RCA Colorama Picture Tubes contain used materials which, prior to re-use, are carefully inspected to meet RCA's high quality standards.

RCA SILVERAMA BLACK & WHITE

PRICES

Prices in this *MASTER* should not be considered as final.
Inquire about latest prices and delivery.

DISCOUNTS

Trade discounts apply in most cases
where *list prices* are shown.

ORDERING

Since previous editions of The *MASTER* are frequently referred to, it is important, when ordering, to mention specifically the edition and page number, also the catalog number of each item. This will avoid possible confusion and delay.

TUNG-SOL ELECTRON TUBES

The fully comprehensive Tung-Sol line of electron tubes fills virtually every requirement . . . from the most exacting military and industrial applications to the peak quality demands of modern entertainment electronics. A quality control network that's unparalleled plus unexcelled production know-how assure that high-volume production units exhibit the same superior performance and full-life dependability as the engineering samples.

MILITARY-INDUSTRIAL

VACUUM PULSE TUBES

Types available: 3D21WB, 6293, 6293W, 6889, 7248, 7403.

RECTIFIERS

Types available: 1Z2, 3B24WA, 3B25, 3B28, 3B29, 5R4WGA, 5R4WGB, 6H6WGT, 6X4WA, 6X4W, 25Z6WGT, 26Z5W, 583, 5517, 5726/6A5SW, 5829WA, 576A.

VOLTAGE REGULATORS

Types available: OA2, OB2WA, OB2, OC3W, OB3W, 5787, 5787WA, 6073, 6074, 6542, 7099, 8068.

POWER PENTODES

Types available: 2E22, 2656WG, 3A4, 5A6, 5881, 6AR6, 609B, 6AR6WA, 6L6GC, 6L6WGB, 6216, 6327, 6384, 6550, 6889, 7189, 7581, 7591, 7867.

TWIN TRIODES

Types available: 6SU7GT, 2C51, 12AT7WA, 12AY7, 5670, 5687, 5687WA, 5718, 5719, 5744WB, 5751, 5751WA, 5814A, 5814WB, 6021, 6111, 6112, 6188/6SU7WGT, 7370, 65N7WGT.

INDICATOR TUBES

Types available: 6977, 7323, 7400, 7401, 7813.

POWER TRIODES

Types available: 5996, 6A5TG, 6080, 6080WA, 6080WB, 6082, 6082WA, 6082WB, 6336A, 6394A, 6520, 6528, 6877, 7105, 7236, 7241, 7242, 7802, 7802WA, 7802WB, 8193.

CLIPPER TUBES

Types available: 8191, 8192, 8036, 7390, 8326, 7890, 8301.

VOLTAGE REFERENCE TUBES

Types available: 5651, 5651WA, 5783, 5783WA, OG3.

TELEPHONE TUBES

Types available: 313C, 338A, 393A, 394A, 395A, 407A, 408A, 426A, 5842/417A, 5847/404A, 6028.

PHOTO DEVICES

Types available: 8049, 8217.

HYDROGEN DIODES

Types available: 7769, 7790, 7791, 7792, 7793, 8434, 8435.

HYDROGEN THYATRONS

Types available: 1257, 1257A, 1258, 5948A, 5949A, 6587, 7190, 7191, 7191A, 7192, 7240, 7871, 7872, 8077, 8253.

TRANSMITTING TUBES

Types available: 2E22, 5675, 5894, 6146, 6146W, 6159, 6159W, 6360, 6883, 6907, 8032, 8149, 8150, 8236.

THYATRONS

Types available: 2A4G, 2D21, 2D50, 2050W, 3C23, 3738, 393A, 394A, 395A, 885, 5594, 5643, 5663, 5696, 5727, 6D4, 6012, 6901, 7410.

PENTODES

Types available: 1AD4, 404A, 5636, 5639, 5654/6AK5V, 6AH6WA, 6AU6WB, 5672, 5678, 5702WA, 5702WB, 5725/6A56W, 5747/6B6W, 5784WB, 6A15, 6AK5WB, 6A56, 5840, 5875, 5902, 6028, 6088, 6136, 6205, 6245.

PENCIL TUBES

Types available: 6263A, 6264A, 6562, 7533.

ENTERTAINMENT

Tung-Sol tubes . . . cathode ray, series string, hybrid auto radio, TV, radio, stereo and hi-fi provide an ideal combination of the most sought-after characteristics. Tung-Sol is also packing the popular types of its quality audio tubes in factory-matched pairs. Dynamically-balanced 6550's, 5881's, 6V6GTA's, 6BQ5's bring you the finest in full-fidelity reproduction.

Technical assistance is available through the following sales offices: Atlanta, Ga.; Columbus, Ohio; Culver City, Calif.; Dallas, Texas; Denver, Colo.; Detroit, Mich.; Melrose Park, Ill.; Newark, N. J.; Seattle, Wash. Canada: Abbey Electronics, Toronto, Ont.; Canadian Electronics Ltd., Edmonton, Alta.

TUNG-SOL

**WORLD'S MOST
COMPREHENSIVE
SOURCE
FOR ALL
ELECTRONIC WIRE,
CABLE AND
INSULATION**

Now, with the manufacture of coaxial cable in an exceptionally wide range of types and sizes, ALPHA becomes the most complete one-stop source of wire, cable and insulation for *all* electronic applications.

From over 7,000 separate items—always in stock and available for immediate delivery—you select exactly what you need, at competitive prices! And comprehensive engineering assistance is yours, for requirements ranging from prototypes, and short runs through mass production quantities.

See your local electronic parts distributor or write to ALPHA today for these valuable engineering catalogs.

**Complete 52-Page
Wire and
Cable Catalog**

With sections on MIL-W-76B plastic wire; MIL-W-16878D plastic wire; audio and hook-up wire and cable; Teflon wire, multiconductor cable; retractile coil cords; power and service cords; shielding and braiding; and a wide range of other wire and cable items.

**New 24-Page
Tubing Catalog**

Complete details on irradiated heat shrinkable tubing, the versatile insulation that shrinks skin-tight to predetermined size; plus all-purpose PVC tubing; zipper tubing; lacing cord and Teflon tubing.

ALPHA WIRE CORPORATION
Subsidiary of LORAL Electronics Corporation

ALPHA WIRE CORPORATION

MIL-W-76B-PLASTIC WIRE

TYPE MW—UNCOVERED PLASTIC

DESCRIPTION: Solid or extra flexible stranded tinned copper, color coded medium wall polyvinylchloride insulation. The stranded conductor has an extra tight lay to prevent springing open when stripped.

CHARACTERISTICS: Temperature rating —40°C to +80°C, Voltage rating 1000 volts. Resistant to acids, alkalis, oil, flame, moisture and fungus.

TYPE EE—EXTRUDED (1000 VOLTS)

DESCRIPTION: Single conductor stranded silver plated copper, .016" TFE extruded Teflon insulation.

CHARACTERISTICS: Temperature rating —60°C. to +260°C. Voltage rating 1000 volts. Resistant to acid, alkalis, oil, flame, moisture, solvents and fungus.

STANDARD SPOOL PUT-UP: 100 FT., 250 FT., 500 FT., 1000 FT.

ALSO AVAILABLE TO ORDER CUT AND STRIPPED.

**TEFLON FEP EXTRUDED JACKET OVER SHIELD**

DESCRIPTION: Each conductor stranded silver plated copper, Type E extruded TFE insulation color coded, cabled, braided silver plated copper shield 90% coverage, extruded FEP white Teflon jacket overall.

CHARACTERISTICS: Temperature rating —65°C. to +200°C. Voltage rating 600 volts. Resistant to acids, alkalis, oil, flame, moisture, solvents and fungus. Extruded FEP Teflon jacket is tough and abrasion resistant.

ALPHA WIRE CORPORATION

SHIELDED MICROPHONE CABLE

PLASTIC JACKET—STANDARD DUTY

DESCRIPTION

1702-1706: Single conductor, stranded tinned copper, white polyethylene insulation, braided or spiral wrapped tinned copper shield, gray polyvinylchloride jacket overall.

1709-1715: Each conductor stranded tinned copper, color coded polyethylene insulation, cabled with fillers, textile wrap, braided or spiral wrapped tinned copper shield, gray polyvinylchloride jacket overall.

APPLICATIONS

1702-1706: All high impedance microphones, lapel, ribbon, velocity, crystal contact, Hi-Fi interconnecting cables.

1709-1715: All low impedance microphones—carbon, condenser, dynamic.

SHIELDED MICROPHONE CABLE

RUBBER AND NEOPRENE JACKETS

DESCRIPTION: Each conductor stranded tinned copper, color coded rubber insulation, cotton wrap, braided tinned copper shield, cotton wrap, tough black rubber or neoprene jacket overall.

APPLICATIONS: 1248-1449: All high impedance microphone, broadcast and heavy duty studio use, communication and audio systems.

1250-1450/16: All low impedance microphone, broadcast and heavy duty studio use. Can also be used for control circuits, video and audio interconnection cable, and as electronic power cables.

CHARACTERISTICS: Suggested operating temperature: -20°C to +60°C.

Rubber jacketed cable suited for standard duty indoor use.

Neoprene jacketed cable suited for heavy duty outdoor use and direct burial. Will resist oil, acid, sunlight, ageing and abrasion.

ALPHA NO.	NO. OF COND.	CONDUCTOR SIZE	CONDUCTOR STRAND	NOM. WALL THICKNESS	NOM. JKT. THICKNESS	TYPE OF JKT.	*NOM. CAP. MMF./FT.	NOM. O.D.

STANDARD SPOOL PUT-UP: 100 FT., 250 FT., 500 FT., 1000 FT.

* Between one conductor and remaining conductors (if any) connected to shield.

† Mylar wrap under tinned copper shield.

COLOR CODE OF CONDUCTORS 1—Black 2—White

LOW CAPACITANCE SHIELDED

MICROPHONE CABLE

CELLULAR FOAM POLYETHYLENE INSULATION—PLASTIC JACKET

DESCRIPTION: Single conductor, stranded tinned copper, white foam polyethylene insulation, braided tinned copper shield, chrome gray polyvinylchloride jacket.

Two conductors, stranded tinned copper, color coded foam polyethylene insulation, 1 white and 1 black, cabled with fillers, textile wrap, braided tinned copper shield, chrome gray polyvinylchloride jacket.

CHARACTERISTICS: Suggested operating temperature: -20°C to +60°C. Low loss foam polyethylene provides low capacitance and attenuation than standard solid polyethylene microphone cables, thereby increasing the effective length of usable cable without loss of signal.

ALPHA WIRE CORPORATION

FLAT RIBBON CABLE

MULTI-CONDUCTOR—PLASTIC INSULATION
CONDUCTORS PER MIL-W-16878D, TYPE C

DESCRIPTION: Each conductor stranded tinned copper, color coded .016" polyvinylchloride insulation, conductors bonded together to form flat ribbon cable.

CHARACTERISTICS: Temperature rating: -55°C to +105°C. Voltage rating 1000 volts. Resistant to acids, alkalis, oil, flame, moisture, solvents, and fungus.

APPLICATIONS: Saves time, weight, and space on circuit connections, interconnecting assemblies and systems, wiring harnesses for racks, sliding drawer and drop panels. Conductors fully color coded and easily separated for neat terminations.

TELEMETERING & SUPERVISORY SHIELDED CONTROL CABLE

DESCRIPTION: Each conductor, bare solid copper, .015" high molecular weight polyethylene insulation, color coded, twisted into pairs, cabled with a non-hygroscopic binder tape .008" aluminum shield, black polyethylene jacket overall. Operating voltage 300 volts.

APPLICATIONS: Remote control of rocket recording data and test-firing control, transmission of signals which telemeter temperature, voltage pressure, etc. control of multiple circuits, measuring devices, quality control equipment, radar antenna. For aerial, duct and conduit installations.

MIL-W-5086A & MIL-C-7078A

AIRCRAFT WIRE FOR ELECTRICAL SYSTEMS

DESCRIPTION:

MIL-W-5086A—Type I—AN-22 thru AN-12—Single conductor stranded tinned copper, white polyvinylchloride insulation, clear nylon (polyamide) jacket overall.

MIL-W-5086A—Type II—AN-22 thru AN-12—Single conductor stranded tinned copper, white polyvinylchloride insulation, white glass braid, clear nylon (polyamide) jacket overall.

MIL-W-5086A—Type II—AN-10 thru AN-00—Single conductor stranded tinned copper, white polyvinylchloride insulation, white glass braid, flame retardant nylon lacquered nylon braid overall.

MIL-C-7078A—Type I—Single conductor stranded tinned copper, white polyvinylchloride insulation, clear nylon jacket, braided tinned copper shield overall, 85% coverage.

CHARACTERISTICS: Temperature rating: -55°C to +105°C. Voltage Rating: 600 volts. Resists effects of water, oil, aircraft fuels, hydraulic fluid, skydrol, ethyleneglycol, alcohol, dilute acids, alkalis, fungus and abrasion.

COLOR CODE: The color code of neoprene jacketed control cables conforms to IPCEA standards either with full color code or surface printed with color name and number.

ALPHA WIRE CORPORATION

SHIELDED CONTROL CABLE

HEAVY-DUTY MULTI-CONDUCTOR
RUGGED NEOPRENE JACKET

DESCRIPTION: Each conductor stranded tinned copper, color coded rubber insulation, cabled with fillers where necessary, cotton wrap, braided tinned copper shield, cotton wrap, rugged black neoprene jacket overall.

CHARACTERISTICS: Operating Temperature: -20°C to +60°C.

UNSHIELDED CONTROL CABLE

HEAVY-DUTY MULTI-CONDUCTOR
RUGGED NEOPRENE JACKET—600 VOLTS

DESCRIPTION: Each conductor stranded bare copper, color coded rubber insulation, cabled with fillers where necessary, wrap over conductors, heavy duty black neoprene jacket overall, 600 volt operating voltage.

APPLICATIONS: Remote control of automatic electrical equipment and sub-stations, tele-metering, voltage pressure and motor control, signal transmission. Flexible heavy duty neoprene jacketed cable, recommended for outside installation, cable resists oil, ozone, sunlight, moisture, abrasion and impact.

SHIELDED PLASTIC JACKETED CABLE

MYLAR SUPPORTED ALUMINUM FOIL SHIELD

DESCRIPTION: Each conductor stranded tinned copper, color coded polyethylene insulation, conductors cabled, wrapped mylar supported aluminum foil shield, 100% coverage with drain wire laid parallel, aluminum foil facing outward to provide maximum grounding contact, chrome gray polyvinylchloride jacket overall.

CHARACTERISTICS: Suggested operating temperature: -20°C to $+60^{\circ}\text{C}$. Suggested operating voltage: 400 volts. Shielded cable with a mylar laminated aluminum foil is lighter in weight, reduces cable diameter, and provides 100% shield coverage at audio and radio frequencies. Drain wire facilitates quick and easy shield termination to ground.

SHIELDED PLASTIC JACKETED CABLE

SPIRAL WRAPPED COPPER SHIELD

DESCRIPTION: Each conductor stranded or solid tinned copper, color coded polyvinylchloride insulation, conductors twisted, spiral wrapped copper shield, gray polyvinylchloride jacket overall. Nominal jacket thickness .020".

CHARACTERISTICS: Use of spiral shield makes pigtailting off extremely simple and fast. Excellent for production line work. Provides close to 100% shielded coverage for audio and RF frequencies.

UNSHIELDED AUDIO CABLE

MULTI-CONDUCTOR—PLASTIC JACKET

DESCRIPTION: Each conductor tinned copper, color coded polyvinylchloride insulation, conductors twisted, gray polyvinylchloride jacket overall. Suitable for outdoor installations.

APPLICATIONS: Intercoms. Interconnecting cables. Remote control circuits. Telephones. Telemetering connecting cable. "Baby Sitter" intercom.

CHARACTERISTICS: Suggested Operating Temperature: -20°C to $+60^{\circ}\text{C}$. Suggested Operating Voltage: 300 volts.

SERVICE & POWER CORDS

U.L. APPROVED

DESCRIPTION: RUBBER PORTABLE CORDS, TYPE SV, SJ, & S

Each conductor stranded bare copper, separator, color coded rubber insulation, cabled with fillers, separator, tough black rubber jacket overall.

NEOPRENE PORTABLE CORDS, TYPE SVO, SJO, & SO

Each conductor stranded bare copper, separator, color coded, rubber insulation cabled with fillers, separator, black neoprene jacket overall. Oil, grease, ozone, acid, moisture resistant.

+YELLOW PORTABLE CORDS, TYPE SVTO, SJTO, & STO

Each conductor, stranded bare copper, oil resistant polyvinylchloride insulation, cabled with fillers, separator, plastic jacket overall. Resistant to oil, acid, moisture, abrasion resistant, easy to clean.

CHARACTERISTICS

& APPLICATIONS: Suggested Operating Temperatures: -20°C to +60°C.

U.L. TYPE	TYPE OF USAGE	VOLTAGE RATING
SV, SVO, SVTO	Light appliances such as fans, mixers, and office equipment.	300V
SJ, SJO, SJTO	Medium appliances, small motors, tools, amplifiers, speakers.	600V
S, SO, STO	Heavy duty equipment, generators, heaters, tools, air-conditioners.	600V

ALPHA WIRE CORPORATION

RETRACTILE COIL CORDS

POWER CORDS—NEOPRENE JACKET U.L. APPROVED

RETRACTED LENGTHS 2 & 4 FEET—EXTENDED LENGTHS 12 & 25 FEET

DESCRIPTION: Long-lasting service is assured with this quality multi-conductor power cord. Each conductor is stranded copper, with rubber installation, and a rugged weather and oil resistant neoprene jacket overall.

APPLICATION: Used on electric tools, portable drills, soldering wires, electrical appliances, household appliances, etc., to eliminate loose hanging wires and to prevent wires from tangling and twisting.

CHARACTERISTICS: Suggested operating temperature: -20°C to +60°C.

*If all four conductors normally carry current, amp rating is as shown. If one lead is used as a ground, amp rating is the same as 2 and 3 conductor cords.

†A 12" retracted length with a 12" straight lead on each end for easy stripping and termination. Cord extends to approximately 6 feet.

RETRACTILE POWER CORD SETS U.L. APPROVED

RETRACTED LENGTH 18"—EXTENDED LENGTH 7½ FEET

DESCRIPTION: Coiled power cord with a sturdy molded male plug on one end. On the other end we have removed a portion of the neoprene jacket, exposed the conductors and stripped them for easy termination. Operating voltage, 300 volts.

APPLICATION: Same as power cords, but with a plug on one end.

RETRACTILE COIL CORDS

RETRACTILE COMMUNICATION COIL CORDS

RETRACTED LENGTHS 2 & 4 FEET—EXTENDED LENGTHS 12 & 25 FEET

DESCRIPTION: Multi-conductor communication cord manufactured with extra flexible #23 AWG-21/36 tinned soft cadmium copper for maximum flex life, insulated with rubber for communication circuits of maximum 120 working volts. The overall jacket is a specially compounded cured neoprene jacket giving long life to the retractile cord.

APPLICATION: Used in communication equipment, such as telephone car carriers, mobile radio equipment, ham operations, head sets, citizen band units and radio transmitter to receiver head sets, communication cords eliminate hazards and inconveniences caused by tangled straight cords.

RETRACTILE COMMUNICATION CORDS (SHIELDED)

RETRACTED LENGTHS 2 & 4 FEET—EXTENDED LENGTHS 12 & 25 FEET

DESCRIPTION: Same as above, except that shielded conductors are individually shielded with a cadmium copper shield to eliminate external electrical interference. Shield can be pigtailed for direct soldering connections.

APPLICATION: When shielded communication cords are needed.

MINIATURE RETRACTILE COMMUNICATIONS CORDS

RETRACTED LENGTH 2 FEET—EXTENDED LENGTH 10 FEET

DESCRIPTION: A small diameter plastic cord with stranded tinned copper conductors for maximum flexibility, insulated and jacketed with polyvinylchloride. Each cord is available in a 2 ft. retracted length with a 6" straight lead on each end and extends to approximately 10 feet.

APPLICATION: For low voltage power and communication equipment where miniaturization is required due to space and weight limitations.

For 3 conductor, use 4 conductor with one lead unused

ALPHA WIRE CORPORATION

FLAT BRAID

DESCRIPTION: A woven braid composed of tinned copper strands, which is rolled flat at time of manufacture to a specific width depending upon construction.

APPLICATIONS: Flat braid is usually employed for its current carrying capacity and its extreme flexibility. It is generally used as a high current conductor at low voltages. Military protection is typical of this application. It is also used as a bonding strap in vehicles and aircraft to help eliminate junction interference. Because of its extreme flexibility it can be used in confined areas or as electrical connections on moving parts.

OVAL COMMERCIAL BRAID

DESCRIPTION: A woven tinned copper braid which is left in the tubular configuration as it leaves the braiding equipment. It is manufactured to a specific inside diameter but because of its extreme flexibility cannot maintain its complete round shape and becomes oval.

APPLICATIONS: Oval braid is used as an electrostatic shield to cover a conductor, a series of conductors, a cable, or other components. It is specifically constructed and left in its tubular or oval form so that it can easily be slipped over wire, cable, or other components for which shielding is required.

EXTRA LARGE TINNED COPPER TUBULAR BRAID

DESCRIPTION: These tubular braids manufactured to standards of QQ-B-575 though these sizes are not listed in the specification.

TINNED COPPER TUBULAR BRAID TO MIL SPEC QQ-B-575

DESCRIPTION: A woven tinned copper braid which is manufactured completely round as outlined in Mil Spec QQ-B-575. Each strand of the braid is soft drawn tinned copper wire. The braid is self-supporting and maintains its round configuration. The percentage of shielding coverage is 95% or more when placed over a mandrel of an equivalent diameter to the inside braid diameter.

APPLICATIONS: Maximum shielding against electrostatic interference for wire, cables and other components. Also as a protective covering against mechanical abrasion and stresses.

SILVER PLATED TUBULAR BRAID CONSTRUCTION TO MIL SPEC QQ-B-575

DESCRIPTION: A woven silver plated copper braid which is manufactured completely round as outlined in Mil Spec QQ-B-575. Each strand of the braid is soft drawn silver plated copper wire. The braid is self-supporting and maintains its round configuration. The percentage of shielding coverage is 95% or more when placed over a mandrel of an equivalent diameter to the inside braid diameter. Silver plated braid is used where a high operating temperature (500°C) and corrosion resistance is required.

ALPHLEX® TUBING SECTION

PLASTIC TUBING (PVC-105)

DESCRIPTION

PVC-105's exceptional integration of desirable qualities endows it with excellent versatility and durability. Its dielectric strength is high and remains unaffected by increasing temperature throughout its range. It displays high resistance to the agents of heat, oil, chemicals, corrosion, fungi and even abrasion with no loss in tensile strength, non-flammability—or flexibility.

Under all the above adverse conditions, PVC-105 will retain its ability to hug and protect irregular-shaped objects, will "snake" beautifully, and will always be easy to handle.

To achieve this combination of advantages, special care is taken in the making of PVC-105. It is compounded with only first-grade quality non-migratory resinous type plasticizers. From laboratory to production line, from raw material to finished product, strict quality control prevails. Behind it are the same engineering and production know-how that have made the name Alpha famous in the electronics industry.

As with all Alpha and Alphalex items, PVC-105 is "IN STOCK" for immediate delivery, and can be supplied to desired lengths as well as standard spools.

For your special problems, please call on us for consultation and recommendations—no obligation, of course.

Dielectric Strength	Temp. Rating	Low Temp. Flexibility	Flammability	Tensile Strength	Ultimate Elongation	Insulation Resistance	Fungi Resistance	Oil Resistance	Corrosion & Abrasion Resistance	Applicable Specifications
800 V/MIL	105°C	—30°C	Non-Flammable	2500 PSI	300%	Over 1,000,000 Megs.	Yes	Remains Flexible Indefinitely	Excellent	MIL-I-631C ASTM-D876 ASTM-D922

Standard Colors

#24 thru #12	—Clear, Black, Yellow, Red, Blue, Brown, Green, White, Orange
#11 thru #2	—Clear, Black, Yellow, Red, Green, White
#1 thru 2½"	—Clear, Black

Standard Put-Ups

#24 thru #15	—1,000 ft. spools
#14 thru #5	—500 ft. spools
#4 thru ¾"	—250 ft. coils
¾" thru ½"	—100 ft. coils
½" & larger	—50 ft. coils

APPLICATIONS

Alphalex® PVC-105 Plastic Tubing is designed and manufactured specifically for electronic, aircraft and electrical applications involving temperatures as high as 105°C. It conforms to Specification MIL-I-631C, Type F, Form U, Grade C, Class I, Category I.

TEFLON® EXTRUDED TUBING (TFT-200)

(THIN WALL)

DESCRIPTION

ALPHLEX® THIN WALL TEFLON TUBING, a high temperature insulation (designated by A.I.E.E. for continuous operation at 220°C minimum), while classified as a thermoplastic resin, does not melt and flow as do conventional thermoplastic materials.

APPLICATIONS

Because of its combination of electrical, chemical and mechanical properties, ALPHLEX TEFLON is unmatched by any other type tubing for use in electrical applications at high frequencies and temperatures. As a thin, flexible insulation, it permits miniaturization and compactness of design heretofore impossible.

ALPHA WIRE CORPORATION

ALPHLEX® ZIPPER TUBING

DESCRIPTION Alphlex Zipper Tubing is the all purpose modern way to harness, cover and protect cables. Just zip to close — and zip to reopen. If you wish, it may be permanently sealed with PB-200 Special Compound Liquid Sealer. Alphlex Zipper Tubing is strong, flexible, durable, and offers new freedom in design, production and repair.

APPLICATIONS To shield, to harness wire, to custom-cable to any length, to enclose, to encase, to identify (such as cable markers), to protect, to replace worn jackets.

TYPES OF ZIPPER TUBING

TYPE	MATERIAL	WALL THICKNESS (Inches)	OPER. TEMP.	APPLICATIONS	STOCK COLORS	STANDARD PUT-UPS
ZIP-31	Polyvinylchloride made from MIL-I-631 D, GRADE C Materials	.020	-20° C to 105° C	All Purpose Type	Clear Black Yellow	25' 50' 100' 25' 50' 100' 25' 50' 100'
ZIP-31M	Polyvinylchloride made from MIL-I-631 D, GRADE C Materials	.040	-20° C to 105° C	Heavy Duty Constructions	Clear Black	100' 100'
ZIP-44	Polyvinylchloride made from MIL-I-7444 B Materials	.020	-67° C to 70° C	Extreme Flexibility Low Temperature & Aircraft Industry	Clear Black	100' 100'
ZIP-50	Polyvinylchloride "sandwich" of aluminum foil laminated between two sheets of polyvinyl	.040	-20° C to 105° C	100% RF shielding	Silver-Grey	100'

ZIPPER SPECIFICATIONS FOR ALL TYPES OF ALPHLEX ZIPPER TUBING

Material	Polyvinylchloride	Cold Brittleness	-86° C
Track Thickness (when closed)	.095"	Fungus-proof	will not support fungus
Dielectric Strength, V/mil	750	Flammability	self-extinguishing
Tensile Strength P.S.I.	3810	Lateral Pull Strength (unsealed)	42.7 pounds/inch
Ultimate Elongation	255%	Lateral Pull Strength (permanently sealed)	59.8 pounds/inch
Operating Temperature		Standard Colors	Black, Clear, Yellow
Upper Limit	106° C		

Contrasting color combinations of zipper and body are available to order. The zipper portion can be supplied in any of the following colors: Black, Yellow, Clear, Blue, White, Brown, Purple, Red, Orange, Green, Slate.

STANDARD SIZES FOR ALL ZIPPER TUBING

Zipper Tubing Inside Diameter	Approx. Flat Width (From track to track — excluding flap)
1/4"	1 1/4"
3/8"	1 3/4"
1/2"	2"
5/8"	2 1/4"
3/4"	2 3/4"
7/8"	3 1/4"
1"	3 3/4"
1 1/8"	4 1/4"
1 1/4"	4 3/4"
1 1/2"	5 1/4"
1 3/4"	6 1/4"

*Because of small Inside Diameter, these sizes cannot be closed by using the slider. The tracks must be closed by manual pressure.

HOW TO ORDER

Select the type of Zipper Tubing desired from the chart and the required Inside Diameter. When ordering, request as follows: For example, ZIP-31 Tubing in 1/4" Inside Diameter order — ZIP-31 — 1/4".

TYPES OF LACING CORD

flat braided tape This construction was developed to prevent the "cold flow" that often is encountered in wire having plastic or rubber insulations. It has been specifically designed to create a wider contact area with the insulation, so that it does not flow away from the contact point. It is considerably more flexible and easier on the user's hands and is recommended for all types of harness work. Flat tapes do not appreciatively increase the diameter of the cable.

round twisted cord Available in various strands and thicknesses to produce different tensile strengths. This type, while it may be used for plastic and rubber insulated wire, is particularly suited for wires having a secondary insulation or those utilizing a textile as an insulating material.

MATERIALS

nylon Synthetic fiber resistant to: fungus, flame, acids, abrasion. Excellent tensile strength, light weight, small size.

dacron A synthetic fiber which retains all the above characteristics of Nylon plus: less elongation, better resistance to acids, no appreciable discoloration.

FINISHES

ge synthetic rubber-like resin
mw micro-crystalline wax
am thermoplastic synthetic resin
sr fungistatic synthetic rubber

Other materials, finishes and sizes available to order.

The MASTER — 29th Edition • Page 1603

ALPHA WIRE CORPORATION

A host of electronic, electrical, medical, laboratory, automotive and aircraft applications. FIT Tubing displays high resistance to heat, oils, moisture, chemicals, acid, corrosion, fungi and abrasion.

All FIT Shrinkable products are available from stock and may be cut and/or marked to your specifications.

New Alphalex all-purpose FIT Shrinkable Tubing shrinks in seconds when heated, forming a permanent tight-fitting mechanical bond even over irregularly shaped materials. Shrinkage is predetermined.

ALPHLEX®

TYPES OF FIT™ SHRINKABLE PRODUCTS

FIT-221	An excellent all-purpose polyolefin tubing, Shrinkage Ratio — 2:1 (50% shrinkage).
FIT-105	A shrinkable polyvinylchloride with all the advantages of PVC plus the convenience factors of Shrinkable Tubing. Recommended as a superior quality, economical material for cabling and jacketing. Shrinkage Ratio 2:1 (50% shrinkage).
FIT-295	An extremely tough, semi-rigid abrasion resistant tubing with unusual mechanical strength. Recommended for jacket-termination, connection, or splice that is subject to mechanical stress. Shrinkage Ratio 2:1 (50% shrinkage).
FIT-Cap	Electrical insulating, flame-resistant sealed wire and cable terminations. Answers the need for a strong, space-saving, lightweight end cap for splices and cables. Shrinkage Ratio 2:1 (50% shrinkage).
FIT-Mrk	FIT-Markers are pre-cut and stamped wire markers made of a flexible abrasion-proof, durable polyolefin tubing. Shrinkage Ratio 2:1 (50% shrinkage).

HEAT GUN (HG-1)

FIT - KIT

An ideal laboratory / prototype / production kit. A selection of 6-inch lengths of FIT-221; FIT-295, FIT-105, FIT-Caps and FIT-Markers in a handy plastic case, each type in its separate compartment. Includes a wide variety of sizes and colors.

6" PACKAGED ASSORTMENTS

FIT-221 — assorted sizes and colors per box — contains an assortment of 6" lengths in various sizes and colors. Every length identified as to size and supplied in Black, White, Red, Yellow, Blue, and Clear.

*STANDARD PACKAGE

295 Tubing is available only in the specified standard packages. When ordering, indicate package desired (6 Inch or 2 Foot).

*Each size available in "Clear."

FIT-CAPS — SHRINKABLE WIRE TERMINATION CAPS An Irradiated Semi-Rigid Polyolefin Product
Shrinkage Ratio 2:1 (50% Shrinkage)

DIMENSION CHART

Actual Size

Alphlex No.	A Minimum I.D. Before Shrinking (Inches)	AA Recovered I.D. After Shrinking (Inches)	Nominal Wall Thickness (Inches)	B Nominal Length (Inches)	Stock Colors	Standard Package Put-Up (Pieces)
CAP-1	.063	.025	.016	$\frac{3}{4}$	White	100 or 1000
CAP-2	.125	.050	.020	1	Red	100 or 1000
CAP-3	.250	.100	.025	1	Slate	100 or 1000
CAP-4	.500	.200	.030	1 $\frac{1}{4}$	Black	100 or 1000

FIT-CAP ASSORTMENT CAP-A contains 10 each of the 4 sizes of shrinkable wire termination caps. Packed in a handy transparent plastic storage box.

FIT-MARKERS — SHRINKABLE WIRE MARKERS

An Irradiated Flexible Polyolefin Product
Shrinkage Ratio 2:1 (50% Shrinkage)

Alphlex No.	O.D. of Wire to be Identified (Inches)	Minimum I.D. Before Shrinking (Inches)	Recovered I.D. After Shrinking (Inches)	Nominal Wall Thickness (Inches)	Marker Before Shrinkage (Inches)	Stock Color
MRK-A	.049-.065	.098	.049	.016	$\frac{3}{4}$	Black
MRK-B	.066-.095	.122	.061	.016	$\frac{3}{4}$	Black
MRK-C	.096-.150	.178	.089	.016	$\frac{3}{4}$	Black

FIT-MARKER ASSORTMENTS Contains a selection of markers printed in numerical or alphabetical sequence.

Alphlex No.	Minimum I.D. Before Shrinking (Inches)	Printing On Markers	Standard Package *2 of each number *4 of each letter	Stock Color
MRK-A-NS	.098	1-50	100*	Black
MRK-B-NS	.122	1-50	100*	Black
MRK-C-NS	.178	1-50	100*	Black
MRK-A-LS	.098	A-Z	100*	Black
MRK-B-LS	.122	A-Z	100*	Black
MRK-C-LS	.178	A-Z	100*	Black

HOW TO ORDER

- Determine O.D. of wire to be identified.
- Select recommended size and part number from chart above.
- To order, add number or letter to be printed on marker as suffix to the Alpha part number: For example: To order FIT-Markers printed with number "22", for use on wire with O.D. of .075, order: MRK-B-22.

speed-up electronic
purchasing, estimating,
bidding and pricing with...

UNITED *Pricing Reports*

up-to-the-minute prices of more than 400,000 standard
electronic products available from distributors.

NOW, CONSULT ONE SOURCE for current prices of standard electronic products available from your distributor.

Pricing Reports eliminates the phone calls and letter writing involved in price checking. It provides accurate price information at the moment you need it. It speeds purchasing, estimating, bidding and pricing.

ONLY PRICING REPORTS GIVES YOU:

- Up-to-the-minute prices of more than 400,000 standard electronic products available from parts distributors.
- Price schedules of more than 750 manufacturers.
- Price change supplements showing increases, decreases, new and discontinued items — mailed to you twice weekly.

For complete details and subscription rates write to:

* New Item † Specify Color (TBO) To Be Obsolete. (Obs) Obsolete.

ALL SPOOLS ARE ONE PIECE UNLESS OTHERWISE INDICATED BY (+)

• Spools may contain more than one piece, minimum length of any one piece is 25 ft.

 • When priced per M ft. length may vary $\pm 10\%$ from length shown; all other lengths are exact.

• Cut to Customer's Specified Length subject to available stock lengths—minimum length 25'; 25' to 199' plus 25' minus 0'; 200' or over, plus 50', minus 0'.

• (Vinyl Hook-up Wire) Prices apply to standard stock colors as listed in our current catalog and to non-stock striped colors over solid colors in quantities of 10,000 or more. Non-stock striped colors over solid colors in quantities of 1000' to 9999' add pro-rata set-up charge of \$3.00 per color combination.

• Minimum order 1000' per special stripe combination. Special stripe colors in any quantity will be subject to 2 piece put-up and plus or minus 10% per spool.

• (Teflon Hook-up Wire) Prices apply to any striped color combination in quantities of 1000' or more. Minimum order 1000' per stripe color combination. Stripping

adders do not apply to braided tracers—Write for prices on non-stock tracer colors.

BELDFOIL^{††} The Total Shield

Since Belden introduced Beldfoil in 1957, this 100% shield has won the reputation as "The Total Shield."

For critically sensitive circuit applications the combination of 100% shield coverage and the exclusive Belden fold (U.S. Patent 3,032,604) proves superior to previously available shields in guarding against cross talk and spurious signal impulses.

The benefits of Beldfoil include:

- 1) Increased electrical integrity.
- 2) Reduction of cross talk to unmeasurable levels.
- 3) Reduced weight and space requirements.
- 4) Easier and faster shield terminations.
- 5) Reduced costs.

The basic Beldfoil tape is .00035" thick rolled aluminum foil per ASTM B373-61T laminated to a .0005" thick sheet of high dielectric strength DuPont Mylar[®] per MIL-I-631D, Type G, Form F, by means of a high strength color code adhesive for circuit identification.

The exclusive Belden fold is used in several ways to give added value to the cable:

All Beldfoil shields include a drain wire for ease of termination. This drain wire is in intimate contact with the foil throughout the length of the cable.

unshielded paired sound cables

Belden**MULTIPLE PAIR UNSHIELDED SOUND CABLES**

TYPICAL APPLICATIONS: Balanced line sound systems.

Made with 80°C vinyl plastic compounds for high dielectric strength and the best physical properties, such as free stripping, small

diameter, and tear resistance. It also resists the effects of water, sun, oil, grease, and ozone. The conductors are paired with a short-lay twist for conductor balance, providing a quiet circuit, free from cross talk.

Bare cadmium bronze, vinyl insulated, cabled, paper wrapped, black vinyl jacket. 8494 one end stripped $7\frac{1}{4}$ ", spade terminals attached and hook strain relief clamped over jacket. Other end stripped $6\frac{1}{4}$ " and spade terminals attached. 8495 one end stripped $2\frac{3}{4}$ ", spade terminals attached and hook strain relief clamped over jacket. Other end stripped $3\frac{1}{8}$ " and spade terminals attached.

RUBBER-PLASTIC-NEOPRENE

PLASTIC CABLES RECOMMENDED FOR: Lower capacitance, lower loss, greater ozone and oil resistance, lighter weight, smaller diameter.
RUBBER CABLES RECOMMENDED FOR: Greater abrasion and impact resistance, and extra limpness so cable will lie flat on stage or studio floor.
NEOPRENE CABLES RECOMMENDED FOR: Outside use, cold weather applications. Resistant to effects of sun, oil, and ozone.

***Capacitance of shielded conductor.

tv camera cable and 75 ohm video cables

Belden

TV CAMERA CABLES

Belden TV Broadcasting and closed circuit TV Camera Cables are precision engineered to assure reliable performance and long service life. In addition to lighter weight, greater flexibility, and easier termination

these cables are designed to maintain high conductor insulation resistance regardless of changes in ambient temperatures.

Trade Number 8283

Designed to meet the critical electrical and physical requirements necessary for color television broadcast applications.

82 Conductor TV Color Camera Cable

4-14 AWG (19x27) tinned copper, vinyl plastic insulated, color coded
3-16 AWG (26x30)-tinned copper, vinyl plastic insulated, color coded
BELDFOIL aluminum-Mylar wrapped shield around the above 7 conductors cabled with stranded tinned copper drain wire
8 coaxial cables. Nom. impedance 53.5 ohms, color coded
67-22 AWG (7x30) tinned copper, vinyl plastic insulated, color coded,
7 under conductive textile shield with stranded ground wire
Tinned copper braid shield
Chrome vinyl plastic jacket. 1.22" Nom. O.D.
§Cut to customer's specified length.
Maximum length 1000'

Trade Number 8280

A smaller, lighter weight cable designed to make long runs easier. Recommended for black and white (Monochrome) systems.

28 Conductor TV Camera Cable

4-18 AWG (16x30) tinned copper, vinyl insulated, color coded
21-22 AWG (7x30) tinned copper, vinyl insulated, cabled in 3 groups of 7, color coded
3 coaxial cables. Nom. impedance 51 ohms, color coded
Tinned copper braid shield
Chrome vinyl jacket. .750" Nom. O.D.
§Cut to customer's specified length.
Maximum length 1500'

Trade Number 8284

Designed specifically for color TV transmission. This cable incorporates excellent circuit isolation assuring the reduction in AC hum level and cross talk essential for color TV broadcasting.

24 Conductor TV Camera Cable

17-22 AWG (7x30) tinned copper, vinyl insulated, color coded
3 under BELDFOIL shield with stranded drain wire
4-16 AWG (26x30) tinned copper, vinyl insulated, color coded
3 coaxial cables. Nom. impedance 53.5 ohms, color coded
Tinned copper braid shield
Heavy cotton braid
Chrome vinyl plastic jacket. .800" Nom. O.D.
§Cut to customer's specified length.
Maximum length 1000'

Trade Number 8282

Especially engineered for TV Eye Cameras. Recommended for remote control, monitor and cue line applications.

13 Conductor TV Eye Cable

9-22 AWG (7x30) tinned copper, vinyl insulated, color coded
2-18 AWG (16x30) tinned stranded copper conductor vinyl insulated. Black and Red
1-RG-58A/U cable 50-ohm coax
1-72-ohm coax, stranded conductor, Mylar tape wrapped
Chrome vinyl jacket. .470" Nom. O.D.
§Cut to customer's specified length.
Maximum length 2000'

This series of cables is also recommended as interconnecting cables in complex electronic applications. Each cable contains coaxial cables for §Minimum length 25'. 25' to 199', plus 25', minus 0. 200' or over, plus 50, minus 0.

RF and Video signals, pulse voltages or high voltage lines as well as many conductor groups for control and power circuits.

75 OHM PRECISION VIDEO CABLE

TYPICAL APPLICATIONS: Video signal transmission in color and monochrome TV studios. Provides high quality carrier of video signal with superior picture definition and eliminates problems of periodicity. Cable

is manufactured with rigid control of concentricity and all dimensional tolerances. The black polyethylene jacket is manufactured with a non-contaminating, non-migratory compound. 100% SWEEP TESTED.

								500	9.8	
								700	11.5	
Miniature Compacted conductor, polyethylene insulated, tinned copper braid shield, black polyethylene jacket. Fits RG 59/U connectors. Compacted conductor combines impedance uniformity of solid conductor and "nick-resistance" of stranded conductor.										

For Use on 8281 Only

NEW 8299 Adapter for use with PL-259 connector. 25 in a box.

PERMOHM Encapsulated twin lead for strong, clear signals on all channels despite salt spray, industrial contamination, rain, ice and fringe area reception. An excellent color, UHF or VHF cable. First choice for all weather, all channel T.V. reception								
Celluline** 8275 	20 (7x28)	Brown	.300 x .400	80%	4.6	100 200 300 400 500 700 900	1.05 1.64 2.12 2.5 2.98 3.62 4.3	50, 75, 100 coils in counter dispenser 250, 500 1000 spools
CELLULINE Maintains uniform electrical characteristics by eliminating all possible moisture between conductors. Installation is easier as no end-sealing is necessary. Losses are lower because of its lower dielectric constant (1.5). The thick outer wall of brown polyethylene protects the cable from abrasion and sun damage, and the round shape offers less wind resistance. The result is a longer lasting, more efficient line which helps maintain a strong UHF or VHF reception for black and white or color.								
8235 	18 (7x26)	Brown	.185 x .520	77%	5.0	100 200 300 400 500 700 900	.85 1.35 1.80 2.20 2.60 3.25 3.85	100 coil 500 spool
Bare copper, 2 conductors parallel, polyethylene insulated. Amateur transmitting and receiving twin lead—1KW(RF) rated.								
Weldohm†† 8230 	20 (7x28)	Brown	.072 x .400	80%	4.4	100 200 300 400 500 700 900	1.1 1.7 2.2 2.7 3.1 3.7 4.5	25, 50, 75, 100 pancake coils in a sleeve 250, 500 1000 spools
WELDOHM This cable is 1½ times STRONGER and has 2½ times more FLEX LIFE than equivalent twin lead with all copper conductors, without changing the RF electrical characteristics. Tests prove its superior resistance to the pulling, whipping, and twisting that is so important to a long lasting installation.								
8225 	20 (7x28)	Brown	.058 x .400	80%	4.4	100 200 300 400 500 700 900	1.1 1.7 2.2 2.7 3.1 3.7 4.5	25, 50, 75, 100 pancake coils in a sleeve 250, 500 1000 spools
Bare copper, 2 conductors parallel, polyethylene insulated. Brown polyethylene for the best weathering.

One conductor tinned, one bare copper, polyethylene insulated, cabled, polyethylene jacket, tinned copper braid shield, black vinyl jacket. This shielded transmission line offers low-loss signal transmission which remains unaffected by outside signals or noise fields. Recommended for RF applications requiring a cross-talk free, balanced operation.

REQUEST QUOTATIONS ON PRODUCTION QUANTITIES OF RG/U CABLES NOT LISTED.

RG/U COAXIAL CABLES

Belden's RG/U cables are manufactured and laboratory tested in accordance with existing military specifications. These cables combine low capacitance and low attenuation. The virgin polyethylene insulation assures constant electrical characteristics regardless of changes in frequency or temperature.

A variety of available jacket types include abrasion resistant polyethylene, polyvinylchloride (recommended for chemical and weather resistance) and a special non-contaminating vinyl compounded for applications above 3000 megacycles.

Typical applications: Flexible test leads, patch cords and high voltage leads (consult applicable Mil. Spec for dielectric rating of individual RG/U types). Excellent for audio applications.

Note: Maximum temperature rating of polyethylene is 80°C (176°F). The polyethylene insulation begins to soften above this temperature.

Manufactured to current Government specifications and subsequent revisions.

SWEEP TESTING

For satisfactory transmission of a signal through a cable at any frequency, Belden Sweep Tests every length of its Community TV Cables at all channels in the VHF Frequency range on an oscilloscope.

Sweep Testing, performed by trained technicians using the most modern equipment, prevents unsatisfactory program reception due to

imperfections in the cable acting as "Filter Traps" at some frequencies. The black polyethylene jackets on Belden numbers 8211, 8212, 8213, 8215, 8232, and 8233 are manufactured with a noncontaminating, nonmigratory compound specially formulated for superior weather resistance.

HIGH VOLTAGE CATHODE-RAY TUBE LEAD

Belden

magnet wire
mobile communications cable
for marine and automotive

Nylclad magnet wire combines the most desirable features of Formvar with the well-known toughness and solvent resistance of Nylon enamel.

For difficult and exacting windings, these plus values may represent the difference between low and high rejections.

Nylclad will out-perform all other A.I.E.E., Class A, film-coated wires with respect to: (1) ability to withstand winding abuse and forming operations; (2) resistance to the solvent action of insulating varnishes and all types of thinners; (3) resistance to softening at elevated temperatures; (4) solvent crazing; (5) windability.

Birnbach

INSULATING TUBING & SLEEVING

BIRACO, BIRFLEX, VINYL COATED FIBERGLASS

BIRACO PLASTIC TUBING

UL APPROVED FOR 105° C. OPERATION — MEETS MIL-I-631C SPECS.

A quality plastic Vinyl tubing designed for electronic and electrical insulation work. Has high dielectric strength, extreme flexibility, non-flammability, abrasion resistance, impervious to oil, water, alkalies, alcohol, solvents, etc., high heat stability and resistance to aging. Meets all A.S.T.M. specifications, Mil. Spec. (Type F, Form U, Grades A and C, Class 2, Category 1).

BIRACO TUBING

Put up on convenient 100' Spools or Coils.

IN STOCK

The Birnbach Line of insulated sleeving and tubing is the basic quality line designed for the rigid performance requirements of the Aircraft, Electronic and Electronic Industries.

Meets or exceeds the required MIL Specifications and ASTM and NEMA standards. We invite your inquiries on special problems and requirements.

TABLE OF PHYSICAL & ELECTRICAL PROPERTIES

BIRACO TUBING
Tensile Strength—2500 Psi (Minimum Average)

Flammability—Non-Flammable

Ultimate Elongation—340%

Recommended for Temperatures to—105° C

Cold Bend—-40° C.

Dielectric Strength .020" Wall—800 V/Mil

Varnish Baking—Good

Water Absorption

Weight Increase (1 Week)—0.1%

Funke Resistance—Yes
Oil Resistance—Indefinitely flexible when immersed in oil
Insulation Resistance—over 1,000,000 megohms.

BIRFLEX VINYL COATED FIBERGLASS TUBING

(ASTM, NEMA Grade B-B-1) MEETS MIL-I-3190B SPECS.

Quality Electronic and Electrical Tubing. It is Class B Insulation that combines the best features of the inorganic fiberglass base sleeving with heat resistant, flexible plastic insulation. The plastic compound provides the highest electrical properties, heat stability (130° C), flexibility and toughness. Meets performance requirements of specs. MIL-I-3190 B, NEMA VSI, ASTM D 372.

PHYSICAL & ELECTRICAL PROPERTIES BIRFLEX VINYL COATED FIBERGLASS

Class B

Grade B-1

Dielectric Strength.....4000 V.

Temperature Rating.....130° C.

Low Temp. Flexibility.....-30° C.

Non-Flammable

Ins. Resistance.....Over 1,000,000 MEGS.

Corrosion Resistance.....Excellent

Oil Resistance.....Good

NEW THIN WALL BIRFLON T-500

TEFLON* SPAGHETTI TUBING

Birflon T-500 Tubing is extruded from DuPont Tetrafluoroethylene Resin. Used in electronic and electrical equipment for connection of components. Its flexibility, ease of handling has established it as the best and most popular insulation sheathing. This high temperature Class C insulation does not melt and flow as the conventional thermoplastic materials. Birflon T-500 Teflon has unique electrical, chemical and mechanical properties unmatched by any other type tubing for use in applications requiring high frequencies and high temperatures. Because of Teflon's continuous service temperature of 250° C., which is more than 100° C. above other materials, the soldering technique is simplified since "Teflon" is not harmed by the hot barrel of the soldering iron — therefore, the assembly of aircraft, missile and electronic communication equipment is greatly speeded up. Thin Wall flexible Teflon Tubing can be processed easily into flexible and rigid printed circuits. As a thin, flexible insulation, it permits miniaturization and compactness of design never before possible.

TABLE OF PROPERTIES

Test	ASTM Method	Result
Tensile Strength, 73°F.	D638-52T	1500-3000 Lb./Sq. In.
Elongation, 73°F.	D638-52T	100-200%
Deformation Under Load—122°F. 1200 Lb./Sq. In., 24 Hrs.	D621-51	4-8%
2000 Lb./Sq. In., 24 Hrs.	D621-51	25%
Hardness Durometer	D676-49T	D50-D65
Heat Distortion Temp., 66 Lb./Sq. In.	D6488-45T	250°F.
Dielectric Strength, .080"	D1494-44	400-500 V/MIL
Surface Arc-Resistance	D499-48T	Sec.
Volume Resistivity	D257-52T	10 ¹⁵ Ohm-Cm
Surface Resistivity, 100% R.H.	D257-52T	3.6x10 ¹⁵ Megohms
Dielectric Constant, 60 to 10° Cycles	D150-54T	2.00
Power Factor, 60 to 10° Cycles	D150-54T	0.0003
Specific Gravity	D792-50	2.1-2.2

ADDITIONAL ADVANTAGES OF BIRFLON T-500 TEFLON*

- **ELECTRICAL:** Low power factor, low dielectric constant, high volume and surface resistivity, good dielectric strength (500 to 1000 volts/MIL) constant over wide ranges of temperatures and frequencies. Dielectric constant of 2.0 and dissipation factor of 0.0002 are lowest of any solid dielectric.
- **THERMAL:** No change of electrical properties with temperature (25°C. to 250°C.) or frequency (60 CPS to 100 MC). Class C insulation — capable of continuous service at temperatures to 250° C. Has color stability.
- **TOUGHNESS AND FLEXIBILITY:** Has high impact strength. Is tough and flexible over the broad temperature range of -90° C. to 250° C. Service range -320°F. to 500° F.
- **CHEMICAL INERTNESS:** Completely inert to all chemicals and solvents except molten alkali metals and fluorine at elevated temperatures and pressures. Non-corrosive to all metals.
- **MOISTURE ABSORPTION:** Zero moisture absorption. Completely sun and weather resistant.
- **NON-FLAMMABLE** ● **LOWEST COEFFICIENT OF FRICTION**
- **FUNGUS RESISTANCE:** Inert to all fungi growths.
- **SIZES:** Birflon T-500 Teflon Tubing available in sizes to fit B & S gauge wires. Thin wall available from stock, in sizes No. 32 thru 1/4" I.D. Additional sizes and wall thicknesses made to order.

Birflon T-500 is made from high molecular weight virgin "Teflon" and meets AMS 3651B, 3653B, 3654, 3655, MIL-C-17B and MIL-I-22129B.

NOTE: When using Teflon Tubing, use single edge razor blade for clean unpinched cut.
*Teflon® DuPont Trade Name for Tetrafluoroethylene Resin

NO EXTRA CHARGE FOR SOLID COLORS SMALL PIECE CUTTING AVAILABLE TO ORDER

BIRACO • BIRFLON HEAT SHRINKABLE PLASTIC TUBING

BIRNBACH HEAT SHRINK POLYVINYL CHLORIDE PLASTIC TUBING NEW ALL PURPOSE TUBING WITH CONTROLLED SHRINKAGE

Series SK265 covers heat shrinkable PVC polyvinyl chloride plastic tubing. This flexible, electrical insulating tubing is extruded and its expansion is arrived at thru a patented secondary operation which builds a memory into the material. The memory is activated via the application of heat at approximately 130°C (266°F). The thinner the wall, the faster the shrinkage. The heavier the wall, the

slower the shrinkage. In each case, the diameter is reduced to a predetermined size upon the application of heat and will maintain strength, insulating properties and form stability.

Material is SK265 PVC (Polyvinylchloride), flame resistant, self-extinguishing, dimensions as supplied in its expanded stage and after its recovery, with application of heat in excess of 130°C (266°F) shall

be in accordance with noted table. Longitudinal shrink shall not be greater than 10%.

- NEW ALL PURPOSE TUBING—HAS CONTROLLED SHRINKAGE.
- SHRINKS IN SECONDS.
- FORMS A PERMANENT, TIGHT MECHANICAL BOND.
- PVC (POLYVINYLCHLORIDE).

*NOTE: SK265 PVC tubing is unsuitable in contact with organic solvents.

SK265 PVC tubing has a higher resistance to oils than low density Polyethylene.

BIRFLON SHRINK SERIES TE TUBING

HEAT SHRINKABLE TEFLON* TUBING

Is a Class C material modified from polytetrafluorethylene. The tubing will shrink when heated to 621 F. (It should be heated until it turns semi-transparent, then the heating process immediately stopped. Overheating can cause splitting, therefore trial and error testing is recommended to establish the proper time and temperature for each application.) Correct procedure will result in a snug-fitting insulating wrap possessing hi-heat resistance, superior chemical resistance, and excellent electrical characteristics. The tubing is available in a full range of colors.

* Dupont Polytetrafluoroethylene

GOV'T. SPEC HOOK-UP WIRE •
MIL-W-1687D SPEC WIRE • TEFLON* CABLES

SPECIFICATION MIL-W-1687D TYPE E-600 VOLT

HIGH TEMPERATURE RATING -90° TO +250°C

Chemically inert, non-flammable, excellent flexibility, easy stripping, high dielectric strength, unaffected by fungus. Exceeds Class II insulation requirements. Unaffected by high or low temperature. Outstanding for its dependability and long life under all operating conditions indoors or outdoors. Teflon permits miniaturization and compactness in electronic designs of sub-miniature components, computers, UHF equip., slip ring assemblies, leads to hermetically sealed and potted components, telemetering equip. and guided missiles. Nom. wall .010". TFE extruded.

DESCRIPTION: Single conductor silver plated copper wire concentrically stranded and insulated with extruded or Teflon insulation.

SUBMINIATURE TEFLON* HOOK-UP WIRE

PER MIL-W-1687D TYPE ET 250 VOLTS, 200°C

This new exceptionally thin miniature hook-up wire is suitable in miniature slip ring assemblies, as interconnecting wire between wafers in micro-miniature electronic circuitry, instrument wire, medical wire, subminiature thermo-couple lead wire, strain gauge wire, etc. Provides lighter weight, greater flexibility and hi temperature resistance. Size Nos. 32 thru 20 conform to MIL-W-1687D type ET 250 volts, 200°C.

SHIELDED AND UNSHIELDED TEFLON* CABLES

TO MIL-W-1687D

DESCRIPTION: One or more conductors. Each conductor silver plated concentrically stranded copper wire, Type E Extruded TFE .010" insulation. When shielded, braided silver plated copper shield over conductor(s), 90% shield coverage. When covered, either a TEFLON* impregnated fiberglass braid or a .010" TEFLON* fused, double reversed tape jacket overall. Temperature -55° to +260°C. Voltage rating 600V. Fungus, solvent, moisture, flame, acid, alkali and oil resistant.

MIL-W-1687D HOOK-UP WIRE MIL-W-76B HOOK-UP WIRE

PLASTIC HOOK-UP WIRE SPECIFICATION MIL-W-1687B TYPE B—HIGH TEMPERATURE VINYL 600 VOLT

Suitable for general purpose wiring for miniature high temperature hook-ups in aircraft, electronic instruments, devices, etc., where excellent resistance to moisture and solvents may be required.

DESCRIPTION: One conductor stranded tinned copper with rated —55°C to +105°C high temperature thermoplastic light wall insulation. The letter "N" after Catalog Number designates clear Nylon Jacket overall. 115°C. Nom. Wall .010".

AIRCRAFT PLASTIC HOOK-UP WIRE

SPECIFICATIONS MIL-W-5086A and MIL-C-7078A (105°C Rating)

NYLON JACKET

Used where a single conductor, 600-volt insulated wire, is required. This aircraft electrical wire is resistant to effects of salt water, oils, aircraft engine fluids, alcohol, fungus, heat, cold, salt water, abrasion, meets -65°F temperature test.

DESCRIPTION: Type 1 MIL-W-5086A One conductor stranded tinned copper with plastic insulation, nylon jacket overall. Type 2 MIL-W-5086A—one conductor stranded tinned copper, plastic insulation, nylon lacquered glass braid. Color: White.

Birnbach**HIGH VOLTAGE, SILICONE HOOK-UP WIRE**
KEL-F HOOK-UP, CATHODE RAY, 105° UL**200° C. BIRSIL SILICONE RUBBER HOOK-UP LEAD WIRE 600 VOLT**

This Birsil Silicone Rubber Hook up lead wire withstands extreme temperature range and flexibility from —104° C. to +400° F. with retention of physical properties and is highly resistant to flex cracking at temperature extremes; fungus resistant; corona resistant; engineered for high-heat and hi-frequency applications; low power factor; acid-alkali-oil resistant; low dielectric constant; insulation approaching mica. Approved by U. L. but consumer must apply for Underwriter's Laboratories approval for individual product.

DESCRIPTION:

One conductor silver plated copper stranded, insulation — Monochlorotrifluoroethylene (Birfene Kel-F).

COLORS: White, Red, Green, Gray, Black, Orange, Dk. Blue, Lt. Blue, Brown, Yellow, Purple

Available in Spiral Tracers.

*Made with Kellogg Co. Kel-F or Bakelite Co. Fluorothene.

HI-VOLTAGE and CATHODE RAY CABLE

Used for 10,000, 20,000, 40,000, 60,000 volt applications as for cathode ray tubes in TV receivers, oscilloscopes and other electronic devices. Has dielectric constant of 2.7 and power factor of .002. Shielded Hi-Voltage type used to shield RF radiation in X-Ray, diathermy, medical equipment, and in transmitters.

Also multi-conductors can be formed to order twisted, shielded with or without plastic jacket overall.

Birnbach**KINKLESS TEST LEAD WIRE — SHIELDED CABLE
PHONO PICKUP WIRE — SERVICE and POWER CORDS****KINKLESS TEST LEAD WIRE**

Used with portable test equipment; as tested, leads in analyzers, oscillators, instruments; wherever extreme flexibility and limpness is required. Has excellent dielectric properties.

DESCRIPTION:

Nos. 61, 62—#20—41/36 extra flexible annealed tinned copper, stranded.

Nos. 66, 67—#18—65/36 extra flexible annealed tinned copper stranded; paper serve; 3/64" special low capacity rubber, wax finish.

Cat. No.	Spool	Size AWG	Strand	Ins.	Puncture Voltage	Nom. O.D.
61	100'	20	41/36	3/64"	20,000 Volts	.187"

66	100'	18	65/36	3/64"	22,000 Volts	.145"
67	500'	18	65/36	3/64"	22,000 Volts	.145"

Types WS-16/U Black, WS-17/U Red, per MIL-W-13169 Specification available same construction as Birnbach #67 except compound per specification.

COLORS: Red, Black

HEAVY DUTY HI-VOLTAGE TYPE**DESCRIPTION:**

Nos. 68, 69—#18—65/36 extra flexible annealed tinned copper; stranded; paper serve; 5/64" special low capacity rubber, wax finish.

Used for oscillators, analyzers, TV, therapeutic instruments, etc.; wherever an extremely flexible high voltage lead is indicated.

Cat. No.	Spool	Size AWG	Strand	Ins.	Puncture Voltage	Nom. O.D.
68	100'	18	65/36	5/64"	29,000 Volts	.210"
69	500'	18	65/36	5/64"	29,000 Volts	.210"

For longer lengths and alternate put-ups—Specify.

SHIELDED PHONO WIRE

Used where small diameter, limpness and extreme flexibility is necessary as for phono pickup arms and grid wire.

DESCRIPTION:

#1822—Single Conductor #22-7/30 Tinned Copper Strands, Vinyl plastic insulation, close tinned copper shield braided overall.

#1824—Single Conductor #24-16/36 Extremely Flexible Tinned Copper Strands, special plastic insulation, close tinned copper shield braided overall.

#1825—Same construction as #1824 except with fine cotton braid overall.

See Page 11 for miniature and subminiature shielded wires suitable for wiring phono arm from cartridge to amplifier.

TINNED COPPER SHIELD OVERALL

Cat. No.	Spool	Strand	Cond.	Size AWG	Insul.	Nom. O.D.
1824	500'	1	24	16/36	.010"	.080"

1822B	500'	1	22	7/30	.015"	.090"
1822C	1000'	1	22	7/30	.015"	.090"

COTTON BRAID OVER SHIELD

Cat. No.	Spool	Strand	Cond.	Size AWG	Insul.	Nom. O.D.
1825	500'	1	24	16/36	.010"	.095"
1825M	1000'	1	24	16/36	.010"	.095"

For longer lengths and alternate put-ups—Specify.

SHIELDED GRID LEAD WIRE

Used to reduce loss in grid lead use, also to reduce interference caused by motors, high tension wires, X-ray machines, etc.

DESCRIPTION:

#820—Single Conductor #20—10/30, #818—16/30 Stranded Tinned Copper, low loss rubber insulation, cotton braid lacquered, closely woven tinned copper shield overall.

Cat. No.	Spool	Size AWG	Strand	Ins. Under Shield	Cap./Ft. Mmf.	Nom. O.D.
820	100'	20	10/30	.085"	.70	.140"
818	100'	18	16/30	.085"	.75	.150"

For longer lengths and alternate put-ups—Specify.

7MM HIGH TENSION CABLE

Used as hi voltage leads in electronic equipment and instruments, photo electric cell leads, automotive, etc.

DESCRIPTION:

#1600—Unshielded One Conductor #16-19/29 stranded tinned copper wire, rubber insulation, cotton braid highly lacquered.

#781—Shielded Same construction as #1600 plus a closely woven tinned copper shield overall.

Cat. No.	Spool	Size AWG	Strand	Insul.	Nom. O.D.
1600	100'	16	19/29	3/32"	.275"
781	100'	16	19/29	3/32"	.295"

Used for auto and aircraft ignition systems where grounding is required for elimination of interference.

For longer lengths and alternate put-ups—Specify.

New Plastic Kinkless Test Lead Wire

New formulation vinyl compound

Insulation allows maximum flexibility; rough treatment; extreme variation in climate conditions; excellent abrasion resistance; greater temperature stability from -90°C to +115°C; fungus resistant; self extinguishing flame proof; smooth surface. Resists exposure to gasoline and oil.

DESCRIPTION: one conductor tinned copper stranded, special formulation vinyl insulation. COLORS: Black, Red, Yellow, Green, White, Blue.

Cat. No.	Size AWG	Strand.	Ins.	Nom. O.D.
1922	22	26/36	.032"	.100"
1920	20	26/34	.032"	.104"
1918	18	65/36	.032"	.125"
1916	16	65/34	.032"	.129"

Standard Package: 100', 500', 1000' spools.

For portable test equipment; as test leads for instrumentation exceeds the requirements for MIL-I-3930A type JP(PVC). It is superior to synthetic rubber spec MIL-R-6855 Class II Grade 60.

HI VOLTAGE LACQUERED WIRE

Used as primary wiring as for automobiles, tail, dashboard, horn, etc. Instrument leads, high voltage and primary voltage requirements

DESCRIPTION: One Conductor tinned copper annealed stranded, rubber insulation, highly lacquered braid, oil, heat, and moisture resistant.

Cat. No.	Spool	Size AWG	Strand	Ins.	Puncture V.	Nom. O.D.
2818	100'	18	16/30	.022"	9500	.117"

2814	100'	14	19/27	.022"	9500	.148"
2812	100'	12	19/25	.022"	9500	.171"
2810	100'	10	19/23	.031"	9500	.202"

For longer lengths and alternate put-ups—Specify.

LACQUERED HOOK-UP WIRE

Used in transformers, amplifiers, hook-ups, leads, etc. Strips easily for soldering.

DESCRIPTION:

No. 3462—#20-10/30 Single Conductor stranded tinned copper, low loss free stripping rubber insulation, cotton braid highly lacquered.

No. 3600—#18-16/30 Single Conductor stranded tinned copper, 1/32" low loss free stripping rubber insulation, rayon braid highly lacquered.

COLORS: Black, Red, Green, Yellow, Brown, Blue, White, Orange, Grey, Purple.

For longer lengths and alternate put-ups—Specify.

SHIELDED HOOK-UP & LEAD-IN WIRE

Used to prevent and reduce interference caused by motors, hi-tension cables, X-ray machines and various units radiating electrical impulses. Useful in grid circuits.

TINNED COPPER SHIELD OVER RUBBER INSULATION**DESCRIPTION:**

Single Conductor, Tinned Copper Stranded, low loss rubber insulation, closely woven tinned copper shield overall.

Cat. No.	Spool	Size AWG	Strand	Ins.	Cap./Ft. Mmf.	Nom. O.D.

Birnbach

RETRACTILE KINKLESS POWER COMMUNICATION CORDS

This series of Birnbach Coiled Kinkless Retractable Cords are permanently coiled into a spring-like shape without the use of metal springs or elastic bands. They have inherent "Recovery" properties. These Retractable Cords extend approximately six times its retracted length, returning to its exact original shape and length when released. Always as you need them and no longer, they will not kink, tangle, trail, knot or dangle on the floor or bench and cause accidents. Useful wherever cords or cables must change length or position.

RETRACTILE (KINKLESS) POWER CORDS RUBBER, NEOPRENE AND PLASTIC UL AND CSA APPROVED

DESCRIPTION: Multi conductor power cords, each conductor stranded copper, tough neoprene jacket overall UL and CSA approved. Available from stock in indicated lengths, can be cut to desired length.

RETRACTILE COILED COMMUNICATION CORD

Multi-conductors stranded communication cord No. 23 AWG. Tinned copper wire neoprene or Geon plastic jacketed. Long lengths can be cut to exact requirement. Adds product reliability. Useful wherever cords must change length or position. Nom. cond. resistance .022 ohms per linear foot, .185 ohms per retracted foot. Maximum working voltage 120 volts. Current carrying capacity 1 ampere.

RETRACTILE (KINKLESS) COILED SHIELDED COMMUNICATION CORDS

DESCRIPTION: Single and multi-conductor shielded microphone cable neoprene or geon plastic jacketed. This cable remains neat and compact with no danger of tripping or of the wire becoming entangled in equipment. Also suitable for stereo and additional speaker extensions. Shield can be digital for soldering. No. 24 AWG Str. is 41/40 tinned soft cad. copper. No. 23 has 21/38 tinned soft cad. copper. Spiral wrapped tinned soft copper shielding.

Birnbach

SUPER HEAVY DUTY RETRACTILE POWER CORDS
CONTROL • STEREO • SPEAKER CABLE

NEW Sound Cable with "VI-CON" Shield

"VI-CON" Shield is the new Birnbach conductive vinyl plastic shield that provides:

- HI-FLEXIBILITY • LONG FLEX LIFE • EASY WORKING
- 100% SHIELDING COVERAGE

No. 24 Solid Tinned ground wire used for ground termination

Cat. No.	Spool	Conds.	Size No.	Strand	Nom. O.D.

BIRNBACH RETRACTILE SUPER HEAVY DUTY

POWER CORDS

GUARANTEED
TO RETRACT FOR
4 YEARS
MILITARY
INDUSTRIAL

AWG
SIZES
12, 14, 16
3 and 4 COND.

THIS IS A
NEW CORD
and should
not be
confused
with cords
of lesser
quality.

These cords are
Bureau of Mines,
C. S. A. (Canada),
U. S. Coast
Guard, U. I. and
Army/Navy approved.

Especially desirable in the maintenance of industrial automation equipment, refrigerated trucks and trailers, mass assembly and production equipment, plane maintenance, control cable for cherry pickers, magnetic cranes, standby power distribution, heavy duty machinery.

Useful whenever and wherever a tough, more rugged heavy duty power cable is indicated as in foundries, aboard ships, reels on overhead cranes and hoists, tanks, plug-in power for refrigeration and immersion heaters, etc. Usable around salt water, chemicals and many other areas which makes the use of reels undesirable.

NEW STEREO MONAURAL WIRE AND CABLE

The following items were specifically developed for use in recording and playback equipment including all stereo cartridges; ceramic, magnetic, crystal and tone arms. Designed for extremely low hum and noise pickup. Individual conductors are #32 AWG, 7 strands #40 AWG tinned copper, .010" wall. Special formulation PVC + 80° C to -40° C operation allowing ease of stripping and soldering. When shielded #40 AWG tinned copper, 30% coverage for maximum flexibility, minimum weight and diameter and for quick pushback.

Microphone Cables with Birnbach's NEW

"VI-CON" SHIELD

HI-FLEXIBILITY • LONG FLEX LIFE • EASY WORKING
This series of cable is Birnbach's new outstanding shield in combination with vinyl plastic that is conductive thereby providing 100% shield coverage. Easy handling; lighter in weight than comparative types; extremely flexible; #24 Stranded Bare Tinned Wire is used for grounding termination; this is in continuous contact with the "Vi-Con" Shield.

4800/19 and 4800/27 is #22 strand 7/30 with .015 wall.

PLASTIC MICROPHONE CABLE

Designed to stand up under physical abuse and is resistant to oil, moisture and aging for long life. These cables have low capacitance, high insulation resistance and low attenuation at audio frequencies. Will not stain or mark.
#1839 is used for high impedance microphone, lapel, contact, crystal, ribbon, velocity and Hi-Fi interconnecting cable.
#1840 is used for high impedance lapel microphones.
#1841 is used for crystal, ribbon and other impedance microphones.

Above recommended for Hi-Fi installations because of low loss and low capacitance.

PLASTIC — ONE-CONDUCTOR MICROPHONE CABLE

DESCRIPTION:

Single Conductor Stranded

3 strands #33 copper tinned, and 4 strands #33 (steel-tinned 1840 and 1841) cellulose yarn braid, Polyethylene insulation, tinned copper shielded braid, with chrome vinyl plastic jacket overall.

1846/10	500'	10	20	26/30	60MMF	.375"

CONDUCTOR COLOR CODE: 1-White, 2-Black, 3-Red, 4-Green, 5-Yellow, 6-Blue, 7-Brown, 8-Orange, 9-Purple, 10-Slate

PLASTIC INTER-COM CABLE

4 CONDUCTORS (2 Shielded — 2 Unshielded)

Widely used for wiring from station to station where a shielded twisted pair is indicated in order to eliminate cross talk.

DESCRIPTION:

No. 925 — 4 conductors #22 7/30 stranded tinned copper, vinyl plastic insulation color coded, tinned copper shield over one pair (2 cond.) One pair (2 cond.) unshielded. Tubed gray vinyl jacket overall.

Cat. No.	Spool	Conds.	Size AWG	Strand	Insul.	Nom. Jacket	NOM O.D.
925	500'	4	22	7/30	.010"	.020"	.310"

3 CONDUCTORS (1 Shielded — 2 Unshielded)

Widely used for wiring from station to station where a single shielded conductor is indicated in order to eliminate cross talk.

DESCRIPTION:

No. 924 — 3 conductors #22 7/30 stranded tinned copper, vinyl plastic insulation color coded, tinned copper shield over one conductor, tubed gray vinyl jacket overall.

Cat. No.	Spool	Conds.	Size AWG	Strand	Insul.	Nom. Jacket	NOM O.D.
924	500'	3	22	7/30	.010"	.020"	.205"

CONDUCTOR COLOR CODE: Black/red unshielded White shielded

ARMORED INDUSTRIAL CABLE

Used for P.A. systems on speaker extensions, oil burner installations, auto wiring, etc.

Two Conductors Parallel #18 16/30 Stranded Tinned Copper, rubber insulation, lacquered cotton braid color coded, spiral galvanized steel armor overall.

Cat. No.	Spool	Size AWG	Strand	O.D.

SHIELDED PLASTIC JACKETED CABLE BRAIDED COPPER SHIELD

Designed for P.A. and sound systems, installations in schools, hospitals and institutions, transmitters, recording studios, electronic circuits, etc. The construction of the shield allows ease of pigtail soldering and the shield provides additional strength for the cable.

DESCRIPTION: Each conductor tinned copper, polyvinylchloride insulation color coded, twisted, braided copper tinned shield, gray polyvinylchloride jacket overall. Cables suitable for outdoor installations.

St. Put-up: 500 ft., 1000 ft.

SHIELDED BROADCAST AUDIO CABLE

Designed to provide maximum performance on all equipment. Conductors twisted correctly assures quiet, clear operation which eliminates interference and cross talk. Used by Broadcast studios, for P. A. and sound systems, rack wiring, etc.

DESCRIPTION:

#938—#22 Solid Tinned Copper Conductor, enameled, heavy cellulose acetate yarn wrap, cotton braid waxed; cable with #22 AWG solid tinned copper wire laid parallel to twisted pair under tinned copper braid shield; tubed-on Vinyl plastic jacket overall.

#939—#22-7/30 Stranded Tinned Copper, plastic insulation, color coded, twisted, copper braid shield, tubed-on Vinyl plastic jacket overall.

#940—2 Conductors #22 solid plastic insulation, color coded, twisted with #22 AWG solid tinned copper ground wire under tinned copper shield with vinyl plastic jacket overall.

#940/1 same construction as #940 however with tinned copper spiral wrapped shield.

#822 and #824 have solid enameled copper wire, cotton wrap, cotton braid waxed twisted pair, bare copper braid overall.

HEAVY DUTY SERVICE CORD

CSA APPROVED — (HEAVY DUTY) — UL APPROVED

Used for heavy duty replacement on refrigerators, washing machines, machinery, tools and electronic devices.

DESCRIPTION:

Two and Three Conductors, Stranded Bare Copper, cotton serve, rubber insulation, jute filler, cotton wrap, tough rubber jacket overall, molded plug one end, free end stripped and tinned for easy attachment—Hank.

No. 346 and 347 Same as above with 3 prong plug.

BIRNBACH COMMUNITY TV COAXIAL CABLES

New, developed for industry where weight, lower attenuation and superior performance are paramount. New cellular polyethylene construction offers low loss and light weight to community TV use. Note supported numbers—ideal for long lengths and self supporting. Hi-molecular weight 'poly' jacketing assures longer life and all weather conditions.

C=Copper
CC=2 Copper
CW=Copperweld
PE=Polyethylene

LACINE CORD AND TAPES • CABLE AND TUBING CLAMPS • WIRE TIES

LACING CORD/TAPE TO MEET MIL-T-713A TYPE P* FLAT BRAIDED LACING TAPE

NYLON

Flat braided Hi-Tenacity Nylon Fiber impregnated with (MW) microcrystalline fungicidal wax. Engineered to stay flat. Distributes stress evenly over a wide area. Resistant to fungus, flame, abrasion, acids. Will not cut or damage insulation. Has strength, toughness and stability.

Put up on 500 yards per tube.

NYLON CABLE AND TUBING CLAMPS MEETS MIL-P-20693A

MADE OF DUPONT NYLON FORMULA FM 10001 (Zytel 101)

Used as a clamp, strain relief, clip hanger, fastener, strap, these nylon cable clamps are light and tough. Have smooth, non-abrasive surfaces, rounded edges will not chafe conductors or cause shorts or grounds in cable. Insoluble in solvents, oils, gasoline, alcohol, hydraulic fluids, alkalis, acids. Temperature resistant from -60°F to +300°F. Do not support combustion. Moisture and heat resistant. Inside matte finish surfaces prevent slippage under vibration and are self aligning when tightened by screw. Snaps onto cable. Meets MIL-P-20693A specs. Fungus resistant.

ETHYL CELLULOSE PLASTIC CABLE & TUBING CLAMPS

Recommended for general use. They withstand are, shock and vibration. Moisture and corrosion. This tough, lightweight and durable clamp withstands temperatures from -60° to +175°F. Approved 7-21-44 Army-Navy aeronautical AN-742. Approved for inside-outside, hi-tenness, primary and secondary. Standard pkg. 100, 1000.

PUSH BUTTON WIRE TIES (PAT. PENDING)

Push Button Wire Ties useful for harnessing wires fast; saves labor; eliminates screws and usual time required for string tying. Measures 4 1/2" in length and is adjustable to 30 different diameters. Insert the tie in the hole for anchoring; wires can be replaced or added by loosening the tie and pulling tight again. Constructed of tough Polyethylene; chemically inert, heat resistant; breaking point 45 to 95 lbs. Push button ties are designed to fit a .250"-.285" hole in a .031 to .140 thick panel.

PERMALINE TV TRANSMISSION LINES

It is now over ten years since Columbia introduced Permaline television transmission line, the only television wire available today with a written guarantee against deterioration. In all this time we have yet to replace one single foot of this wire for reasons of deterioration, proving beyond all doubt that Permaline insulation has no equal for long life under the most severe atmospheric conditions.

Permaline is a high molecular weight polyethylene containing a very small percentage of carbon black to provide maximum resistance to the ultra violet rays in sunlight which has been proven the chief factor in the deterioration of ordinary television wire.

Electrical characteristics of Permaline are very similar to brown polyethylene television lines, but as there is no deterioration attenuation remains constant instead of increasing as is the case with brown polyethylene which becomes brittle and cracks. Remember it is not how THICK but how GOOD!

25 YEAR WARRANTY

80 Mil 20 Ga. Str. PERMALINE Television Transmission Line
.080 x .395

Highly resistant to:

- SUNLIGHT • MOISTURE • FAR BELOW ZERO TEMP.
- CHEMICAL FUMES • OIL REFINERY FUMES • SALT AIR & SALT SPRAY
- ABRASION

Tensile Strength — 2300 lbs. per Sq. In.

Separate Warranty Certificate with every spool or package of Permaline Television Transmission Line.

PERMALINE VHF-UHF TV TRANSMISSION LINE

Since the introduction of this cable in May, 1956 it has been proven beyond any doubt that this cable has no equal for reliability over the entire range of VHF and UHF channels under the most adverse conditions, such as salt spray, sunlight, extremes of heat and cold, stress cracking, chemical fumes, whipping in high winds, etc. In many areas throughout the country where other cables have failed due to salt deposits on transmission lines, this cable has given satisfactory reception at all times. Foam polyethylene tubes provide excellent low loss dielectric and require no sealing. 22 gauge solid copperweld conductors mean high tensile strength so necessary where whipping of cable is a problem. Heavy duty jacket of high molecular weight BLACK PERMALINE POLYETHYLENE is a protection against all hazards. We believe this is the finest all-purpose television transmission line available today. Impedance is 270 ohms, nominal attenuation is 3.2 D/B at 500 M/C and 4.6 D/B at 900 M/C. Cable size is approximately .295 x .402.

PERMAFOAM LOW LOSS COAXIAL CABLES

PERMAFOAM is a new type of coaxial cable for television systems, communication work, and all other co-ax applications. A foam polyethylene dielectric replaces the conventional solid polyethylene thus providing for lower capacity and attenuation. In fact, attenuation is approximately 25% lower than standard coaxial cables of same type. Overall jacket is our PERMALINE high molecular weight polyethylene. This foam polyethylenating jacket is unaffected by salt air, chemical fumes, damp rot, fungus, acids, alkalis, etc., and is remarkably resistant to all extreme weather conditions. Moisture resistance is so high that this insulation is now used on submarine cables. Will withstand severe temperature extremes and is immune to the deteriorating effects of sunlight and other ultra violet. Note: In addition to the PERMAFOAM cables listed below, any other RG U cable is available with a foam polyethylene dielectric on special order.

FLEXFOAM ULTRA LOW CAPACITANCE MICROPHONE CABLES — EXCLUSIVE WITH COLUMBIA

Another Columbia first is a complete line of microphone cables with capacity as much as 35% lower than the best regular microphone cables available today. This drastic lowering of capacity has been made possible by the use of foamed polyethylene as the inner dielectric instead of solid polyethylene as normally used. This low capacitance means that lengths of microphone cable can be increased as much as 50%. These cables are also ideal for Hi-Fi and high quality sound work because of the extremely low attenuation, particularly at the higher audio-frequencies. The use of a special flexible vinyl as an outer jacket provides flexibility practically as good as rubber yet has much greater abrasion resistance. Color—Grey.

Also available in high gloss gleaming white jackets.

COLUMBIA SUPER-FLEX ULTRA FLEXIBLE FOAM COAXIAL CABLES

We believe Super-Flex Coaxial Cables are the finest available today — not only because of their appearance and flexibility, but because they actually out-perform any similar type of coaxial cable in use today. Cables feature High Gloss Non Contaminating Jackets and have a primary insulation of foam Polyethylene to reduce attenuation as much as 25% over regular types of coaxial cables. In addition to the above features Super-Flex Coaxial Cables will not become rigid in severe cold. Can be used with standard connectors. Ideal for citizens band and amateur use. Perfect for master television systems due to the wide range of colors available. Standard stock colors are: Black-White-Silver or Beige. Other colors to special order with a minimum of 5000 ft. of a color.

SHIELDED TEFLON CABLES MIL-W-16878

Each conductor stranded silver plated copper Type E extruded Teflon .010" insulation—90% braided silver copper shield, also supplied with either a Teflon impregnated Fiberglass braid or Teflon fused tape overall jacket.

Temperature rating -65°C to $+260^{\circ}\text{C}$. Voltage rating 600 volts.

 INTER COMMUNICATING WEATHER-PROOF					
5566	2 Condr.	22 Solid	.015	Bare copper .015 rubber insulation with a black cotton braid weatherproof finish. Conductors coded for easy identification. Ideal for exterior or interior communication installations.	.181x.203

TELEPHONE AND COMMUNICATION CABLE DIRECT BURIAL TYPE FULLY COLOR CODED

GENERAL APPLICATION AND ADVANTAGE
APPLICATION: Communication and Telephone Cable for use in direct burial installations provides a high quality product similar to that used for aerial and duct systems, but with the addition of protective armoring. This minimizes the possibility of damage to the cable from rodents and insects and, correctly installed, reduces the dangers to the cable from sharp stones and other hazards of underground burial installations.
ADVANTAGE: The lightweight, but rugged construction of direct burial Communication and Telephone Cable permits fast and economical underground installation of communication systems with the assurance of dependable and enduring service. This is made possible through utilization of the same high quality polyethylene compounds that are used in its counterpart for aerial and duct type installations, with the added protection of copper armoring tapes and a durable, high-molecular weight, polyethylene jacket.

SPECIFICATIONS

Solid bare annealed copper 22 Awg. gauge conductors; thin wall, color coded, polyethylene insulation; conductors twisted to form pairs with symmetrically varying lays to minimize cross-talk; cabled (for 6 thru 50 pairs) by stranding pairs in concentric layers, or (for 75 thru 400 pairs) by stranding pairs into concentrically formed units, which are in turn cabled to form the complete assembly; non-hygroscopic binder tape furnishing high dielectric strength between shield and individual conductors; continuous copper shielding tape; high-molecular weight, polyethylene jacket.

MAGNET WIRE

Popular, profitable specialty wire packaged for easy selling in radio-electrical, department, specialty and hardware stores. Wide variety of sizes and insulations. Keeps stock in perfect order, always saleable. Supplied on Spool as shown and in Heavier Weights for whatever weight desired. Here is a handy and convenient way to stock small quantities of wire. It prevents wire from matting or tangling.

BARE NICKEL CHROMIUM WIRE

No. 2000

Recommended for electrical heating appliances and other devices where the highest quality in performance is required, whose operating temperatures do not exceed 1850° F. Particularly suited for heavy duty rheostats and controls which require compact resistance.

DABURN**DABURN ELECTRONICS & CABLE CORP.**

WIRE • CABLE • TUBING • MIL/COMM • SWITCHES • ELECTRONIC HARDWARE

DAFLEX PLASTIC TUBING
105°C POLYVINYLCHLORIDE (PVC)

Specifically compounded vinyl resins for superior all around performance. UL approved for 105°C, conforms to Spec MIL-I-631D Type F, Form U, Grades A and C, Class 2, Category 1. Resistant to heat, oil, water, chemical corrosion, fungi and aging. Very hi abrasion resistance. Will retain its flexibility. Suitable for covering and protecting wires and cables. Designed for electrical, electronic and aircraft applications. Non-flammable. Meets ASTM-D876, ASTM-D922.

DAFLEX VINYL COATED FIBERGLASS TUBING 130°C
MEETS MIL-I-3190B SPECS (ASTM, NEMA GRADE B-B-1)

DAFLEX 130 is recommended for continuous temperatures up to 130°C. Constructed to provide a tough, flexible, heat resistant tubing. Made from an inorganic fiberglass base sleeving with heat resistant plastic coating, extremely flexible tough plastic insulation. Will not support combustion. Meets MIL-I-3190B, NEMA VSI ASTM D372.

DAFLON TEFLON* SPAGHETTI TUBING

Daflon 500 and 550 tubing is extruded from Dupont tetrafluoroethylene resin and is unmatched by any other tubing for use in applications for hi frequencies and hi temperatures. Rated for continuous operation of 250°C it retains its toughness and flexibility thruout. Has high resistance to fatigue and stresses. Will not shrink back during soldering operation. Non-flammable, flexible, it permits miniaturization of design and compactness. Lowest coefficient of friction. Inert to all fungus growth. Conforms to MIL-I-22129C Spec.

DAFLEX - DAFLOX HEAT SHRINKABLE TUBING**IRRADIATED POLYOLEFIN TUBING**

Shrinkage Ratio: 2:1 (50%)

DAFLEX SH-275 (colored) and **SH-270** (clear) Series are an irradiated, thermally stable Class B (130°C) material extruded from specially formulated polymers. Comes thru in expanded sizes. It insulates, jackets, splices, encapsulates, weatherproofs components, connectors, cables or other irregular shapes.

When exposed to heat (235°F) the tubing shrinks 50% in diameter, 5% longitudinal contraction, forming a tough, smooth insulating covering with excellent chemical and oil resistant properties and electrical characteristics. Meets or exceeds requirements of MIL-I-23053 (WEP) Class I.

HEAT SHRINKABLE TEFLON* TUBING**DAFLOX SH-400 (FEP)**

Made with Modified TEFLON* FEP will shrink over inserted objects upon exposure to moderate heat. Heretofore, many joints, parts, components, devices could not be protected because of hi temperature required for shrinkage; Can now use this FEP TEFLON* which has a continuous service temperature of 400°F. Will shrink at 300°F. Supplied in natural color. Complete shrinkage at 350°F. Now, many heat sensitive products can use the permanent protection of TEFLON.* Will not burn or support flame, long lengths available. Extruded.

TUBULAR BRAID PER MIL SPEC QQ-B-575

Tinned copper shielded braid mfd completely round per Mil Spec QQ-B-575. Maintains its round configuration. Shielding coverage is 95% or more. Used in military applications where maximum shielding is required against electrostatic interference. Useful against mechanical abrasion and stresses for cables — as grounding cable.

NOW**BUILD YOUR OWN PRINTED CIRCUIT**with versatile **VERO** board*

FOR INDUSTRY, GOV'T., SCHOOL USE
FOR THE LAB, TECHNICIAN,
EXPERIMENTER, RESEARCHER, DESIGNER

NOW make your own printed circuit board faster—cheaper with the versatile Daburn-Veroboard. There is no time lost. As easy as 1-2-3, you have a finished printed circuit. Components are easily inserted and soldered. Components can be added or removed—circuits modified or changed easily and quickly by using the Daburn-Veroboard, the spot face cutter and component jig.

Available from stock in two sizes. Boards can be cut easily by scoring to conform to your exact requirement.

DABURN-VEROBOARD NO.	SIZE OR TYPE	RESALE NET EA.

STANDARD PKG. 6		
IN STOCK FOR IMMEDIATE SHIPMENT		

ALL YOU NEED IS—**• VEROBOARD**

Available 4.8" x 18"
and 4.8" x 5.8"

• SPOT-FACE CUTTER—

To break copperstrips and form a circuit.

• DESIGN SHEET—

Printed replica of the VEROBOARD for layout.

• VERO COMPONENT JIG—

Accurately forms component leads to fit VEROBOARD.

4.8 x 18 full inches—cut off the size you need. Good for 5 or more circuit boards.

Used by design engineers in 18 countries VEROBOARD gives you a finished printed circuit—not just a breadboard.

No expensive terminals and tools required—just insert components and solder.

Add or remove components—modify or change your circuits—FREELY!

Over 4000 holes and continuous parallel strips form the logical printed wiring board for all applications.

Ideal for any circuit—amplifiers, intercoms, IF, RF, transceiver, diode cards, experimental or transistor radio.

*Patented

STD. PUT-UP: 500 Ft., 1000 Ft.

CONDUCTOR COLOR CODE: 1—Black, 2—Red, 3—White, 4—Green.

PLASTIC INTER-COM CABLE

Station to station wiring to eliminate cross-talk. Each conductor tinned copper stranded, color coded PVC, T.C. braid, shield where indicated, paired, grey polyvinylchloride jacket overall.

2935 — Suitable for unbalanced systems.

2935/4 — Suitable for balanced systems.

2935/5 — Suitable for coin operated phonographs.

OPERATING VOLTAGE: 350 Volts.

OPERATING TEMPERATURE: -20°C to +60°C.

DABURN Cat. No.	Conds.	Size	Strand	No. Cond. Shield	Nom. Wall	Nom. Jacket	Nom. O.D.

CONDUCTOR COLOR CODE:

2935 — White shielded; Black, Red — unshielded

2935/4 — Black, White — shielded; Black, Red — unshielded

2935/5 — Black, White, Red — shielded; Black, Red — unshielded.

**SHIELDED
PLASTIC MICROPHONE CABLE**

Will withstand abuse and is resistant to oil, moisture, aging. Have low capacitance. Hi insulation resistance and low attenuation. Will not strain or mark.

2772 — For hi impedance microphone

2774 — For hi impedance lapel mikes.

2774 — For crystal, ribbon, etc. Mikes all are suitable for hi-fi interconnecting cables.

OPERATING TEMPERATURE: -20°C to +60°C.

PLASTIC — ONE CONDUCTOR SHIELDED CABLE

DAFLEX® ELECTRONIC LACING CORDS AND TAPES

LACING CORD-TAPE TO MEET MIL-T-713A TYPE P*

NYLON FLAT BRAIDED LACING TAPE

Nylon fiber flat braided impregnated with MW microcrystalline fungicidal wax. Stays flat. Designed to create a wider contact to distribute the stress. Flexible. Won't slip when knotted. Resistant to fungus, flame, abrasion, acids.

DABURN No.	Color	Class	Nom. Width	Nom. Thickness	Tensile Strength	Standard Put-Up Tubes
2035	Natural White	—	.200"	.014"	150 lbs.	500 yd.

NYLON CABLE CLAMPS**MADE OF DU PONT "ZYTEL" 101 NYLON RESIN**

Meets MIL-P-26093A and MIL-P-17091A Amend. 2. Light and tough these nylon cable clamps are used as a clamp, strain relief, clip hanger, fastener or strap. Smooth non-abrasive surfaces, rounded edges will not cause shorts or grounds in cable. Insoluble in solvents, gasoline, oils, hydraulic fluids, alcohol, acids, alkalis. Temperature range -60°F to +300°F. Does not support combustion, inside matte finish. Prevents slippage and is self aligning. Snaps on cable. Meets MIL-P-26093A specs. fungus resistant.

DABURN PUSH BUTTON WIRE TIES

Push button wire ties for harnessing wire. 4 1/2" in length, each tie is adjustable to 30 different diameters. Made of strong polyethylene, it is inert chemically and heat resistant. Breaking strength 45 to 95 lbs. After the tie is placed in hole for anchoring, and wires can be replaced or added by loosening tie and pulling tight again. Designed to fit .250" x .265" hole in a .031" to .140" thick panel. Material conforms to Spec. LP590.

Beta Spiroband

Reduces inventory costs • Three standard materials — natural polyethylene, ultraviolet resistant, fire resistant • Three diameters, each for application to a wide range of bundle sizes.

MATERIAL SPECIFICATIONS

Natural Polyethylene: (grade specification shown in table at right) color is clear.

Ultraviolet Resistant: basically same as above with additives to withstand ultraviolet rays which color material black.

Fire Resistant: as above, but with additive which colors material bone white.

ELECTROCRAFT COMPONENTS

ELECTROCRAFT PLASTIC CABLE CLAMPS

Electrocraft Cable Clamps are used for fastening cables, harnesses, tubing, etc. Lightweight, durable, with excellent electrical and mechanical properties. Two materials: (1) Ethyl Cellulose, for normal industrial and commercial uses—where temperatures range from -40°F . to 185°F . (2) Nylon (Zytel), for extreme durability and high resistance to temperature (-60°F . to 300°F .) and most chemicals.

ETHYL CELLULOSE CABLE CLAMPS

Transparent (light yellowish) plastic. Meets specifications AN742. Plastic thickness is .063".

NYLON (ZYTEL) CABLE CLAMPS

Natural color (translucent white) Nylon. Thickness is .050" on $\frac{1}{2}$ " dia. and smaller clamps, .060" on $\frac{3}{4}$ " and larger.

34-460-M	10"	33.85

SPECIAL CABLE TIES

Special sizes and colors, even styles of cable ties are available in large quantities. Write or call your specifications today.

ELECTRONIC COMPONENTS

(A) **G-C INSULATING CAMBRIC**—Dry yellow varnished cambric for field coils, transformers, chokes, resistors, motors, etc.
Cat. No. 549 .010"—Roll over 210 sq. in. Net \$.78

(B) **G-C LAMINATED PHENOLIC PLASTIC PANELS**—Black laminated panels. $\frac{1}{16}$ " thick stock. Black color.
Cat. No. 590 6"x6"x $\frac{1}{16}$ " Net \$.42
591 6"x12"x $\frac{1}{16}$ " .82
592 12"x12"x $\frac{1}{16}$ " 1.58

(C) **G-C FIBEROID FISH PAPER**—Fish paper has many uses around the shops for repair jobs where electrical insulation is required.
Cat. No. 560 .010"—240 sq. in. roll Net \$.50

(D) **G-C BATTERY CONNECTOR STRIP**—Used for connecting 67½ volt "B" batteries, such as Eveready 455, 466; Burgess XX30, XX45.
Cat. No. 8115 Net \$.18

(E) **G-C SHIELDED PHONO PICK-UP WIRE**—Handy packages of shielded phono pick-up wire, very handy for new installations or replacements.
Cat. No. 1738-E Envelope Net \$.38

(F) **G-C AC-DC INDOOR ANTENNA WIRE**—Antenna lead wire for indoor type AC-DC sets. Flexible copper wire covered with brown plastic insulation.
Cat. No. 840 25 Ft. coil Net \$.37

(G) **G-C 300-OHM LINE PROTECTIVE TUBING**—Clear plastic tubing will fit over 300-ohm flat lines and will protect the line from grounding and rubbing on corners of buildings, eaves, etc. It actually protects and waterproofs the line.
Cat. No. 625 Box of 8 ft. Net \$.75
626 250 ft. coil 15.90
627 1000 ft. 59.33

(J) **G-C GENFLEX PLASTIC TUBING**—High grade extremely flexible plastic tubing for radio and electronic insulation work. Highly resistant to cold or heat. High dielectric strength, average 9,000 volts. Colors: Black, Red, Green and Clear (Specify Color).
Cat. No. 603 18 B-S Gauge, .042 I.D., 20 ft. Package Net \$.82
605 16 B-S Gauge, .063 I.D., 20 ft. Package Net \$.82
607 14 B-S Gauge, .066 I.D., 20 ft. Package Net \$.82

609 12 B-S Gauge, .085 I.D., 20 ft. Package Net \$.82
611 10 B-S Gauge, .106 I.D., 15 ft. Package Net \$.82

613 8 B-S Gauge, .133 I.D., 15 ft. Package Net \$.82
616 6 B-S Gauge, .166 I.D., 10 ft. Package Net \$.82

617 4 B-S Gauge, .208 I.D., 10 ft. Package Net \$.82
620 2 B-S Gauge, .263 I.D., 10 ft. Package Net \$.82

G-C PLASTIC TUBING KITS—Handy kits of assorted colors and sizes. Ideal for experimenters and servicemen.
Cat. No. 635 Kit of 25 ft. assorted. Sizes 18 to 10 Genflex Tubing. Net \$.82

(L) **G-C ASSORTED SPAGHETTI KIT**—An assortment of 7½" lengths of spaghetti sleeving, 26 lengths to the kit. Sizes include from No. 17 wire to ¾" I.D.
Cat. No. 550 Kit of 26 Lengths. Net \$.40

(M) **SPAGHETTI AND SLEEVING ASSORTMENT**—A variety of sizes and colors are included of high grade varnish tubing. Put up in attractive box.
Cat. No. 551 Net \$.90

(N) **G-C SPAGHETTI IN BOXES**—Best grade varnished tubing put in convenient 20-ft. lengths. Will fit wire from No. 12 to No. 18. Colors: Black, Red, Yellow, Green and Blue.
Cat. No. 499 Net \$ 1.67

(O) **G-C RADIO SPAGHETTI**—High grade spaghetti for radio-television work. Average dielectric strength 4000 volts. Very flexible. Smoothly coated with best grades of varnish. Material is approved by A. S. T. M. Colors: Black, Brown, Red, Green and Yellow (Specify Color). 30" Lengths.
Cat. No. 500 No. 20, fit 20 wire Net \$.15
503 No. 17, fit 18 wire \$.17
506 No. 14, fit 14 wire \$.17
508 No. 12, fit 12 wire \$.17
512 ½" I.D. \$.23
515 ¾" I.D. \$.25
518 1" I.D. (resist. size) \$.40
522 ¾" I.D. Red & Black \$.73
523 ½" I.D. Red & Black \$1.03

(A) **G-C STREAMLINE ATTACHMENT CAP**—Made of rubber. Brass blades. Spring type. U.L. approved.
Cat. No. 865 Net \$.23

(B) **G-C SPRING ACTION CAP**—Heavy-duty type. Made of rubber. Brass blades. U.L. approved.
Cat. No. 861 Net \$.17

(C) **G-C SPRING ACTION CAP**—Flat plastic type. Brass blades. U.L. approved.
Cat. No. 860 Net \$.17

(D) **G-C ANGLE PLUG**—Plastic angle plug that assembles in a jiffy. It has no screws and requires no soldering.
Cat. No. 8360-E Brown Net \$.30
8361-E Ivory .30

(E) **SERVICEMAN'S CHEATER CORD**—Special "cheater cord" for extending the standard interlock safety cord supplied with the TV set.
Cat. No. 8948 Net \$.87

(F) **INTERLOCK CABLE CORD**—Replacement cord for RCA, Philco, G-E, Admiral and others.
Cat. No. 8200 Reg. TV Cord Net \$.48
8201 Spec. Zenith Cord .70

NEW G-C INSULATING TUBING OF TEFLON*

—Exceptionally tough and flexible. Withstands temperatures from 450° below zero F. to 500° above zero F. Will not melt near solder joints. Outstanding dielectric properties—zero moisture absorption. Chemically inert. Completely weatherproof. Wires can be inserted much more easily than in any other tubing.

*Registered trademark Du Pont Co.

In Stock MIL-SPEC

Multiple Conductor Cables!

National Wire & Cable Corporation manufactures a complete line of multiple conductor control cables. Conductors are of tinned copper strand with primary insulation for use up to 105°C per MIL-W-16878D Type C. Insulated for 1000 volts working voltage. Conductors are color coded using 10 standard basic colors, plus spiral tracers on white per MIL-STD. 122.

All conductors are planetary cabled and contra-helically laid with a Mylar tape serve over the cable bundle. The overall jacket is a 105°C black Thermoplastic or may be Neoprene to MIL-R-6855 Class 2 Grade 60 specification.

SHIELDED CABLES

National Multiple Conductor SHIELDED CABLES are to the same specifications as above with addition of tinned copper braided shield over cable complex with 85-90% coverage to MIL-C-7078A. STANDARD PUT-UPS: 500 ft. and 1000 ft. No-deposit reels.

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage:	Greater than 8000 volts AC RMS, 60 cps.
Capacitance:	Nominal capacitance from a wire to all else in the cable ranges from 40 to 65 mmfd per ft., @ 1000 cps; dependent on cable construction.
Insulation Leakage Res.:	200. megohms/1000 ft. min. at 500 VDC from any conductor to all else in cable.
Sheath Leakage Res.:	10. megohms/1000 ft. min. at 500 VDC from overall shield through sheath to outside world.
Useable Temp. Range:	Suitable for continuous use from +105°C to -55°C.
Cold Bending Capability:	All cables are suitable for flexing to a circle diam. of approx. 6 cable diameters from +105°C to -20°C; Recommended flex diameter should be greater than 20 cable diam. for flexing at -40°C, or for continuous flexing service to -55°C, specify our neoprene sheath, in lieu of plastic sheath.

MULTI-CONDUCTOR STOCK CABLES

Conductor sizes 22, 20, 18, 16, 14 & 12 gauge. 22 AWG is 7 strand. All others 19 strand.

SIZES: #24 through 2½" Diam.

PUT-UP: #24 to ¾" on spools, completely sealed in plastic wrapping. Size ¾" to 2½" in tied coils.

SPEC. Vinyl +105°C to -32°C Type: MIL-I-631C, ASTM-D922 Grade C

GRADES: Vinyl + 80°C to -55°C Type: MIL-I-7444B, MIL-I-22076

Teflon +250°C to -55°C Type: MIL-I-22129B (#20 to #2)

NATIONAL OPENLINE

DESIGNED FOR COMMERCIAL TV DISTRIBUTION SYSTEMS AND RF POWER TRANSMISSION

Specifications: two inch spacing between conductors . . . 12 gauge copperweld . . . 470 ohm impedance . . . attenuation: 150 mc 0.25 DB PER 100 FEET, AT 30 mc 0.1 DB PER 100 FEET. Velocity factor 0.975 . . . copperweld steel for maximum strength and electrical stability, and to insure permanent uniform performance . . . Spreaders are brown polystyrene, spaced at average five foot intervals, staggered slightly to avoid spurious resonances.

Also 1" & ½" copper line for TV leadin Formvar coated.

COMPLETE WIRE AND CABLE INVENTORY ALWAYS AVAILABLE FOR IMMEDIATE SHIPMENT!

National Wire and Cable Corporation maintains one of the largest and most complete stocks of electronic and aircraft wire and cable in the nation. Total footage of floor stocks exceeds 50 million feet!

Your immediate source for "MIL and Jan-Spec" wires, coaxial cables and vinyl sleeving.

Special color coded, shielded and jacketed combinations of hook-up wire and multi-conductor cables can be made to your specifications and delivered promptly without delay.

Saxton No. 1126,
 Net Price20 ea.

Especially designed for use with open line transmission wire installations. Tighten screws after pulling wire taut. For use as spacer, partially tighten set-screws. This permits movement of wire in the slots and avoids potential wire breaks. Use outside slots for 600-ohm wire. The "Tappee" Stand-off Insulator is good for community installations where random spacing of open line is desirable to avoid tuned circuits. Ideal also for use as anchor point or spacer for "fence wire" installations. "Tappee" permits inexpensive, time and labor-saving, trouble-free installations, and is made for use with No. 12 thru No. 18-gauge wire. Hardware constructed of double-dip galvanized steel; block is high impact polystyrene.

SELF-SERVICE WIRE DEPARTMENT

Choose the floor display that best suits your operation, for increased sales and greater profit. Saxton packaged wire products stay clean, neat, saleable . . . save on storage and selling time. See your Saxton representative for details.

THE "CONCORD" Group

Attractive heavy duty rotating floor display available in three product groupings. Four-sided modern design. Dimensions: 27-inches wide x 63" high.

Saxton No. 8000, 8100, 8200
Retail value, approx. \$460.00

THE "LEXINGTON" Group

Self-selling island floor display built for long use complete with a wide assortment of popular Saxton wire products. Takes up little space, offers big returns. Dimensions: 2-ft. wide x 4-ft. high. Saxton No. 200
Retail value, approx. \$430.00

THE "MADISON" Group

A wide variety of Saxton wire products on a compact, sturdy island floor display. Dimensions: 4-ft. wide x 4-ft. high, including side wings. Saxton No. 375
Retail value, approx. \$750.00

THE "REVERE" Group

A complete wire products department on one space-saving island floor display. Has side wings and bottom shelf. Dimensions: 4-ft. wide x 4-ft. high. Saxton No. 500
Retail value, approx. \$1000.00
CHOICE OF WIRE PRODUCTS MAY EFFECT DISTRIBUTOR COST.

Saxton No. 8000

WINDOW-PAKS

*Special purpose cable

Saxton Window-Paks have made it feasible and profitable to move wire up front with other prime, fast-moving merchandise. Ideal for every serviceman, technician, engineer, student and "ham", Window-Paks are designed to keep wire tangle-free and clean—ready for immediate use. Over fifty constructions are listed here, for every requirement.

SAXTON SPECIAL PRODUCT SECTION

SHIELDED 300-OHM TWIN LEAD

Saxton No. 1118—Each conductor #20AWG. Features abrasion-proof Vinyl jacket. Delivers noise-free signal on FM, FM Multiplex, TV. Also available in 72-ohm type.

100-ft. coil **\$9.95**
1000-ft. spool **\$86.93**

CORROSION AND
CHEMICAL RESISTANT

"SEACOASTER" TV & FM TWIN LEAD

Designed to resist air-borne corrosives and chemical reactions. 300-ohm 20 gauge (7 x 28) copper conductors encased in low loss PE foam and tough, brown outer jacket.

Saxton No. 1017—100-ft. coil **\$4.49**
Saxton No. 1017—1000-ft. spool **\$44.63**

TELEPHONE WIRE

Saxton No. TW-199—2-conductor, stranded for indoor or outdoor use.

100-ft. coil **\$2.09**

HEAVY DUTY SHIELDED IGNITION WIRE

Saxton No. 1S98—For ham or CB applications. Reduces noise.

15-ft. coil **\$1.25**

DISPENSER-PACKAGED TRANSMISSION LINE

FINEST QUALITY "LIFELINE" SERIES

Tangle-free,
dust-proof,
economical
packages

SPECIAL DISPENSER PACKAGE

LIFELINE TWIN LEAD

Full size, heavy duty deluxe twin lead constructed of the finest materials. Chemically protected against deterioration. In Magic Dispenser.

Saxton LTL (100-ft.), **\$2.95**
Brown
Saxton LTL (100-ft.), **3.49**
Clear

LIFELINE "100" ROTOR CABLE

Extra heavy duty 4-conductor rotor cable. Superior quality. One leg polarized for easy reference. Sold in exclusive Magic dispenser carton.

Saxton L4FC (100-ft.), **\$3.59**
Brown

ECONOMY TWIN LEAD

Fine quality twin lead constructed of 55 mil dia. with 7 strand, 22-ga. copper wire.

Saxton ETL (100-ft. Dispenser Pkg.) - Brown, **\$1.89**

Saxton ETL (100-ft. Dispenser Pkg.) Clear, **2.19**

LOW LOSS UHF LIFELINE TUBULAR TWIN LEAD

Heavy duty brown PE designed for UHF use. 20-gauge.

Saxton No. TTL (100-ft. coil) **\$2.95**
Saxton No. TTL1M (1000-ft. coil) **\$23.50**

LOW LOSS LIFELINE "SPONGEE" TWIN LEAD

Designed especially for UHF, "Spongee" provides stronger signals on VHF. 300-ohm 20-ga. stranded copper conductors encased in porous, low loss PE foam. Low cost economy type available on special request.

Saxton No. 1016/100 (100-ft. coil) **\$3.59**
Saxton No. 1016/1M (1000-ft. spool) **\$34.50**

6-PAK TAPE STORAGE CASE

Sturdily constructed, indexed Tape Storage Case designed for bookshelf. Compartmented to accommodate six 7-inch reels, boxes and cans. Covered with attractive simulated leather. Saxton No. RT-706 ea. **99c**
Complete unit. Includes above Case plus six Saxton No. 1231 Tape Cans. Saxton No. RT-707 **\$2.89**

TAPE REELS

5" and 7" warp-proof, clear Polystyrene reels, individually boxed.

Saxton No. TR-5 **39c ea.**
5-inch
Saxton No. TR-7 **49c ea.**
7-inch

Film & Recording Tape STORAGE CHEST

Saxton No. 1230—Complete with 12 Swivel-locked, dust-proof storage cans. Insures moisture and dust-free storage of valuable tape and film. Attractive indexed storage chest. High-impact Styrene containers accommodate 5" and 7" tape or 8mm film **\$4.98**

Saxton No. 1231—Individual containers, each **49c**

INSULATORS & BLOCKS

Saxton No. 1154 **10c ea.**
Net Price

Doublet type antenna insulator, white glazed. Excellent electrical characteristics, high tensile strength. Dim. 4 1/2" x 2 3/4". Saxton No. 1155 **32c**

Airplane type "egg" insulator. Low air resistance, high tensile strength, white porcelain glaze. 2" long. Saxton No. 1156 **10c**

Transposition block with porcelain glaze finish. Use with many types of doublet antennae. Saxton No. 1157 **32c**

SAXTON SPECIAL PRODUCT SECTION

DELAYED ACTION • COMMERCIAL SAFETY SWITCH

Switch "off" and the lamp goes out SIXTY SECONDS LATER! Allows sufficient time to reach destination SAFELY. Replaces present wall switch in seconds. Ideal for Home, Farm or Cottage. Fully guaranteed and UL Approved.

Saxton No. S560 (Ivory) or
Saxton No. S561 (Brown) **\$2.98**

PATIO SPEAKER BAFFLE

Made of unbreakable, high impact styrene. Mahogany color only. Complete with hardware and mounting instructions. Use as 6" x 9" speaker for paging, monitoring, as patio and stereo extensions, or as extension speaker anywhere. **\$2.98**

6" x 9" SPEAKER—Complete with volume control and knob, baffle and instructions
Saxton No. B1206 **\$4.98**

SHORT-WAVE ANTENNA KITS

Designed for efficient operation with all receivers.

Saxton No. 4300—Short-wave kit includes 66' heavy duty antenna wire; one transposition block; 50' heavy duty twisted lead cable; two insulators; two window straps and two nail knobs **\$4.98**

ALL KITS INCLUDE COMPLETE INSTRUCTIONS
SEE SAXTON PAGE 9 FOR STANDARD AND DELUXE KITS

"UNI-GRIP" UNIVERSAL TV KNOB

REPLACES THOUSANDS OF LOST, OBSOLETE OR UNAVAILABLE TV KNOBS

New "UNI-GRIP" universal TV knob fits more than 90% of all TV sets! Accommodates all half-round, flat or double-slotted shafts. Choice of two types for protruding or recessed tuner shafts. EASILY INSTALLED! Sets include 2 keys and 2 skirts for channel selector and on-off volume control.

Saxton No. UK-S1 (short shaft, UHF) \$3.95
Saxton No. UK-S2 (short shaft, VHF) 3.95
Saxton No. UK-L1 (long shaft, UHF) 3.95
Saxton No. UK-L2 (long shaft, VHF) 3.95

"MITY-AMP" 2-WATT AUDIO AMPLIFIER

MA-100 • **9.95**

MA-101—2.5 Watt "Mity-Amp". Dim.: 2 1/2" L x 1 3/4" W x 1 1/2" D **\$11.95**

OTHER AMPLIFIER TYPES AVAILABLE

COMPLETELY EPOXY ENCAPSULATED MODULE

Shock-proof • Water & Moisture-proof • Dirt & Dust-proof

FEATURES

- * SPACE-SAVING—2" x 3 1/2" x 7/8"
- * HI-FI AMPLIFIER—20 cy. to 15KC $\pm$ db at 1-watt level
- * LIGHTWEIGHT—Weighs total of 6 ounces
- * RUGGED—Unconditionally guaranteed. Shock, moisture and dust-proof
- * EASY TO INSTALL & USE—Hooked up in minutes. Simple instructions make unit functional immediately.
- * ECONOMICAL—Low in price, big in performance. Long, trouble-free life. Total power requirement 6 or 12 volts.
- * PORTABLE—Operates on auto or boat battery
- * VERSATILE—Uses limited only by your ingenuity. Ideal for p. a. system, phono amplifier, stereo, intercom, signal tracer, modulation, tape monitor, etc.

SPECIFICATIONS

1. INPUT VOLTAGE REQUIRED TO DRIVE FULL POWER—5 Volts
2. POWER REQUIREMENTS—6 to 12 volts at 300 to 700 ma. Current determined by speaker voice coil impedance.
3. FREQUENCY RESPONSE—20 cy. to 15 KC $\pm$ 2 db at 1 watt level.
4. INPUT IMPEDANCE—45 ohms to 50K ohms.
5. OUTPUT IMPEDANCE—3.2 to 45 ohms.
6. WEIGHT—Six ounces.
7. OVERALL SIZE—2" x 3 1/2" x 7/8".
8. HIGHLY SHOCKPROOF—Unaffected by dust, dirt or moisture. Operable under water.
9. GUARANTEED AGAINST DEFECTS.

TV ANTENNA MATCHING BALUN COILS

Efficiently matches 72 to 150 ohms; 72 to 450 ohms; 150 to 300 ohms; 150 to 450 ohms; 300 to 450 ohms and 75 to 300 ohms. Eliminates standing waves. Use as set coupler, impedance transformer or for line matching, etc. Instructions included. Available in bulk.
Saxton No. 1121 pair, **99c**

FLOATING GUY RINGS

Cast aluminum, two-piece floating guy ring. Fits most masts up to 1 1/2" dia. Individually packed, complete with hardware, in plastic bags.
Saxton No. 1099 **74c**

Heavy Duty Super Guy Wire and MESSENGER CABLE

Super flexible (49-strand wire rope), galvanized steel wire. 2100-lb. breaking strength. Has clear vinyl jacket. Ideal for tiller or boat rudder cable.
Saxton No. 5112—
(100-ft. coil) **\$7.25**

FIBRE GLASS GUY LINE

Non-radiating, non-absorbing, high-strength "wireless" guy wire in vinyl jacket. 500-lb test strength. 100-ft. coil.
Saxton No. 7000 **\$2.19**

SUPER-STRONG FIBRE GLASS GUY WIRE

Same as above but in grey vinyl jacket. 1000-lb tensile strength. 100-ft. coil.
Saxton No. 7002 **\$4.24**

INSULATING TUBING

WALSCO INSULATING TUBING OF TEFLON

TEFLON "spaghetti" has unsurpassed electrical and mechanical qualities. Withstands temperatures from 450° below zero F. to 500° above zero F. Will not melt near solder joints. Outstanding dielectric properties—zero moisture absorption. Chemically inert. Completely weatherproof. A big feature is the low co-efficient of friction.

Std. Pack 10' and 5' Spools: 12 * BULK PRICES QUOTED ON REQUEST
Std. Pack 100' Spools: 1

WALSCO RAYOFLEX

For the serviceman and industrial user of insulated tubing, Rayoflex combines the mechanical strength of fiberglass with the protective properties of synthetic lacquer to produce a tough, rugged insulating tubing. Rayoflex is more flexible and less affected by aging than conventional varnished tubing. Rayoflex is smooth inside and out making the insertion of wires, etc., very easy. Has a dielectric strength of 4,000 to 5,000 volts. Meets MIL-I-3190. Sizes up to #6 are packed on a handy spool.

Net per spool \$.82

Cat. No.	Size B&S Gauge No.	Approx. I.D. Inches	mm	Quantity Per Spool
630-(color)	18	.042	1	10 ft.
631-(color)	15	.059	1.5	8 ft.
632-(color)	12	.085	2	8 ft.
633-(color)	9	.118	3	5 ft.
634-(color)	6	.166	4	5 ft.

AVAILABLE IN BLACK, RED, BLUE and YELLOW COLORS. To specify COLOR add suffix to above catalog number as follows: -R3 for Black, -R4 for Red, -R5 for Blue, -R6 for Yellow. Example: — 630-R3 is 18 gauge, Black.

WALSCO FLEXITUBE

Walsco Flexitube is the ideal supplemental insulation for most electronic and electrical applications. Flexitube is impervious to water, oil, alcohol, most acids and alkalis. Has an outstanding dielectric strength of 15,000 volts (average) before breakdown. Is not affected by temperature extremes.

Net per spool \$.82

Cat. No.	Size B&S Gauge No.	Approx. I.D. Inches	mm	Quantity Per Spool
600-(color)	18	.042	1	20 ft.
601-(color)	16	.053	1.4	20 ft.

NO MORE HUNTING THROUGH PILES OF LITERATURE OR SMALL CATALOGS

1728 pages illustrate and describe every product you'll ever need for buying, specifying, designing, servicing, kit building, experimenting — anything that you do in the field of electronics. And, it's all in one big catalog. No need to look through piles of literature or go from small catalog to small catalog. The MASTER has more information on each product and contains more products than any other electronic catalog. The MASTER answers these questions:

*What product best fills my needs?
What does it look like?
How does it compare?
Who makes it?
What does it cost?*

the 1965 MASTER helps engineers, servicemen, buyers, hobbyists

- 1 Saves "shopping" time — no looking from catalog to catalog, no wading through piles of literature for the product you want. It's all in The MASTER.
- 2 Aids in selecting the right product to do the job best — comparison of specs, features, prices of many makes of similar type products is simplified. All similar products in same product section.
- 3 Leads to extra service income — in addition to radio-TV products, The MASTER describes in detail thousands of products for profitable hi-fi, sound and industrial servicing.
- 4 Includes new items indispensable in servicing — new sub-miniature and printed circuit components, new color TV and hi-fi test instruments.
- 5 Increases profits for service technicians — buy and sell direct from The MASTER. It contains prices.
- 6 Guides radio amateurs — select the best equipment to get the most out of your hobby, shows latest SSB, mobile and CB gear.
- 7 Spells better kit building for experimenters — it contains thousands of useful items not contained in smaller, incomplete catalogs.
- 8 Short-cuts delivery time — products shown in The MASTER are available from local distributors — just a phone call away.
- 9 Saves design time — the product you are looking for is illustrated and completely described with specifications and prices.
- 10 Saves buying time — truly an electronics supermarket, so great a variety, so detailed, you can purchase directly from its pages.
- 11 Cuts production costs — the widest selection helps you locate standard items that meet your requirements. Eliminates need to order a custom item.
- 12 Keeps production lines moving — get that much needed product that's holding up production, from your local distributor's stock.
- 13 Eliminates errors in buying — The MASTER makes an excellent common reference when you are ordering from distributors by phone or mail.
- 14 Makes it easy to find the product you want immediately — 32 product sections thoroughly indexed makes the world's biggest electronic catalog also the easiest to use.

**the largest,
most authoritative catalog
of electronic products
sold through distributors**
